Servian Orthodox, 840,627; Roman Catholic, 442,707; Evangelical, 6,337; Greek Catholic, 8,136; Jews, 12,169; There was an increase in 1910 of 329,952 — the — of 1895, or 21·04.

The nationality is Croato-Servian, only in the greater towns there are Spanish Jews, and here and there gipsies and colonists of different nationality. The most populous towns are the capital, Sarajevo, with 51,919; Mostar, 16,392; Banjaluka, 14,800; and Tuzla, 11,338 (1910).

In 1911, number of births (living) 76,693; (dead) 218; number of deaths, 49,622; net increase 27,071.

Instruction.—In 1910 there were 11 gymnasias, 2 *Realschulen*, 1 military college, 11 advanced schools for girls, 9 commercial schools, 458 elementary schools, 1,241 lower and 1 reformed Mohammedan schools, 1 Servian Orthodox, and 1 Roman Catholic seminary for priests, 41 Mohammedan schools for higher religious instruction, 3 training colleges for teachers, and 1 college for Mohammedan judges. Technical and industrial schools exist in most of the larger towns, and in the village schools the teaching of practical agriculture has been introduced. Education is free, and under certain circumstances compulsory.

Justice.—There is an upper court of justice in Sarajevo, the 6 district (Kreis) courts and 52 county (Bezirk) courts of first instance. In every district court (Kreisgericht) and county court (Bezirksgericht) there are 11 judges taken from the people to advise the judge in criminal causes.

Finance.—For the administration of Bosnia and Herzegovina the revenue and expenditure were estimated at 3,313,989*l.* in 1911, and 3,520,790*l.* in 1912.

The chief items of revenue in 1912 were receipts from tobacco (758,167*l.*), railways (481,500*l.*); and those of expenditure in 1912 were for railways (631,667*l.*), the service of navy (323,668*l.*) and troops (298,656*l.*).

Production and Industry.—The agricultural population in 1910 numbered 1,668,587 or 87·9 per cent. of the whole, but agriculture is still in a low state of development, though the soil is very fertile. Forest land occupies 49·8 per cent. of the whole. Tobacco, an important crop, is a Government monopoly. In 1911, 3,000 metric tons of tobacco (value, 3,853,693 crowns; 1*l.* = 12*s.*), were exported. Maize, wheat, barley, oats, rye, millet and buckwheat, potatoes, flax, and hemp, are cultivated. Both provinces have superabundance of fruit. In 1911 about 13,000 tons of dried plums and marmalade were exported, valued at 5,635,083 crowns.

The vine is grown, but the wine produced is of indifferent quality; the wine exported in 1910 was of the value of 344,381 crowns. Sugar-beet is cultivated, and there is a sugar factory at Usora, near Doboj. Silk-culture has been introduced. Timber was exported in 1910 to the value of 30,672,475 crowns. Cattle-grazing and sheep-farming are important; cattle were exported in 1910 to the number of 121,382; horses, 12,578; sheep, 68,892; goats, 46,868. Hides are not exported, but sheep-skins and goat-skins are sent in large quantities to Great Britain and the United States, as well as to Hungary; lamb-skins are exported to France. In Bosnia and Herzegovina in 1910 there were 221,971 horses, 1,308,930 cattle, 1,393,068 goats, 2,499,422 sheep, and 527,270 swine. Towards the agricultural development of the country Government gives assistance in many ways, by instruction, by importing horses, cattle, sheep, and poultry of superior breed, by distributing seeds, and by lending agricultural machinery to farmers.

Minerals are abundant; mining is carried on (mainly by the

Government) for iron and copper, manganese, chromium, quicksilver, and coal. In 1910 the output of coal was 706,669 tons, of iron ore 133,332 tons, of manganese 4,000 tons. The miners employed numbered 3,051. The output of metals in 1910 consisted of raw iron, 48,842 tons (8,493,070 crowns) and wrought iron, 27,363 tons, value, 4,367,220 crowns, cast goods, 5,090 tons (1,038,824 crowns). There are salt pits at Tuzla, and a soda factory. In 1910 the output of salt reached 23,579 tons, value 2,617,291 crowns. The petroleum refinery at Bosnian Brijuni has been amalgamated with the alkali works at Lukavac, Tuzla. There are factories for chemicals, sugar, timber, plum drying, matches, and sundry products.

Commerce and Communications. Bosnia and Herzegovina belong to the Austro-Hungarian customs territory, their export to Austria-Hungary and foreign countries in 1910 was estimated at 135,458,446 crowns, and their import at 144,538,617 crowns.

Since 1878 the metric system of weights and measures has been followed side by side with the Turkish system. A law providing for the exclusive application of the metric system after a transition period of five years passed through the Diet in November, 1910, and now only awaits the Imperial sanction.

There were in 1910 1,215 miles of railway. Large railway extensions were authorized by a law of December 3rd, 1912, by which a loan of 270,000,000 crowns (11,250,000 £) is to be raised for the purpose of completing the following lines within six years of the commencement of the work:—New normal gauge lines from Banjaluka to Jajce, Sumac to Doboj, Bugojno to Rama, and from Breko to Tuzla, with a branch to Bijeljina and Raca, a new narrow gauge line from Bugojno to Arzano, and the conversion from narrow to normal gauge of the existing lines from Doboj to Sarajevo, Jajce to Bugojno, Rama to Mostar, and from Doboj to Tuzla.

There were in 1910 2,007 miles of telegraph lines, and 4,582 miles of wire. Offices 173, messages (1910) 711,997. The telephone service had in 1910, 293 miles of line and 966 miles of wire.

In 1910 there were transmitted 23,291,915 letters and postcards, and 8,529,963 packets of printed matter, samples, and newspapers.

Military service is compulsory over 21 years of age. The native troops comprise 11 infantry regiments, 4 battalion cadres of reserve, 11 sections of train, 1 battalion of jagers, with a total of 7,200 men, 11 peace footing.

BELGIUM.

(ROYAUME DE BELGIQUE.)

Reigning King.

Albert, born April 8, 1875, son of the late Prince Philippe de Saxe-Coburg and Gotha and of Flanders (died November 17, 1905), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912); married Oct. 2, 1900, to Princess *de Bavaria*; succeeded his uncle Leopold II., Dec. 17, 1909.

Children of the King.—(1) Prince *Leopold*, born Nov. 3, 1901. (2) Prince *Charles*, born Oct. 10, 1903. (3) Princess *Marie-José*, born Aug. 4, 1906.

Sisters of the King.—(1) Princess *Henriette*, born Nov. 30, 1870; married Feb. 12, 1896, to Prince Emmanuel of Orléans, Duke of Vendôme. (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

Aunt of the King.—Princess *Charlotte*, sister of Leopold II., born June 7, 1840; married July 27, 1857, to Archduke Maximilian of Austria, elected Emperor of Mexico July 10, 1863; widow June 19, 1867.

Daughters of the late King.—(1) Princess *Louise*, daughter of Leopold II. and of Marie Henriette, Archduchess of Austria, born Feb. 18, 1858; married Feb. 4, 1876, to Prince Philip of Saxe-Coburg and Gotha. Marriage dissolved Jan. 15, 1906. (2) Princess *Stéphanie*, daughter of Leopold II. and of Marie Henriette, born May 21, 1864; married to Archduke Rudolf, only son of the Emperor of Austria, May 10, 1881; widow January 30, 1889; married March 22, 1900, to Elemér, Count of Lónyay de Nagy Lónya. (3) Princess *Clémentine*, daughter of Leopold II. and of Marie Henriette, born July 30, 1872, married to Prince Victor Napoleon, Nov. 14, 1910.

King Albert has a civil list of 3,300,000 francs, and the Countess of Flanders has a dotation of 50,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession ~~was~~ decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians ~~on~~ ~~Jan.~~ ~~4,~~ 1831; he ascended the throne July 21, 1831. By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It ~~remained~~ until after the signing ~~of~~ the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King ~~of~~ the Netherlands, that all the ~~States~~ of Europe recognised the Kingdom of Belgium.

Constitution and Government.

According to the Constitution of ~~1831~~ Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power ~~is~~ vested in the King, the Senate, and the Chamber of Representatives. ~~The~~ royal succession is in the direct ~~line~~ ~~in~~ the ~~line~~ of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by ~~the~~ King with the ~~consent~~ of the

two Chambers. No act of the King can have effect unless countersigned by ■■■ of his ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his ■■■■■ with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

The Senate consists of members elected for eight years, partly directly and partly indirectly. Their total number is 120, of whom 27 are elected by the Provincial Councils. The number elected directly ■■■ equal to half the number of members of the Chamber of Representatives, and is proportioned to the population of each province. The constituent body is similar to that which elects deputies to the Chamber, except that the ■■■■■■■■■ of electors is fixed at thirty years. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties ■■■ introduced by Law of December 28, 1899. In 1911-12 the number of electors for the Senate ■■■ 1,460,236, of whom 755,453 had each ■■■ vote, 394,123 two votes, and 310,660 three votes. Senators elected indirectly are chosen by the provincial councils, two for each province with less than 500,000 inhabitants, three for each with ■■■ population up to 1,000,000, and four for each with over 1,000,000. No one, during two years preceding the election, must have been ■■■ member of the council appointing him. All senators must be at least forty years of age, those and elected directly must pay not less than 1,200 francs ■■■ direct taxes, or own immovable property ■■■ Belgium yielding an income of 12,000 francs. In provinces, however, where the number eligible for the Senate would be less than one in 5,000 of population, the list is extended to this proportion by admission of the most highly taxed. Sons of the King or failing these, Belgian princes of the reigning branch of the Royal Family ■■■ by eight Senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 136, ■■■ proportioned to the population, and increased one for every 40,000 inhabitants. They are for four years, ■■■ half retiring every two years, except that after ■■■ dissolution a general election takes place. Every citizen over twenty-five years of age, domiciled for not less than one year ■■■ the ■■■ commune, and not legally disqualified, has a vote. Every citizen over thirty-five years of age with legitimate issue, and paying at least 5 francs a year in house tax, has a supplementary vote, as has also every citizen ■■■ twenty-five years of age owning immovable property to the cadastral value of 2,000 francs, ■■■ having a corresponding cadastral income from such property, or who for two years ■■■ derived at least ■■■ francs a year from Belgian funds either directly or through the Savings Bank. Two supplementary votes are given to citizens ■■■ twenty-five years of age who have received a diploma of higher instruction, or ■■■ certificate of higher secondary instruction, ■■■ who fill ■■■ have filled offices ■■■ engaged in private professional practice, implying ■■■ average higher instruction. No person has ■■■ than 3 votes; failure to vote ■■■ misdemeanour, punishable by law. In 1911-12 the number ■■■ electors for the Chamber was 1,721,755, ■■■ whom 993,483 had ■■■ vote, 404,786 two votes, and 318,486 three ■■■. Deputies must ■■■ not less than twenty-five years of ■■■ and resident in Belgium. Each deputy has an annual indemnity of 4,000 francs (160*l.*), and a free pass ■■■ the year

BELGIUM

Government and Companies' railways between his residence and the place ■■■■■

The Senate and Chamber meet annually in the month of November, and must sit for ■■■■ least forty days; ■■■■ King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously ■■■■ separately. In the latter ■■■■ a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and ■■■■ relating to the contingent for the ■■■■ originate in the Chamber of Representatives.

Senate, 1912 —Catholics, 70, Liberals, 35, Social Democrats, 15. Chamber of Representatives 1912 —Catholics, 101; Liberals, 44, Social Democrats, 39; Christian Socialists, ■■■■

The Executive Government consists of 11 departments, under the following ■■■■ —

President of the Council and Minister of War—Ch de Broqueville
Appointed November 11, 1912

Minister of Science and Art—P. Poulet, June 17, 1911

Minister of Interior—Paul Buryer. Appointed September 5, 1910,

Minister of Finance—M. Lorie. Appointed June 17, 1911

Minister of Agriculture and of Public Works—G. Holleputte, Appointed November 11, 1912

Minister of Foreign Affairs—M. J. Davignon. Appointed May 2, 1907

Minister of Justice—H. Carton de Wiart. Appointed June 17, 1911

Minister of the Colonies—J. Renkin. Appointed October 30, 1908

Minister of Industry, and Labour—M. A. Hubert. Appointed May 2, 1907

Minister of Railways—A. Van de Vyvere. Appointed November 11, 1912

Minister of Marine and of Posts and Telegraphs—P. Segers. Appointed November 11, 1912

Besides the above responsible heads of departments, there ■■■■ a number of 'Ministres d'Etat,' without portfolio, called on special occasions by the sovereign.

The Ministry of Marine ■■■■ created in November, 1912

Local Government.

The provinces and communes (2,629 in 1910) of Belgium have a large amount of autonomous government. The provincial electors ■■■■ the same as ■■■■ who elect the senators directly, the qualifications of the communal electors are also the ■■■■ except that these must have been domiciled ■■■■ least three years in ■■■■ and a supplementary vote ■■■■ owners of real property yielding an ■■■■ of at least 150 francs. No ■■■■ more ■■■■ 4 votes. In ■■■■ with over 20,000 inhabitants there ■■■■ councillors elected directly, by single vote, by citizens enrolled on the communal electoral lists, and ■■■■ the qualifications requisite for electors to the Councils of Industry and Labour, half ■■■■ councillors ■■■■ appointed by the working ■■■■ electors, ■■■■ half by ■■■■ electors who ■■■■ industrial heads (chefs d'industrie). In communal elections vote by ballot ■■■■ suppressed, except when ■■■■ a single mandate to be conferred. Candidates ■■■■ an absolute majority ■■■■ declared elected, others have seats allocated ■■■■ accordance with the system of "Proportional Representation." In the year 1911-12 there were 1,460,236 provincial, and 1,820,074

communal electors. To be eligible to the Provincial or Communal Council, persons must be twenty-five years of age and domiciled in the province or commune. The Provincial Council is renewed every four years, and it meets fifteen days each year. There is a permanent deputation of six members elected, which is presided over by the Governor of the province. All provincial and communal interests, including local finances, are under the control of the Council, as far as they are not provided for in the general administration. The Communal Councils are elected for eight years, half being renewed every four years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding almost to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

Area and Population

Belgium has an area of 29,451 square kilometres, or 11,373 English square miles. The following table shows the population in various years:—

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1846	4,827,833	298,372	·65	1890	6,069,321	549,312	·99
1876	5,336,185	508,352	1·05	1900	6,693,543	624,227	1·03
1880	5,520,009	183,824	·85	1910	7,423,784	730,236	1·09

Area and population of provinces:

Provinces	Area: Eng. sq. miles	Population		Population per sq. mile, 1911
		Census Dec. 31, 1910	Estimated Dec. 31, 1911	
Antwerp (Anvers)	1,093	968,677	937,201	857
Brabant	1,268	1,469,677	1,494,416	1,158
Flanders	West	874,135	878,417	699
	East	1,190,335	1,125,814	967

Luxembourg	1,706	231,215	231,814	135
Namur	1,414	326,846	363,449	257
Total	11,373	7,423,784	7,490,411	652

In 1910 there were 3,680,790 males and 3,742,994 females, or 98 males for every 100 females. Of the population in 1900 (exclusive of children under 2 years of age), 2,574,805 spoke French only, 2,822,005 Flemish only, 28,314 German only, 801,587 French and Flemish, 66,447 French and German, 7,238 Flemish and German, and 42,889 spoke all three languages. Civil condition of the population in 1910:—

	Unmarried	Married	Widowed	
Males	2,047,607	1,145,774	127,014	3,499
Females	1,963,383	1,143,483	352,202	4,646

In 1900 there were 206,061 foreigners (99,119 males and 106,942 females) in Belgium. Of these 63,923 were Dutch, 56,576 French, 53,578 German, 10,417 Luxembourgish, 5,748 British, 3,543 Italian, 2,991 Austro-Hungarian, 2,351 Russian, 2,231 Swiss, and 4,523 of other nationalities.

Returns for 1900 according to occupation, a certain number being tabulated under "other" than "head" :—

	Males	Females	Total
Mining and metal industries	367,436	17,839	385,275
Industries connected with vegetable products	260,551	45,699	306,250
Industries connected with animal products	43,178	14,895	58,073
Mixed industries	376,363	244,290	622,653
Commerce	248,336	136,900	385,236
Professions and official occupations	546,866	169,698	716,564
Various occupations and independent	472,039	354,064	826,103
Total	2,316,763	983,885	3,300,648
Without profession	1,201,762	2,420,483	3,622,245
Grand total	3,518,525	3,403,870	6,922,395

The number employed in agriculture, gardening, &c., is put at 449,802 (341,638 men and 108,249 women).

Births, deaths, and marriages :—

Year	Total Living Births	Still born	Illegitimate (Living)	Illegitimate per 100 Births	Deaths	Marriages	Surplus of Births over Deaths
1900	186,271	8,504	11,933	6.41	118,884	58,388	67,387
1907	185,198	8,311	12,004	6.43	115,347	58,660	69,791
1908	183,834	8,563	11,326	6.16	121,964	57,564	61,870
1909	178,431	8,269	10,832	6.15	117,571	57,126	60,855
1910	176,418	8,008	10,837	6.14	112,826	58,776	63,587

Divorces : 1906, 1,000 ; 1907, 841 ; 1908, 892 ; 1909, 1,039 ; 1910, 1,088.

The following table shows the immigration and emigration :—

	1905	1906	1907	1908	1909

Mechlin (Malines)	58,191	Tournai	37,108	Mons	27,904
		Courtrai	36,872	Charleroy	28,891

¹ The suburbs comprise 8 distinct municipalities.

Religion.

Of the inhabitants professing a religion the majority are Roman Catholic. But no inquiry on the profession of faith is made at the censuses, and therefore, the last available figures, those of 1891, are the only clue to the numbers of the three dominant faiths. According to these there were:—Protestants and Anglicans 27,900; Jews, 13,200. There are, however, statistics concerning the clergy, and according to these there were in 1912:—Roman Catholic higher clergy 85; inferior clergy, 5,635; Protestant pastors, 14; Jews (rabbi and ministers) 14. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury; this amounted, in 1912, to 7,289,600 francs to Roman Catholics; 107,000 francs to Protestants; and 29,200 francs to Jews; subsidies for buildings devoted to Protestant and Jewish religious services, 10,000 francs. There are few endowments.

In 1910, there were six Roman Catholic dioceses, 190 deaneries, 6,443 Catholic churches and chapels, 6 large and 11 small seminaries. In 1900 there were 2,474 convents, of which, 291, with 6,237 inmates, were for men, and 2,183, with 81,668 inmates, for women.

The Protestant (Evangelical) Church is under a synod.

Instruction.

Of the four universities, Ghent and Liège are State, Brussels and Louvain free.

Universities 1910-11	Students of				
	Theology	Jurisprudence	Philosophy	Medicine	Sciences
Brussels	—	200	150	300	267
Ghent	—	179	35	148	11
Liège	—	430	209	226	—
Louvain	98	608	—	556	—

Attached to the universities are various special technical schools, 2,694 students in 1910-11. There are 6 commercial high schools; the Royal Academy of Fine Arts at Antwerp, 716 students in 1910; 11 schools of design, 17,108 students; royal conservatoires and other schools of music, 20,920 students in 1910. Public schools, 1910:—

	No.	Pupils		No.	Pupils

National liabilities on January 1, 1912 .-

Netherlands 1911	per cent	218,959,632
Loans 1911	per cent.	3,514,394,406
Total		3,734,354,038 (148,188,652L.)

Almost the entire debt was raised and devoted to works of public utility. It is a sinking fund for all descriptions of debt, except the

2½ per cent. ■■ debt. The debt charge amounted to 125,954,858 francs (4,998,208½) in 1912.

The total debt amounts to about 498 francs per head, and the annual charge to about 16½ francs per head; but the interest is ■■■ than covered by the ■■■■ from railways alone. The total exports of home produce in 1911 ■■■ 478 francs per head.

Local Finance.

In 1911 the total revenue for ■■ the provinces ■■ 31,566,258 francs, expenditure 26,872,836 francs; provincial debts, 1910, 35,563,988 francs.

Defence.

Maritime frontier, ■■ miles; Dutch frontier, north and east, ■■ miles; German frontier, in the east, 60 miles; Luxembourg frontier, in the east, ■■ miles; French frontier, south and west, ■■ miles. The chief military arsenal of the kingdom is Antwerp, the fortifications of which, designed to shelter the whole army in case of need, are now being remodelled at enormous cost. There are also fortifications at Liège, Huy, and Namur ■■ the Meuse, where there is a strong line of defences.

The Belgian army was till recently recruited partly by voluntary enlistment and partly by conscription of the old type with many exemptions, but in December, 1909, ■■ law was passed substituting "personal service" for conscription with substitution, and greatly reducing the number of exemptions. Voluntary enlistment is retained (for those who desire to make the army ■■ profession), first engagements being for 5, 4, ■■ three years, according to whether the recruits is 16, 17, 18, or over 18 on enlistment. The young ■■ of the contingent (compulsory recruits ■■ for 1 year and 8 months in the infantry, 1 year and 10 months in the garrison artillery and engineers, 2 years and ■■ months in the field artillery, and ■■ years in the cavalry. These terms will however be reduced, after 1912, to 15 months in the case of the infantry, engineers, and garrison artillery, 1 year and nine months in the case of the field artillery, and 2 years in the cavalry.

The total length of service is ■■ years in the first line, or "active army," and ■■ years in the second line, or reserve force. The first line reservists will be liable to be called up for training for 4, 6, ■■ ■■ weeks, according to the arm to which they belong, in the 2nd, 3rd, or 4th years of service, and the training period may be divided between the two years.

The authorised peace strength of the Belgian army ■■ 42,800 (exclusive of officers), and the number of ■■ men available in war, including depôts, should be about 180,000; but the actual peace strength in 1910 was only about 41,000.

The field army consists of ■■ divisions, and 2 cavalry divisions. The former are composed of two brigades of infantry (each consisting of two regiments of ■■ battalions), a brigade of artillery (12 ■■ batteries of ■■ guns each), ■■ battalion of carabineers, ■■ company of cyclists, ■■ squadron of gendarmes, ■■ company of engineers, &c. The strength of a division ■■ about 22,000 combatants. The cavalry divisions each contain 2 brigades of 2 regiments and ■■ batteries ■■ horse artillery. Strength about 4,000 combatants. The total strength ■■ the ■■ army should be close on 100,000 men, leaving 80,000 for the fortresses and ■■ positions, ■■ included.

■■■ Gendarmerie is ■■ semi-military corps of about 3,500 of all ranks, nearly ■■ of them mounted. ■■ furnishes ■■ squadron to each ■■ as divisional cavalry.

There ■■ ■■ ■■ ■■ Civique of 46,563 officers ■■ ■■ organised on

a military basis, and possessing a large reserve. In time of war it would be employed ■■■ the lines of communication, and would ■■■ in garrisoning the fortresses.

The Belgian infantry is armed with the Mauser rifle. The field artillery ■■■ the shielded Krupp 75 mm gun, calibre 7.5 cm.

Peace establishment of the army in 1912, by arms of the ■■■ —

	Officers	■	■

The military budget of Belgium ■■■ 1912 (effective services only) amounted to 2,594,000/.

The army estimates for 1913 amounted to 81,497,265 francs (3,259,890/.) A portion of the total is assigned for aviation purposes. Belgium has ■■■ navy.

Production ■■■ Industry.

I AGRICULTURE.

In each province there is an official Agricultural Commission, delegates from which, along with specialists, form a supreme council of agriculture.

Of the total area, 2,945,589 hectares, 1,736,174 ■■■ under cultivation, 521,495 under forest, 190,444 fallow or uncultivated, the rest roads, marshes, rivers, &c.

The following figures show the yield of the chief crops for three years —

Crop	Acreage			Product in cwt.		
	1909	1910	1911	■	1910	1911
Wheat	990,680	950,990	977,910	7,521,111	6,667,100	7,828,194

Tobacco	9,445	14,720	9,880	175,831	231,7 1	196,786

1 Tons.

■ average value of the total products of the forests is about 21,653,482 francs.

On December 31, 1909, there were 255,229 horses, 1,856,833 horned cattle, and 1,116,600 pigs.

II. MINING AND METALS AND OTHER INDUSTRIES.

There is a special department of Industry and Labour. There are a Superior Council of Industry, a Council of Mines, and a Council of specialists for advising the State on the interests of various industries.

Of the more important industries the following may be mentioned: artificial silk, motor cars, glass, iron and steel, lace (particularly hand-made lace), linen, and gloves.

1,522 quarries in 1910, workmen 35,711, value of products 66,418,720 francs; workmen engaged in metallic mines; iron ore produced in 1900 247,890 tons, valued at 1,320,100 francs; in 1910, 122,960 tons, valued at 566,260 francs. Coal mines in 1910, 217, of which 135 worked; work-people, 1910, 148,701; 1911, 142,580. Production of coal:—

	1906	1907	1908	1909	1910	1911
Tons (1000)	23,569	23,705	23,558	23,517	23,916	28,125
Value in 1000 fr.	353,472	339,657	308,579	337,906	348,877	

Iron ore, from Luxemburg, was imported to the value of 9,048,809 francs in 1909; 9,224,891 francs in 1910; 8,231,724 francs in 1911.

Pig and manufactured iron produced:—

	1907	1908	1909	1910	1911
Pig iron					
Tons	1,368,075	1,378,290	1,270,050	1,616,370	1,852,090
Value (1,000 fr.)	97,400	104,116	86,883	100,582	120,761
Manufactured iron					
Tons	358,250	358,500	306,650	316,990	299,500
1,000 fr.	53,303	57,708	41,584	45,653	39,494
Steel ingots					
Tons	1,895,140	1,466,715	1,198,000	1,580,850	1,892,160
1,000 fr.	133,110	150,562	107,095	128,950	161,606
Steel rails, &c.					
Tons	1,164,745	1,216,690	989,400	1,264,650	1,334,550
1,000 fr.	169,046	192,964	137,835	157,457	192,220

1911, 2,106,120 metric tons of pig-iron produced, and in 1912, 2,344,910 tons.

In 1910 there were 16 pig-iron works in activity and 2 unemployed; 40 furnaces active; 1 inactive; number of workmen, 4,214. For manufacture of iron, 1910, 36 works active; 1 puddling furnaces; workmen, 10,155; steel works, 25 active, 3 inactive; Martin and other converters, 70; workmen, 16,877; zinc produced, 27; 1911, 198,280 tons, value 119,668,000 francs; workmen, 7,999; lead, 13,464,000 francs; silver lead, 27,754,000 francs; workmen, 1,818.

1910 there were 11 manufactories, produce 271,282 tons of raw sugar; 22 refineries, output 114,658 tons; 125 distilleries, output 71,087 kilolitres of alcohol 50° G.-L.

In 1910 11 fishing vessels caught fish to the value of 6,541,399 francs.

COMMERCE

GENERAL COMMERCE

	Imports	Exports
1910	170,798,440	190,297,120
1911	180,738,920	143,224,000
1912	175,230,000	149,530,000

General imports, 1911, by **■** 3,261,700,000 francs, by land, railway, canals and rivers, 3,544,700,000 francs, exports, by sea, 2,551,500,000 francs, by land, railway, canals and rivers, 3,127,800,000

Imports for home consumption, exports of Belgian origin, and transit trade, in millions of francs -

	1906	1907	1908	1909	1910	1911
Imports	8,068 8	8,140 0	8,773 6	8,827 4	8,704 3	8,365 0
Exports	2,388 8	2,719 8	2,846 1	2,508 4	2,609 7	2,407 4
Transit	1,922 2	2,208 6	2,848 0	3,021 0	2,290 3	2,298 9

The customs receipts amounted, in 1906, to **■** 267,941 francs, in 1907, 277,044 **■** 1908 27,328,988, in 1909, 20,900,545, in 1910, 67,376,134, in 1911, **■** 425,120 (2,617,004) The commercial treaty of 1862 provided for the "most favoured nation" treatment between Great Britain and Belgium. This treaty terminated in 1878, but since then the system in **■** under the treaty has been continued by an arrangement terminable after **■** months' notice.

The amount of revenue collected by **■** of a tariff on imported goods **■** very small, and when compared with the value of **■** entire imports it will be found **■** the **■** duty charged **■** relation **■** the entire imports amounts to less **■** 1 per cent **■** customs tariff is intended **■** a protection to home industries than **■** means of revenue production.

The vessels entered and cleared in 1911 were as follows —

Nationality	Entered		Cleared	
	No.	Tonnage	No.	Tonnage
Belgian	1,959	2,074,930	1,959	2,080,640
British	5,160	7,021,959	5,155	6,991,793
German	1,725	4,042,578	1,728	4,048,815

Internal Communications.

The total length of the roads in Belgium (1911) was as follows :— State roads, 5,072 miles ; provincial roads, 987 miles ; conceded roads, 140 miles ; by-roads, 19,347 miles ; total, 25,446 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1911 was 1,288 miles.

The length of railways (1911) :— State lines, 2,697 miles ; private lines, 218 miles ; light railways, 2,420 miles ; total, 5,335 miles. Under construction, 464 miles.

Passengers conveyed by State railways in 1911, 180,840,189, by companies 18,049,567. Gross receipts 1911 for the State 318,872,749 francs ; for companies 93,909,926 francs ; expenses for the State 210,645,039 francs ; for the companies 14,151,463 francs. The first cost of State railways to end of 1911, 2,624,458,916 francs ; net receipts 2,854,876,425 francs ; financial charges 2,790,909,215 francs.

The work of the Post Office in Belgium in four years was as follows :—

	1908	1909	1910	1911
Private letters . . .	182,546,179	193,820,497	208,693,675	218,176,673
Letters	85,194,749	95,473,873	93,091,149	87,392,456
Post-cards	105,056,568	112,601,424	119,736,212	123,255,448
Printed matter . . .	207,562,821	220,865,628	246,988,121	251,797,474
Newspapers	155,721,476	160,521,278	171,964,993	180,198,608

On December 31, 1911, there were 1,658 post offices in Belgium. The gross revenue of the Post Office in the year 1911 amounted to 40,774,771 francs, and the expenditure to 22,182,110 francs.

The telegraphs in Belgium carried 22,084,097⁽¹⁾ despatches, private and official, in the year 1911. In 1911 the total length of public telegraph lines was 4,774 miles, and the length of wires 25,834 miles, exclusive of railways and canal telegraphs. There were in 1911, 1,659 telegraph offices. Receipts in 1911 (telegraphs and telephones), 19,252,911 francs, expenses (telegraphs and telephones), 16,074,468 francs.

In 1911 there were 118 urban telephone systems with 144,835 miles of wire, and the inter-urban systems 18,290 miles of wire; total number of conversations 121,951,280 in 1911.

Money and Credit.

No gold has been minted since 1862, and no silver franc pieces since 1878.

The bank of Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1905. Its capital and reserves amounted in 1911 to 89,622,440 francs. It is the cashier of the State, and is authorised to carry out the usual banking operations. Its situation in 1911, was—

	1900 francs
Cash in hand	246,707
Note circulation	969,768
Accounts current, creditors	133,541
Portfolio (commercial)	745,882
Advances on public funds	90,814

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks. The following are statistics of the State savings-banks—

Year	Offices	Depositors	Amount of Deposits at end of year	Year	Offices	Depositors	Amount of Deposits at end of year
			Francs				
1901	1,089	2,418,710	812,092,023		1,206	2,710,112	930,145,084
1907	1,137	2,538,207	847,791,835	1910	1,217	2,808,777	
1908	1,160	2,684,891	886,240,741	1911	1,266	2,901,793	

Money, Weights, and Measures.

The franc is the unit of currency. Par value 25·22½ to sterling. Belgium belongs to the Latin Monetary Union. The weights and measures are those of the metric system.

Diplomatic Representatives.

1. OF BELGIUM IN GREAT BRITAIN.

Envoy Minister—Count de Lelaing: appointed May 30, 1911.

Councillor of Legation.—E. de Prelle de la Nieppe.

First Secretary of Legation.—G. Ramaix.

Consul-General—London.—M. E. Pollet.

There are Consular representatives of Belgium in the following towns:—

Aberdeen, Arbroath, Belfast, Berwick, Birmingham, Bradford, Bristol, Cardiff, Cowes, Dartmouth, Dover, Dublin, Dundee, Edinburgh, Falmouth

(1) Including 14,379,250 telegrams in the administration of the railway system.

Glasgow, Goole, Grimsby, Guernsey, Harwich, Hull, Leith, Leeds, Limerick, Liverpool, London, Manchester, Middlesbrough, Milford-Haven, Newcastle, Plymouth, Portsmouth, Queenstown, Ramsgate, Sheffield, Southampton, Sunderland, Swansea, Yarmouth, and other places.

OF GREAT BRITAIN IN BELGIUM

Envoy and Minister—Hon. Sir H. Villiers, G. C. V. O., K. C. M. G., C. B., appointed September, 1911.

Secretaries—H. A. G. Watson and I. W. R. Mackay.

Military Attache—Lt. Col. G. T. M. Bridges.

Naval Attache—Captain Howard Kelly.

There is a Consul General and three Vice-Consuls at Antwerp and Vice-Consuls at Bruges, Brussels, Charleroi, Ghent, Liege, Ostend, and Spa.

BELGIAN

(CONGO BELGE)

Constitution and Government The Congo Independent State founded in 1882 by Leopold II, King of the Belgians, and the State was placed under his sovereignty, but its perpetual neutrality, in accordance with the provision of Chapter III of the General Act of Berlin (1885), was guaranteed [Concerning this Act, see STATESMAN'S YEAR BOOK for 1908—p. 874.]

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the Chambers of the Belgian Legislature in August and by the King in October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 14 members, 11 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chamber retire annually, but may be reappointed. The King is represented in the Colony by a Governor General, assisted by several Vice-Governors General. The budget is presented annually to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers along with the budget.

The Annexation has up to date been recognized by all the Powers with exception of Great Britain.

The Belgian Minister for the Colonies in October 1907 introduced his scheme of reform in the Congo. The natives would be granted the right to take the produce of the soil in the Domain. This would be accomplished in three stages. Since July 1, 1910 the Lower Congo, Middle Congo, Ubangi, Bangala, Kwango, Kasai, Katanga, the southern portion of the Eastern Province, Aruwimi, and the banks of the river as far as Stanleyville are open to freedom of trade. On July 1, 1911 the Domain of the Crown, and on July 1, 1912 the whole district would also be thrown open. Furthermore the Government would levy taxes in money, and the system of the provisioning of the agents would be abolished. (See map among the introductory matter of the YEAR BOOK for 1910.) In March 1910, various decrees ameliorating the condition of affairs were voted by the Colonial Council regulating taxation, abolishing the exploitation of Domain land by the State in July, 1912 and abolishing the powers of the Comité Spécial de Katanga.

Governor General—F. Iuché (appointed May 25, 1912)

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The territory is divided into twenty-two administrative districts (March 28, 1912)—Lower Congo, Middle Congo, Kwango, Lake Leopold II, Equator, Lulonga, Bangala, Ubangi, Lower Uele, Upper Uele, Ituri, Stanleyville, Aruwimi, Lower Kivu, Manikema, Sankuru, Kasai, Lomami, Tanganyika, Moero, Lulua, and Upper Luapula. The last four districts form the sub-government of Katanga, with its capital at Elisabethville; the other eighteen districts forming the government general of Belgian Congo, with Boma as its capital. At the head of each district there is a District Commissioner. In 1911 there were, altogether about 350 posts and stations at which 1,987 European Government agents officiated.

Area and Population.—The area of the Colony is estimated at 909,654 square miles, with a population of Bantu origin officially estimated at 15 millions. Sir H. Johnston's estimate is 15½ millions, and another estimate is 9 millions. The European population in January, 1911, numbered

4,003 Of these, 2,432 were Belgian, 111 English, 197 Portuguese, 11 Swedish, 43 Norwegian, 11 French, 11 American, 215 Italian, 24 Danish, 64 German, 121 Dutch, 72 Swiss, 11 Russian, 19 Austrian, 10 Greeks, 35 from Luxembourg, and 29 others

The native languages comprise many dialects, every tribe having its own Kikwaha is the language spoken by the natives who have been under Arab influence Bangala is the commercial language in the upper Congo, Kikwa is used in the lower Congo The religion of the natives consists of gross fetishism, but work is actively carried on There are 138 mission stations, with 571 missionaries, of whom 350 are Catholic and 221 Protestant In education they cooperate with the Government, which has formed colonies where children are collected and taught

Finance In 1911, the revenue was 40,501,700 francs, and the expenditure 59,012,728 francs, in 1912, 45,377,639 francs and 66,538,970 francs respectively

For 1913 the receipts and expenditure were estimated as follows—

Receipts	Francs	Expenditure	Francs
Customs	5,911,000	Interest	71,000
Direct taxes	10,141,000	Finance	5,124,000
Transports &c	75,000	Instruction &c	1,100
Taxes on land	2,500,000	Justice &c	3,400
Mines	1,500,000	Industrial &c	14,400
Various	6,000,000	Culture	1,400
Timber tax	9,000,000	Various	1,400
Posts and telegraphs	40,000		
		Total ordinary	10,934,000
		extraordinary	1,024,000
Total	40,415,000	Total	11,958,000
	(1,167,000)		(1,167,000)

The debt contracted at various dates is given as follows Under decree of February 7, 1888, authorising the issue of bonds amounting to a nominal capital of 150,000,000 francs, the amount of 97,262,000 francs was issued, under decrees of October 17, 1896, and June 14, 1898, 14,000,000 francs (nominal capital) was issued at 1 per cent interest, on July 5, 1887, bonds were created and delivered to the members and subscribers of the late "Comite d'Etudes du Haut Congo," amounting to 122,200 francs yielding interest at 2½ per cent from January 1, 1900

In October, 1901, a loan of 50,000,000 francs, at 1 per cent interest, was issued for the purpose of public works, including railways A decree of February 1, 1904, authorised the creation of bonds to bearer of the public debt for a nominal capital of 30,000,000 francs at 1 per cent interest Emprunt 1906, 1 per cent de 150,000 francs 1st instalment 10,000,000 francs, a second of 10,000,000 francs to be issued in December or January 1910, and a third instalment of 10,000,000 francs was issued on May 19, 1911 Loan, 1 per cent, 1909 6,800,000 francs The total public debt of the Belgian Congo amounts (1912) to 278,747,200 francs (1,149,886l)

—The Colony possesses a force of native troops amounting to 18,000 men They are all infantry and are organised in 11 independent companies The force is recruited by conscription and volunteering, the annual contingent being 3,375 in 1912 The officers (182) and 254

non commissioned officers, are Europeans, for the most part Belgians. The term of service is seven years, and the recruits are trained in camps of instruction before being drafted to their companies.

Justice.—There are 7 courts of first instance, 12 county courts and 2 courts of appeal (one at Boma and the other at Elizabethville). There are altogether 77 magistrates in the Congo.

Production, Commerce, Shipping.—The four chief products in the order of their importance are rubber, palm nuts and palm oil, white copal and cocoa. Ivory is also abundant. Coffee grows freely, and the cultivation of tobacco is successful. Tobacco is grown in all native villages. Plantations of rubber and coffee have been established by the Government. Cattle do not thrive on account of the deadly tsetse fly. There are no native industries and few skilled workmen. Mining flourishes, the chief minerals being gold and copper. Other minerals are known to exist—coal, iron, tin and manganese—but as yet these have not been obtained in paying quantities. The gold mines in 1911 employed some 3,000 natives, the output was 2,000 pounds and the exports 1,995 pounds. In 1911 the shipment of copper was 2,184,636 pounds (136,708 pounds in 1910).

The value of the commerce in 1895 was as follows:—Imports, special 427,480l., general, 473,440l.; exports special, 437,720l., general, 485,430l. The development in the last five years was as follows:—

Years	Imports		Exports	
	Special	General	Special	General
1907	1 007 70	1 317 800	1 414 90	1 201 110
1908	1 068 0	1 210 610	1 945 0	1 410 0
1909	1 100	1 131 10	2 441 0	1 020 70
1910	1 408 5	1 511 11	1 61 09	9 225 047
1911	1,468 315	1 344 602	1 113 69	1 108 25

In the trade of 1911 the chief imports and exports were:—

	Imports			Exports	
	Special	General		Special	General
	Francs	Francs		Francs	Francs
Arms ammunition &c	1 41,153	1 782 4	Rubber	31 420 506	80 424 211
Steamers and ships	1 920 91	1 422,116	Ivory	5 613,418	1 237 2,7
Machinery	6 000 544	1 12 072	Palm nuts	2,876 674	3, 04,17
Iron, steel, copper	2,464 137	1 129 729	Palm oil	1 731,898	2 032 30
Wines, spirits	3 377	9 248,118	Copal	3,448,117	8 315 724
Provisions	5 121 212	11 216 047	Cocoa	806	1 692
Cottons	3 117	3 031 120	Coffee	8 218	3 216
Clothing			Gold, crude	1 111,950	9 119,000
			Copper and crude	1 902 549	6 815

Of the special imports (1911) the value of 31,435,138 francs from Belgium, 5,882,230 francs from Great Britain, 2,454,173 francs from Germany, 2,177,246 francs from France, and 972,077 francs from Holland. The special exports the value of 47,566,266 francs went to Belgium, 468,732 francs to Great Britain, 3,413,896 francs to neighbouring Portuguese possessions, 429,000 francs to British East Africa, and 705,920 francs to Holland.

According to the Board of Trade Returns the imports into the United Kingdom from the Congo State in 1911 amounted to the value of 35,891/ (rubber, 17 555/, gum, 922/), and the exports of British produce and manufactures to the Congo State, to 256,551/ (cottons 158 961/)

At the port of Boma in 1911 of sea going vessels there entered 117 of 435,941 tons. In the coasting trade there entered 90 vessels of 9,378 tons. There is regular steam communication every three weeks with Antwerp and frequent steam communication with Liverpool, Hamburg, Rotterdam, Lisbon, and Bordeaux.

The administration possesses 11 steamers on the Lower Congo, and 37 on the Upper Congo.

A special office, called the 'Office Colonial,' collects and gives information on all subjects relating to commerce and industry in the Congo.

Internal Communications—The Congo is navigable for about 100 miles from its mouth to Matadi, and in this section 11 steamers belonging to the State ply. Above this, for over 200 miles, are numerous rapids, which render the river unnavigable as far as Stanley Pool (Leopoldville). Above the Pool there are about 1,200 miles of navigable water, as far as Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course.

A railway of about 250 miles in length, running at an average distance of 20 miles south of the river, connects Matadi with Stanley Pool. This railway is open for traffic in its whole length. There are four other short lines in the Congo, including two sections of the Cape to Cairo Railway, making a total mileage of 900. The distance from Elisabethville, Katanga, on the Cape to Cairo Railway, to Cape Town is about 2,300 miles. On January 1, 1911, the entire rolling stock in Congo consisted of 93 locomotives, 37 passenger coaches and 11 freight cars. Proposed lines include one from Elisabethville to Bakuma, 310 miles, Kambove to Lake Dilolo, 435 miles, and the extension of the Benguela Railway in Angola to Dilolo to connect with the second line mentioned. The last two lines would shorten the distance from Elisabethville to the sea by about 1,000 miles. From Leopoldville a public transport service on the Upper Congo has been organised by the Government, 37 steamers being employed for this purpose.

An important development in 1911 was the construction of a pipe line from Matadi to Leopoldville, 246 miles long for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 18 inches, with 8 pumping stations capable of delivering 50,000 tons of oil at Leopoldville the terminus. The concession is for 25 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will pass into the hands of the Congo Government.

In 1911 there were 39 post offices, 17 telegraph offices, and 1 telephone office. In 1911 in the internal 401,427 letters, papers, &c., were transmitted, and in the external, 2,079,652 were handled, and 15,984 passed in transit. The Congo included in the Postal Union. Telegraph lines connect Boma and Leopoldville, 110 miles, Leopoldville and the Equator, 110 miles; Katongo and Uvira (Lake Tanganyika), 110 miles; Stanleyville and Ponthusville, 110 miles, Boma and Banana and Moanda, 80 miles, and there are 110 miles of telegraph line in Mayumba: total length, 1,083 miles. There are 110 present stations in the Belgian Congo—at Banana, Boma, Coquilhatville, Luala, Stanleyville, Lova, Kindu, Kongolo, Kikondja, and Elisabethville. All these posts communicate with each other.

The installation of stations at Leopoldville, Eolo, and Lusambo along the Sankuru Valley — at present under consideration, for the purpose of connecting Boma and Elisabethville through the Kasai basin.

The legal money is — in Belgium, but on the Upper Congo the currency consists of brass coils, cowries, &c. The total money in circulation on January 1, 1912, amounted to 740,067*l*. (on January 1, 1911, it was valued at 355,418*l*.). The Metric System was introduced by law on December 2, 1912.

British Consul.—W. J. Lamont (at Boma). There — British Vice-Consuls at Katanga, Leopoldville, Stanleyville, and Kasai District.

BHUTÁN.

A State in the Eastern Himalayas, between 26° 45' and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbi and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 20,000 square miles; population estimated at 250,000.

The original inhabitants of Bhután, the Tephús, ■ subjugated about two centuries ago by ■ band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but since then repeated outrages ■ British subjects committed by the Bhután hill ■ have led from time to time to punitive measures, usually ending ■ the temporary ■ permanent annexation of various *dhars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *dhars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted ■ subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded ■ January, 1910, under which the Bhután Government surrendered the control of its foreign relations to the British Government, the subsidy has been increased to Rs. 1,00,000 a year. This gives the Indian Government an effective control ■ the State, while the occupation of two strong positions ■

Rava and Diwángiri, within a few miles of their frontier, ■■■■ as a material guarantee against further aggression.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity ■ represented by Dharma and Deb Rájás. In 1907 the Dol Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, K.C.I.E., ■■ elected ■ the first hereditary Maharaja of Bhután.

Chief towns: Punakhá, the winter capital, a place of great natural strength; Tásichozong (Tashichedzong), the summer capital, Páro, Angdumphorang (Wangdupotang), Tongsa, Taka, and Biaka.

The people ■■ nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tásichozong (Tashichedzong), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is nothing like a standing army.

The chief productions are rice, Indian corn, millet, lac, wax, two kinds of cloth, musk, ponies, chowries, and silk. The State is now beginning to realise the necessity of encouraging foreign capital for industrial enterprises such as mines, tea gardens, and the working of its extensive and valuable forests. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

Imports into Bengal and Eastern Bengal and Assam, and exports from those Provinces to, Bhután :—

BOLIVIA

BOLIVIA.

(REPÚBLICA BOLIVIANA.)

Constitution and Government

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. By its provisions the executive power is vested in a President, elected for a term of four years by direct popular vote, and not eligible for re-election; there is a Congress of two chambers, called the Senate and the Chamber of Deputies. The suffrage is possessed by all who can read and write. There are 16 Senators (2 for each Department) elected for 6 years and 75 Deputies elected for four years. Both Senators and Deputies are elected by direct vote of the people. Of the Senators one-third retire every two years, of the Deputies one-half retire every two years. Senators receive a salary of 500 bolivianos (40*l*.) per month during the sittings, which, is a rule list for 15 days, but may be extended to 30 days, and Deputies receive £3 for each day they attend. Extraordinary sessions may be held for special purposes. There is a President, two Vice Presidents and a ministry, divided into six departments—of Foreign Relations and Worship; Finance; Government and Public Works; Justice and Industry; War and Colonisation; and Education and Agriculture.

President of the Republic—*Señor Eliodoro Lillo* on, elected for the term 1909-13 (18,000 bolivianos).

The supreme political, administrative, and military authority in each department is vested in a prefect. The Republic is divided into 9 departments, 55 provinces, and 487 cantons and 248 vice cantons, administered respectively by prefects, sub-prefects, corregidores and alcaldes. Prefects and sub-prefects are appointed by the President of the Republic, corregidores and alcaldes by the sub-prefects of the provinces. The capital of each department has its municipal council, the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents. The territories in the north-east of the Republic and in the Gran Chaco are governed by two officials, called *delegados* and *zonales*.

Departments and Territories	Area square miles	Census 1900	Estimated 1910	Per square mile 1910
La Paz	9 900	271 616	311 114	310
Cochabamba	29 300	323,163	380,101	1299
Potosí	48 900	323,618	377 713	770
Santa Cruz	141 000	209 592	243 157	170
Oruro	21 000	204,434	237 143	103
Tarija	21 800	110 434	110 439	115
Oruro	18 000	86 081	91 834	51
El Beni	21 000	72 180	77 730	360
Los Chiriquitos	2 745	—	15 811	827
Territories	119,400	10 000	21 000	701
Total	708 10	744,563	822 119	115

The Indian population in 1900 was 920,864, or 50.9 per cent of the whole; the mixed was 486,018, or 28.9 per cent, the white was 281,088, or 12.7 per cent.; the negro, 3,945, or 0.2 per cent., and the unclassified,

170,936, ■■■ per cent. Of the population not under 7 years of age, 564,000 ■■■ engaged in agriculture 399,037 in the industries 55,521 in commerce, 49,647 ■■■ the liberal professions, 36,285 in domestic service, 12,625 in mining and 3,108 in artistic professions. The foreign population numbered 7,425, of whom 2,072 were Peruvians. The admission and settlement of immigrants are facilitated under the regulations published in March, 1906.

The boundary disputes of Bolivia with Brazil and with Chile ■■■ settled by treaties of November 1903 and October 1904. That with Peru was settled by direct negotiations between Bolivia and Peru.

The population of La Paz (the capital) estimated is 78 ■■■ Cochabamba, 24,712, Sucre, ■■■ 416, Santa Cruz, 20,535, Potosí, 7,817. Potosí 23,450. Oruro 20,670, Trinidad, 4,810. The temporary capital of the colonial territory in the north west of the republic is Riberalta; population, 2,134. The capital of the Great Eastern Chaco ■■■ Villi Montes, 1,653. In 1912, the Government founded the new town of Caracollo in the department of La Paz.

Religion, Instruction, and Justice

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 18 convents (10 for males and 8 for females), the male members number about 241, the female 280, there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident ■■■ Sucre) and 3 bishops. The maintenance of the Church costs the State about 200,000 bolivianos a year, 14,000 bolivianos being devoted to the propagation of the faith among the Indians. In 1911 ■■■ law was passed that all marriages must be celebrated by the civil authorities.

Primary instruction, free and nominally obligatory, is under the care of the municipalities. In 1912 (including industrial, parish, and private schools), there were 990 elementary schools with 3,960 teachers and 81,386 pupils. For secondary instruction there were 21 colleges, 5 clerical institutions, and 5 private lyceums with, in all, 180 teachers and 2,177 pupils. For superior instruction there are 19 establishments with 78 professors and 780 students. At Sucre and La Paz are the only two universities which possess ■■■ than ■■■ faculty at both degrees may be obtained ■■■ law, medicine, and theology, at La Paz there is also a faculty of commerce. In some department capitals are schools of commerce, and at La Paz the military college. At ■■■ places are rural schools for the natives, and ■■■ 1911 ■■■ normal college for training teachers of Indians was established at La Paz. A normal school for training teachers generally was established at Sucre in 1909, and has 60 students. In all the departmental capitals there ■■■ public libraries, at La Paz ■■■ ■■■ at Oruro and Potosí are mineralogical ■■■. The State spent 2,484/ ■■■ 1912 ■■■ educational purposes.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting ■■■ the Capital of the Republic has 7 judges, the district courts (one ■■■ each department) have each 5 judges, except that in El Beni which has only ■■■, the local tribunals have judges of instruction and parish alcaldes. Public justice ■■■ directed by ■■■ Attorney General ■■■ by district and local attorneys. The administration of justice ■■■ free.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, tin and silver mining, rubber export, patents, and stamps. From

Jan 1, 1912 onward, a tax of 1 percent is imposed on the liquidated profits of all mineral enterprises the gross value of whose 'production and exportation' exceeds 8,000/ yearly. The chief branches of expenditure are finance, war, and public works. The ordinary revenue and expenditure for 7 years were as follows (12½ bolivianos = 1/2) —

	Revenue	Expenditure		Revenue	Expenditure
	£	£		£	£
1904	832 00	13 000	1910	1 001 6 6	1 019 7 64
1907	1 098 0 0	1 16 50	1911	1 333 4 0	1 36 46 3
1908	1 24 0 00	1 21 400	1912	1 56 5	1 388 7
1911	1 013 000	1 53 3 0			

Until five years ago, Bolivia had no foreign debt. In December 1908, a loan of half a million sterling was negotiated in order to pay off some internal debts and to aid in the establishment of a gold standard, but this loan is now held by the Banco de la Nación Boliviana, which was established on January 1, 1911 with a capital of 1,275,000/ 1,000,000/ of which is to be subscribed by the Bolivian Government out of the loan of 1 500 000/ which was made in France at the end of November 1910. The 1908 loan now amounts to 400,000/. There is also an amount of 95,159/ issued in 3 per cent bonds indemnities decided by the Joint Arbitration Tribunal of Brazil and Bolivia. Total debt charge (1912) 136,989/.

The total internal debt amounts (1911) to 4,410,796 bolivianos.

The departmental revenues for 1911 were estimated at 2,570,216 bolivianos. These revenues are mainly from territorial contribution by natives (land taxes, taxes on tobacco, hides, inheritances imported and exported cattle, &c). The expenditure is chiefly on justice, police, public works, instruction, and worship. The municipal revenues amount to 224 000/.

Defence.

The law of February 5th, 1910, provides for a permanent force of 8,153 officers and men. Military service is compulsory for all males from the 20th to the 50th year.

The army is a militia with a total service in the first line of 1 year, of which about 1 year is spent in the ranks. For the next 1 years (from 25 to that of 30) the Bolivian soldier belongs to the 'ordinary reserve'. After this the soldier passes to the 'extraordinary reserve' for 10 years, and finally completes their service by 10 years in the Territorial Guard.

The permanent formations are 6 infantry battalions of about 300 men each, 2 cavalry regiments totalling about 600 each one field and two mountain batteries. But a considerable force of militia could be mobilised in event of war.

In addition to the above troops, there are small bodies of infantry, 80 strong (called *columnas*), at the chief towns of departments, which can be expanded to battalions, if necessary, also 1 squadrons which do duty in Gran Chaco.

The Bolivian infantry is armed with the Mauser rifle, model 1908. The material for 8 mountain batteries and 9 field batteries of 1 guns each has recently been obtained from Europe.

Military expenditure in 1912, 266,518/.

Production ■ Industry.

It is estimated that about 4,940,000 ■ ■ under cultivation, but agriculture ■ in ■ backward condition. Irrigation by means of artesian wells ■ being attempted in some regions. Wheat, maize, barley, beans, potatoes, are produced mostly for local consumption, and coffee, coca, quina, &c., are exported to Chile and Argentina. Cocoa and coffee ■ grown on the slopes of La Paz and Cochabamba; coffee and other products ■ grown in El Beni and Santa Cruz. Rubber is produced on 40,612,000 acres in the National Territorios, and in the Departments of El Beni and Santa Cruz, and parts of La Paz and Cochabamba. The quantity exported in 1911 was 8,645 metric tons, value, 18,921,619 bolivianos. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles ■ reserved for special colonisation.

The number of cattle was (1912), 734,266; sheep, 1,499,114; horses, 98,846; mules, 44,584; asses, 172,959; goats, 467,950; pigs, 114,146; llamas, 414,047; alpacas, 112,033; vicuñas, 200; domestic fowls, 78,477.

The mineral wealth of Bolivia includes silver, copper, tin, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal. In 1911 the tin exports amounted to 37,072 tons; bismuth, 414 tons; copper ingots, &c., 2,950 tons; silver ore, 127,000 kilograms; other metals, 12,648 tons; gold, 55 kilograms. The chief silver mining company is the Huanchaca Company, which produces nearly all the silver obtained. Gold is found in small quantities throughout Bolivia, both in rivers and in quartz reefs, but its production is mainly limited to washings by Indians. The value of the tin and other minerals exported in 1911 was ■ follows (in bolivianos):—tin, 52,639,608; copper, 1,426,953; silver, ■ 587,746; bismuth, 2,106,162; various minerals: wolfram, antimony, borax, &c., 2,854,619. Large deposits of common salt are found ■ Lake Poopó and in the South of Bolivia. In 1911 large tracts of land were taken up for the production of petroleum, especially near Calacoto, on the Arica-La Paz railway.

Commerce.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and the river-ports of Sucre ■ the Paraguay, Montes ■ the Iténez, Villa Bella, ■ the Madeira, and Bahía ■ the Upper Acre. The Argentine route through Salta is now little used. The chief imports are provisions, hardware, wines and spirits, cotton, woollen, linen and silk goods, and ready-made clothes. The import trade is chiefly in the hands of Germans, but English goods ■ largely introduced. The chief exports are silver, tin and rubber. The value of imports and exports for four years are given as follows (12 ■ bolivianos = 1 £ in 1909):—

	1908	1909	1910	1911
Imports . . .	3,394,986	2,974,960	3,004,187	4,069,712
Exports . . .	8,770,624	3,643,680	6,049,771	6,611,493

The values of imports (dutiable and duty-free) ■ determined according to ■ appraisement in force; ■ of exports, by declarations of the exporters, based on current prices at the place and time.

The principal imports are cottons, woollens, cattle, provisions, machinery and hardware, wines, spirits, clothing. In 1910 the exports consisted of

tin, 2,960,000/, in 1911 (6 months), 2,012,000/, silver, 420,000/, in 1911 (6 months), 225,700/, copper, 143,000/, in 1911 (6 months), 70,200/, bismuth, rubber, 2,200,000/ (more than one third of the total exports), gold, cocoa, 35,000/, in 1911 (6 months), 26,400/, hides, 17,450/, in 1911 (6 months), 10,600/.

The (in order of value) with United Kingdom, Germany, United States, Chile, France, Belgium, and Italy.

Total trade between U and Bolivia for years —

	190	1905	1907	1910	1911
Imports from Bolivia to U K	14,105	15,211	13,433	14,815	15,567
Exports to Bolivia from U K	22,358	17,785	20,104	29,404	32,816

In July, 1912, a Commercial Treaty was ratified between Great Britain and Bolivia (Signed August, 1911).

Communications.

In 1912 the total length of line open in Bolivia was 778 miles, comprising 300 miles of the older railways, and the rest being operated provisionally by the contractors on lines now being constructed. The principal line is the Antofagasta and Bolivia Railway, from Antofagasta, on the Pacific coast to Ollaguita, thence to Oruro, thence to Viacha, thence to La Paz (719 miles). Under the Bolivian-Chilian treaty of October 24, 1904, railway construction on a large scale is being undertaken. The Arica-La Paz line (208 miles, of which 186 miles are in Bolivia) is begun from La Paz via Lluta with Tacora and to Corocoro. It is expected that the proposed Pan American Railroad will follow the shore line of Lake Titicaca from Guayaquil to Viacha, and thence to the Argentine border by way of Uyuni, Tupiza, and La Quiaca, a total distance in Bolivia of 361 miles, of which 361 are already in operation.

Up to the end of October, 1911, 3,801,973/ has been spent on the various lines in the of construction. Length of lines being constructed, 413 miles. Length of lines projected, 1,169 miles.

Traffic on Lake Titicaca and the Bolivian rivers is carried on by steamers, which belong to private.

There are about 2,304 miles of cart roads connecting the important towns.

In Bolivia there are 111 post offices with 111 officials. In 1911, 6,486,572 pieces of postal matter were handled. The postal receipts amounted (1906) to 810,598 bolivianos and the expenses to 851,102.

In 1912 there are 2,500 miles of telegraph line, including private lines. All the departmental capitals are connected by telegraph. There is telegraph communication with foreign countries by the lines of the Central and South American Telegraph Company, the Southern railway telegraph lines of Peru; the West Coast of America Telegraph Company, and also by way of Tupiza and Buenos Aires. Despatches (1910) sent, 180,554, received, 360,053. Cost of administration, construction, &c., 331,270 bolivianos deficit, 132,648 bolivianos.

A contract has been made between the Bolivian Government and Marconi's Wireless Telegraph Company for the establishment of wireless telegraphy in Bolivia.

Money, Weights, ██████████

In Bolivia there ██████████ (1910) 17 ██████████ of issue, including the Banco de la Nacion (State bank). These banks are allowed to ██████████ 100 bolivianos notes for every 40 bolivianos gold in their reserve. The total available currency ██████████ (1910) ██████████ follows—Private banks—paper, 2,575,000/, gold 1,030,000/. Banco de la Nacion—paper, 4,625,000/, gold, 1,850,000/. Total—paper, 7,200,000/, gold, 2,880,000. There are ██████████ mortgage banks. The Bank of Chile and Germany, and the German Transatlantic Bank have branches in Bolivia.

On September 14, 1906, a monetary law was passed providing for the adoption of a gold standard. The unit of account is the gold peso of one fifth of a pound sterling weighing ██████████ 597½ grams, 916 fine, thus containing 1.464466 grams of fine gold. There are two gold coins struck, British and Peruvian pounds and half pounds, there ██████████ no Bolivian gold yet in circulation. Silver coins, 800 fine, are pieces of 50 and ██████████ centavos. Nickel coins, pieces of 10 and 5 centavos. Gold is legal tender to any amount and English and Peruvian gold coins of corresponding value have legal currency, the rate of exchange being fixed ██████████ 12.5 bolivianos = 1/. Silver is legal tender up to 10 pesos, and nickel up to 1 peso. Silver and nickel coins are being minted. In 1909 silver coins, the value of 1,000,000 bolivianos (50 and 20 centavo pieces) were coined for Bolivia at Birmingham. There are also paper notes of 1, 5, 10, 20, 50 and 100 Bolivianos.

The metric system of weights and ██████████ is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

Consular Representative

1. OF BOLIVIA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary—Col Pedro Suarez
First Secretary—Dr Alvaro Arguedas

2. OF GREAT BRITAIN IN BOLIVIA.

Envoy Extraordinary and Minister Plenipotentiary—Cecil W. G. Gosling
There are Consular representatives at La Paz, Oruro, Sucre, Santa Cruz, Uyuni and Cochabamba.

BRAZIL.

(ESTADOS UNIDOS DE BRASIL)

Constitution and Government

31 A/L became a Portuguese lieutenant in 1500. On the French invasion of Portugal, in 1807, the Portuguese royal family fled to Brazil, in 1818 the colony was declared a kingdom. The Portuguese court having returned to Europe in 1821 a national congress assembled at Rio de Janeiro and on May 12 1822 Dom Pedro, eldest surviving son of King John VI of Portugal, was chosen 'Perpetual Defender of Brazil'. He proclaimed the independence of the country on September 7 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12 following. In 1831 he abdicated the crown in favour of his only son, Dom Pedro II who reigned as Emperor until November 15, 1889, when by revolution he was deposed and he and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil.

According to the constitution adopted by the National Congress on 24 February 1891, the Brazilian nation is constituted — the United States of Brazil. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps rates of postage, and bank note circulation belong to the Union, but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3d of May, without being convoked unless another day be fixed by law, and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as are diplomatic or military or imposed by law. If, in ordinary circumstances, the acceptance of diplomatic or military office would involve the loss of the legislative services of a member, the president of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and remain at the same time then in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty five years of age and must have been citizens for five years.

The Chamber of Deputies consists of 111 members elected for three years by direct vote (providing for the representation of the minority), in proportion not greater than one to every 70,000 of population as shown by a decennial census, but so that no province will have less than four representatives. It has the initiative in legislation relating to taxation.

■ Doni Pedro [redacted] died in 1891.

BRAZIL

The following table shows ■ number of Deputies from the different States and from the Federal district :—

Deputies		Deputies		Deputies	
Amazonas . . .	4			Rio Grande do Sul .	16
Pará . . .	7	Sergipe . . .	■	■ Gerais . . .	■
Maranhão . . .	7	Bahia . . .	22	Goyaz . . .	■
Piauhý . . .	4	Espírito Santo . .	4	Matto Grosso . .	■
Ceará . . .	10	Rio de Janeiro . .	17	Federal District .	10
Rio Grande do Norte	4	São Paulo . . .	22		
Parahyba . . .	5	Paraná . . .	4	Total . . .	212
Pernambuco . .	17	Santa Catharina . .	■		

Senators, 68 in number, ■ chosen by direct vote, three for each State, and for the Federal district, for nine years, and the Senate is renewed ■ the extent of one-third every three years. The Vice-President of the Republic ■ President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President ■ and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual president or vice-president, or to either who has ceased to be ■ within six months.

The President has the nomination and dismissal of ministers, supreme command of the army and navy, and, within certain limits, the power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but ■ communicate by letter, or in conference with commissions of the Chambers. Ministers ■ not responsible to Congress or the Tribunals for advice given to the President of the Republic.

The franchise extends to all citizens not under twenty-one years of age, duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience.

President of the Republic.—Marshal Hermes da Fonseca, elected March 2, 1910. Assumed office November 15, 1910. Fourth term of office, (1910-1914).

There are 7 Secretaries of State at the head of the following Departments :—
1. Finance, 2. Justice, Interior and Public Instruction, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture, Industry, and Commerce.

I. LOCAL GOVERNMENT.

■ State ■ be organised under the republican form of government, and ■ have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures ■ be elective; the magistrates ■ not be elective nor removable from ■ by judicial sentence. ■ Federal executive cannot intervene directly in the local government of the States. In cases of obstinate infringement of the Federal Constitution by ■ the only resource of ■ ■ power ■ an appeal ■ the Supreme ■ of Federal District. The Federal District ■ administered by ■ council ■ by the citizens of the District, the municipal executive authority being exercised by ■ Prefect appointed ■ four

years by the President of the Republic. There are in Brazil 3,161 municipalities and 3,161 parishes.

Area and Population.

Following are the returns of 1900 and of 1900

States	Area sq miles	Population		
		1890	1900	Per sq mile 1900
Alagoas	22,583	511,440	642,249	28.7
Amazonas	732,439	147,915	249,756	0.3
Bahia	164,643	1,919,802	2,117,956	12.8
Ceará	40,247	805,687	849,127	21.1
Espirito Santo	17,312	135,997	209,782	12.1
Goyaz	288,536	27,572	255,284	0.9
Maranhão	177,561	40,851	459,509	2.8
Matto Grosso	532	92,827	118,325	0.2
Minas Geraes	221,951	3,184,099	3,594,471	16.2
Para	443,903	328,455	445,356	1.0
Parahyba	28,854	457,234	490,784	17.0
Pernambuco	85,451	249,491	327,130	3.8
Piauí	49,573	1,030,224	1,178,150	23.7
Praiahy	116,523	267,609	313,328	2.9
Rio de Janeiro	26,634	876,884	928,085	34.7
Rio Grande do Norte	22,195	208,273	274,317	12.3
Rio Grande do Sul	91,333	697,456	1,149,070	12.5
Santa Catharina	632	283,709	320,289	11.2
São Paulo	112,307	1,384,761	2,282,279	20.3
Sergipe	15,093	310,926	356,264	23.6
Federal District	538	522,651	780,951	1,359.2
Aggregate	3,218,991	14,398,917	17,818,556	5.4

In 1900 the population consisted of 8,825,636 males and 6,492,920 females.

In 1911 the population was estimated at 23,070,969, and the area 2,290,564 square miles.

The Acre Territory (not included in the census results) has an area of about 74,000 sq miles, and a population of about 70,000. For this territory Brazil paid to Bolivia 2,000,000/ in 1902, the revenue from the territory in 6 years, 1908-07, amounted to 2,118,401/. In 1907 the Territory petitioned to be received into the Brazilian Union as a State.

The next census was fixed for June 30, 1911, but owing to lack of funds it was postponed. In 1911 the population of Rio de Janeiro was estimated at 1,128,637; São Paulo (1911), 450,000; Bahia, 290,000; Pernambuco, 150,000; Belém, 200,000; Porto Alegre, 100,000; Manaus, 50,000; Niotheroy, 35,000; Santos, 35,000; Ceará, 33,000; Macaé, 33,000; Parahyba, 32,000; São Luiz, 32,000.

The number of immigrants into Brazil from 1820 to 1911 was 2,967,153. In 1911 there were 153,203 immigrants, as follows: Portuguese, 46,754; Spaniards, 27,007; Italians, 22,821; Russians (mostly Poles), 13,898; Syrians, 6,333; Germans, 4,223; Austrians, 3,327; French, 1,340; Swedes,

1,116, English, 1,045, and 5,852 of 32 other nationalities. These immigrants were classified as follows: 78,021 voluntary, and 55,595 subsidized, agriculturalists 99,811, and of various other professions, 38,805.

A boundary treaty with Colombia was signed on April 24, 1907, and a boundary treaty with Peru was signed September 8, 1909.

Religion.

The connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income. The Catholic Church is perfectly free; religious orders are allowed and are prosperous. All but about 100,000 of the population are Catholics.

There is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop at Bahia, one at Rio de Janeiro, one at São Paulo, one at Pará, and one at Mariana (Minas). There are 26 suffragan bishops. For instruction of the clergy there are 11 seminaries.

Instruction.

Education is not compulsory. The Republican Government undertakes to provide for higher or university instruction within the Union, leaving the provision of primary and training schools to the State Governments. There is in fact no university in Brazil but there are 25 faculties which confer degrees. In Rio de Janeiro are also the military college, the preparatory school of tactics, and the naval school. At the Capital are maintained by the Federal Government a school for the blind and another for the deaf and dumb. The Federal Government maintains also a School of Arts and a National Institute of Music in the Capital, there being similar academies of music in the States of Maranhão, Pará, São Paulo, and several in the State of Rio de Janeiro. In Manaus, Bahia, and Curitiba there are schools of Fine Arts. There are, besides, 28 industrial schools, 11 agricultural and 11 commercial institutions for tuition. There are faculties of law at Recife, São Paulo, Ceará, Goiás, Pará, Bahia, Belo Horizonte, Porto Alegre, and Rio de Janeiro (2), faculties of medicine at Rio de Janeiro, Bahia, and Porto Alegre, colleges of pharmacy at Ouro Preto, Belém, Juiz de Fora, and São Paulo, schools of odontology at Rio de Janeiro, Belo Horizonte and also attached to the colleges of medicine and pharmacy, engineering colleges at Rio, Ouro Preto, Bahia, Recife, Porto Alegre, and São Paulo.

There existed in 1910 in the States, 12,221 primary schools with 684,539 (352,418 boys and 282,121 girls) pupils and 8,064 teachers. Of the total number 6,918 were government schools, 2,608 municipal and 2,695 private. But on April 5, 1911, a decree was issued for the reform of the school system, a feature of which will be that a Board of Education will have entire control over all schools. There are also 327 secondary schools with 30,258 pupils. For teachers' diplomas there are 29 colleges in all Brazil, supported by the Union and 15 private. In recent years public instruction has made great progress.

Justice and Crime.

There is a supreme Federal court of Justice at Rio de Janeiro; and Federal judges in each State. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to hear cases up to a certain amount.

Finance.

Revenue and expenditure (gold milreis—2s 3d, paper milreis = 1s 4d)

	Revenue		Expenditure	
	(Gold) £	(Paper) £	(Gold) £	(Paper) £
1905	1,121,100	1,121,100	6,450,000	3,411,100
1906	1,121,100	1,121,100	11,411,100	1,121,100
1907	1,121,100	1,121,100	1,121,100	1,121,100
1908	1,121,100	1,121,100	1,121,100	1,121,100
1909	1,121,100	1,121,100	1,121,100	1,121,100
1910	1,121,100	1,121,100	1,121,100	1,121,100
1911	1,121,100	1,121,100	1,121,100	1,121,100
1912	1,121,100	1,121,100	1,121,100	1,121,100

The Budget for 1913 fixed the expenditure at 451,371,055 milreis paper and 80,861,904 milreis gold and estimated the receipts at 125,792,996 milreis gold and 354,243,000 milreis paper (Expenditure, 37,865,128; receipts, 37,767,500)

The consolidated foreign debt of Brazil on December 31, 1911, amounted to 908,120/ and 300,000,000 francs, the internal paper debt, to 523,600 milreis. Paper money in circulation on March 31, 1912, 612,519,626 milreis.

The rate of interest on the Foreign Debt varies from 4 per cent to 5 per cent, that on the Internal Funded Debt from 1 per cent to 1 per cent, but this last has been to a large extent redeemed. The internal debt is chiefly represented by bonds called *Apólices* inscribed to the holder, and the payment of its capital and interest, which is provided for by the annual vote of Congress, is under the charge of the sinking fund department (*Caixa da Amortização*) independent of the Government, directed by a committee presided over by the Minister of Finance, and composed of a general inspector and five large Brazilian bondholders.

State Finances

Each of the States of Brazil has its own receipts, expenditure and debt. The last available figures are those of 1907. For these see THE STATISTICAL YEAR BOOK, 1912, p. 676.

On July 24, 1912, a bill was introduced into the Senate making it necessary for the States to obtain the Federal authorization before contracting any loan.

Defence.

Under the military law of January, 1908, military service is obligatory on every Brazilian from 21 years of age to 45. The terms of service are 2 years in the ranks, 7 in the reserve, 7 in the Territorial Army, and 8 in the National Guard. The reservists are called up for training annually for 1 week, besides which there is rifle practice once a month. The Territorial Army also have an annual training of 2 to 4 weeks. The army consists of 12 regiments of infantry each of 3 battalions, and 12 battalions of rifles of 12 regiments of cavalry of 1 squadron and 5 regiments of 1 squadron, 5 regiments of 1 artillery of 9 batteries each with 4 guns, 1 howitzer batteries, 6 mountain batteries, 5 battalions of engineers, and 8 battalions of garrison artillery. The country is divided into 13 territorial districts, each generally containing one rifle battalion. They also supply 10 for 5 "strategical" brigades and 3 cavalry brigades, all stationed in the south of the frontiers of the three southern republics. Each "strategical"

BRAZIL

brigade of 2 infantry regiments, 1 cavalry regiment, 1 field artillery regiment, 1 howitzer battery. A cavalry brigade consists of from 2 to 3 regiments. The total peace strength is at present 32,000. There are also gendarmes 20,000 strong. Infantry is armed with the Mauser rifle, the field and horse artillery have 2 Krupp 12 in.

Ships of the Brazilian navy are as follows —

Laid down	Name	Displacement	Armament	Principal Armament	Torpedo Tubes	H 1	Normal speed
			Belt Gun				
1907	Great Brazil (Mina Geracao) (Sao Paulo)	19 50	12	13-12 in 2. 17 in	—	28 00	1
1911	Rio Janeiro	27 00		14 12 in, 50 0 in			
1915	Old Battleship (Deodoro) (Florianopolis)	1 00	14 5	2 1 in, 4 4 7 in		1 400	11
PROJECTED CRUISERS							
1907	Bahia (Rio Grande do Sul) (Ceara)	3 00	—	10 4 7 in	—	18 00 in	
1915	Baturo	3 4 0		6 6 in 4 4 7 in	—	7 500	
1915	Imperial	3 00		10 6 in 3 4 7 in	—	7 500	17

There are 5 torpedo gunboats (*Tupy, Timbira, Tamayo, Gustavo Sampaio*, and *Trondontes*), 10 Yarrow destroyers, 4 first class torpedo boats, 4 destroyers, a mine ship, and 2 submarines are building or projected to complete the naval programme. A fourth new battleship is projected.

There are three naval arsenals—at Rio de Janeiro, Petropolis, and Ladario de Matto Grosso (this latter a river arsenal).

Production and Industry.

Brazil is an agricultural country, though only a small fraction of its soil has been brought under culture. Agricultural industries are encouraged by the State governments. Coffee is the chief product cultivated, and after that sugar, tobacco, and cotton, mate (Paraguay tea), india rubber, timber, cocoa, and nuts. The four states of San Paulo, Rio de Janeiro, Espirito Santo, and Minas Gerais, the combined of which are about one eighth of the entire area of the Republic, are the principal districts for coffee growing. Four fifths of the coffee of the world comes from these parts, more than half of the world's supply from San Paulo alone. The average annual crop of Brazil may be estimated at about 12 million sacks (1 sack = 137 6 pounds). India Rubber is the other great natural product of the country. The 1911 crop produced 28,807 tons. About half of the world's supply comes from Brazil, the principal rubber growing districts being Ceara, Matto, and Para. Cocoa is produced in many States but chiefly in Espirito Santo, and Bahia, where also the tobacco industry flourishes. In Pernambuco there are sugar factories, in Campos (Rio de Janeiro) 40, in Bahia 12, and in other parts of Brazil 15. The cultivation of rubber is extending. Cattle breeding is important in San Paulo which has 3,738,000 cattle, 1,200,000 swine, 136,000 sheep, 220,000 horses; 124,000 mules.

Both the forests and mines of Brazil are of value, but little has been done to make ■ of them. The mines, with certain reservations, belong ■ the proprietors of the soil. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Parana, and São Paulo, much of the coal being of inferior quality. Gold ■ found, amount produced ■ 1910 was valued at 394,577, in 1911 (nine months), 353,804. Diamond districts are Diamantina, Gias Mogul, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. Petroleum also exists ■ workable quantities. Manganese ores ■ worked in Rio de Janeiro and Minas Gerais. The greater part of the world's supply of monazite comes from Brazil. Other mineral exports ■ mica and talc, copper ore, platinum, rock crystal, agate, but all of these ■ found in small quantities. In Brazil in 1910 there were 194 cotton mills. There were in ■ 761,816 spindles, and 27,958 looms, steam power 24,064 horse power, and water, 8,163 horse power. The consumption of cotton ■ 34,607 tons (metric). There ■ important woollen factories for cloths, flannels, rugs, felts, &c., at Rio de Janeiro, Niteroi, Maranhão, Porto Alegre, and Rio Grande do Sul. There are ■ silk mills at Petropolis near Rio. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics, but the imports of wheat flour are very large, mostly from the Argentine Republic. Brewing, being protected, is prosperous. Altogether there are 1,258 manufacturing establishments in Brazil, with a capital of 685,676,000 milreis, an annual output of 741,536,000 milreis, and 151,841 employees. Efforts are being made to establish a fishing industry.

In the southern States of Brazil there are prosperous German, Russian, and Italian colonies. In Rio Grande do Sul there are about 200,000 Germans, in Paraná, 180,000, and in Santa Catharina 85,000.

Commerce.

Imports and exports (excluding specie) conversions at current rates varying from 11½ to 16d. per milreis (paper) —

	1906	1907	1908	1909	1910
Imports	£ 391,410	£ 471,354	£ 475,971	£ 524,916	£ 618,071
Exports	411,520	617,140	631,947	894,200	74,647

Principal exports ■ 1912 and 1911 were (metric ton — 2,204.6 lbs.) —

	Quantity 1911	Quantity 1912	Value 1911	Value 1912
Coffee (Bags)	11,257,882	12,060,301	10,300,000	11,300,000
Rubber (Metric tons)	34,547	43,266	15,007,015	16,000,000
Tobacco	18,449	24,705	9,500,000	14,400,000
Sugar	30,306	4,728	40,000,000	60,000,000
Tea	61,834	62,880	9,500,000	1,100,000
Cocoa	24,924	30,464	1,641,581	1,520,842
Cotton	16,647	16,773	978,000	1,037,300
Leather	81,982	46,356	1,798,781	2,011,820
Hides	2,796	3,199	647,504	758,167

The distribution of the imports and exports in 1910 and 1911 was as follows:—

From or to	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
Germany	7,497,411	8,362,411	2,257,154	9,142,904
United States	4,040,753	7,107,280	22,484,513	23,140,257
France	1,453,211	4,671,533	5,241,437	5,144,116
Great Britain	13,417,213	17,048,406	14,789,115	9,774,271
Portugal	2,620,778	3,341,198	164,813	297,112
Austria Hungary	1,199,862	777,703	1,461,790	3,948,239
Belgium	2,131,018	2,302,754	1,122,126	1,536,669
Argentina	4,021,614	4,024,678	1,122,620	2,578,875
Uruguay	1,220,441	1,111,905	1,114,494	857,816

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were —

Imports into U.K. from Brazil	1910	1911	Exports from U.K. to Brazil	1910	1911
	£	£		£	£
Caoutchouc	14,444,251	13,111,111	Coal, cinders, &c.	1,944,390	1,441,116
Raw cotton	800,127	901,240	Cottons and yarn	9,174,292	9,213,321
Coffee	6,155	904,051	Machinery	1,648,214	1,201,127

Total trade between United Kingdom and Brazil for 5 years —

1911

Imports from Brazil into U.K.	1,991,977	2,290,126	17,196,365	10,544,001
Exports to Brazil from U.K.	5,114,197	8,479,742	16,426,98	11,075,47
				12,610,000

Shipping and Navigation.

In 1911 there entered the ports of Brazil 16,837 foreign steam vessels of 12,557,819 tons and cleared, 16,836 steam vessels of 22,572,488 tons. Of those entering, 2,541 with a tonnage of 7,445,203 were British; 1,024 with a tonnage of 2,915,255 German, and of those clearing, 2,553 with a tonnage of 7,467,787 were British and 1,844 with a tonnage of 3,919,638 were German.

The merchant navy in 1911 consisted of 130,582 tons net, and 60,728 tons net. All coasting and river vessels must be Brazilian. The Brazilian Lloyd, for coasting trade, maintains a monthly service between Rio de Janeiro and New York, and has also inaugurated a service between Liverpool, Portugal and Brazil.

Communications.

Brazil possessed on December 3, 1911, railways of a total length of 18,750 miles open for traffic, besides 2,450 miles in process of construction on the different State systems, and 3,128 miles for which plans have been approved. During the year 1911, 471 miles were added. About 1,878 miles of railway were owned and administered by the Government. The private

lines are being taken up by ■■■ two large companies, the most important of which ■ the Brazil Railway Company. This controls a system, which when complete, will join up the railways of Brazil with those of Uruguay, Argentina and Paraguay. On April 1, 1911, the total length of this line ■ 3,102 miles, 233 miles are under construction and 1,540 miles are being planned.

The telegraph system of the country ■ under control of the Government. In 1911 there were 20,716 miles of line and 72,962 miles of wire. There ■ 16,204 telegraph offices. The number of messages was 2,835,970 (2,811,850 in 1910). Telegraph revenue ■ 000 milreis gold and 6,500,000 paper expenditure, 14,943,935 paper and 328,888,949 gold.

The Post Office carried (1911) 198,514,000 letters, 12,475,000 postcards and 77,498 other postal packets. There were 2,216 post offices.

A wireless system is now in process of completion. Fifteen new stations were erected along the Amazon ■ Paraguay rivers, and 5 on the coast.

Money and Credit

The metallic money in circulation at the end of 1907 amounted to 114,000 milreis gold and 904,158 milreis silver. The amount of paper money in circulation is being gradually reduced. The amount in circulation on December 31, 1911, was 204,173 ■ milreis. A law is to be proposed (1913) creating two new coins: one of gold value one pound sterling, and one of silver value about 10d., the gold piece to be exactly divisible by 25 of the silver ones. This will mean reducing the par standard from 27 pence to 16 pence. Under decree of December 10, 1905 the Bank of Brazil was ■ organized. It has a monopoly of the issue of gold cheques for payment of duties, preference given to it for the substitution of paper money by bank notes, and after satisfactory liquidation of the old account it will have the right to issue interest-bearing ■ notes. Its revenue for the year 1911 amounted to 11,867,570 milreis (791,171 £), and its reserve fund was 1,672,579 milreis. A decree was issued in November 1907 for the establishment of a Central Agricultural Bank with a capital of 30,000,000 milreis.

The value of the currency milreis fluctuates. In 1909 the average rate of exchange was 17½d.

Money, Weights, and Measures

MONEY

The *Milreis* of 1,000 *Reis* is of the par value of 2s. 2 984d (practically 27d.). The Government was authorized ■ December, 1905, to purchase bar silver for the coinage of 2, 1, and ■ milreis pieces 900 fine, weighing respectively 20, 10, and ■ grammes.

WEIGHTS AND MEASURES

The French metric system, which became compulsory ■ 1872, was adopted in 1862, and has been used ■ in all official departments. But the ancient ■ ■ still partly employed. They are —

The <i>Libra</i>	=	1 012 lbs avoirdupois
„ <i>Arroba</i>	=	32 38 „ „
„ <i>Quintal</i>	=	129 54 „ „
„ <i>Alqueire</i> (of Rio)	=	■ imperial bushel,
„ <i>Cátana</i>	=	55 84 ■

BULGARIA

Reigning King

Ferdinand, youngest son of the late Prince Augustus of Saxe-Coburg and Gotha, and the late Princess Clémentine of Bourbon-Orléans (daughter of King Louis Philippe), born February 26, 1861, elected Prince of Bulgaria by vote of the National Assembly, July 7, 1887, assumed the government August 14, 1887, in succession to Prince Alexander, who had abdicated September 7, 1886. His election was confirmed by the Porte and the Great Powers in March. Married (1) April 20, 1893, to Marie Louise (died January 31, 1899), eldest daughter of Duke Robert of Parma issue Boris, born January 30, 1894, Cyril born November 17, 1895. Rudoxia, born January 17, 1898. Nadejda, born January 30, 1899. (2) On February 28, 1908, to Princess Eleonore of Reuss-Kostritz.

The Prince must reside permanently in the Principality. The princely title is hereditary. In May 1893, the Grand Sublime confirmed the title of 'Royal Highness' to the Prince and his heir, and this style was recognised by the Porte and by Russia in April, 1896. On July 10, 1911, the Grand Sublime confirmed the title of 'King'. According to the Constitution the Sovereign must profess the Orthodox religion, excepting the case of the present king.

The civil list is fixed at 1,250,000 leva (francs) besides 850,000 leva for the maintenance of palaces, &c.

Constitution and Government.

The Principality of Bulgaria was created by the Treaty of Berlin signed July 13, 1878. It was ordered by the Treaty that Bulgaria should be constituted an autonomous and tributary Principality under the suzerainty of His Imperial Majesty the Sultan with a Christian Government and a national militia. The Prince of Bulgaria should be freely elected by the population and confirmed by the Sublime Porte, with the consent of the Powers, but no member of any of the reigning Houses of the Great European Powers should be elected. On October 5, 1908 Bulgaria declared her independence. The difficulty as to compensation to the Turkish Government in respect of railway claims has been arranged by an understanding between the Turkish Government and the Oriental Railways Company, and the Powers have recognised Bulgarian independence, and the title of "King of the Bulgarians" assumed by Prince Ferdinand.

Eastern Rumelia (since its union with Bulgaria also known as Southern Bulgaria) was created by the Treaty of Berlin, signed July 13, 1878. It was under the direct political and military authority of the Sultan under conditions of administrative autonomy, with a Governor General nominated by the Porte. On September 18, 1885, the Government was overthrown by a revolution, and the union of the province with Bulgaria proclaimed. As the result of the Conference held at Constantinople by the representatives of the signatory Powers of the Berlin Treaty during the latter months of 1885, the Sultan, by Imperial Firman, April 6, 1886, agreed that the government of Eastern Rumelia should be confided to the Prince of Bulgaria. Governor General, the Mussulman districts of Kirjali and the Rupchus (Rhodope) being ceded to the Porte. The rectification of the Organic Statute—chiefly as concerned the questions of the tribute and the customs—was undertaken by a Turco-Bulgarian Commission sitting at Sofia, but its labours were abruptly brought to a close by the events which overthrew Prince Alexander on the night of August 20, 1894. The province for all purposes forms part of Bulgaria. It is under the administration of Sofia, which is now the only recognised capital, Philippopolis being merely the seat of a prefecture.

By the Constitution of 1879, amended May, 1898, and June, 1911,

legislative authority is vested in a single Chamber, called the *Sobranje* National Assembly. The members of it are elected by universal manhood suffrage at the rate of one member for every 20,000 of the population. Those residing in the city where the National Assembly sits receive 15 leva (12s.) a day (including Sundays and holidays) during the session; others, 20 leva (16s.) a day with travelling expenses. All over 50 years of age who are read and write (except the clergy, soldiers on active service, persons deprived of civil rights, &c.) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the king, when new elections must take place within two months. Laws passed by the *Sobranje* require the assent of the King. Questions concerning the acquisition or loss of territory, changes in the constitution, a vacancy in the throne, the appointment of a regent have to be decided by a *Grand Sobranje*, elected for the special purpose in a manner similar to that in which the ordinary *Sobranje* is elected, but with double the number of members. For the Fifth National Assembly (1911), 1,038,048 electors were entitled to vote but only 556,782 actually voted.

Sobranje (elected September 19, 1911), 190 Nationalists, 5 Agrarians, 7 Liberals, 6 National Liberals, 1 Young Liberal, 1 Democrat.

The executive power is vested in a Council of eight Ministers nominated by the King—namely, 1 Minister for Foreign Affairs and Public Worship, 2 Minister of the Interior and of Public Health; 3 Minister of Public Instruction; 4 Minister of Finance; 5 Minister of Justice; 6 Minister of War; 7 Minister for Commerce and Industry; 8 Minister of Agriculture; 9 Minister of Public Works, Ways and Communications; 10 Minister of Railways, Posts and Telegraphs.

Area and Population.

The estimated area of Bulgaria is 33,647 English square miles.¹ By a census taken on December 31, 1910, the population of the whole kingdom was ascertained to be 4,337,516 (2,206,691 males and 2,130,825 females), against 4,036,575 (2,057,092 males and 1,978,483 females). Bulgaria is divided into 12 districts (including the 3 districts of Eastern Rumelia).

Area and population of districts, according to census of December 31, 1910 —

	Area		Population	
	sq. miles			
1 Bourgas	540	31,404	9 Rousse (Rustchuk)	2115 106,309
2 Varna	2554	329,612	10 Sofia	1892 451,04
3 Vidin	3,255	237,571	11 St. Zagora	6540 442,969
4 Vratsa	774	312,460	12 Turnovo	202 44,194
5 Kustendil	847	231,122	12 Choumen	2081 282,001
6 Plovdiv (Philippopolis)	3,298	447,009	Total	33,647 4,337,16
7 Plevna	1,651	365,408		

The population, divided according to nationality, is as follows in 1910, 3,203,810 Bulgarians, 488,010 Turks, 75,778 Rumanians, 63,487 Greeks; 98,004 Gipsies, 37,663 Jews, 3,863 Germans, 3,275 Russians, and 61,690 of other nationalities. The present capital of the Principality is the city of Sofia, with a population (census, 1910) of 102,312. The other principal towns, with population in 1910, are Philippopolis 47,981; Rustchuk, 86,255; Varna, 41,419; Shumla, 22,225; Sliven, 50,598; Plevna (Pleven), 28,049.

¹ See note under Area and Population of Turkey.

The census returns of 1905 referring to callings (issued in 1912) shows the following distribution of the population—Agriculture, 3,109,270 (1,552,240 men and 1,557,030 women); mining, 2,064 (1,348 men and 716 women); industry, 358,846 (200,775 men and 158,071 women); transport workers, 64,408 (34,170 men and 30,238 women); commerce, 165,806 (92,390 men and 73,416 women); public defence, 49,336; public service, 48,596 (26,767 men and 21,829 women); liberal professions, 78,566 (39,985 men and 38,581 women). Total, 1905, 4,035,575—2,067,092 men and 1,978,483 women.

The movement of population in the principality in five years has been:—

Years	Marriages	Living births	Still-births	Deaths	Surplus of births
1907	40,540	181,139	1,002	49,207	87,519
1908	37,016	170,248	979	102,753	67,600
1909	38,917	172,583	1,544	113,904	59,270
1910	—	—	—	—	—
1911	41,508	176,000	—	74,860	—

Religion and Instruction.

The national faith is that of the Orthodox Greek Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox communion. The church is governed by the Synod of Bishops. There are 11 Eparchies or Bishoprics. The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c. Of the population in 1905, 3,845,619 belonged to the Orthodox Church, 603,867 were Mahomedans, 37,656 were Jews, 29,684 were Catholics, 12,622 Gregorian Armenians, 5,644 Protestants. The Mahomedans are mostly in the northern and eastern provinces.

There is a university at Sofia, with three faculties—History and Philology, Physics and Mathematics, and Law. In 1908-09 it was attended by 1,569 students, of whom 217 were women, and there were 58 professors and lecturers.

In 1909-1910 the Bulgarian and other secondary schools are shown in the following table. The non-Bulgarian schools are Turkish, Greek, Jewish, Armenian, American, French and German:—

Description of Schools	Schools	Teachers		Pupils	
		Male	Female	Male	Female
Gymnasias	27	456	71	4,992	8,607
Lower Class	292	1,306	—	33,458	15,141
Special Technical and Other Schools	13	—	—	4,740	4,744

In 1909-10 there were 3,786 elementary schools with 8,697 teachers and 430,011 pupils (262,394 boys and 167,717 girls).

For education the State grants a yearly subvention which provides for half the cost (two-thirds in the case of the elementary schools), the remainder being provided in towns by the municipalities and in villages by the communal authorities. Education is free and nominally obligatory for a period of four years (8-12). The richer parents are, however, required to pay 20 leva (16s.) a year for each of their children attending the higher schools. There are public libraries at Sofia, Philippopolis, Varna and Rustchuk.

The estimated revenue and expenditure of Bulgaria for 11 years will be as follows (25 leva = £1) —

	1908	1909	1910	1911	1912
Revenue	£ 4,430	£ 4,670	£ 4,981,940	£ 5,137,511	£ 5,619,100
Expenditure	£ 4,430	£ 4,670	£ 4,981,940	£ 5,137,511	£ 5,619,100

For 1912 the chief sources of revenue are direct taxes, 1,593,640/ indirect taxes 2,741,600/. The chief branches of expenditure were Public Debt 1,605,880/, War, 1,620,000/, Interior, 441,280/, Instruction, 906,640/, Finance 343,000/, Public Works (including railways, posts and telegraphs), 1,120/.

Debt in 1911 24,107,976/ as follows 6 per cent loan of 1892, 3,470,700/; 5 per cent loan of 1902, 4,064,200/; 4 per cent loan of 1904, 3,884,700/; 4 per cent loan of 1907, 5,738,400/; 4 per cent loan of 1909 (to the Russian Government) 3,271,976/; 4 per cent loan of 1909, 4,978,000/.

Defence.

Service is universal and compulsory. Mahomedans are exempted, but like all others exempted, pay a tax. Service in the ranks commences at the age of 20, and is now for 2 years in the infantry, and for 3 years in the other arms. Reserve service is for 18 years in the infantry, and 16 years in the other arms. The reservists are liable to be called out for 3 weeks training annually.

After completion of his reserve service, the Bulgarian soldier passes to the Opolchenie (Territorial Army), serving in the first ban for 1 year (infantry), or 1 year (all other arms). Finally the men of all arms pass for 2 years to the second ban, thus completing a total service of 26 years.

The Bulgarian infantry is organised in 36 regiments of 2 battalions, each of 4 companies, and the artillery in 11 regiments of 2 divisions each, of 3 battalions of 12 guns, 12 mountain battalions, and 3 battalions of fortress artillery. Every infantry regiment has also a *harka* company, which permits of a company being constantly detached to the frontier. These companies are relieved half yearly. While on frontier duty they receive no recruits. On mobilisation each infantry regiment expands to four battalions, and each artillery regiment forms a third division of 11 batteries. Further, from the large number of reservists of each regiment is formed a reserve regiment of 11 battalions, and a depot battalion.

There is one guard cavalry regiment of 11 squadrons, 11 line regiments of 11 squadrons, and 6 of 11 squadrons. On mobilisation, all regiments are raised to 11 squadrons and 11 depot squadron. There further are 3 battalions of pioneers, 1 railway battalion, 1 pontoon battalion, 1 telegraph battalion, etc.

Opolchenie forms 11 mobilisation 11 battalions of the first ban, and 36 battalions of the second ban.

The reservists not required to complete the field units join the depots and are available to make good the waste of war.

Bulgaria is divided into 9 military districts, each of which has a complete division of the field army, besides a pontoon, an independent cavalry, fortress artillery and mountain artillery, etc.

strength of the divisions ■ peace ■ battalions, 6 batteries, etc.) is small, but in war, besides the expansion above mentioned, ■ third (reserve) brigade ■ added, raising each division to 24 battalions 3 squadrons, ■ batteries, 1 battalion of pioneers, &c., to ■ total strength, including divisional troops, of 28,500 ■

The peace strength of the Bulgarian army is about 3,900 officers and 56,000 all other ranks, but the field army, consisting of ■ divisions and 1 cavalry division, with the remainder of the reserve troops (available for the communications), and the mountain and howitzer artillery regiments should amount to about 285,000 combatants.

The Bulgarian infantry ■ armed with the Mannlicher magazine rifle, calibre 315. Cavalry have the Mannlicher carbine. The field gun is the Schneider Q F gun of 75 cm calibre. The mountain batteries are armed with the light Krupp 75 cm Q 1 guns.

Production and Industry

The State is theoretically the ■■■■ of the land: the land holder has a perpetual lease descending to heirs, and pays one tenth of the produce by way of rent (paid still to a great extent, in kind). The communes hold pasture land and wood land in perpetuity and pay no rent and over such lands the members of the communes have grazing and wood cutting rights.

About five sevenths of the population are engaged in agriculture, most of them being small proprietors holding from one to six acres. The total area of Bulgaria comprises ■ 570,450 hectares, of which, in 1911, 3,927,571 hectares ■ cultivated, and 3,041,324 hectares is under woods and forests. About 2,506,137 hectares is under cereals, 7,789 under tobacco, and 79,406 under vines. The principal agricultural product is wheat, of which there was a yield of 17,176,164 cwt. in 1909, 22,628,386 cwt. ■ 1910, and 88 ■ 167 cwt. in 1911. The yield of rye was 7,381,778 cwt. in 1911, oats, 5,840,078 cwt., barley, 8,708,935 cwt., maize, 28,881,121 cwt. The total yield of cereals of all kinds in 1910 was 2,688,127 tons, in 1909, 2,010,000 tons, valued at 18,764,000/. Wine, tobacco and silk are also produced, that of ■■■■ largely manufactured (cotton and rice are grown). In 1912, 1,120,500 hectares (1,118,409 in 1911) was estimated ■■■■ under wheat cultivation, with an expected yield of 17,350,000 quintals (19,596,000 ■ 1911), rye, 215,000 hectares (220,721 in 1911), yielding 3,150,000 quintals (3,761,176 in 1911), barley, 260,000 hectares (251,178 in 1911), yielding 4,000,000 quintals (4,425,593 in 1911), oats, 160,000 hectares (180,797 in 1911), yielding 1,750,000 quintals (2,967,735 in 1911), maize, 650,000 hectares (631,935 ■ 1911) yielding 14,000,000 quintals (7,770,240 in 1911), rice, 3,000 hectares (2,319 ■ 1911), yielding 30,000 quintals (30,238 ■ 1911), sugar beet, ■ 000 hectares (2,967 ■ 1911), yielding 460,000 quintals (620,000 ■ 1911), tobacco, 10,600 hectares (12,123 in 1911), yielding 80 ■ quintals (106,472 in 1911). In 1905 there ■■■■ Bulgaria 8,081,816 sheep, 1,370,201 goats, 2,167,275 head of cattle, and 463,241 ■■■■ 536,816 horses, 124,216 asses, and 11,528 mules.

All minerals belong by law ■ the State. Besides the coal ■■■■ ■ Pernik, worked by the Government, coal of good quality has also been found in Balkans ■■■■ Trevena, and several working ■■■■ have been granted. About 1,000,000 cubic ■■■■ of stone ■■■■ quarried annually. ■■■■ found ■ large quantities, gold, silver, lead, manganese ■■■■ copper. ■■■■ ■■■■ country. The chief manufactures are woollen goods, cottons, cord, and cigarettes.

Imports and exports.—

	1906	1907	1908	1909	1910	1911
Imports	4,335,970	4,867,000	4,802,000	4,417,160	7,092,200	7,894,000
Exports	3,422,000	3,287,000	4,414,200	4,457,317	5,164,088	7,387,800

The following table shows the trade by countries for 1911 —

Countries	Imports	Countries	Exports
U Kingdom	1,199,000	U Kingdom	420,000
Austria Hungary	2,165,000	Austria Hungary	123,000
Belgium	202,000	Belgium	215,000
Germany	1,590,000	France	145,000
France	957,000	Germany	911,000
Italy	36,000	Turkey	116,000
Turkey	630,000	Greece	00,000
Other countries	1,027,000	Other countries	507,000
Total		Total	

The chief imports in 1910 were coal, 132,389/; iron, 981,040/; building timber, 279,720/; machinery, implements, &c., 791,078/; cottons, 1,975,310/; hides, skins, leather, &c., 367,500/. The chief articles of export were wheat, 1,505,510/; maize, 539,618/; live stock, 292,973/; silk cocoons 144,931/; hides, skins, &c., 154,298/; attar of roses, 281,718/. Other exports are fruit, timber, and tobacco.

A commercial convention, specifying maximum rates of duties leviable on British imports into Bulgaria, fixing the duties leviable on merchandise, &c., landed at Bulgarian ports and providing for the most favoured nation treatment between Bulgaria and Great Britain, signed at Sofia on December 9, 1909.

Total trade between United Kingdom and Bulgaria for 5 years —

	1907	1908	1909	1910	1911
Imports from Bulgaria into U K	30,424	83,093	114,040	130,353	317,000
Exports to Bulgaria from U K	364,400	658,618	836,734	707,002	940,000

Shipping and Communications.

The number of vessels entered at ports of Bulgaria in 1910 was 16,930 of 3,895,880 tons, and 16,898 of 3,891,868 cleared. The chief ports Varna and Bourgas on the Black Sea, and Rustchuk, Sutor, Vidin on the Danube.

In 1911, Bulgaria (including Rumelia) had 1,200 miles of railway open, and 187 miles under construction. Railways connect with general European system. There were, in 1910, 3,679 miles of State telegraph lines with 6,711 miles of and 350 telegraph offices; the messages in 1910 1,966,358. There were, in 1910, 27 telephone systems with 177 miles of line. There were 2,203 post offices, and the number of letters, newspapers, &c., carried in 61,960,916.

Money and Credit.

There ■ ■ National Bank of Bulgaria, with headquarters ■ ■ ■ and branches ■ ■ Philippopolis, Rustchuk, Varna, Burgas, Tirnovo and 59 agencies in the different towns of Bulgaria; its capital ■ 10,000,000 leva, provided by the State with ■ reserve fund of, 1911, 7,323,671, and it has authority to issue both gold notes and silver notes. The latter ■ ■ issued for the first time ■ December, 1899, in September, 1911, the note issue amounted to 94,512,000 gold, and 28,600,000 silver. Three foreign banks, ■ ■ German (Banque de Credit, capital 9,000,000 fis), one Austro-Hungarian (Banque Balkanique, capital 4,000,000 fis), and the other French (Banque Generale de Bulgarie, capital 2,000,000 fis) have been founded, having their headquarters at Sofia and branches ■ Varna, Philippopolis, Rustchuk, and Burgas. There ■ 120 agricultural banks for making advances on personal security, with an aggregate capital of 42,845,408 leva on December 31, 1910, and ■ ■ to borrow from the National Bank. There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (francs), but the gold circulation is supplied by foreign 10 and 20 franc pieces. There are silver ■ ■ of $\frac{1}{2}$ lev, and 1 lev, 2, and 5 leva (francs), nickel coins of 2 $\frac{1}{2}$, 5, 10, and ■ ■ stotinki (centimes), the notes of the National Bank circulate at par.

Minister in London — M. Michel Madjaroff (February, 1912)

Charge d'Affaires. — M. Constantin C. Mincoff

Minister Plenipotentiary and Envoy Extraordinary, and Consul-General —

Sir Henry G. O. Baz Ironside, K.C.M.G.

Secretaries. — W. O. Killy and E. Overy, M.V.O.

Military Attaché. — Lt. Col. F. Lyon, D.S.O.

Vice Consul. — W. B. Heard

Hon. Attaché. — K. E. Digby

There ■ Vice Consuls at Philippopolis and Varna, and Consular Agents at Burgas and Rustchuk.

CHILE.

(REPUBLICA CHILI)

Constitution and Government

THE Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18 1810 finally freeing itself from Spanish rule in 1818. The Constitution voted by the representatives of the nation on May 25 1833 with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress consisting of the Senate and the Chamber of Deputies. The Senate is composed of 27 members popularly elected by provinces for the term of six years in the proportion of one Senator for every three Deputies, while the Chamber of Deputies composed of 118 members chosen directly by departments for a period of three years consists of one representative for every 40 000 of the population, or a fraction not less than 15 000, the present number of deputies was determined in 1910 on the basis of the results of 1905. Both bodies are chosen by the electors. Electors must be 21 years of age, and able to read and write. The executive is exercised by the President of the Republic elected for a term of five years, by indirect vote, the people nominating, by ballot, delegates who appoint the President. A retiring President is not eligible. In legislation the President has a modified veto, a bill returned to the chambers with the President's objections may, by a two thirds vote of the members present (a majority of the members being present, be sustained and passed). The day of a Presidential election is June 25 of the last of the five years of a President's, and the inauguration takes place on September 18 of the same year.

President of the Republic—Señor Dr. Ramon Barros Luco, assumed office December 28, 1910.

The salary of the President is fixed at 1,384*l*, with [redacted] for expenses.

The President is assisted in his executive functions by a Council of [redacted] of five members nominated by the President, and [redacted] members chosen by the Congress, and a Cabinet or Ministry divided into six departments viz, Interior, Foreign Affairs, Justice and Public Instruction, Finance, Defence, Industry and Public Works.

LOCAL GOVERNMENT

For the purposes of local government the Republic is divided into Provinces, presided by *Intendentes*, and [redacted] Provinces into Departments, with [redacted] chief [redacted]. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and

of the capitals of departments is organised and regulated by the President of the Republic at the charge of the national treasury.

Area and Population.

The Republic is divided into 23 provinces, subdivided into 78 departments, and 1 territory. Departments and territories are subdivided into sub-delegations and 3,068 districts.

In 1884 the provinces of Tarapacá and Tacna were ceded to Chile by Peru. The cession of Tacna was originally for ten years, at the end of which period a plebiscite of the province would decide to which country it should belong. The provinces, however, are still occupied by Chile.

Area and population of the provinces at the end of 1910:—

Provinces	Area : Sq. Miles	Popu- lation 1910	Pop. per Sq. Mile	Provinces	Area Sq. Miles	Popu- lation 1910	Pop. per Sq. Mile
Tacna	9,248	42,925	3.1	Nuble	3,406	169,816	49.8
Tarapacá	15,125	115,040	7.6	Concepcion	3,500	245,074	69.7
Antofagasta	46,397	118,716	2.6	Arauco	2,446	62,359	25.4
Atacama	20,799	65,116	3.1	Biobío	5,245	100,495	19.7
Coquimbo	13,457	178,731	13.3	Mallico	2,973	113,020	38.0
Aconcagua	5,485	152,780	27.9	Cautín	5,690	161,086	28.3
Valparaíso	1,953	290,466	148.3	Valdivia	4,302	131,751	30.6
Santiago	5,663	546,599	96.4	Llanquihue	31,340	113,285	3.6
O'Higgins	2,389	94,377	40.3	Chiloé	8,500	91,617	10.8
Colchagua	3,855	159,421	41.3	Magallanes			
Curico	2,976	108,139	36.3		14,174	13,030	0.9
Talca	3,689	182,798	49.6				
Linares	3,941	111,775	28.3				
Maule	2,474	115,564	46.7				
				Total	202,540	3,415,000	11.1

Many islands to the north, west, and south, belong to Chile. The coast line is about 2,435 miles in length.

In 1885 the population numbered 2,527,320; in 1895, 2,719,145; in 1905, 3,399,928. In 1907, 3,249,279 (1,624,221 males and 1,625,058 females).

The population of the principal towns in 1910 was:—Santiago, 332,724; Valparaíso, 179,815; Concepcion, 55,654; Iquique, 44,171; Talca, 38,040; Chillán, 42,500; Antofagasta, 32,496; Viña del Mar, 26,262; Curicó, 18,313; Temuco, 16,037; in Serena, 24,425; Talcahuano, 16,261; Valdivia, 17,681. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Purians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucans* (101,118) in the valleys — the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

Births, marriages, and deaths, exclusive of still-births:—

Year		Marriages		Surplus of
1906	117,032	18,507	104,890	12,142
1907	126,104	21,286	96,534	29,570
1908	129,733	21,483	104,226	25,507
1909	129,333	19,687	104,707	24,626
1910	130,052	19,326	106,073	28,979

Immigration is small, but is encouraged by the Government. The number of immigrants in 1910 was 2,543, in 1911, 1,711. Colonies (agricultural settlements) are encouraged, and their number and importance are increasing.

Religion.

The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is an archbishop (Santiago), three bishops, and two vicars apostolic.

Instruction.

Education is gratuitous and at the cost of the State, but is not compulsory. Professional and secondary instruction is provided in the Universities (one belonging to the State, the other a Catholic university) and the National Institute of Santiago, and in the lyceums and colleges established in the capitals of provinces, and in some departments. In the State University the branches included are theology, law, and political science, medicine and pharmacy, physical and mathematical sciences, philosophy, literature, and the fine arts. In 1911, in the Universities there were 2,685 matriculated students studying law, mathematics, medicine, pharmacy, dentistry, and nursing. In the same year 41 *liceos* for boys and 11 for girls had 1,038 teachers and 20,329 matriculated students (12,052 males and 8,277 females). There are 15 normal schools with 262 teachers and 2,322 students, besides one belonging to the Archbishopric with 74 students. There are many institutions for technical instruction. The Agricultural Institute has 94 students and there are 6 other schools for different agricultural subjects. There are mining schools at La Serena, Santiago, and Copiapo. Ten commercial schools have 2,296 pupils. There are schools of industry, of design, of electric work, of hygienic work, of mechanics, of modelling. Among the professional schools are 29 for girls with 11 teachers and 4,084 students. The Society for the Development of the Textile Industries maintains 11 schools with 11 pupils. There were in 1911, 2,896 public primary schools, with 375,274 pupils, an average attendance of 138,326, and 4,829 teachers. In addition the private schools receiving assistance from the Government had 36,577 scholars, and those receiving no assistance had 30,385 teachers. Other educational institutions are the Paedagogic Institute, the National Conservatory of Music, the National Observatory, School of Arts and Trades, Institute for Deaf Mutes, School for the Blind, and public libraries. The National Library contains 185,494 volumes. The cost of maintaining the public primary schools in 1910 was 7,317,885 pesos. There were 11 newspapers and journals published in Chile, including 11 dailies and 113 weeklies.

Justice, Crime, Pauperism.

There are, in addition to a High Court of Justice in the capital, several Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and subordinate courts in the districts. In 1910, 11 children (448 boys and 105 girls) were sent to the 11 correctional schools, 11,827 offenders (6,632 women) were sent to prison:

1,280 criminals ■■■ sent to houses of correction (prosidios) ; and ■■■ sent to the 2 penitentiaries.

At 99 hospitals in Chile in 1910, there were admitted 96,550 patients ; on December 31, there were 7,082 in hospital ; at the imbecile asylum at the end of 1910 there were 2,593 patients.

Finance.

The public ■■■ is mainly derived from nitrate duties, customs duties, the alcohol tax, the railways, post office, &c., while the chief branches of expenditure ■■■ for the national debt and public works and salaries.

In recent years the revenue and expenditure (ordinary and extraordinary) in gold and in currency pesos was as follows (gold pesos = 18d.) :—

Years	Revenue		Expenditure	
	Gold	Currency	Gold	Currency
1908	65,230,892	160,428,470	39,102,517	198,311,785
1909	123,008,021	245,267,030	135,169,887	300,459,758
1910	82,764,423	152,975,645	60,677,704	234,143,253
1911	71,908,379	213,214,928	60,775,635	204,191,707
1912	101,050,000	189,200,000	71,358,378	281,128,726

Estimated expenditure for 1913 in pesos is 237,401,000 currency and 55,746,000 gold. The estimated income is 194,900,000 currency and 108,000,000 gold.

On June 1, 1912, the external debt amounted to 35,163,620%, equivalent to 336,781,600 gold pesos. The internal debt stood at 180,598,372 pesos paper, of which 150,366,408 represent issues of paper money.

Defence.

The Chilean Army is a national militia in which all able-bodied citizens ■■■ obliged to serve. Liability extends from the 18th to the 45th year, inclusive. Recruits ■■■ called up in their 20th year, and ■■■ trained for ■■■ year. And they afterwards ■■■ for 9 y ■■■ in the ■■■ of the active army. After that they belong till completion of their 45th year to the second reserve. The latter is organised ■■■ second-line army.

■■■ is divided into ■■ zones, or military districts, each of which furnishes ■■ complete division on mobilization. There ■■■ battalions of infantry, 6 regiments of cavalry, ■■ batteries of horse artillery, 8 batteries of field artillery, ■■ batteries of mountain artillery, ■■ battalions of fortress artillery, and ■■ battalions of engineers. The total strength of the active army is 18,000 officers and ■■■.

The infantry ■■■ armed with the ■■■ Mauser rifle (1895), calibre 7 mm., and the cavalry have ■■ carbine of similar pattern. The ■■■ artillery are armed with Q. F. Krupp guns.

Military expenditure about 1,220,000%. The peace establishment for 1912 was fixed ■■ 19,360 ■■■ 1,737 gendarmes.

The principal vessels of the Chilean Navy are as follows:—

Name	Launched	Displacement, tons	Extreme Armament, inches	Armament	Torpedo Tubes	Indicated Horse-Power	Normal Speed
<i>Pre Dreadnoughts</i>							
Capitan Prat	1890	6,966	12	6 4-in ; 8 4 7 in	4	12,000	21
<i>Dreadnoughts</i>							
Valparaiso Almirante Cochrane	1904	28,000	—	10 11 in 12 6 in	—	37,000	25
<i>Armoured Cruisers</i>							
Esmeralda	1896	7,030	6	3 8 in , 16 6 in	—	19,000	23 0
O'Higgins	1896	8,400	7	4 5 in , 10 6 in	3	16,000	21 2
<i>Protected Cruisers</i>							
Blanco Encalada	1893	4,420	—	2 8 in , 10 6 in	—	14,500	22 0
Pres Errazuriz	1890	3,060	—	4 6 in	8	5,400	19 0
Chacabuco	1897	4,300	—	3 9 in ; 10 4 7 in	5	15,000	24 0

There are also 11 torpedo gunboats, 13 destroyers, 5 modern torpedo boats, and 11 submarines. Also a 11 ship, and 11 hospital ship. Total strength of navy, 6,084 officers and men.

Agriculture and Industry.

Agriculture and mining are the principal occupations. Chile produces annually large quantities of cereals, besides excellent wine, fruit, and vegetables. In 1910, 2,285,820 bushels were under wheat and 129,970 acres under barley. The principal crops of the harvest 1911-12 were estimated as follows:—Wheat, 248,460 tons; potatoes, 101,240 tons; barley, 26,281 tons; oats, 18,002 tons; maize (corn), 15,510 tons; beans, 18,518 tons; peas, 8,743 tons; wine, 26,004,394 gallons; chicha, 5,591,782 gallons; cordials, 4,794,980 gallons, spirits, 781,241 gallons. On December 31, 1912, the live stock of Chile comprised 415,000 horses and mules, 1,640,322 oxen, 3,587,738 sheep, and 159,000 pigs. Dairy farms and the production of butter and cheese are the principal occupations in Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming. Extensive natural forests are found, the largest being found in the provinces of Valdivia (1,885,406 acres), Llanquihue (1,406,024 acres), and Chiloé (1,188,572 acres). The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapaca.

The number of work-people employed in mineral workings in 1905 was 58,600, of whom 6,500 worked at coal mines, 15,500 at metalliferous mines; 30,600 at nitrate of soda workings, and 1,000 at other works. In 1911, it was 73,130.

The metals obtained are gold, silver, copper, cobalt, and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur, and guano. In June, 1912, it was reported that iron-ore deposits had been found in the province of Coquimbo, estimated at over 200,000,000 tons. The value of mineral output in 1909, was 19,583,918L; in 1910, 22,527,927L; in 1911, 24,880,000L. (nitrate alone, 20,320,000L.)

The total exports of nitrate and of iodine in recent years — stated as follows :—

Years	Nitrate	Iodine	Years	Nitrate	Iodine
	Metric tons	Metric tons		Metric tons	Metric tons
1907	1,065,976	804	1909	1,057,065	—
1907	1,049,624	789	1910	5,075,148	—
1908	2,033,612	130	1911	5,323,741	—

The more important of the industries of Chile (after the chemical and metallurgical) are those concerned with the manufacture and preparation of food substances, beverages (beer, wine, spirits), textiles, clothing, leather, wood-work (including furniture and carriages of various sorts), pottery.

Commerce.

Imports and exports (including re-exports) (special trade, including bullion and specie) (1 peso = 18d.) .—

—	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports . .	22,025,140	20,044,510	19,676,207	22,811,427	20,170,000
Exports . .	20,584,140	28,570,515	12,541,967	23,701,099	27,500,000

The following table shows the principal imports and exports for 1911 (1 peso = 18d.) —

Imports	Value	Exports	Value
	Gold pesos		Gold pesos
Cottons and Woollens . .	75,661,863	Minerals	291,411,547
Coal and other Minerals .	68,565,951	Vegetable products . .	12,320,501
Oil, &c	12,038,474	Industrial articles . .	7,791,831

Wool		533,311	660,441	Machinery		382,777	639,465
				New ships		9,760	11,780

Total trade between Chile and United Kingdom for 5 years

	1908	1909	1910	1911	1912
	£	£	£	£	£
Imports from Chile to U.K.	6,603,450	5,508,584	1,181,747	4,390,878	4,953,000
Exports to Chile from U.K.	3,866,346	3,612,022	4,479,106	6,139,414	6,165,000

Shipping and Navigation

The commercial navy of Chile consisted, in 1911, of 84 steamers of 69,604 tons net and 91 sailing vessels of 52,918 tons net. The shipping entered and cleared the ports of Chile in 1911 was as follows:—Entered 14,698 vessels of 26,164,068 tons; cleared, 11,649 of 25,941,888 tons.

The Chilean 'South American Steamboat Company,' with [] steamers for general navigation and 7 for [] navigation, receives [] annual subvention. The vessels of the company ply between South American Pacific ports, but do not [] go to San Francisco in California. Other steamship lines [] the coast are those of the Pacific Steam Navigation Company (British), with [] steamers, and the lines of 6 other British companies, the Kosmos Steamship Company (German), and the Roland line (German), the Italian Lloyd del Pacifico has begun a service between Genoa and Chilean ports.

Communications.

In 1910 there [] in Chile 15,000 miles of public road, and [] miles of navigable river.

In 1911 the total length of railway lines open for traffic [] 3,952 English miles, of which 1,979 belonged to the State. Mileage under construction, 1,828. Number of passengers carried (1911), 11,164,444. The trans-Andine railway has been completed by a [] from Los Andes to the summit of the Cordillera, joining [] of the same gauge (1 metre) from Mendoza. The whole line was opened for traffic in April, 1910. The Arica to La Paz railway [] opened on Aug. 6, 1911. It [] length of [] miles, [] which 127 [] in Chile and 139 in Bolivia. The cost was 2,450,000.

The post-office in 1911 dispatched 73,383,296 postal packets, of which

4,494,895 were sent abroad. There are 1,104 post offices, besides letter boxes. Revenue (1911-12), 3,426,946 pesos gold, expenditure, 4,269,960 pesos gold.

The length of telegraph lines at the end of 1910 was 22,884 miles, of which 16,518 miles belonged to the State. In 1911 there were 867 telegraph offices, 2,225,000 messages sent. The Telephone and railway companies have 8,000 miles of telephone line.

There is also a wireless telegraphy system with 13 stations.

Money and Credit.

In 1912 a law was promulgated establishing a Bank of Issue (Caja de Emisión). There are a number of joint stock banks of issue with agencies in Chile. Their joint capital amounted on September 30, 1911, to 188,199,628 pesos, and their reserve funds to 44,145,074 pesos. The largest of the banks is the Bank of Chile with a paid up capital of 1,000,000 pesos. The banks are required to guarantee their note issue by depositing gold, Government notes, or securities in the Treasury. There are also land banks which issue scrip payable to bearer and bearing interest, and lend money secured as a first charge on landed property and repayable at fixed periods. Several savings banks are established in the large towns. The 19 principal ones continued on July 1, 1912 deposits to the amount of 2,108,668. The public savings banks number 72, and on December 15, 1912, had 301,858 depositors.

The currency is mostly paper, the time fixed for the conversion of legal tender paper money has been deferred till January 1, 1915. Under the law which came into force on September 12, 1907, the President in 1907 issued 30,000,000 pesos in legal tender paper money. The paper peso in 1910 fluctuated between the value of 11½¢ and 10½¢.

Money, Weights, and Measures.

According to the Act of 1895, the coinage of Chile is as follows.—Gold coins are 20, 10, and 5 peso pieces, called respectively *Condor*, *Doblon*, and *Escudo*. The 10 peso gold piece weighs 5.99103 grammes .916 fine and therefore contains 5.49178 grammes of fine gold. Silver coins are the 1 peso, weighing 20 grammes, 400 fine, and the fifth, tenth, and twentieth of a peso. Bronze coins (95 of copper to 5 of nickel) are the centavo and 2½, 2-, and 1-centavo pieces. The monetary unit is the twentieth part of a condor or the (uncoined) gold peso, of the value of 1s. Its use is obligatory in transactions with the Customs Department of the Government, and serves, too, as the basis of perhaps the larger half of the trade in imported merchandise, though the actual gold coin is not usually tendered. A forced paper currency is in general use, the paper peso varying considerably in relative value, and representing (1918) about 10½¢. The English sovereign has a legal value of 134 pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

Diplomatic and Consular Representatives.

1. OF CHILE IN GREAT BRITAIN.

Envoy Extraordinary and Minister — Agustín Edwards.

First Secretary — Enrique Cusvas.

Secretary — Ricardo Peppes.

Military Attaché.—Lieut.-Col. Alfredo Schomneyr.

Naval Attaché.—Lieut.-Commander Alfredo Santander.

Financial Attaché.—Luis Waddington.

Attaché.—Julio Rittencourt.

Consul in London.—Vicente Echeverría Larraín.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

2. OF GREAT BRITAIN IN CHILE.

Envoy and Minister.—Vacant.

Secretary.—John C. T. Vaughan, M.V.O.

British Consul-General at Valparaíso.—E. G. B. Maxse, C.M.G.

There are Consular representatives at Coquimbo (C), Antofagasta (C), Arica (V.C.), Caldera, Coronel, Iquique (C.), Lota, Junín (V.C.), Pisagua (V.C.), Punta Arenas (V.C.), Talcahuano (V.O.), Tocopilla, Tomé.

CHINA.

(TA CH'ING KUO—CHUNG KUO.)

Government.

Up to February 12, 1912, China was a Monarchy; on that day it became a Republic.

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line; but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth in the canonized series of Ta Ch'ing Emperors. He was born on February 11, 1906, succeeded his uncle the Emperor Tsai t'ien on November 14, 1908, and abdicated on February 12, 1912. He retains the title of Manchu Emperor, but with his death the title will cease. For account of the Revolution of 1911, see STATESMAN'S YEAR-BOOK for 1912, pp. 699-701.

In the abdication edict (published February 15, 1912) the Emperor directed Yuan Shih-K'ai to set up a Provisional Republican Government.

The Provisional Government is composed of a President, a Vice-President, and a National Council, and the administration is carried on by the following Ministries:—(1) Foreign Affairs (*Wai Chiao Fu*). (2) Interior. (3) Finance. (4) Education. (5) War. (6) Marine. (7) Industry and Commerce. (8) Agriculture and Forestry. (9) Posts and Communications, and (10) Justice. The affairs of Mongolia and Tibet, formerly under the control of the Ministry of the Colonies, are now under the 'Department for Mongolia and Tibet.'

Provisional President of the Republic.—Yuan Shih-K'ai.

Provisional Vice-President.—Li Yuan-Hung (resides at Wuchang).

The Provisional President was elected on February 15, 1912, and on March he took the oath of office. His tenure of the Presidency will continue until the meeting of the National Convention, i.e. the Upper and the Lower Houses sitting together. In September, 1912, laws were promulgated governing the elections. The final elections for the Lower House were to have taken place on January 10, 1913, and the Parliament to meet on April 8, 1913.

The Parliament consists of a Senate (the Upper House) and a House of Representatives (the Lower House). One member of the House of Representatives nominally represents 800,000 head of population, but pending the taking of a complete census the number of members returned by the Provinces, including Mongolia and Tibet, is 596. The members of the Senate, elected by the Provincial Assemblies and various Electoral Colleges, number 274.

The Cabinet (*Kuo W'u Yuan*) is composed of the Premier, the heads of the various Ministries and the heads of the General Offices. On August 1, 1912, Dr. G. E. Morrison was appointed Political Adviser to the President of the Republic, and in March, 1913, Mr. F. J. Goodnow Constitutional Adviser.

The following are the members of the Cabinet (January, 1913) —

Prime Minister — Ping Chun

Minister of Foreign Affairs — Liang Ju hao

Minister of Finance — Hou Hsueh hai

Minister of Education — Fan Yuan lun

Minister of War — Tuan Chi jui

Minister of Justice — Hsu Shih yang

Minister of the Interior — Chao Ping chun

Minister of Agriculture and Forestry — Chen Ch'ou huen

Minister of Industry and Commerce — Lau K'uei yi

Minister of Communications — Chu Ch'ih Ch'ien

Minister of Marine — Liu Kuan hsung

Considerable discussion as to the seat of Government has resulted in the retention of Peking as the capital for the time being. The Government has not yet been recognised by the Powers.

The Republic has adopted a new flag which the old yellow dragon has been replaced by five stripes—red, yellow, white, blue and black—to denote the five races comprised in the Chinese people, Mongol, Chinese, Manchu, Mohammedan, and Tibetan.

LOCAL GOVERNMENT

Under the monarchy each of the 22 provinces was ruled by a Viceroy placed over one, two, or three provinces, or by a Governor over a single province, either under a Viceroy depending directly on the central government. He was assisted by various other high officials, such as the Treasurer, the Judicial Commissioner, and the Commissioner of Education. In August, 1910, in addition, a Commissioner for Foreign Affairs was appointed to each of the more important provinces, to rank immediately after the Treasurer—a step which marked the growing importance of foreign relations in Chinese eyes. Each province was subdivided into prefectures ruled by prefects, and each prefecture into districts, each with a district magistrate. Two or more prefectures were united into a tao, or circuit, the official at the head of which being called a Faotai. Each town and village had also its unofficial governing body of 'gentry'. An Edict of July 22, 1908, instituted Provincial Assemblies, and the first meetings were held on October 14, 1909.

The question of the system of Provincial Government to be adopted is the subject of much irritation, the provinces demanding a degree of autonomy which the Central Government is not prepared to grant them. Actually each of the Provinces is under a *Taipei* or Military Governor, who controls only a province (unlike the Viceroys of the late régime). Most of the *Taipei* are upstarts of the Revolution, whose occupation of the positions was formally recognised by the President in July, 1912. In each of the provinces of Shansi, Hupai and Szechuan there is also a Civil Administrator, who ranks with the *Taipei*. The other high offices in the Provinces are for the time being in a state of utter confusion, but in most Provinces the following officials are found under the title of another Civil Commissioner, Financial Commissioner, Judicial Commissioner, Commissioner of Education, Industrial Commissioner, and Commissioner for Foreign Affairs.

Regulations have been issued to the Provinces for the election by popular ballot of Provincial Assemblies to take the place of the old unrepresentative bodies, but there is great difficulty in enforcing them.

Area and Population.

The following table gives a statement of the area and population of the whole of the Chinese Empire according to the latest Chinese estimates —

	Area	Population
	Sq. miles	
China Proper	3,592,420	407,253,029
Dependencies—		
Manchuria	849,610	10,000,000
Mongolia	1,367,000	2,600,000
Tibet	41,200	1,000,000
Chinese Turkestan &c	750,740	1,200,000
Total	4,277,170	488,553,090

In 1904, Mr. Rockhill, the American Minister at Peking, after a careful inquiry, came to the conclusion that the number of the inhabitants of China Proper at the present time is probably less than 270,000,000. The Chinese Imperial Customs in 1911 put the total population at 437,996,000. The figures in the following table are those issued by the Chinese Government as the results of an estimate made for the purpose of the apportionment of the indemnity to the Powers. In the last column the seat of the Viceroy or Governor is named under the heading of Capital —

Provinces	Area English square miles	Population	Pop. per sq. mi.	Capital
Chihli	115,600	20,937,000	172	Pootungfu ¹
Shantung	55,970	18,247,000	325	Chi-nan

¹ Calculating = average of 5 persons to each family.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoski ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on the 2nd of June, 1895.

In November, 1897, the Germans seized the Port of Kiau-Chau, on the east coast of Shantung, and in March, 1898, obtained from the Chinese a 99 years' lease of the town, harbour, and district. By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienswan and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and all rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China leased to Japan the Liao-tung Peninsula, conceded to Japan the control of the railways as far as Chang-chun (Kwanchengtze), and the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce. In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate and maintain the "status quo" in Manchuria in accordance with the treaties and conventions already made. For such period as Japan should occupy Port Arthur, Great Britain was, by agreement with China, April 2, 1898, to lease Wei-Hai-Wei, in the province of Shantung. For defensive purposes Japan has, in addition, secured a 99 years' lease of territory on the mainland opposite the island of Hong Kong. The Chinese Government granted a 99 years' lease to France in April, 1898, a 99 years' lease to Germany in March, 1898, and a 99 years' lease to the United States in April, 1898.

lease of the Bay of Kuang-Chau-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor-General of French Indo-China.

Peking, the capital of China, according to a census undertaken by the Minister of the Interior (1912) gives the total population ■ 1,300,000. Tientsin, from 750,000 ■ 900,000; Canton and Ningan, each doubtfully credited with 1,000,000.

The Chinese population of the treaty ports is (1911) estimated ■ follows, mostly from Imperial maritime customs, partly from Consular returns:—

Ports	Population	Ports	Population
Antung	161,000	Hankow	850,000
Tatungkau	3,000	Ningpo	360,000
Nuchwang	61,000	Wanchau	100,000
Chinwangtao	3,000	Amoy	8,000
Tientsin	900,000	Fuchau	124,000
Chefoo	54,000	Amoy	114,000
Kiauchau	34,000	Swatow	60,000
Chungking	508,000	Canton	1,000,000
Changsha	250,000	Kongmun	82,000
Yochau	30,000	Sanichu	8,000
Ichang	41,000	Kiungchau	48,000
Shasi	90,000	Paihoi	20,000
Hankau	820,000	Wuchau	54,000
Kinkiang	36,000	Nanning	37,000
Wuhu	122,000	Lanchow	18,000
Nanking	267,000	Mengts	11,000
Chunkiang	184,000	Ssemao	15,000
Shanghai	651,000	Tongyueh	10,000
Szechau	500,000		

According to ■ estimate of the Imperial Customs authorities, in 1911 the total number of foreigners resident in China ■ 153,522, the nationalities most numerously represented being:—

Japanese	78,306	American	3,470	French	1,926
Portuguese	71,221	Portuguese	3,224	Other nationalities	2,362
British	10,266	German	2,756		

Religion.

Three religions ■ acknowledged by the Chinese ■ indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

The police authorities of Peking, about the end of 1908, made a census of the temples in Peking and of their inhabitants. The totals ■ follows: Temples of all descriptions, 1,049; Buddhist priests, 1,568; Taoist, 138; Nuns, 102; Students (Tu-ti), 934; Servants, 795; Lodgers in temples 15,445.

Under the monarchy the Emperor was considered the sole high priest of the Empire, and could alone, with his immediate representatives and ministers, perform the great religious ceremonies. No ecclesiastical hierarchy ■ maintained ■ the public expense, nor ■ priesthood attached to the Confucian religion. ■ Confucian is the ■ religion, if the respect paid ■ the memory of the great teacher can be ■ religion at all. But distinct and totally separate from the stated periodic observances of respect offered to the memory of Confucius as the Holy ■ of old (who ■ deified by Imperial

decreed of December 30, 1906), totally unconnected therewith, there is the distinct worship of Heaven (t'ien), in which the Emperor, the 'sole high priest,' worshiped and sacrificed to 'Heaven' every year at the time of the winter solstice, at the Altar of Heaven, in Peking. With the exception of the practice of ancestral worship, which is everywhere observed throughout the Empire, and fully commended by Confucius, Confucianism has little outward ceremonial. The study and contemplation and attempted performance of the moral precepts of the ancients constitute the duties of a Confucianist. Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism—originally a pure philosophy—having abjectly copied Buddhist ceremonial. The arrival of Buddhism 1,800 years ago. Probably all Chinese (not Mahometans or Christians) profess and practice all three religions. The bulk of the people, however, is Buddhist. There are probably about 30 million Mahometans, chiefly in the north west. Roman Catholicism has long had a footing in China, and is estimated to have about 1,000,000 adherents, with 32 vicariates apostolic besides those of Manchuria, Tibet, and Mongolia. Other Christian societies have stations in many parts of the country, the number of Protestant adherents being estimated at about 150,000. Most of the aboriginal hill tribes are still nature worshippers, and ethnically are distinct from the prevailing Mongoloid population.

Instruction.

For many centuries education of a purely Chinese type was general, and led through an intricate system of public examinations to all classes of employment under the State. Being confined in its scope to the study of Chinese classical literature, this form of education was gradually undermined by the influence of increasing intercourse with other countries, until it was completely swept away by an Imperial Decree of September 8, 1905, abolishing the historic system of examinations.

Since that date an enormous impetus has been given to the new educational movement, schools for the teaching of western learning springing up in every town throughout large portions of the Empire.

The Imperial University at Peking is a Government institution, where the English, French, German, Japanese, and Russian languages, and law, mathematics, chemistry, physiology, &c., are taught by European and Japanese professors (6 in 1910), the Chinese education of the pupils (200 in 1910) being entrusted to Chinese teachers (13 in 1910). By the energy of a British medical missionary an important medical school was founded at Peking in 1906 for the training of Chinese medical students. The expenses of the foundation were met by public subscription among Chinese and foreigners. The Government has undertaken to recognise the diplomas to be issued by this school of medicine, which is known as the Union Medical College, and has given an annual grant towards its expenses. At Tientsin there is a Chinese University with 5 foreign and Chinese professors, an Anglo Chinese College, an industrial school under Japanese tuition, general medical colleges, and private and public schools. In 1911 a scheme was set on foot in London to establish a modern university in Central China (at Wuchang). The scheme was promoted by committees representative of the Universities of Oxford, Cambridge, and London in this country, of the Universities of Harvard, Columbia, California, and Toronto in the United States of America. At Chefoo is an imperial college, and in the province are 10 other higher schools with 1,900 students and 78 teachers (63 being

Chinese) There are also private schools and mission schools with medical missionaries and hospitals, all of which are successful. In the provincial capitals colleges have been founded, while primary and secondary schools, mechanical, agricultural, police, and military schools are springing up all over China. In the Wuchan prefecture about 60 Government schools have recently been opened, local Buddhist temples having been confiscated and adapted to school purposes. There are numerous Catholic and Protestant mission schools and colleges at Shanghai and other ports, where the French and English languages and lower branches of western science are taught. It is estimated that altogether there are 38,000 educational institutions of all grades (military and naval schools included), to be found in China, with an aggregate enrolment of 880,000 students.

The engagement of America to return to China the surplus of her indemnity of 1900, amounting to about 10 million taels, produced an undertaking from China to spend an equal amount in sending students to the United States. Three such batches of students have already been sent.

Translations of foreign standard works are gradually reaching the most distant parts of the Empire, with the effect that the desire for western knowledge becomes year by year more evident among the people. The Chinese Government has of late years established schools with and without foreign instructors in connection with the different arsenals and military establishments at Tientsin, Peking, Nanking, Shanghai, Canton, and Fuchau, and steps are being taken for the gradual reorganization of military instruction.

Ten Chinese newspapers are published at Shanghai, and some 20 at Peking, while the number of native papers and the influence they wield is growing rapidly. Altogether there must be well over 200 daily, weekly, or monthly journals in China.

Justice.

Under the old system justice was very badly administered, so much so that the Treaty Powers had to claim the right of extra territorial jurisdiction over their citizens in China. The new regime has brought changes in the judicial system. For the present four kinds of courts are established: (1) The High Court of Justice (*Tu Li Yuan*) which is the Supreme Court of Appeal; (2) Provincial High Courts (*Kao Tung Shen Pan Ting*) in each of the provincial capitals; (3) District Courts, and (4) Courts of First Instance.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States District Court for China (established 1906).

The first trial by jury in the annals of China took place on March 28, 1912.

Finance.

A comprehensive statement of the revenue and expenditure of China is published officially, and such estimates as have been formed by Europeans are founded on financial reports of provincial governors published from time to time in the *Peking Times*.

According to the Budget for the year 1911 (China's first Budget), published (October, 1910) by the Ministry of Finance, the total revenue was to 297,000,000 taels, while the expenditure is 376,000,000 taels, leaving a

deficit of 64,000,000 taels. This was however, ruthlessly cut down by the Senate till a deficit of 80,000,000 taels converted into a surplus of 3,500,000 taels.

Chief Sources of	Taels	Chief Items of Expenditure	Taels
Land tax estimated produce	49,000,000	Repayment loans	56,600,000
Sea and salt taxes	47,000,000	Army and navy	88,000,000
Government lands	000	Communications	37,000,000
Likin	44,000,000		
Customs	42,000,000		

The tax in different provinces from 10 to 60 more per incidence theoretically fixed, but under other additional tax imposed on land Salt Government monopoly, all producers being required to sell to Government agents, who a price which the duty, re sell to merchants provided with 'salt warrants'.

Budget for 1912 — Revenue 268,000,000 taels, expenditure 268,311,000 taels.

The collection of the the Chinese foreign trade and the administration of the lights on the coast of China under the management of the Imperial Customs Service, which has a large staff of European, American, Japanese, and Chinese subordinates, the department being organised somewhat similarly to the English Civil Service. By Imperial Decree of May 9, 1906, the customs service, hitherto supervised by the Board of Foreign Affairs, was placed under the control of two Chinese high officials, forming a new department known as the Shui Wu Ch'u, or Revenue Council. Since November, 1901, the Native Customs at the Treaty Ports hypothecated for the service of the indemnity, have been under the Imperial Maritime Customs.

On November 22, 1912, an Audit Bureau was established, charged with auditing the expenditures and revenues of the Central and Provincial Governments. On Jan. 15, 1913, an inspectorate-general was established for the Salt Gabelle.

The receipts from maritime customs and from opium likin in the last 5 years were (in Haikwan taels).—

Year	Customs	Opium likin	Total	Total	Exchange
	Taels	Taels	Taels		Pence
1905	24,060,473	3,471,422	32,531,895	4,386,919	81½
1909	31,639,951	3,905,406	35,545,357	4,627,598	82½
1910	32,732,506	2,899,424	35,631,930	4,799,214	82½
1911	32,615,660	3,504,136	36,119,796	4,871,085	82½
1912	—	—	36,050,112	4,090,629	82½

The foreign debt secured on Imperial revenue outstanding December 31, 1911 is shown in the following table:—

No	Nature of Loan	Interest	Original Amount	Principal outstanding Dec. 1, 1911
1	(Hong Kong and Shanghai Bank)	7%	10,400,000 Tls	2,180,000
2	Gold Loan of (Hong Kong and Shanghai Bank)	6%	3,000,000	900,000
3	"Cassell Loan" of April, 1895 (Chartered Bank)	6	1,000,000	286,786

14	Honan Railway (Pekin Syndicate) Loan of 1905	5	700,000	700,000
15	Canton Kowloon Railway Loan, 1905 (Hong Kong and Shanghai Bank)	5	1,500,000	1,400,000
16	Tientsin Pukou Railway Loan, 1905 (Hong Kong and Shanghai, and German Banks)	5	5,000,000	5,000,000
17	Shanghai Hangchow Ningpo Kai'wei Loan, 1905 (Hong Kong and Shanghai Bank)	5	1,500,000	1,500,000
18	Gold Loan of 1905 (Peking Hankow Railway Redemption) (Hong Kong and Shanghai, and French Banks)	5	5,000,000	5,000,000
19	Hupeh Provincial Loan of 1905 (Hong Kong and Shanghai Bank)	7	500,000	400,000
20	Kirin Changchun Railway Loan, 1905 (Yen 2,150,000)	5 1/2%	250,000	220,500
21	Hennmintun Mukden Railway Loan, 1905 (Yen 920,000)	5 1/2%	125,141	24,180
22	Buchai Peking Hankow Railway Redemption Loan 1910 (London City and Midland Bank for Hunn, Fischer & Co)	7	150,000	150,000
23	Loan to Nanking Viceroy, 1910 (British, German, French)	7 1/2%	2,000,000	1,000,000
24	Loan to Shanghai Maotai, 1910 (All Foreign Banks)	5	3,500,000	3,500,000
25	Tientsin Pukou Railway Supplementary Loan, 1910 (Hong Kong and Shanghai Bank)	5 1/2%	3,000,000	2,000,000
26	Yokohama Specie Bank, Railway Supplementary Loan, 1910 (Yen 10,000,000)	5	1,020,012	1,020,012
27	Currency Reform Loan, 1911 (10,000,000) (American, British, German, French)	5 1/2%	10,000,000	10,000,000
28	German Railways Loan, 1911 (German, British, French, American)	5	6,000,000	6,000,000
29	Hupeh Prov Silver Loan, 1911 (British, German, French, American)	7	2,000,000	2,000,000
30	Kuangtung Silver Loan, 1911 (British, French, German)	7 1/2%	5,000,000	5,000,000
31	Various Loans, 1912 (British, Belgian, German, French, American, etc.)	5 1/2%	7,500,000	7,500,000

Total principal outstanding December 31, 1911 72,242,250, 11,080,000 taels and 5,000,000 dollars approximately equivalent to 74,446,750

In February, 1912, "The Chinese Government 5 1/2 per cent Reorganisation Loan of 1912" was issued. The amount was 25 millions sterling

Defence.

The task of erecting an army on modern lines was inaugurated by Imperial decree in January, 1905, and in October, 1907, an edict was issued ordering the formation of 36 divisions in the various provinces of the Empire by the principle of modified conscription (which in many provinces amounts to the voluntary principle owing to the dense population and the readiness to serve). The terms of service are 3 years with the colours, the first and 4 in the second reserve, 10 years in the first reservists called out for 3 days training every year, and men in the second reserve for a like period every other year.

These divisions, of about 10 combatants apiece, will eventually be comprised in two armies, a Northern and a Southern. In 1909 recruitment was furthermore commenced for a division of Imperial Guards. Fourteen divisions understood to be complete and the formation of 16 has been begun, a mixed brigade existing to represent each of them. A division consists of two brigades of infantry of 3 battalions, a regiment of cavalry, a regiment of artillery of 4 batteries, and a sapper battalion. Although the Guards Division, the 14 other divisions and the 16 mixed brigades ought to number about 250,000 men, it is estimated that the present strength does not exceed 180,000. The northern troops appear to be superior to the others both in training and armament. No organisation is as yet contemplated for the second reserve, which is supposed to form an army in second line. Besides the Lu Chun there are provincial troops still in existence which are the remains of a force which the Lu Chun is superseding, these provincial troops are being reorganised to form a police, they are under the control of the Viceroy of provinces and consist only of mounted troops and infantry.

At the present time the army administration consists of the General Staff and the Ministry of War in Peking and Military Councilors in various provinces. The total force, including provincial troops, police troops, &c. is variously estimated as 300,000 to 500,000 and it probably is nearer the latter figure. Pay is considerably in arrears, efforts at disarmament are met with great opposition and in many districts the army occupation has turned to its own profit the local sources of revenue.

The Chinese navy consists of the 4,300 ton cruiser *Hai Chi*, (29 in guns) of 47 knot original speed, three 3,000 ton cruisers *Hai Feng*, *Hai Sheng* and *Hai Shen* (36 in, 84 in guns) and 195 knot original speed, a few miscellaneous vessels, some old torpedo boats, and some modern gun boats built in Japan. Two submarines of 2,750 tons each (*Ying Wei* and *Chao Ho*) built in England in 1911, and (*Fer Hung*) in America. Principal armament of all 26 in and 4 in. Also 2 gunboats (displacement 780 tons) built in Japan in complement to 12 others constructed there 1905-08. Various more extensive naval programmes have from time to time been mooted but none of them have as yet materialised. The number of the personnel cannot be exactly stated, but it is worthy of mention that both the French and the Japanese who have fought against them, are unanimous in considering the Chinese blue-jacket to be a very high asset.

Production and Industry.

China is essentially an agricultural country, and the land is in the hands of the peasant. The land is held by families on the payment of an annual rent. The holdings are in general small; the implements are primitive, irrigation is in a backward state. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Wheat, barley, and millet and other cereals, with peas and

beans, are chiefly cultivated in the north, and rice in the south. Sugar, indigo, and cotton are cultivated in the provinces. Cotton production is the basis of the middle and lower Yangtze, the quantity produced cannot be estimated. At the end of 1910 there were 38 mills in China, of which half were in Shanghai, with a total of 903,416 spindles, 3,805 looms, and their annual output given as 273,000,000 lbs. of yarn and 45,600,000 yards of sheetings and drills. Under restrictive measures introduced in 1911 the cultivation of opium poppy is being gradually contracted. Other decrees followed with the purpose, and the anti-opium campaign culminated on May 8, 1911 in the signature of an agreement with the British Government whereby the import of Indian opium into China was to be reduced in the proportion of the diminution of the cultivation of native opium, the importation and cultivation to cease in 1917. A clause inserted providing that Indian opium shall not be conveyed into any province which shows that it has effectively suppressed the cultivation and import of native opium. A further important concession to the desire of the Chinese Government to restrict opium made by the British Government in the provision for ear-marking a restricted number of chests of Indian opium for shipment to China, the number of permits being limited in 1911 to 30,600 and progressively reduced by 5,100 in each successive year during the remaining six years. Tea is cultivated exclusively in the west and south, in Fu-Kien, Hupoh, Hunan, Kiang-si, Cheh-Kiang, Nankwei, Kwangtung, and Szechwen. The exportation of tea (especially black leaf), which fell off owing to the competition of Ceylon and Indian teas, has tended to increase in recent years. In 1911, 1,950,404,000 lbs. (valued at £5,161,800) were exported. The culture of silk is more important than that of tea. Silk culture in China, however, is not in a prosperous condition. Still 37 per cent. of the world's supply of silk is from China, the serious rivals being Japan with 28 per cent. and Italy with 25 per cent. An important feature in the development of the Chinese industries is the erection of cotton and wool mills, and of filatures for winding silk from cocoons in Shanghai, Canton and elsewhere. At Shanghai a new cotton-spinning and weaving factory with 20,592 spindles, was opened by a Japanese company. It is reported that a total of 11 mills with 932,506 spindles and 4,635 looms were established in China on January 1, 1912. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. At Hanyang, near Hankau, are large Chinese iron-works, supplied with iron from mines at Ta-yeh, about 100 miles distant. These works are turning out about 100 steel rails a day, but a large amount of machinery was destroyed during the Revolution, and the works are not yet in proper running order.

Many of the 18 provinces and the 13 provinces of Manchuria contain coal, and China may be regarded as one of the great coal countries of the world. The principal collieries worked by foreign methods are the following:—Kaiping-Lanchow mines (joint Japanese and Chinese), 1,452,546 tons in 1911; Fushan mines (Japanese), 830,300; Peking Syndicate mines (British), 417,196; Pinghsiang mines (Chinese), 640,000; Hungshan and Fangtze mines (German), 466,553; Ching Ching mines (Chinese), 150,000; total (1911), 9,897,973 tons. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is ancient, and iron (found in conjunction with coal) is worked in Manchuria. The Ta-yeh mines have (in consideration of a loan of 3,000,000 yen at 6 per cent.) been mortgaged to a Japanese syndicate for 20 years, the Han-yang foundry engaging to buy from 70,000 to 100,000 tons of iron annually during that period at prices already fixed in 1915. On the Upper Yangtze a

foreign syndicate is working for petroleum. Copper ore is plentiful in Yunnan, where the copper-mining industry has long existed; Kinkiang rich veins of copper being worked, and the city of Mengtaz tin, lead, and silver found. Antimony exported from Hunan. In Tam Ohiu (Hainan) mining for tin and gold has been begun under the Chinese Board of Works; silver, copper, and lead are known to exist in the island. Many mining concessions have been granted, but the majority of cases, the foreign concessionaires have failed to make any practical use of the concessions granted to them, although the first 3 mines named above are all foreign enterprises.

The mineral exports of China in two years are given as follows:—

Exports.

	Tons		Tons
Antimony			
Regulus and refined	6,345	83,403	6,375
Ore	5,670	60,171	6,704
Iron:			
Pig and manufactured	64,346	213,097	69,705
Ore	180,140	77,704	110,531
Lead:			
Ore	5,004	16,968	5,325
Quicksilver	44	9,297	15
Tin in slabs	6,407	46,921	5,960
Zinc	300	2,604	699
" Ore	3,641	1,581	4,700

Tin is the most important mineral export. It is mined in Yunnan, and through Mengtaz it reaches Hong Kong, whence it is shipped to foreign countries. Coal exports are increasing rapidly, amounting in 1911 to 326,610 tons, value 256,640*l*. as against 318,124 tons, value 229,602*l* in 1910.

Commerce.

Foreign trade of China (exclusive of bullion):—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Net Imports	57,664,222	52,630,730	54,477,600	62,191,472	63,415,180
Exports	12,061,409	26,348,650	11,179,000	51,278,634	50,808,081

Trade by countries in 1911 —

	Imports from	Exports to	Total Trade
	£	£	£
United Kingdom	12,110,791	2,338,409	14,449,200
Hong Kong	19,059,611	18,057,614	37,117,225
India	4,986,098	762,190	5,748,288
Amoia and Siberia	2,324,671	6,828,114	9,152,785
France	466,876	1,264,154	1,731,030
Germany	3,023,468	1,897,779	4,921,247

Japan	10,704,661	8,953,937	19,658,598

The imports into China from Hong Kong come originally from, and the exports from the colony are further carried to, Great Britain, Germany, France, America, Australia, India, the Straits, and other countries.

The share of the British Empire in the foreign trade of China in 1911 was 43.47 per cent, Japan coming second with 19.47 per cent, and Germany third with 11.78 per cent.

The chief imports and exports are as follows (1911) —

Imports	£	Exports	£
Opium	1,497,064	Beans and beancake	6,462,091
Cotton goods	19,360,511	Cotton raw and waste	2,408,104
Woollen goods	2,470,994	Grain, vegetable	1,554,461
Metals	2,500,511	Synthetic goods	1,580,461
Cereals etc.	2,171,067	Silk raw & manuf'd	12,477,429
Cigarettes	1,023,000	Cow and buffalo hides	1,175,551
Coal	1,129,303	Skins and furs	1,048,176
Oil kerosene	4,441,111	Wool	1,355,511
		Ten	161

Of the tea in 1911, 15,541,466 lbs. were exported to Hong Kong, 19,698,993 lbs. to the United Kingdom, 110,246,465 lbs. to Russia and Siberia, and 17,486,000 lbs. to the United States. The total export of tea to foreign countries has been as follows — 1885, 283,833,466, 1895, 248,767,333, 1905, 182,573,064, 1911, 195,040,400 lbs.

China has besides extensive coasting and river trade, which, by treaty, is largely carried on by British and other foreign as well as Chinese vessels.

The commercial treaty of 1858 provided for most favoured nation treatment in the case of Great Britain, that of 1902, in the case of British possessions, and also made provision respecting investments by Chinese in Chinese companies, and by British in Chinese companies. Dairen is the customs port for all the leased territory and has out stations at Kinkow, Pulantien, Pitswo, and Port Arthur. Net Value of Trade at each Port in 1911 —

Shipping and Navigation.

During 1911, 193,398 vessels, of 85,771,973 tons entered and cleared Chinese ports. Of these 1,373 of 712,161 tons, were American; 28,885 of

37,712,440 tons, British ; 2,602 of 3,154,157 tons, French ; 4,348 of 6,849,069 tons, German ; 21,259 of 19,172,727 tons, Japanese ; 1,744 of 1,237,027 tons, Russian ; and 130,828 of 17,881,542 tons, Chinese. Of vessels engaged in foreign trade only the entrances during the year numbered 86,418 of 12,833,667 tons, and the clearances 35,748 of 13,035,443 tons.

The nationality of the vessels (direct foreign trade) ■■■ mainly as follows :

Nationality 1911.	Entrances		Clearances

Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and all are badly kept, ■ vast internal trade is carried ■ partly over them, but chiefly by means of numerous canals and navigable rivers. In February, 1898, the Chinese Government agreed that all internal waterways should be open both to foreign and native steamers.

In 1911 there were 1,020 vessels registered for inland water navigation ; of these, 189 ■ foreign and ■ were under the Chinese flag.

In 1911 an Edict was issued commanding that all trunk lines of railway should revert to Government and that provincial control should ■■■ The construction of the Canton-Hankow and Szechuan-Hankow lines is ■■■ in the hands of the Central Government, and ■ loan of 3,000,000*l.* has been raised specially for this purpose. At the end of 1911 there ■■■ open to traffic about 5,500 miles of Chinese railway, not including the Russian and Japanese systems ■ Chinese territory in Manchuria, while ■■■ than 2,800 miles of ■■■ trunk lines ■■■ under construction. The following statement shows the nationality of the companies which have financed various lines, the approximate length of projected railways, and the length of main line open :—

The imperial Chinese telegraphs are being rapidly extended all over the Empire. They now connect all the principal cities of the Empire, and there are lines to all the neighbouring countries. The telegraph lines (end of 1910) had a length of 45,260 kil., with 80,407 kil. of wire; there were 1,000 offices. The administration is completely under government control, partly Imperial and partly provincial.

The postal work of the Empire, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By 1906 of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July 1911. The work of the Post Office extends over the 22 Provinces and Manchuria, which have been divided into postal districts, or sub-districts. In 1911 there were 6,201 post offices in the country. The number of letters, cards, &c., was 321,000,000, and parcels 3,037,000; total 324,037,000, as against 358,768,000 in 1909. China has postal conventions with India, France, Japan, Germany, Hong Kong, Natal, Russia, through intermediary postal communities with postal union countries, the disadvantage of not belonging to the union being diminished.

Money, Weights, and Measures.

MONEY.

The sole official coinage and the monetary unit of China has been hitherto the copper cash, of which about 1,220 = 1 haikwan tael, and about 35 = 1 penny. A coin recently issued in great numbers by the provincial mints is the 'hundredth of a dollar.' This coin, of which the issue to the end of 1906 is computed to have been 12,500,000,000, has been readily accepted, but latterly at rates corresponding closely to the intrinsic value of the metal in it. The face value of the coin is about $\frac{1}{100}$ d.; the intrinsic worth about $\frac{1}{100}$ d. The $\frac{1}{100}$ of silver bullion, or sycee, is the medium of exchange, is not now much less common, but the circulation of the dollar is certainly extending. The haikwan (or customs) tael is equal in value in 1911 to 82 $\frac{1}{100}$ d.

The dollar (of the same weight and touch as the Mexican dollar) is now current in all the provinces, even in out-of-the-way districts. Notes for cash are also much in use.

In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October 1908, commanding the introduction of a uniform tael currency, of which the unit must be a silver tael coin of '98 touch weighing 1 K'up'ing or Treasury-scale tael or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (yuan) of '90 touch and weighing '72 Treasury-weight tael as the unit of currency. The touch and weight of the silver subsidiary coins (50c., 25c., and 10c.) was also definitely specified, while provision was made for further subsidiary coins (5c. nickel, 2c., 1c., $\frac{1}{2}$ c., and $\frac{1}{10}$ c. copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but very few are yet in circulation. By the law of May, 1910, the several mints have been brought under the Central Government, and longer practically private ventures of local viceroys. All coins are now minted at the Imperial Mint in Tientsin and at branch mints in Hankow, Chengtu and Mukden. The K'up'ing tael weighs 575.642039 grains, somewhat less than the Haikwan tael which weighs 581.47 grains. A decree for uniform weights and measures was issued Oct. 9, 1907, whereby the K'up'ing or Treasury scale was made the standard weight.

10 <i>Sai</i>	= 1 <i>Hu</i> .
1 <i>Hu</i>	= 1 <i>Hao</i> .
10 <i>Hao</i>	= 1 <i>Li</i> (nominal cash).
1 <i>Li</i>	= 1 <i>Fên</i> (Candaren).
10 <i>Fên</i>	= 1 <i>Chien</i> (Mace).
1 <i>Ch'ien</i>	= 1 <i>Liang</i> (Tael) = $1\frac{1}{16}$ avoirdupois by treaty.
1 <i>Liang</i>	= 1 <i>Chin</i> (Catty) = $1\frac{1}{16}$ lbs. " "
100 <i>Chin</i>	= 1 <i>Tan</i> (Picul) = 133 $\frac{1}{16}$ lbs. " "

CAPACITY.

10 <i>Ko</i>	= 1 <i>Sheng</i> .
10 <i>Sheng</i>	= 1 <i>Tou</i> (holding from 6 $\frac{1}{2}$ to 10 <i>Kin</i> of rice and surging from 1.13 to 1.63 gallon). Commodities, even liquids, such as oil, spirits, &c., are commonly bought and sold by weight.

LENGH.

10 <i>Pi</i>	= 1 <i>Ts'un</i> (inch)
10 <i>Ts'un</i>	= 1 <i>Ch'ih</i> (foot) = 14 English inches by treaty
10 <i>Ch'ih</i>	= 1 <i>Chang</i> = 2 fathoms
1 <i>Li</i>	= approximately 3 cables

In the tariff settled by treaty between Great Britain and China, the *Ch'ih* of 14½ English inches has been adopted as the legal standard. The standards of weight and length vary all over the Empire, the *Ch'ih*, for example, ranging from 9 to 16 English inches, and the *Chang* (= 10 *Ch'ih*) in proportion, but at the treaty ports the of the foreign treaty standard of *Ch'ih* and *Chang* is becoming common.

Diplomatic Representatives.

I OF CHINA IN GREAT BRITAIN

Envoy and Minister—Liu Yuh lin
Councillor of Legation—Sir John McLeavy Brown, C. M. G.
Secretary—P. C. Tyan
Second Secretary—Yuen Ksh Shuen
Attache—Tung Chen lin, Lao Tu ch ung, Lao Ming vi
Commercial Attache—Tung Y. huau

II OF GREAT BRITAIN IN CHINA

Envoy and Minister—Sir John Jordan, G. C. I. E., K. C. B., K. C. M. G.
 Appointed October 26, 1906
Councillor of Legation—Vacant
Secretaries.—Hon. F. S. Scott, M. V. O., T. H. Lyons and Sir S. Head, Bart.
Naval Attache—Capt the Hon. H. G. Bland, M. V. O., R. N.
Military Attache—Major D. S. Rolleston
Chinese Secretary—S. Barton
Commercial Attache—William P. Kai
Judge—Sir H. W. de Saumarez (at Shanghai)
Assistant Judge—F. S. A. Bourne, C. M. G.
 There are British Consular representatives at Peking, Amoy, Canton (C. G.), Changsha, Cheloo, Cheng-tu (C. G.), Chinkiang, Chungking, Fanchau, Hangchau, Hankau (C. G.), Harbin, Ichang, Kiukiang, Kuangchau, Mukden (C. G.), Newchwang, Nanking, Pakhoi, Shanghai (C. G.), Swatan, Tung-Yueh, Tien-tsin (C. G.), Wuchau, Wuhn, Yunnan-fu (C. G.).

Chinese Dependencies ■ Frontier Provinces

Manchuria, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 365,610 square miles and a population probably of about 20,000,000, but variously estimated from 5,750,000 to 29,400,000. It consists of 11 provinces, Sheng-Kung or Feng (area, 56,000 sq. miles, pop. 10,312,241), capital Mukden, Kirin (105,000 sq. miles, pop. 6,000,000), capital Kirin, and Heilung-chiang on the Amur province (203,000 sq. miles: pop. 1,500,000) with Tartarbar for its capital. The population given above for Fengtien provinces is from an Chinese statement of November, 1908, which also gives its agricultural population as, 2,520,145, and its cultivated area as 4,333,333 acres.

The chief towns — Mukden, the capital, with about 158,132 inhabitants; Newchwang (50,000) standing about 30 miles up the Liao river, the mouth of which is the port of Ying-tse (60,000) often called Newchwang. Besides Newchwang, Mukden, An-tung, Tatung-kau, Tiehling, (28,492) Tungchiangtsu, (7,299) and Fakumen, (19,432) are open to commerce. Other important towns — Hsin-min-fu (20,000), Liao-yang (40,000), Feng-hwang-cheng (25,000). In Kirin province is the town of Chang-chun (Kwangchengtze), with 80,000 inhabitants. The chief town in Heilung-chiang province is Tsitsihar (30,000). In Manchuria, however, there are many other populous towns situated on the old trade routes.

The Manchu population, especially in the south, has been largely absorbed by Chinese immigrants, so that the southern provinces, being now connected with China by railway as well as by maritime trade, has become closely identified with distinctively Chinese interests. The lease of the southern extremity of the Liao-tung peninsula, containing Port Arthur, Talien-wan and other ports with the adjacent waters and islands, by treaty of December 22, 1905, made it over to Japan, and various concessions were granted to control and construction of railways.

The Manchurian railways extend from Shan-hai-kwan on the frontier of Chihli northwards to Hsin-min-tun and Mukden, and round the Liao-tung gulf to Port Arthur which is directly connected with Mukden by the South Manchurian Railway (Japanese line) running northwards to Harbin, 615 miles from Port Arthur. There is a branch line of 75 miles from Chang-chun to Kirin. A line 16 miles in length of a metre gauge has been laid (1908) by local Chinese capital from Tsitsihar to Ang-ang-ch'i for commercial purposes. A line from Sianmin Fu to Tsitsihar Fu (630 miles) is in project, to be surveyed in 1910. At Harbin the railway joins the line which runs for a length of 960 miles over Manchurian soil and connects the Siberian frontier with Vladivostok. The new town, Harbin, on the Sungari river, at some distance from the old town of the same name, is rapidly extending.

Early in 1913 the Chinese Government created two new official posts in Manchuria, that of Commander-in-Chief of the Chinese troops and that of Government Resident.

Tibet, extending from the Pamir region eastwards between the Himalayan and Kwen-lun mountains to the frontiers of China, has an area of 468,200 square miles with a population estimated at 3,500,000. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two Ambans who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,000, provided by China, was mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) in Lhasa. He acts through a minister or regent (nomo-khan), appointed for life by the Chinese Government from among the chief Tibetan Lamas, and he is assisted by five ministers. One Tibetan frontier region was transformed into a Chinese province with Batung for its capital, and a Chinese military force having taken and pillaged Lhasa, the Dalai Lama fled to India. He was thereupon deposed by the Chinese, who unsuccessfully attempted to adopt measures for ascertaining and appointing a proper successor to his office.

prevailing religion is Lamaism, a corrupt form of Buddhism, but along with there is Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In favoured regions fruits, including peaches and grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier.

For the removal of hindrances to the Indian trade a treaty was made with China (as suzerain of Tibet) in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier; for marts at Yatung, Gyantze, and Gartok for Tibetan and British merchants; for the demolition of forts on the trade routes; for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff; for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. The Tibetans have paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumbi valley by the British began in February, 1906. Further, no Tibetan territory may be sold, leased, mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the sanction of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

In March and April, 1912, Presidential Orders were issued which claimed to regard Tibet and Mongolia as integral parts of China, and proposed to put them on exactly the same footing as the provinces. H.M. Government demurred to this so far as Tibet was concerned, and insisted on the fact that, as laid down in the Lhasa Convention of 1904, Great Britain recognised only China's suzerainty and not her sovereignty in Tibet.

The Chinese forces in Lhasa having been besieged there by the Tibetans, were eventually allowed to march out without their arms, and were sent back to China via India. In March, 1913, all Chinese officials, civil and military, had evacuated Tibet.

In the meantime, a treaty between Tibet and Mongolia was signed on January 21, 1912, the principal provisions of which being that each country recognises the independence of the other. They both undertake to promote the spread of Buddhism, and to open their frontiers for mutual trade and intercourse.

The province of *Sia-Kiang*, consisting of Chinese Turkestan, Kulja,

Zungaria, and outer Kan su, comprehends all the Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is under the control of a Military Governor, being now regarded as a separate province. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of many races, mostly mixed Kirghiz, Persian, Kalmuck and Chinese. The chief towns are Kashgar, Yarkand, Khotan, Kuriya and (towards the north) Aksu. The country is administered under Chinese officials, residing at Urumtsi, the subordinates being usually natives of the country. In some regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised, and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found.

Mongolia

Ruler — Djebroun Damba Khutukhta

The Cabinet is made up as follows —

President of the Council of Ministers of Mongolia — Sun nien Khin Ninnan Souioun

Minister of the Interior — Tchin Sousonkton Tsun van Luna Tchin Tchimet

Minister of Foreign Affairs — Datsin van Handa dajai

Minister of War — Tsdem Dala Tsun van Gombo Souioun

Minister of Finance — Touchetou Tsun van Tchakdoijah

Minister of Justice — Radem Tsun van Namvatai

The vast and indefinite tract of country called Mongolia stretches from the Kinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,367,600 square miles, and its population about 2,600,000. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. The chief town and centre of population is Urga, about 170 miles due south of Mumaichen, which is a frontier emporium for the brisk trade carried on with China. The Gobi Desert goods being easily transported to the Siberian frontier town of Khabkha, which stands about 100 miles from the south end of Lake Balkal. The imports to Urga amounted to about 1,560,000/ , and the exports to about 990,000/. The chief exports are wool, skins and hides, furs, horns, &c. The commerce between Mongolia and China will no doubt be stimulated by the projected railway from Kalgan to Urga (530 miles) and the Urga Khabkha railway (170 miles), both being Chinese undertakings.

During the Chinese Revolution an independent Government was set up in Outer Mongolia under the leadership of the Hutukhtu (living Buddha) of Urga. The Chinese Government having despatched forces to reduce Outer Mongolia, on account of the frequent representations of the Russian Government, the latter in October despatched to Urga an envoy, who has recognised on behalf of his Government the independence of Outer Mongolia. On Nov 3rd, 1912, a Russo Mongolian Agreement was concluded, by which the Russian Govern-

COLOMBIA.

(LA REPÚBLICA ■■■ COLOMBIA)

Constitution and Government.

The Republic of Colombia gained its independence of Spain in 1819, and was officially constituted December 27, 1819. It split up into Venezuela, Ecuador, and the Republic of New Granada, February 29, 1832. The Constitution of April 1, 1859 changed the Republic into a confederation of eight States, under the name of Confederation Granadina. On September 20, 1861, the convention of Bogotá brought out the confederation under the ■■■ name of United States of New Granada, with nine States. On May 8, 1863, ■■■ improved Constitution was formed, and the States reverted to the old name Colombia—United States of Colombia. The revolution of 1885 brought about another change, and the National Council of Bogotá, composed of three delegates from each State, promulgated the Constitution of August 4, 1886. The sovereignty of the States was abolished, and they became simple departments, with governors appointed by the President of the Republic, though they have retained some of their old rights, such ■■■ the management of their own finances. In 1900, a new territorial division of the country was adopted, 15 departments and ■■■ "Intendencias" being formed.

The legislative power rests with a Congress of two Houses called the Senate and the House of Representatives. The Senate contains 34 senators elected indirectly by electors specially chosen for the purpose. The House of Representatives consists of 92 members elected by the people in 24 electoral circumscriptions (one for every 50,000 of population), but in each of the 4 intendencias appointed by the Intendente, his secretary and 3 inhabitants chosen by the municipal council of the capital of the intendency. Senators are elected for ■■■ years, Representatives for 2 years.

The President ■■■ elected by direct vote of the people for a term of 4 years, and his salary is 9,600 gold dollars per ■■■■■. Congress elects, for a term of one year, two substitutes, one of whom, failing the president during ■■■ presidential term, fills the vacancy.

President of the Republic—Señor Carlos E. Restrepo, appointed July 15th, 1910.

The ministries are those of the Interior, Foreign Affairs, Finance, Treasury, War, Public Instruction, and Public Works.

■■■■ Population.

The ■■■ of the Republic is estimated ■■■ about 461,600 square miles. According to a ■■■ taken in 1870, the population, including ■■■ of Panama, ■■■ that date was 2,951,323. The ■■■ and population of the 15 departments and ■■■ intendencias ■■■ according to the ■■■ ■■■ 1912, as follows:—

	Area sq. miles	Popula- tion (1912)	Per sq. mile		Area sq. miles	Popula- tion (1912)	Per sq. mile
Antioquia	22,752	740,937	32	Cartagena with	—	—	—
Atlántico	1,008	114,887	114	Comisarias	—	99,676	—
Bolívar	21,320	425,975	19	Chocó	—	60,663	—
Bolívar	16,480	583,469	35	Guajira	—	58,018	—
Cauca	7,850	541,498	46	Meta	—	29,299	—
Cauca	20,403	211,756	10	Total	—	—	—
Córdoba	8,046	715,670	88	Intendencias	258,840	242,646	0.9
Huila	8,100	155,101	19				
Magdalena	19,160	140,106	7				
Panamá	30,760	400,090	13				
Panamá	9,360	238,916	31				
Santander	17,665	400,684	23				
Norte Santander	6,355	204,391	32				
Tolima	10,090	282,420	28				
Valle	3,897	317,167	55				
Total Departments	202,760	3,328,416	16	Grand Total	401,600	1,476,961	11

This excludes about 30,000 uncivilised Indians. On December 4, 1903, Panama asserted its independence and was formed into a separate Republic, but Colombia has not yet recognised the independence of Panama.

The capital, Bogotá (pop. 121,257), lies 8,600 feet above the sea. The chief commercial towns are Barranquilla (48,907), connected with the coast by 17 miles of railway; Cartagena (34,889); Medellín (70,547) a mining centre; Cali, 26,425; Bucaramanga (19,735); Cúcuta (20,364), the last two being coffee centres.

The boundary line with Brazil is still undefined, and there are difficulties with Peru and Ecuador which have been submitted to the decision of the King of Spain under the convention of September 12, 1905.

Religion and Instruction

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 a-piece. One of the suffragan archbishops is Panamá, belonging to ecclesiastical province of Cartagena, and also to the Republic of Panamá. Other forms of religion being permitted, so long as their exercise is 'not contrary to Christian morals or to the law.' There is a Ministry of Public Instruction which has the supreme direction of education throughout the Republic, and is divided into 5 sections: primary, secondary, professional, artistic and industrial. Education is stated to be in a satisfactory condition, there being 4,371 schools with 272,873 pupils in 1912. Nearly all the schools for secondary education, maintained and assisted by the nation, are entrusted to religious corporations of the Catholic Church. There are in the capital Faculties of letters and philosophy; of jurisprudence and political sciences; of medicine and natural sciences; and of mathematics and engineering. For the working class there are many schools of trades directed by the Fathers. There are other schools of colleges open, under religious orders, and the school of the Sisters has reopened. Normal schools have been established in 11 departments, and schools of mining in 10. Pasto. Primary education is gratuitous but not compulsory. The Republic spent on education (1912), \$41,460. The Republic has a national library, museum, and observatory.

Revenue and expenditure for 4 years in gold pesos -

Year	Revenue	Expenditure
1910	881,500	10 981,500
1911	13 466 119	13 583 119
1912	12,045 141	12,500 000
1913	14 070 612	14 060,294

The internal debt consists of the consolidated internal, amounting July 1st, 1912, to 5,476,888 silver pesos, and the floating, amounting 2,756,545 pesos gold. This is exclusive of the paper money in circulation, amounting in 1912 to more or less the value of 10,000,000 pesos gold.

The external debt, mostly due to British creditors, amounted, with arrears, to 8,514 492½, the nominal value of the debt being 2,700,000. A settlement was arrived at in that year whereby bonds issued for 2,687,800. Under arrangement of unpaid coupons exchanged for interest bearing certificates. Of 351,000, the amount of those, 70 per cent has been paid off, and payment of the remaining per cent contingent on Colombia receiving compensation from the United States in respect of the cession of Panama. On March 30th, 1910, the total outstanding was 2 660,400, and from April, 1911, to January, 1912 it was reduced to 2,496 600. In addition to the external debt of 1908 there are guarantee railway debts amounting to 1,469,400.

The strength of the national army is determined by Act of Congress. The peace footing was fixed at 7,000 in 1910. After the war the actual strength was reduced to 10,000 men, and in 1905 to 5,000, many of these being engaged in making or repairing highways. There are 6,000 men. Every able bodied Colombian is liable to military service.

The Colombian navy consists of the following vessels.—On the Atlantic, 1 cruiser, on the Pacific, 2 cruisers, 2 gunboats, 1 troopship, 1 tug, on the river Magdalena, 1 gunboat. The ships are all old, and of little or no fighting value. It is very doubtful if they could ever get to sea.

Production

Colombia is rich in minerals, and gold is found in all the departments. Gold produced in 1907 to the value of 668,501½, and silver to the value of 142,136. In 1911, gold exported to the value 3,751,833 gold pesos (bullion, 2,454,894, and gold dust, 1,296,939). In 1911 the value of export of mineral products amounted 4,507,762 dollars gold. In Antioquia, Cauca, Bolivar, Tolima, and Magdalena. Other minerals, less worked, are copper, platinum, lead, mercury, cinnabar (14 mines), manganese (7 mines), emeralds (32 mines). The emerald of Cosquez and Cosquez belong to the Government. No statistics of their output published, but they are said to yield 1,000,000 pesos worth of per year. Nearly the emeralds mined to day from Colombia. The Pradera works north-east of Bogotá have a capacity of 30 pig iron daily, and manufacture wrought iron, rails, mills, castings, &c. in the immediate neighbourhood. Coal, iron, limestone, sand, manganese, and gravel deposits, which

render the locality highly favourable for the development of metallurgical industries. The salt mines at Zipaquirá, north of Bogotá, are a government monopoly and a great source of revenue, supplying most of the interior departments. The maritime departments use the salt evaporated at the numerous natural salt pans along the coast. In several of the departments there are extensive deposits of coal and petroleum. The Government has undertaken the working of the coal mines at San Jorge, which had been abandoned. On the coasts there are valuable pearl fisheries which the Government desires to concede for a term of years.

Only a small section of the country is under cultivation. Much of the soil is fertile, but of the present value, from want of means of communication and transport. Coffee is the staple product, but transport is difficult. In 1910-11, 12,641,186 kilograms of coffee were exported, and in 1911-12, 12,237,875 kilograms. Tobacco is grown and shipped to Germany. Cotton is produced in Magdalena, Bolívar, Antioquia and Santander, and is beginning to be cultivated in Boyacá and Cundinamarca. Cocoa, sugar, vegetable, ivory, and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, and near Santa Marta a large amount of capital is being invested in this industry. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant in the Magdalena river, but little or no wood of any sort is exported. The Panama hat industry is making great strides; some 86 per cent. of the hats manufactured are sent to the United States. The greatest industrial development was at Barranquilla, where several new factories were opened, including two match factories, a glass factory for the production of all kinds of glassware (no flat glass), a shoe factory, a nail factory, a cotton-goods factory, a cotton gin, and an ice factory. There is a considerable export trade in cattle.

In 1906, concessions of land embracing about 145,000 square miles in the rubber region were granted for 25 years. The concessionaires are to pay 1 gold dollar on every 100 lbs. of rubber gathered; they are to establish agricultural colonies, to provide a steamboat service on the rivers, and to construct mountain roads.

Commerce.

In 1911 the imports amounted to 18,108,863 pesos gold, and the exports 22,375,899. In 1910 the imports amounted to 17,385,039 pesos gold, and the exports to 17,786,806. The principal articles of export (1911), coffee, 9,475,456 gold pesos; cocoa, 139,324; bananas, 2,172,582; rubber, 900,886.

About 67 per cent. of the coffee exported from Colombia goes to the United States; most of the tobacco to Germany; cotton to Liverpool or Havre. The chief imports are flour, lard, petroleum, and cotton goods from the United States; rice from Germany; and cotton goods from Great Britain.

Total trade between United Kingdom and Colombia for 5 years:--

	1907	1908	1909	1910	1911
Imports from Colombia into U.K.	408,118	480,382	764,902	1,041,161	1,046,215
Exports to U.K.	1,012,782	885,185	885,185	1,190,760	1,086,052

Shipping and Communications.

In 1911 the merchant shipping of Colombia consisted of 1 steamer of 457 tons and 4 sailing vessels of 1,121 tons. At Cartagena in 1910 there entered 257 vessels of 585,706 tons, and at Puerto Colombia 111 vessels of 787,699 tons. The ports of Colombia are in regular communication with those of European and American countries by means of 7 lines of mail steamers, 3 of which are British and the others German, French, Spanish, and Italian.

The total length of railways open in Colombia in 1911 was 1,111 miles belonging to 11 companies and 11 States. Of the total, 1,111 miles have a gauge of 3 ft, the rest a metre gauge. Number of passengers carried (1911), 1,350,548, tons of freight, 883,930. The roads of Colombia are simple mule tracks, but the Government is employing soldiers to improve the main roads. Much of the inland traffic is by river, and the work of clearing and canalising the lower and upper Magdalena is being carried on. That river is navigable for 111 miles, steamers ascend to La Dorada, 111 miles from Barranquilla. Tributaries supply 215 miles of navigable water, and these have 42 steamers, with a total tonnage of 7,331, regularly ply.

Postal facilities between Barranquilla and foreign countries are stated to be excellent, but as to internal mail there are no recent statistics. In 1911, in the internal service there were 3,200,000 letters and post cards transmitted, and 2,436,190 packets of printed matter, samples, and business papers. Number of offices, 608. A British river transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German, and native ply on the river.

There were 11,248 miles of Government telegraph lines in 1912, 1,462,329 telegrams were despatched in 1911, and 11,294 cablegrams were sent.

Money, Weights, and Measures

By decree of March 6, 1906, the Central Bank was constituted with a capital of 1,600,000, and to it was entrusted the redemption of the paper currency and the restoration of metallic money, but this is now taken in hand by the Government. The sovereign is received by the Government and the Commerce in all transactions as the equivalent of 10 gold pesos. By a special law the exchange between the paper currency and the gold currency has been fixed at 10,000 per cent, so that the value of the paper peso is 1 cent gold.

Under the Law of June 12, 1907, the monetary unit is a gold dollar equal to one-fifth of a pound sterling and of proportionate weight, the fine being the same. Gold coins are 1, 2½, and 5 dollars. Silver (900 fine) the dollar, the half dollar the peseta, and the real, the silver coinage being legal tender for amounts not exceeding 10 dollars gold. Nickel for 1, 2, and 5 dollars paper is legal tender up to 5 dollars gold, each paper dollar being reckoned as worth 1 centavo gold (as stated above). Colombia has no gold coinage beyond the British £1 and 10 pieces.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2,204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 10 Colombian pounds, or 12½ kilos; the quintal, of 100 Colombian pounds, or 125 kilos, and the carga, of 200 Colombian pounds, or 250 kilos, are generally used. The libra is equal to 1.102 pound avoirdupois. The Colombian vara is 80 cm., still in use as the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

Diplomatic and Commercial Representatives.

1 OF COLOMBIA in GREAT BRITAIN

Minister — *Envoy* — Vacant

Secretary of Legation — Saturnino Restrepo (in charge)

— Samuel Montana

Consul-General in London — Luis Martinez Silva

There are consuls or vice consuls in Grimsby, Liverpool, Nottingham, Southampton, Birmingham, Cardiff, Dover, Dundee, Glasgow, and Manchester

in OF GREAT BRITAIN in COLOMBIA

Envoy Extraordinary and Minister Plenipotentiary and Consul-General — Percy C. Wyndham
Appointed May, 1911

Attache — Ronald Parker

Consul at Barranquilla, and vice consuls at Bogota, Carthagena, Honda, Medellin, and Santa Marta, and consular agents at Toluca and Buenaventura

COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

Constitution

THE Republic of Costa Rica, an independent State since the year 1821, and forming part from 1824 to 1838 of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there is no constitution, but only dictatorships, between 1870 and 1882. The legislative power is vested in a Chamber of Representatives called the Constitutional Congress, and made up of 44 deputies, being one representative to every 8,000 inhabitants chosen in electoral assemblies, the members of which are returned by the suffrage of all who are able to support themselves. The members of the Chamber are elected for the term of four years, one half retiring every two years. The executive authority is in the hands of a president, elected, in the same manner as the Congress, for the term of four years. A Standing Committee of 5 deputies represents Congress during its recess and advises the President on all matters which would ordinarily come before the Chamber.

President of the Republic—Ricardo Jimenez (Elected for four years from May 8, 1910.)

The administration normally is carried on by five Secretaries of State who are appointed by, and responsible to the President. They are the Secretaries respectively of the Interior and Police, of Foreign Affairs, Justice, and Public Worship, of Public Instruction and War and Marine, of Finance and Commerce, and a Sub Secretary of Public Works under the control of Secretary of Finance and Commerce.

On December 20, 1907, the 6 Central American States, by their representatives in a conference at Washington, signed (among other treaties) a treaty of peace by which all the States agree to submit disputed matters to a Court of Arbitration, the judges of which will be appointed by the Congress of each country, the decisions of this Court to be binding on all parties.

Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces: San Jose, Alajuela, Heredia, Cartago, Guanacaste, Puntarenas, and Limon. According to the estimate for December 31, 1911, the population was 388,266, as follows:—

Province	Population	Provinces	Population
San Jose	121,182	Guanacaste	88,810
Alajuela	91,707	Puntarenas	10,054
Heredia	42,045	Limon	11,000
Cartago	68,878	Total	388,266

There are about 3,500 aborigines (Indians).

The number of births and deaths for 1911 showed 15,847 births and 9,723 deaths, increase 6,124; in 1911, 16,839 births, and 9,483 deaths, increase, 7,356.

Immigration in 1911 amounted to 9,537, and the emigration to

8,170. The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (81,668) and in the towns of Alajuela (6,061), Cartago (5,927), Heredia (7,761), Liberia (2,373), Puntarenas (4,709), and Limón (6,287). The government encourages immigration by the sale of land on easy terms. There are some 25,000 coloured British West Indians, mostly in Limón Province, on the banana farms.

For the purpose of public health the country has been divided into 26 districts, superintended by medical men paid by the national Treasury.

Religion and Instruction.

The Roman Catholic is the religion of the State, but there is entire religious liberty under the Constitution. The Bishop of San José is a suffragan of the Archbishop of Guatemala. Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1911, there were 29,904 elementary schools, the teachers numbered 1,074, and the enrolled pupils 29,904, the average attendance being 25,921. For secondary instruction there are at San José a lyceum for boys with 315 pupils in 1911, and a college for girls with 206 pupils (including a normal section). The towns of Cartago, Alajuela, and Heredia, have each a college. For professional instruction there is a Medical Faculty, and also schools of Law, Pharmacy, and Dentistry.

Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1911 there were 11,760 convictions of misdemeanour, and 1,509 of crime.

Finance.

The revenue and expenditure for five years have been in gold colones worth about £92 (£1 = colones 10.45) as follows:—

	From April 1st to March 31st		From April 1st to Dec 31st	From January 1st to December 31st		
	1906-7	1907-8	1908	1909	1910	1911
Revenue	£692,019	£757,557	£498,480	£91,860	£777,000	£991,404
Expenditure	£717,702	£779,564	£70,580	£87,400	£47,710	£403,070

The revenue is chiefly derived from customs, liquors, and railways, posts, and telegraphs. The largest items of expenditure are finance, public instruction, and internal development.

The Budget estimates for 1912 are as follows:—Revenue, 8,900,000 colones (£851,674), and expenditure, 8,874,610 colones (£849,245).

The foreign debt of the Republic outstanding on December 31, 1910 was £1,617,200. To pay this total the Government borrowed 2,000,000 (through Mr. O. Keith, an American financier), retaining 382,800 for their needs. The bonds are payable in 1968. In November, 1911, a

further loan of 35,000,000 francs issued to pay the bonds of the Pacific railway and the internal debt. The internal debt on December 31, 1911, was 11,879,441 colones (1,186,789 £).

Defence.

Costa Rica has an army, including reserve and national guard, of 50,077 officers and men. The active army numbers 36,952, the reserve 8,491, and the national guard 4,634. The army consists of 3 brigades, 1 battalion, 3 companies, and 135 unclassified soldiers. The peace strength is 1,000 men, and the strength is estimated at 50,000 militia, every male between 18 and 30 may be required to serve. The Republic has also 2 motor launches on the Atlantic side for Revenue purposes.

Industry and Commerce.

Almost anything can be grown in Costa Rica, but the principal agricultural products are coffee and bananas. In 1911, 74,600 acres were devoted to the cultivation of coffee, 66,000 acres to bananas, 9,309,586 bunches of bananas were exported in 1911, and 206,609 bags (weight 12,641 metric tons) of coffee. There is a brisk banana trade with New Orleans, Mobile, New York, and Boston, and also between Limon and Bristol and Manchester. Other exports of produce were gold and silver bullion and concentrates, cocoa, tortoiseshell, hides, rubber, heads of cedar, mahogany, furze, and other woods. New rubber plantations are proving productive. Maize, sugar, rice, and potatoes are commonly cultivated. The distillation of spirits, a government monopoly, proceeds actively. The live stock consists of 361,046 cattle, 59,173 horses, 111,540 pigs, besides mules, sheep, and goats. Several districts are auriferous, and mining is carried on in the Abangarez, Barranca, and Aguacate districts, at about 6 mines.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (in sterling 1 colon = 22 £) :—

	1907	1908	1909	1910	1911
Imports	£ 1,511,627	£ 1,126,559	£ 1,162,438	£ 1,625,299	£ 1,621,320
Exports	1,570,620	1,572,482	1,587,000	1,739,380	1,680,746

For 1911 the value of the chief imports and exports was as follows :—

Imports		Exports	
Cotton goods	251,737	Bananas	9,309,586
Flour	80,496	Coffee	206,609
Railway	54,619	Gold, silver (bullion) and concentrates	216,881
Constructional	52,606	Timber	18,509
Machinery	51,750	Cocoa	17,780
Ward	40,970	Rubber	17,300
Coal		Hides and skins	18,042
		Raw rubber	19,191

Of the import value in 1911, 845,597 £ (46.29 per cent) was from the United States, 316,219 £ (17.34 per cent) from the United Kingdom, 347,093 £ (19.03 per cent) from Germany, 90,400 £ (4.25 per cent) from

France, and 116,246*l.* from Spanish America. Of the value exported, 1,012,618*l.* (55·14 per cent.) went to the United States, 780,314*l.* (39·76 per cent.) to the United Kingdom, 61,921*l.* (3·37 per cent.) to Germany, and 12,360*l.* (0·67 per cent.) to France.

Total trade between the United Kingdom and Costa Rica for 5 years :—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports Costa Rica into U.K.	1,396,006	1,265,655	875,372	826,800	1,168,745
Exports to Costa Rica from U.K.	282,606	301,343	160,263	217,068	270,807

Shipping and Communications.

There are no official figures available as regards shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast motor launches.

In 1911 there entered the ports of the Republic 1,159,873 tons, and cleared 1,164,372 tons. Limon is visited regularly by steamers of 7 shipping companies (2 British, 1 German, 1 Spanish, 1 French, 1 Italian, and 1 American) connecting it with ports of Europe and America. Two lines visit the Pacific port of Punta Arenas.

The railway system connects San José with the Atlantic ports, and has been extended to connect the capital with the Pacific ports; there are branch lines connecting towns to the north and south. The length of railway is about 459 miles; the system is being extended into the banana lands. At San José there is an electric tramway of 5½ miles.

In 1911 there were 200 post offices. The number of postal packets despatched and received was 6,991,898.

There were (1911) telegraph wires of a total length of 1,580 English miles, with 180 telegraph offices. The number of messages in 1911 was 563,000. The telephone lines had a length of about 460 miles. Wireless telegraphy is working from Limon to Bocas del Toro (Panama) 60 miles, and from Bluefields and Colon to Jamaica. Limon has a radius of 300 miles.

Money, Weights, and Measures.

There are 4 banks in Costa Rica, the Anglo-Costa Bank (founded 1863) and the Bank of Costa Rica (1877), with a capital of 1,200,000 and 2,000,000 colones respectively, the Commercial Bank of Costa Rica (1905) with a capital of 1,500,000 colones, and the Mercantile Bank of Costa Rica (1908) with a capital of 1,200,000 colones. On September 12, 1912, a bank was incorporated, the International Bank of Costa Rica, with a capital of 465,000 colones. The bank must keep its reserves in gold equal to half their note circulation. The total in circulation on December 31, 1911, was 4,097,405 colones. The 4 banks had a reserve (December 31, 1912) of 2,678,469 colones.

On October 18, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colón*, weighing 778 grammes, 800 (value 22·9*gr.*). The U.S. gold dollar is worth 2·15 colones. The new silver coinage consists of fractions of the *colón*, viz., 50, 25, 10, and 5-cent pieces. 900 silver, which is legal tender up to 1 *colón*, copper being legal tender up to 1 *colón*. Foreign gold is legal, but not foreign silver.

The metric system is now in use, the following — the old weights and

1 lb. <i>Libra</i>	= 1 014 lb avoirdupois
„ <i>Quintal</i>	= 101 40 lbs „
„ <i>Arroba</i>	= 25 „
„ <i>Fanega</i>	= 11 bushels (imperial bushel)

The old weights and of Spain in the country districts but the introduction of the French metric system is legally established and in general use

Diplomatic and Consular Representatives

1 OF COSTA RICA IN GREAT BRITAIN

Charge d'Affaires — London — W de la Guardia

Secretaries — Victor M and Guillermo de la Guardia

Consul General — W J McLachlan

There are Consular Representatives at Birmingham, Cardiff, Falmouth, Glasgow, Leeds, Liverpool, Manchester, Nottingham, Southampton, &c.

2 OF GREAT BRITAIN IN COSTA RICA

Minister and Consul-General — Sir C C Mallet, C M G, Resident at Panama

Consul — J N Cox

There is a Vice Consul at Port Limon

CUBA.

Constitution and Government.

Cuba, after having been continuously in Spanish possession from its discovery, was by the peace preliminaries and by the definitive treaty signed by the Peace Commissioners at Paris December 10 1898, relinquished by Spain and thus has the position of an independent nation. The direct and interposition of the United States in the struggle against Spanish domination has, however, brought the island into close association with the United States Government. On November 5, 1900 a convention met to decide on a constitution, and on February 21, 1901, a constitution was adopted, under which the island has a republican form of government, with a president, a vice president, a Senate, and a House of Representatives. The United States legislature passed a law authorising the President of the United States to make over the government of the island to the Cuban people as soon as Cuba should undertake to make no treaty with any foreign power endangering its independence, to contract no debts for which the current revenue would not suffice, to concede to the United States Government a right of intervention and also to grant to it the use of naval stations. On June 12, 1901, these conditions were accepted by Cuba, on February 24, 1902, the President and Vice President of the Republic were elected, and on May 20 the control of the island was formally transferred to the new Cuban Government. Under treaties signed July 2, 1903 the United States has coaling stations in the Bay of Guantanamo and Bahia Honda, for which they pay 2,000 dollars annually. The connection between Cuba and the United States was rendered still closer by the reciprocal commercial convention which came into operation on December 27, 1900.

In August, 1906, an insurrection broke out, and a United States Commissioner undertook the provisional government. On January 24, 1909, the provisional government came to an end, and the new president assumed office.

President — General Mario G. Menocal (Nov., 1912)

There is a Cabinet consisting of the Secretaries of State, of Justice, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, and of Sanitation and Charity.

The National Congress is made up of a Senate (24 members, 2 from each province) and a House of Representatives (83 members, 1 for every 25,000 of the inhabitants).

Area and Population.

Cuba has an area of 44,164 square miles with a population, according to the enumeration of 1910, of 2,220,278. The area, population, and density of population of the provinces according to the census of 1910 are as follows: —

Provinces	Area	Population in 1910	Pop. per sq. mile
	Square miles		
Havana	47	194,100	411
Pinar del Rio	1,000	204,420	204
Matanzas	1,000	266,000	266
Santa Clara	9,400	14,920	159
Camaguey	11,000	185,140	168
Oriente	13,000	450,000	346
Total	44,000	3,207,800	729

The population in 1910 was made up of 52.5 per cent of males, and 47.5 per cent of females, and 70.3 per cent of whites and 29.7 per cent of coloured people.

The movement of population in 1910 was as follows:—Marriages, 12,000, births, 74,286, deaths, 33,194, surplus of births over deaths, 41,092.

In 1911 there were 38,053 immigrants (31,056 men and 6,998 women) of whom 32,104 were Spanish.

The chief towns are Havana, 319,884; Santiago de Cuba, 56,614; Matanzas, 64,383; Camaguey, 70,116; Camaguey, 66,460; Cardenas, 28,576.

Instruction.

According to the census returns for 1899 64 per cent of the population could not read, 2 per cent could read but not write, 83 per cent could write, but were without superior education, 1 per cent had received higher education. Education was made obligatory in 1880, but the law was not enforced. Under United States rule the elementary and secondary school systems were re-organised, each municipality was required to have a school board, and every town to have schools at which the attendance of children should be compulsory. On Feb. 3, 1911 there were 8,774 schools with 3,856 teachers and 162,658 enrolled pupils, 79,762 boys and 72,896 girls; the average attendance was 105,774. For secondary instruction there are on the island many institutes and colleges.

The highest instruction in Cuba is given at the University of Havana, which has faculties of letters and sciences, of medicine and pharmacy, and of law. The number of students is about 1,000. In 1912 the first military academy in Cuba was established at Cabañas Fort.

Finance, Defence.

The receipts from customs during the fiscal year ended June 30, 1912, amounted to 28,218,624 dollars.

The Budget for the fiscal year commencing July 1, 1912, and ending June 30, 1913, shows estimated receipts 37,940,200 dollars, expenses 33,974,147 dollars, leaving a surplus of 3,966,052.

The principal items of estimated income were:—Customs Revenue, 26,484,000 dollars; and Consular Fees, 1,000 dollars. The principal items of estimated expenditure were:—Home Affairs, 10,117,894 dollars; Finance Department, 2,900,700 dollars; Instruction, 1,782,638 dollars; and Public Works, 8,155,000 dollars.

Congress did not approve of a budget for 1911-12 and therefore that of the previous year was in operation.

The [] of the Republic of Cuba (August 1, 1911) [] (according to the President's message) [] follows:—

Revolutionary [] per cent. bonds, 1896	2,196,585	
Redeemed	1,464,585	
In circulation		782,000
Interior debt, [] per cent.	10,871,100	
„ „ 1906, 4½ per cent.	16,500,000	
Total		27,371,100
Loan of 1904, [] per cent	35,000,000	
Amortisation	1,020,000	
Total		36,980,000
Total debt		62,083,100

During the year 1910 the public debt was decreased by 3,645,827 dollars.

For [] preservation of order there is a Rural Guard, horse and foot, of 5,298 men, and a regular army of 4,311 enlisted men, and 212 officers. The navy consists of 13 steam launches and [] cutters.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. In 1911 the sugar crop was 1,459,630 tons; that for 1912 was 1,896,000, the largest ever raised in Cuba. In 1910 there [] 175 sugar mills. The production of tobacco in 1911 [] 308,497 bales (of 120 lbs. each). In 1911, 188,129,188 cigars [] exported. The principal fruits exported were pineapples (25,775 tons in 1911) and bananas (38,000 [] in 1910), also 2,000,000 coconuts [] exported.

On June 30, 1909, the live stock in the island consisted of 2,936,549 head of cattle, 523,702 horses, 57,310 mules, and 2,202 [].

Cuba has forest lands, many of which [] in private ownership, but the forests belonging to the State have an [] of about 1,250,000 []. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany exported. Many other hard woods [] used for railway sleepers, carts, ploughs and other local purposes.

In the district of Santiago de Cuba, copper manganese, and iron mines [] worked. The iron mines employ over 4,000 workmen, and supply on [] average 50,000 tons of [] per month to the United States. Gold is found but little worked. There [] rich [] of asphalt which [] not largely [].

Commerce.

The value of the imports and exports for 3 years (ending June 30) were [] follows:—

	1909		
	dollars		
Imports	91,447,581	103,675,581	118,366,997
Exports		100,800,000	120,106,579

Value of specie imported in 1910, 4,338,617 dollars, exported 861,538 dollars. The imports and exports distributed as follows (in United States dollars) —

Countries	Imports		Exports	
	1911	1910	1911	1910
United States	54,669,293	60,915,000	129,828,507	106,853,340
Other Countries of America	8,814,920	—	2,391,216	—
Germany	4,512,760	7,144,657	2,645,398	3,641,665
Spain	8,684,456	9,201,791	727,297	450,703
France	5,174,039	6,209,130	1,549,080	1,307,517
United Kingdom	12,212,219	13,694,060	10,606,280	1,697,811
Other Countries of Europe	5,423,357	—	915,175	—
All Other Countries	2,224,726	16,910,469	606,058	5,176,047
Totals	101,675,581	113,306,997	124,745,301	128,186,677

Shipping and Communications.

In 1911 12, 12,172 vessels entered and 12,306 cleared. British vessels, 268 of 508,050 tons entered the Port of Havana and 266 of 510,639 tons cleared. In Cuba there were in 1912, 1,690 miles of railway. The four lines are—the United Railways of Havana, 672 miles; Cuba Railroad, 602 miles; Cuban Central Railway, 269 miles, and Western Railway of Havana, 147 miles. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. The larger sugar estates have private lines connecting them with the main lines. Several important railway extensions are projected. There are 1,033 miles of cart roads open to traffic. There are 487 post offices, 171 telegraph offices, and nine wireless stations operated by the Government. There are 5,065 miles of government telegraph line.

The National Bank has a paid up capital of 5,000,000 dollars. On June 29th, 1912, its assets amounted to 38,127,307 dollars. There is no Cuban currency and no paper money. The Spanish gold dollar is worth 45½¢; the silver dollar about 40¢., and the American dollar 49½¢. The principal coins used are the peso, worth 84 cents, the peseta, worth 17 cents, the real, worth 4 cents. The French 'Louis' is worth 3 dollars.

The metrical system of weights and measures is in use.

Diplomatic and Consular Representatives.

1. OF CUBA IN GREAT BRITAIN.

Envoy and Minister.—General Carlos Garcia Veller.

Secretary.—Gabriel Zendegeu.

Chancellor.—Carlos Autran y Batista.

Attache.—Antonio F. Saavedra.

2. OF GREAT BRITAIN IN CUBA.

Envoy and Minister.—Stephen Leech.

British Vice-Consuls at Havana.—H. H. R. Cowan and G. F. Plant.

There are British Consuls at Santiago, and Vice-Consuls at Matanzas, Cienfuegos, Cardenas, and Guantanamo.

DENMARK.

(KONGELIGKE DANMARK.)

Reigning King.

Christian X., born September 26, 1870; son of King Frederik VIII. and Queen Louisa; married April 26, 1904, to Princess *Alexandrine*, of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

Children of the King.

- I. Prince Christian *Frederik*, born March 11, 1899.
- II. Prince Knud, born July 27, 1900.

Brothers and sisters of the King

- I. Prince *Amé*, born August 3, 1871, elected King of Norway, under the title of Haakon VII., November 1905, married July 23, 1906, to Princess *Maud* Alexandra of Great Britain; offspring Prince *Alexander* (now Crown Prince of Norway), born July 2, 1903.
- II. Prince *Harald*, born October 3, 1876, married April 25, 1906, to Princess *Hekna* of Sonderborg, Glucksborg; offspring Princess *Frieda*, born July 1, 1911.
- III. Princess *Ingeborg*, born August 2, 1878, married August 27, 1897, to Prince *Charles* of Sweden.
- IV. Princess *Thyra*, born March 14, 1880.
- V. Prince *Gustav*, born March 4, 1887.
- VI. Princess *Dagmar*, born May 28, 1890.

The crown of Denmark was elective from the earliest times. In 1448, after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy is connected with the general interests of the balance of power in Europe, is of high importance the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made to Prince Christian of Schleswig-Holstein-Sonderburg-Glucksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII. of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Frederik VIII. has a civil list of 1,000,000 kroner. The heir apparent to the crown has, in addition, an allowance of 120,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I. of Oldenburg —

Constitution and Government.

The present Constitution of Denmark is embodied in the charter of June 5, 1849, which was modified in some important respects in 1855 and 1866, but again restored, with various alterations, by a statute which obtained the royal sanction on July 28, 1866. According to this charter, the executive power is in the King and his responsible ministers, and the right of making and amending laws in the Rigsdag, or Diet, acting in conjunction with the sovereign. The king must be a member of the Evangelical Lutheran Church, which is declared to be the religion of the State. The Rigsdag comprises the Landsting and the Folkething, the former being the Senate or Upper House, and the latter a House of Commons. The Landsting consists of 66 members. Of these, 12 are nominated for life by the Crown, from among actual or former representatives of the Kingdom, and the rest are elected indirectly by the people for the term of eight years. The choice of the latter 54 members of the Upper House is given to electoral bodies composed partly of the largest taxpayers in the country districts, partly of deputies of the largest taxpayers in the cities, and partly of deputies from the totality of citizens possessing the franchise. Eligible to the Landsting is every citizen who has passed his twenty-fifth year and is a resident of the district. The Folkething, or Lower House of Parliament, consists of 114 members, returned by direct election, by universal suffrage, for the term of three years. According to the Constitution there should be one member for every 16,000 inhabitants. The franchise belongs to every male citizen who has reached his thirtieth year, who is not in the actual receipt of public charity, who if he has any former time been in receipt of it, has repaid the same so received, who is not in private service without having his own household, and who has resided at least one year in the electoral circle in which his name is inscribed. Eligible for the Folkething are all men of good reputation past the age of twenty-five. Both members of the Landsting and of the Folkething receive payment for their

services at the rate of 10 kroner (11s. 1d.) per day, including Sundays and holidays, during the first 6 months of the session, and 11 kroner (6s. 8d.) for each additional day of the session. Members must accept payment. They also receive second-class free passes on the railways and may charge travelling expenses to and from Copenhagen at the beginning and end of the session.

The Rigsdag must meet every year on the first Monday in October. To the Folkething all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Højesteret, form the Regeret, a tribunal who alone try parliamentary impeachments. The ministers have free vote to both of the legislative assemblies, but only vote in that chamber of which they are members.

The executive (appointed July 6, 1910), acting under the king as president, and called the State Council—*Statsraadet*—consists of the following departments:—

- 1 and 2. *The Presidency of the Council and Ministry of Defence.*—Klaus Berntsen.
3. *Ministry of Foreign Affairs.*—C. W. G. Ahlefeldt-Laurvig.
4. *Ministry of the Interior.*—J. Jensen-Sundrup.
5. *Ministry of Justice.*—F. T. Bülow.
6. *Ministry of Finance.*—Niels Neergaard.
7. *Ministry of Public Instruction and Ecclesiastical Affairs.*—Jacob Appel.
8. *Ministry of Agriculture.*—Anders Nielsen.
9. *Ministry of Public Works.*—Thomas Larsen.
10. *Ministry of Commerce and Navigation.*—O. H. V. B. Muns.

The ministers individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folkething.

Landsting, elected 1910:—28 Right, 23 Left, 1 Free Conservatives, 1 Socialists, 1 Radicals, and 1 Independents.

Folkething, elected 1910:—57 Left, 20 Radical Left, 1 Socialists, 13 Right.

Denmark is divided into 13 counties (*Amt*), each of which is administered by a Governor (*Amtmand*), and the counties into Hundreds (*Herred*), each with a portion of the Peace (*Herredsfoged* or *Birkedommer*). In the towns there is a Mayor, appointed by the government, with or without aldermen. The Hundreds are divided into parishes of which there are, in all, about 1,100. Copenhagen forms a district by itself, and has its own form of administration.

The chief of the dependencies of the Crown of Denmark, Iceland, its constitution and administration, under a charter which came into force August 1, 1874. By the terms of this charter, modified by two acts of October 8, 1903, legislative power is vested in the Althing, consisting of 18 members, 12 elected by popular suffrage, and 6 nominated by the king.

A minister for Iceland (Bjorn Jonason) nominated by the king and residing in Reykjavik is the responsible head of the administration. The offices of the governor and the two Amtmands have been abolished.

Area and Population.

The following table gives the area and population of Denmark in 1911 —

Divisions	Area 1911 English sq. m.	Population 1911	Population 1911 per sq. m.
City of Copenhagen (Kjøbenhavn) } without suburbs	27	462,161	16,800
Islands in the Baltic	5,117	1,096,458	214
Peninsula of Jutland	9,898	1,198,457	121
Faeroe Islands	740	18,000	24
Total	15,582	2,775,076	175

The population (excluding the Faeroes) consisted of 1,837,900 males and 1,419,176 females in 1911. The total population at the census of 1906 was 2,757,076 showing an increase during 1906-11 of 11.27 per cent per annum. In Denmark proper the town population has increased from 1,023,384 in 1906 to 1,109,726 in 1911 while the rural population has increased from 1,565,585 in 1906 to 1,647,310 in 1911. The population is almost entirely Scandinavian, — 1901 of the inhabitants of Denmark proper, 98.86 per cent were born in Denmark, 0.07 per cent were born in the Colonies, 0.15 per cent in Norway, 1.45 per cent in Sweden, 0.97 per cent in Schleswig, 0.47 per cent in other parts of Germany and 0.23 per cent in other foreign countries. The foreign born population was thus 11.27 per cent of the whole.

According to the occupation the population of Denmark in 1906 was classified thus —

Immatrial Production	145.54	Commerce, circulation & hotel keeping	24.130
Agriculture and Forestry	17,808	Capitalists and rural pensioners	109.729
Dairy work	13,113	Public assistance (including the aged)	16,901
Fishing	37,154	Profession not indicated	48,711
Business and industry	401,911		
Railways, posts, telegraphs, telephones, transports and navigation	14,057	Total	2,757,919

The population of the capital, Copenhagen (Kjøbenhavn), in 1911, 462,161, — with suburbs, 559,398, Aarhus 61,755, Odense, 42,237, Aalborg, 33,449, Horsens, 23,843, Randers, 22,970.

The following table gives the total number of births, deaths and marriages with the surplus of births over deaths, in five years —

Year	Births	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1907	74,824	1,823	20,103	37,275	37,049
1908	76,232	1,845	19,956	39,072	37,160
1909	76,801	1,815	19,944	35,807	40,494
1910	75,297	1,788	19,986	35,187	40,110
1911	78,938	1,751	19,879	37,232	36,706

Of the births in 1910, 11.1 per cent were illegitimate. In 1907, there were 1,100 divorces, in 1908, 651, in 1909, 784, in 1910, 749, in 1911, 711.

Emigrants, chiefly to the United States, 7,890 in 1907, 4,558 in 1908, 6,782 in 1909; 8,890 in 1910 and 8,303 in 1911.

Religion.

The established religion of Denmark is the Lutheran, which was introduced in 1536, the Church being at that time seized by the Crown, to be delivered up to the university and other religious and educational establishments. The members of the National Church are under the superintendence of the bishops, the Bishop of Roskilde being metropolitan. The bishops have a political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1901 there were 2,436,084 Protestants, 5,873 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 106 Greek Catholics, 3,476 Jews, 4,501 other or of no confession.

Instruction.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. The public schools, maintained by communal rates, are with exception of a few middle class schools, free. Of public elementary schools there are about 3,422 (50 in the capital, 147 in other towns, and 3,225 in rural districts), with 376,696 pupils in the year 1911 (5 of these communal schools are grammar schools, and 71 Mellemskoler). For higher instruction there is furthermore a veterinary and agricultural college at Copenhagen with 31 professors and teachers and about 500 pupils, 19 agricultural or horticultural schools; 11 *folkehøjskoler* or popular high schools (adult schools with about 8,000 pupils); 41 grammar schools (14 Government, 27 private); a college of pharmacy (founded 1892) with 7 teachers and 72 students; a Royal academy of arts (founded 1754) with 13 teachers and 110 pupils, a Polytechnic Institution (founded 1829) with 41 professors and teachers and about 1,100 students, 110 Mellemskoler or middle class schools, and 41 grammar schools. The higher schools for children (grammar schools and Mellemskoler), together with other non-municipal schools in 1911, had an attendance of 48,300 pupils. The *folkehøjskoler* are all private, but to them and the agricultural schools the state annually makes a grant of about 26,000. To the Mellemskoler grants are made amounting annually to about 25,000. The University of Copenhagen founded in 1479, has 5 faculties, to 4 of which is admitted on equal terms with the others. It has 100 professors and teachers, and about 9,000 students.

Pauperism and Old Age Pensions.

Ordinary poor relief is regulated by the law of April 9, 1891, under which in 1901, 101,915 (4.16 per cent of the population) were relieved. In 1902 of 398,490.

Another law of ■■■ concerning ■■■ *Age Pensions* has been extended by enactments of 1902 and 1908 ■■■ as to provide for, and to regulate assistance granted to the aged poor. Recipients must be over 60 years of age, of good character, and must have, for the preceding ■ years, had their domicile in the country without receiving public charity. The assistance granted may be in money, or in kind, ■■■ by abode in an hospital. It must be sufficient for maintenance and for attendance in ■■■ of illness. The estimate of the poverty of the recipient does not include private assistance unless amounting to ■■■ 100 kroner (about 6l. 13s.) a year. The subvention ■■■ paid by the ■■■ of domicile and half of it is refunded by the State. For the year ending March 31, 1911, 79,289 persons ■■■ relieved, of whom 59,271 ■■■ principals and 20,018 dependents. The total expenditure ■■■ 844,072l., of which 328,172l. was expended by the State.

Justice and Crime.

The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogeder* and *bykedonamere*) and town judges (*byfogeder*). From these courts ■■■ appeal lies to the superior court (*Overret*), or court of second instance, in Viborg with 9 judges, and in Copenhagen with ■■■ judges. The Copenhagen superior court, however, is identical with that of the civil magistrates. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, 12 puisne judges, and 11 special judges sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

In 1910, 8,378 ■■■ and 509 women ■■■ convicted of crimes and delicts; 47,001 persons were convicted of minor offences. On March 31, 1911, 797 men ■■■ and ■■■ women were in the penitentiaries of Denmark.

Finance.

By the terms of the Constitution of Denmark the annual financial budget called the 'Finanslovsforslag,' must be laid ■■■ the table of the Folkething ■■■ the beginning of each session. As to the annual financial accounts called 'Statsregnskab,' the Constitutional Charter prescribes them ■■■ be examined by four paid revisors, two of whom ■■■ elected by the Folkething and ■■■ by the Landsting. Their report is submitted to ■■■ Chambers which, after due consideration, pass their resolution generally to the effect that they have ■■■ remarks to make on the balance-sheet.

The following shows the actual ■■■ and expenditure for the five years ending March ■■■ (18 kroner = 1l.) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1907	7,056,600	6,324,080	1910	7,518,526	7,898,859
1908	5,472,210	5,326,880	1911	7,781,908	7,781,908
1909	6,194,629	5,999,780	1912	9,304,676	9,440,778

The estimated **income** for 1912-13 was 5,705,686*l.*, and expenditure 6,351,150*l.* The following is an abstract of the budget for 1913-14:—

Revenue	Kroner	Expenditure	Kroner
Balance of domain	1,037,416	Civil list and	1,174,000
Interest on State assets	6,087,950	Rigsdag and Council of	400,000
Direct	35,031,000	Interest and on	
Indirect taxes, mainly customs and excise	60,143,200	State d	12,337,102
Posts and telegraphs	2,066,229	Pensions including military invalids	4,422,460
Balance of lotteries	1,517,223	Ministry of Foreign Affairs	989,913
Separate revenues	6,483,794	Ministry of Agriculture	4,200,414
Revenue from employment of property and funding of	4,623,500	Ministry of Interior	18,897,436
		Ministry of Public Works	2,834,013
		Ministry of Justice	4,459,441
		Ministry of Commerce and Navigation	632,916
		Ministry of Public Worship and Instruction	15,490,981
		Ministry of War	19,482,430
		Ministry of Marine	9,785,048
		Ministry of Finance	8,019,268
		Iceland	267,900
		Improvement of State property and reduction of debt	12,700,812
Total revenue	117,194,064 (6,445,174 <i>l.</i>)	Total expenditure	115,531,884 (11,365,260 <i>l.</i>)

An important feature in the administration of the finances of the kingdom is the maintenance of a reserve fund of a comparatively large amount. In 1867 it was 6,458,110*l.*; in 1887, 990,050*l.*; in 1907, 994,210*l.*; on March 31, 1910, 994,342*l.*; 1911, 994,345*l.*; 1912, 985,789*l.* The object of the fund is to provide means at the disposal of the Government in the event of sudden occurrences.

The public debt of Denmark has been incurred in part by large annual deficits in former years, before the establishment of parliamentary government, and in part by railway undertakings and the construction of harbours, lighthouses, and other works of public importance. The following table gives the national liabilities from 1907 to 1912:—

Year ending March 31	Capital of Debt	Year ending March 31	Capital of Debt
	<i>£</i>		<i>£</i>
1907	14,920,540	1910	16,764,121
1908	14,218,500	1911	15,658,839
1909	14,108,010	1912	15,859,000

The debt is divided into an internal and a foreign. The total foreign debt amounted in 1912 to 14,904,000*l.* The debt is at 3 and 3½ per cent.

The amount of the debt for 1911-12 was 15,859,000*l.* down as compared with 1910-11. The amount of the debt on March 31, 1912, including the reserve fund, was 15,859,000*l.* excluding the railways (valued at 14,904,000*l.*) and the domains, 1,787,000*l.*

The revenue and expenditure, and the property of Copenhagen

and of the provincial towns and places and rural communes, were as follows —

	Revenue	Expenditure	Property	
Copenhagen (April 1, 1911 March 31, 1912)	£ 2,226,407	£ 2,705,717	■ 13,183,54	£ 11,046,200
Provincial Towns and Places (April 1, 1910 March 31, 1911)	2,780,650	2,797,500	8,717,310	6,224,882
Rural Communes (April 1, 1910 March 31, 1911)	1,852,873	1,839,932	4,355,163	2,298,978

Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able bodied Danish subject is obliged to serve in the army or navy, except the inhabitants of Iceland, the Faeroe Islands, and the Danish Antilles. Exemptions in Denmark are few even (legymen having ■ serve for ■ years.

Service commences at the age of 21 and lasts for 16 years. For the first 9 the men belong to the active army, and for the second 8 years to the extra, or territorial reserve. At the time of joining, the recruits are continuously trained for 165 days in the infantry, ■ days in the field artillery, 1 year in the garrison artillery, and 200 days in the cavalry. The engineers have 7 months', and the train 2 months' continuous training. In the case of about, one fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place once ■ twice ■ the remaining six or seven years of army service, and then only for 25 or 30 days ■ each occasion. The peace strength of the active army is about ■ officers and 12,900 men.

The country is divided into two territorial commands, one including Copenhagen and the first and second Zealand brigades, the other comprising the Funen brigade, and first and second Jutland brigades. There are 11 regiments of infantry (each of ■ or ■ battalions making 52 battalions altogether), also ■ regiments of cavalry, ■ regiments of field artillery (each of 8 four gun batteries, 5 garrison artillery battalions, and 3 battalions of engineers). The field army would apparently consist of 5 mixed brigades, with a fighting strength of about 50,000 men.

There are two special corps of infantry and garrison artillery, formed from reservists, for the defence of Copenhagen and the island of Bornholm.

The Danish infantry is armed with the Krag-Jorgensen magazine rifle, calibre 8 mm. Mounted troops have the Remington carbine. ■ artillery ■ ■ ■ armed with ■ Krupp gun, firing ■ 14 ■ pound shell.

The permanent ■ of the Danish army (officers and non-commissioned officers) is about 2,650 strong, and ■ 8 ■ recruits are trained yearly. The military budget for 1911 amounted to 1,097,000l., of which 166,000l. ■ ■ extraordinary expenditure on fortifications.

The Danish fleet is maintained for purposes of coast-defence. It consists of three monitors, *Peder Skram*, *Oluf Frische*, and *Herluf Trolle*, carrying a pair of 9 4-inch and 4 6-inch guns, a monitor, *Skjold* (launched 1896), with 9 11 and three 4 7-inch guns; three torpedo gun boats and 20 torpedo boats, 3 submarines. This is the effective fleet.

It is reinforced by the old battleship *Loer Høitfeld*, and a small cruiser, the *Valkyrien*.

A new coast defence battleship is under construction.

Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

Of the total area of Denmark 80 per cent is productive; about one sixth of the unproductive is past hogs. Of the productive area 6 per cent is forest and of the remainder less than one half is arable, and the remainder pasture and meadows. The area under the chief crops in 1912, and the production in 1910-1912, were as follows:

Crops	Production			
	Acres	Bushels	Bushels	Bushels
Wheat	101,280	4,408,414	4,978,207	4,328,203
Barley	584,285	21,128,259	18,047,266	20,806,646
Oats	1,007,947	38,928,314	26,290,587	39,914,089
Rye	690,023	18,967,614	18,026,204	18,696,564
Mixed grain	—	18,615,267	—	16,593,308
Potatoes	—	28,582,710	—	28,020,398
Beetroot, &c.	75,750	502,931,842	—	418,743,000

On July 15, 1910, there were in Denmark proper 535,018 horses, 2,258,982 head of cattle, 726,829 sheep, 40,257 goats, and 1,467,822 swine. In 1881 there were 1,470,078 cattle, and in 1871, 1,238,898.

In 1911 there were exported 28,491 horses, 153,512 head of cattle, 497 sheep and goats.

In 1911 there were in Denmark 11 distilleries (Copenhagen 6), whose output of brandy reduced to 100° amounted to 3,421,547 gallons (16,552,488 litres). In 1911 there were produced 24,494,734 gallons of excisable beer and 34,094,566 gallons (small) beer, not excisable.

In the same year 116,156 tons of beet sugar were produced in 8 sugar factories, and 35,402 tons of margarine and oleomargarine in 11 manufactured factories.

In the Danish fisheries the total value of the fish caught was in 1909, 692,667*l.*, in 1910, 769,126*l.*; 1911, 838,697*l.*

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18 kroner = 17.) :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1906	40,912,600	91,063,700	1910	40,279,884	33,782,278
1907	43,825,800	88,404,700	1911	35,244,000	30,445,600
1908	49,583,500	84,274,000		43,505,000	34,517,000

1 In 1910 and 1911 all goods transhipped are excluded from the figures.

The exports of home produce in five years were, in sterling — 1907, 28,169,000l. ; 1908, 24,417,600l. ; 1909, 21,656,778l. ; 1910, 26,965,200l. ; 1911, 29,552,000l.

In 1911 the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce of manufacture) were as follows :—

1911	Imports, (General)	Imports, (Special)	Exports, (General)	Exports, (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances	228,600	146,186	516,582	471,164
Personal and domestic	4,412	58,108	9,496	1,331
Fuel	40,321	45,821	9,407	6
Fodder, manure, seeds	72,844	69,844	10,284	7,060
Raw products	269,235	201,451	98,994	57,061
Total	705,400 (28,506,000l.)	623,314 (24,325,000l.)	626,761 (24,514,000l.)	536,647 (20,852,000l.)

The principal articles of import and export, with their respective values, were as follows :—

	Imports, 1910 (General)	Exports, 1910 (General)	Imports, 1911 (General)	Imports, 1911 (Special)	Exports, 1911 (General)	Exports, 1911 (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner
Colonial goods	98,278	4,553	45,621	34,094	9,870	2,467
Beverages	14,838	17,877	5,508	5,280	1,284	1,900
Manufactures	31,161	5,211	55,176	48,418	8,250	700
Iron and steel	52,452	6,321	57,162	58,989	8,028	5,287
Wood	24,157	1,135	37,839	37,015	948	2,028
Coal	45,008	—	49,276	45,276	8,401	—
Grains	8,333	54,085	12,008	11,835	32,191	61,012
Provisions, eggs, &c.	53,244	204,244	58,125	25,849	22,587	28,277
Cereals, &c.	86,569	12,498	94,800	92,692	10,243	18,985

The following table shows the value of Danish foreign trade

Countries	Imports, 1910 (General)	Imports, 1911 (General)	Exports, 1910 (General)	Exports, 1911 (General)
	Kroner	Kroner	Kroner	Kroner
Germany	241,558,000	265,802,000	124,511,000	160,003,000
United Kingdom	117,232,000	115,341,000	341,418,000	353,447,000
Sweden	56,304,000	67,254,000	24,139,000	30,878,000
Norway	7,403,000	7,820,000	10,950,000	16,453,000
United States	51,692,000	63,440,000	4,844,000	7,605,000
Rest of America	13,755,000	12,749,000	4,830,000	4,700,000
Russia	49,219,000	52,503,000	7,932,000	15,521,000
Holland	14,502,000	17,189,000	3,291,000	3,822,000
Belgium	9,300,000	9,992,000	3,100,000	2,836,000
France	16,848,000	17,448,000	2,786,000	2,873,000
Danish Colonies	8,081,000	8,736,000	5,797,000	7,106,000

The Treaty of Commerce and Navigation between Great Britain and Denmark, made in 1661 and 1670 and confirmed in 1814, provides for the 'most favoured nation' treatment.

The value of imports, whether subject to duty or duty-free, and of exports, always duty-free, are determined by the Statistical Bureau in communication with commercial firms. These state the average value of the various articles of merchandise in quantities as verified by the Customs authorities. The prime origin and ultimate destination of goods are not recorded. The general trade comprehends all imports and exports, the special trade only imports for consumption, and exports of home produce. Usually the Customs authorities easily ascertain whether imports and exports belong to the general or the special trade but sometimes the amount of imports for home consumption is determined merely by the excess of imports over exports.

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were:—

Imports into U.K.	1910	1911	Exports to Denmark	1910
	£	£		£
Butter	10,206,112	10,404,147	Coal	1,416,151
Eggs	1,732,107	2,030,607	Cottons	181,714
Bacon	6,841,728	6,000,937	Iron-work	401,112
				350,408

Shipping and Navigation.

On December 31, 1911, Denmark and colonies possessed 4,252 vessels (of 538,863 registered tons in her merchant marine, of which 691 of 414,353 tons were steamers. In 1911, 85,873 vessels of 4,015,804 tons cargo entered the Danish ports, and 36,288 vessels of 1,513,632 tons cargo cleared.

Internal Communications.

Denmark proper (exclusive of Copenhagen) has (end of 1911) 4,344 miles of road, besides 22,382 miles of by-ways. There are (1911) railways of a total length of 2,292 English miles open for the kingdom. Of this total, about 1,216 English miles belong to the State, the total cost of which up to March 31, 1912, was 270,649,217 kroner. The railways have a length of 11 ft. 8½ inches, except 109 miles of which the gauge is 3 ft. 3½ inches.

The Post Office in the year 1911-12 carried 185,435,522 letters and post-cards, and 160,492,918 samples and printed matter. There were 1,125 post-offices. The telegraphs in 1911-12 carried 3,526,527 messages, of which 2,533,168 were internal, 2,533,168 international; exclusive of 127,752 telegrams. The length of telegraph wires (March 31, 1912) was 8,048 English miles; number of offices 172. At the same date the railway

and private telegraphs had ■■■ offices. On March 31, 1912, the length of telephonic ■■■ of the State and the private companies ■■■ 276,000 English miles. In the year 1911-12 there ■■■ 207,719,000 telephonic conversations.

Money and Credit.

On July 31, 1912, the accounts of the National Bank balanced ■■■ 11,485,465/. The assets included 4,452,487/ in bullion and specie. The liabilities included 8,525,000/ note issue, 1,486,836/ of capital, and 454,916/ reserve fund. In Denmark there are about 135 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1911, there ■■■ 521 savings banks, with 1,358,384 depositors, and deposits amounting to 44,219,999/, or about 33/ to each account.

The nominal value of the coin minted (including recoupment of worn pieces) ■■■ Denmark ■■■ 1873 is given ■■■ follows:—

Years ending March 31	Gold	Silver	Bronze	Total
	Kroner	Kroner	Kroner	Kroner
1873-1900	50,100,160	22,071,814	1,951,742	62,792,866
1901-1905	4,040,340	1,232,708	194,615	5,472,563
1906	—	187,137	10,041	197,178
1907	—	201,542	84,722	286,264
1908	5,920,410	808,114	129,967	6,858,571
1909	9,801,630	—	139,465	9,941,095
1910	3,540,270	252,466	—	3,792,736
1911	3,057,240	210,000	21,943	3,289,183
1912	1,660,660	111,614	102,766	1,875,040
Total	71,451,130	25,617,961	2,468,918	99,538,009

Money, Weights, and Measures.

The monetary unit, the *Krone* of ■■■ one, is of the value of 1*½* 1*d*, or about 18 kroner to the pound sterling.

Gold coins ■■■ and 10-kroner pieces. The 20-kroner piece weighs 8.870 grammes ■■■ fine, and thus contains 8.0645 grammes ■■■ fine gold.

The 2-kroner silver piece weighs 15 grammes 800 fine, and thus contains 12 gr ■■■ of fine silver.

The standard of value ■■■ gold. Silver ■■■ legal tender up to 20 kroner.

The ■■■ of the metric system of weights and measures, under the law of May 4, 1907, became obligatory ■■■ Denmark ■■■ public offices on April 1, 1910, and generally ■■■ April 1, 1912.

Diplomatic ■■■ Consular Representatives.

1. OF DENMARK IN GREAT BRITAIN.

Envoy and Minister.—H. Grievnkop Castenskiold (1912).

Secretary of Legation.—Mogens de Sehested.

Honorary Attaché.—Paul Baron Bittouch Lehn.

Consul-General.—London.—J. W. Faber.

There ■■■ Consuls at Belfast, Bristol, Edinburgh (U.G.), Hull (U.G.), Leth, Liverpool, Manchester, Newcastle, Sheffield, Southampton, Swansea, Yarmouth.

■ OF GREAT BRITAIN ■ DENMARK

Secretary and Minister—Sir Henry C Lowther, K C M G (1912)

Secretary—Richard ■ Seymour, ■ V O

Naval Attaché—Captain H D ■ Watson, R ■

Military Attaché—Lieut Col T M Budge, D S O.

There ■ Consuls at Copenhagen, Reykjavik (Iceland), St Thomas (West Indies), Thorshavn (Faroe Islands) Flsmore (V C)

Colonies

The colonial possessions of Denmark consist of territories in Europe and America. Iceland has a local legislature and, under the constitutional law of 1903, a minister appointed by the king and residing at Reykjavik. The area and population of the colonies and the value of their imports into and exports from Denmark alone in 1911, according to Danish returns, ■ —

Colonies	Area English sq. m.	Population 1911	Import to Denmark, 1911	Export from Denmark, 1911
Iceland	39,756	85,188	41,560	269,890
Greenland	46,740	13,517	107,710	33,210
West Indies	138	27,086	7,600	25,610
Total	86,634	125,791	146,660	328,710

The ■ idc of Greenland is a State monopoly.

The West Indian Islands, St Croix, St Thomas, and St John are inhabited mostly by free negroes engaged ■ the cultivation of the sugar cane, but the trade with Denmark, formerly considerable, has fallen off in recent years.

ECUADOR.

(REPUBLICA ECUADOR)

Constitution and Government

The Republic of Ecuador was constituted May 11, 1830, in consequence of a civil war which separated the members of the original Republic of Colombia, founded by Simon Bolivar, by uniting the Presidency of Quito to the Vice Royalty of New Grenada and the Captaincy-General of Venezuela, when they threw off the Spanish yoke. Under the present constitution promulgated December 23 1906, the executive is vested in the President, elected for the term of four years, while the legislative power is given to a Congress of two Houses the first consisting of thirty two senators, two for each province (chosen for four years) and the second of 48 deputies, on the basis of one deputy for every 30 000 inhabitants, chosen for two years, both elected by adults who can read and write. The Congress meets on the 10th of August of every year at Quito the capital without being summoned by the Government. The election of the President takes place in direct manner by the people. Under the present constitution there is no election for Vice President. In case of death or other vacancy in the office of President, he is replaced (1) by the President of the Senate of the Last Congress, and (2) if he should also fail, by the President of the Chamber of Deputies.

President of the Republic — General Francisco Plaz (elected April 1, 1912)

The President, who receives a salary of 24,000 sucres a year, theoretically exercises his functions through a Cabinet of five ministers (Interior, foreign affairs, public instruction, finance and war) who, together with himself, may be impeached by Congress, and who, with seven other members, form a Council of State. Each minister receives a salary of 2 880 sucres a year. The President has the power of veto, but if Congress insist on a vetoed bill becoming law, he has no alternative but to give his assent to it. He may summon an Extraordinary Congress for a specified purpose, but he cannot dissolve the Chambers or shorten their sittings. By the terms of the Constitution privileges of rank and arms are not allowed to exist within the Republic, but most of the Indians are virtually in bondage. By an edict of 1896, the Indians are exempted from paying tribute, and are admitted to citizenship.

The Provinces are administered by Governors, appointed by the Government, their subdivisions, or cantons, by political chiefs, and the parishes by political lieutenants. The Galapagos Archipelago is under a local administrator.

Area and Population.

The area of Ecuador is about 116,000 square miles, divided into sixteen provinces and one territory, with about 1,205,600 inhabitants, of which uncivilised Indians be included, about 1,100 000. The bulk of the population is Indian; inhabitants of pure European blood are few, those of mixed blood estimated at about 400,000. Included in the above statement are the

Galapagos ■ Tortoise Islands, with an area of 2,400 square miles, and ■ population of about 400. Ecuador ■ Colombia, under treaty of November 5, 1904, are ■ submit their boundary dispute to the German Emperor as arbitrator. The dispute between Ecuador and Peru ■ referred to the King of Spain, but he has declined to interfere. (See under Peru.)

The population of ■ Republic ■ distributed as follows:—

Provinces	Pop.	Provinces	Pop.	Provinces	Pop.
Caroli	36,000	Azuay	132,400	Manabi	64,100
Imbabura	68,000	Loja	66,000	Esmeraldas	14,600
Pichincha	206,000	Bolivar	43,000	Oriente	80,000
Leon	109,600	Rios	52,800	Galapagos	■
Tungurahua	103,000	Oro	32,600		
Chimborazo	122,000	Guayas	98,100		1,272,000
Cañar	64,000				

Estimated population 1910: 1,500,000.

The chief towns ■ the capital, Quito (70,000), Guayaquil (80,000), Cuenca (80,000), Riobamba (18,000), Ambato, Loja, and Latacunga (each about 10,000), Bahía (8,000), Esmeraldas (4,000).

Religion and Instruction.

The Church of the Republic, according to the Constitution, is the Roman Catholic, which has one archbishop (Quito) and six suffragan bishops. Its income, in substitution for tithes, is annually provided for in the estimates. In 1904 a law was passed and promulgated placing the Church and its property under the control of the State, and forbidding the foundation of new orders or the entrance of foreign religious communities into the country. All members of the Episcopate ■ required to be Ecuadorian citizens. Civil marriages are obligatory in accordance with regulations prescribed by law of December, 1902. Primary education is gratuitous and obligatory. There is a University in Quito with 32 professors and University bodies in Cuenca and Guayaquil. There ■ 9 schools for higher education, 35 secondary, and (1912) 1,590 primary schools; with 93,418 pupils and 2,326 teachers. There ■ commercial and technical schools in Quito and Guayaquil, and, in 1900, English began to be taught in the normal schools, about a dozen American teachers being employed.

Justice ■ Crime.

The appellate courts are the Supreme Court in Quito, which ■ the highest tribunal and consists of ■ justices elected by Congress for ■ term of ■ years. The six superior courts are located at Quito, Guayaquil, Cuenca, Riobamba, Loja and Portoviejo. The first two ■ composed of 6 judges, the remainder of ■ judges each, all elected by Congress for 6 years. The Court ■ Accounts ■ empowered to audit and investigate ■ public accounts. In ■ Republic there ■ 33 cantonal and ■ parochial justices, and 85 solicitors admitted to practice.

Finance.

■ ■ ■ ■ ■ revenue about 70 per ■ is derived from customs ■ ■ ■ 15 per ■ ■ ■ from taxes on cacao, real estate, white rum, and tobacco; 6 percent. from salt and gunpowder monopolies, and the remainder mostly from excise, ■ ■ ■ of ■ ■ ■ property, ■ ■ ■ ■ ■ postal department. The ■ ■ ■ ■ ■ and

Expenditure for recent years ■ given as follows ■ sterling (1 sucra = 24d), but the figures ■ not to be taken as representing the exact state of affairs —

	1901	■	1911	1912 ¹	1913 ¹
	£	£	£	£	£
Revenue	1 637 069	1 11 720	1 300 413	1 6 7 182	~ 036 156
Expenditure	1 226 468	1 47 143	1 595 613	1 997 132	■ 038,605

¹ Estimates

The principal items of revenue are Import and export duties, alcohol duties, and salt monopoly. The chief items of expenditure ■ Government, army and navy, education.

On the 31st of January, 1911 a new foreign loan of 3,000,000 ■ (300 000£), ■ contracted with the house of Speyer & Co., of New York. The issue was at 8½ for 100 and the guarantee was, ■ per cent of the export dues and 500 000 sucres out of the liquor dues, ■ dividends of 21,000 sucres per month.

No other details as to foreign debt nor as to the internal debt, have been made public, as owing to the violent change of Presidents and Ministers the report of the Finance Minister has not been presented to the 1911 Congress. Up to 31st Dec., 1911 the foreign debt was stated to be 3 338,8497 and the internal debt 1,180,1807.

Defence

The Ecuadorian army in 1910 numbered 7,810 officers and men. The force is composed of ■ brigades of artillery, 9 battalions of infantry, and a regiment of cavalry. The national guard ■ said to consist of 100,000 men. A mining and torpedo section, a sanitary section and a telegraph and telephone corps were created in 1910. Military service is obligatory from 18 to 32 years of age in the army, and from 32 to 35 in the national guard.

The Navy consists of three vessels, the ex-Chilian cruiser *Ministro Zenteno*, 3,600 tons, eight 6 in. h. guns, the *Lit rador Bolívar* ■ torpedo gunboat of 800 tons and an old sloop which was formerly the French *Papin*.

Production ■ Commerce

The staple produce of Ecuador is cocoa, which is grown ■ Los Rios and other provinces near the coast. The total exports of cocoa in 1911 were valued at 1,602,458£. The largest cocoa estate in the country has been taken over by an English company. Coffee ■ also grown, the exports ■ valued in 1910 at 323,811£. The rubber industry is also important, ■ the accessible supply from wild trees ■ being rapidly exhausted, attention is ■ turned to the planting of trees. Other products are tag ■ (woy nuts), exports 1911, 173,799£, tobacco, ■ annual yield of which is from 30 000 ■ 40,000 quintals; and sugar. Cotton cultivation has almost ceased, and all that is ■ produced ■ sent to the mills ■ the interior to be ■ factured into rough calicoes and other goods. Peruvian bark exports have fallen to 60 or 70 tons a year. Mangrove bark (for tanning), alligator skins, ■ kapok (silk cotton tree fibre *Bombax ceiba*) ■ exported ■ small quantities. Ecuador ■ amiferous, but mining companies have had little success ■ Esmeraldas ■ have absorbed ■ foreign capital with ■ practical result. At Zaruma, in the province ■ Oro, ■ are quartz crushings worked by ■ American company which ■ 1910 produced gold ■ the value (approximate) of 25,000£, ■ cyanide slime (containing gold,

silver, copper, zinc and iron) to the value of 26,000*l.*; total, 51,000*l.* At Pillzhum in Cañan rich silver ore is found, but is not worked. Petroleum is found; the oil-fields of Santa Elena are being worked by two British Companies. The country is known to be also rich in copper, iron, lead and coal; and sulphur exists in great quantities in the Pichincha district and in the Galapagos Islands.

Panama hats are made almost exclusively in Ecuador, and the demand for them is greater than the makers can meet. To protect the industry a duty is charged on the straw exported. The value of exports of hats in 1910, 258,342*l.* There are flour mills, sugar works, breweries, and chocolate factories.

The value of imports and exports for five years is given as follows in sterling (10 sucres = £1):—

	1907	1908	1909	1910	1911
Imports	£ 1,969,907	£ 2,915,371	£ 1,670,424	£ 1,647,600	£ —
Exports	2,290,605	3,050,481	3,000,623	3,427,100	2,107,041

In 1910 the chief imports were textiles, foodstuffs, iron work, clothing, and gold and silver. The chief exports were cocoa, 2,105,701*l.*; tagua, 1,476,086*l.*; rubber, 206,590*l.* Of the imports in 1910, the value of 482,895*l.* was from the United States; 512,400*l.* from Great Britain; 723,321*l.* from Germany; 108,134*l.* from France. Of the exports, in 1911, the value of 932,649*l.* went to France; 641,896*l.* to the United States; 489,405*l.* to Germany; 204,397*l.* to Great Britain and colonies. Of the large quantities of cocoa shipped to Havre, the greater part is ultimately distributed among other countries.

The chief articles of import from Ecuador into Great Britain in 1911 consisted of cocoa of the value of 344,386*l.*; coffee, 2,823*l.*; straw hats, 133,513*l.* The chief exports of British produce to Ecuador in 1911 were cotton goods, to the value of 375,754*l.*; woollens, 55,739*l.*; iron, wrought and unwrought, 28,384*l.*

Shipping and Internal Communications.

In 1910 there entered at Guayaquil 213 vessels of 396,262 tons (190,390 tons British), and cleared 215 vessels of 401,258 tons (195,388 tons British). Guayaquil is visited by the steamers of three European lines passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast.

The roads of the country are mostly bridle-roads only, and often impassable for half the year. The one highway is from Quito towards Guayaquil, for a distance of 115 miles, but the work of this connecting the capital and the port has long been discontinued. There is river communication throughout the principal agricultural districts on the low grounds of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for miles by steamers in the rainy season), and other small waterways thereof. Navigation of these inland waters is carried on by about 17 American and Ecuadorian-built side-wheel screw steamers, steam yachts or tow-ferry boats, many small launches, and a large fleet of gasoline launches, canoes, and other small craft.

A railway is open from Duran (opposite Guayaquil) to Latacunga (and

now Chumbacella) at only 15 minutes distance — coach from Quito. Length of line about 370 (1912) miles. This line was transferred by the Government to the Guayaquil and Quito Railroad Company, and is extended to Quito. Railways for the development of local trade have been undertaken by several local authorities. That from Puerto Bolivar (Machala) to the ——— district — being worked and extended, that from Ambato to the Arayumo River — not yet begun. There — a project for a railway from Bahia de Caraquez to Quito undertaken by a French company. This has been partially built and — running for about 11 to 50 miles to the important cocoa district of Chone, — Manabí, with ——— stations at Calcota. Another line from Manta to Santa Ana, — the ivory, nut and coffee districts of Manabí is also in ——— of construction and will shortly ——— at the capital of the Province Porto Viejo.

The total length of telegraphs is about 2,602 miles, Quito being connected with Guayaquil and the coast, with the Republics of Colombia, and Peru, and by cable with the rest of the world. There are about — telegraph stations. Two telephonic systems with 400 subscribers each — established at Guayaquil, and — system is also in operation in Quito.

The inland correspondence amounts to about 820,000 letters yearly, and the foreign correspondence to 1,809 ——— letters and — 947 ——— newspapers and packets.

Money and Credit

Ecuador having no mint, the coin of the country is minted in England, the United States and Peru.

There are two banks authorised to issue notes for circulation, viz., the Banco del Ecuador, capital 3,000,000 sucres, and the Banco Comercial y Agrícola, capital 5,000,000 sucres. On December 31, 1909, the Government owed 279 1871 to the former bank, and 252 1917 to the latter. By the banking law of 1907 the banks are required to hold at least half their metallic reserve in gold (17 — 10 sucres). In 1909 their united gold reserve was 427 3837, and their circulation 6 651 397 sucres.

Other banks are the Banco Hipotecario with a capital of — 000 000 sucres and the Banco Territorial. These are only mortgage loan banks.

On December 31, 1910 the gold and notes in circulation ——— — follows: gold, — 090,925 sucres (509,8927) silver, 2 782 954 (278,2957) and notes 4 931,886 (499 1997).

Money, Weights and Measures

A law passed in 1898 provided for a gold standard, which was established on June 4, 1900. The ——— coinage consists of the gold *condor* of 10 sucres weighing ——— grains, and containing 7 ——— grains of fine gold (equivalent to the English sovereign) the silver *marc* and its sub divisions, and nickel and copper pieces. The *sucro*, so called from the likeness of Marshal Sucre (a former President) imprinted on the coin, is legal tender only up to 10 sucres.

By a law of December 6, 1856, the French metrical system of weights and measures ——— made the legal standard of the Republic but is not adopted by commerce. The quintal is equivalent to about 101 pounds.

Diplomatic and Consular Representatives

1 OF ECUADOR IN GREAT BRITAIN.

Minister — Vacant

Consul-General — C. Nevares (London)

There are Consular Representatives at Birmingham, Cardiff, Glasgow, Hull, Liverpool (C.G.), Manchester, Southampton, and Falmouth

2. OF GREAT BRITAIN IN ECUADOR

Minister — C. L. des Graz (who is also Minister at Lima, Peru)

Consul at Guayaquil — A. Cartwright.

Consul at Quito — G. W. E. Griffith (also Chargé d'Affaires)

Vice-Consul at Guayaquil — George Powell

FRANCE.

Constitution and Government.

I CENTRAL.

SINCE the overthrow of Napoleon III on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875, by a constitutional law, which has been partially modified in June 1879, August 1884, June 1885, and July 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (e.g. a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs), he appoints to all civil and military posts, has the right of individual pardon and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the territory of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy the two Chambers united immediately elect a new President.

President of the Republic—M. Raymond Poincaré, born 1858, elected President, January 17, 1913.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, March 21, 1913 —

Prime Minister and Minister of Public Instruction—M. Barthou

Minister of Justice—M. Riber

Minister of the Interior—M. Klotz

Minister of War—M. Berteaux

Minister of Marine—M. Doumer

Minister of Foreign Affairs—M. Stephen Pichon

Minister of Finance—M. Dumont

Minister of Colonies—M. Delcassé

Minister of Agriculture—M. Berteaux

Minister of Posts and Telegraphs—M. Maujan

Minister of Public Works.—M. Thierry.

Minister of Labour.—M. Chéron.

Under-Secretaries of State.

For Interior.—M. Paul Morel.

For Finance.—M. Baurely.

For Marine.—M. Monzie.

For Fine Arts.—M. Leon Bérard.

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon:—

<i>House of Bourbon</i>		<i>Second Republic.</i>	
Henri IV.	1564-1610	Provisional Government,	
Louis XIII., 'le Juste'	1610-1643	Feb.—Dec.	1848
Louis XIV., 'le Grand'	1643-1715	Louis Napoleon	1848-1852
Louis XV.	1715-1774	<i>Second Empire.</i>	
Louis XVI. (+ 1793)	1774-1792	Napoleon III. (died 1873)	
<i>First Republic.</i>		<i>Third Republic.</i>	
Convention	1792-1795	Government of National	
Directory	1795-1799	Defence	1870-1871
Consulate	1799-1804	Adolphe Thiers, President	1871-1873
<i>First Empire.</i>		Marshal MacMahon	1873-1879
Napoleon I. (+ 1815)	1804-1814	F. J. P. Jules Grevy	1879-1887
<i>House of Bourbon restored</i>		F. Badi Carnot	1887-1894
Louis XVIII.	1814-1824	Casimir Perier	
Charles X. (+ 1836)	1824-1830	(June—Jan.)	1894-1896
<i>House of Bourbon-Orléans.</i>		Felix Faure	1896-1899
Louis-Philippe (+ 1830)	1830-1848	Emile Loubet	1900-1906
		Armand Fallières	1906-1913
		Raymond Poincaré	1913

The Chamber of Deputies is elected for four years, by universal suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any town commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1889 there was a return to the *scrutin de liste*, in 1889 the nominal vote was reintroduced and in 1912 the previous practice was again resorted to. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for that constituency only—all votes which eventually may be given for him in other constituencies being reckoned void. Multiple elections and elections of persons previously condemned by the law are thus rendered impossible. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors-General appointed by the prefect of the department. The Chamber is composed of 577 Deputies; each elects a Deputy, and if its population exceeds of 100,000, it is divided

into two or three constituencies. In 1876 there were 10,863,421 inscribed electors, in 1884 there were 10,231,532, and 7,657,429 voted.

Chamber of Deputies, elected May, 1910 —Radicals, 113, Radical Socialists, 150, Democratic Left, 72, Organised Socialists, 75, Progressionists, 76, Independent Socialists, 34 Action Libérale, 32 Right, 21, Independent 24.

The Senate is composed of 100 members, elected for nine years from citizens 25 years old, one third retiring every three years. The election of the Senators is indirect and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population, and (2) of the Deputies, Councillors General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875 75 Senators elected for life by the united two Chambers, but by the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine years Senators the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one half of the number of members composing each Chamber. The President can adjourn the Chambers but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government or on the initiative of private members. In the first case they are remitted to the bureaux for examination, in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senat, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 15,000 francs (600*l.*) a year. On January 1, 1907, and the Presidents of the two Chambers receive in addition, 72,000 francs (2840*l.*) for the expense of entertainment. Members of both Chambers travel free on all railways by rail of a small annual payment. The dotation of the President of the Republic is 600,000 francs (24,000*l.*), with a further allowance of 600,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to Deputies or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has besides a special institution under the name of *Conseil d'Etat*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councillors, Masters of Requests (*Maîtres des Requêtes*) and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is the last resort in administrative suits, and it prepares the rules for the public administration.

LOCAL GOVERNMENT

For administrative purposes France is divided into departments, of which the 'territory of Belfort' (remnant of the department of Haut Rhin) be considered as a separate department. Since 1881 the three departments of Algeria are also treated, for most purposes, as part of France proper. The department has representatives of the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. It is assisted by a Prefecture Council, an administrative body, whose advice it may take without being bound to follow it. The Prefect is a representative of the Executive, and, such, supervises the execution of the laws, police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a Sub Prefect in every *arrondissement* except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the and population of which vary very much. There were, in 1906, 36 222 communes, but the territorial land survey of 1909 had the effect of increasing their number by 7. Most of them (31 690) have less than 1,500 inhabitants and 18,471 have even less than 500, while 124 only have more than 20,000 inhabitants. The local affairs of the communes are under a Municipal Council, composed of from 10 to 36 members elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence, but each act of the Council must have the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*separatists*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members, each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (2,911 in France), which is composed of an average of 12 communes, although some of the largest are, on the contrary, divided into several cantons. It is a seat of a justice of the peace, (*juge de paix*) but is not an administrative unit.

The district, or *arrondissement* (362 in France) has an elected *council d'arrondissement*, with many members as there are cantons, its chief function being to allot among the their respective parts the direct taxes assigned each *arrondissement* by the Council General. That body stands under the control of the Sub Prefect. A varying number of *arrondissements* form a department, which has its *council général* renewed by universal suffrage the of one half every three years (one Councillor for each canton). These *councils* deliberate upon the economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

Area and Population.

I. TERRITORY AND POPULATION CONDITION.

The legal population is the result of the two enumerations of 1896 and 1906.

Departments	Area Engl sq miles	Population		Population per ■ mille 1911
		March ■■■	March, 1911

I Decrease

In 1906, the foreign nationalities most numerous represented were English, 35,990, Belgians and Luxembourgers, 310,433, Germans, 87,886, Austrians, 18,001, Swiss, 68,992, Italians, 377,639, Spaniards, 80,914, Russians, 25,695, others, 46,576, total, 1,016,885. In 1911 the total was 1,182,691.

The active population of 1906 was returned under the following occupations: fisheries, 78,000; agriculture and forestry, 8,777,038, mines and quarries, 291,027, manufacturing industries, 5,979,216; transport, &c., 887,837; commerce, 2,002,681, liberal professions, 483,170, domestic service, &c., 1,012,282, public service (including the army), 1,220,164, total, 20,720,879, of whom 7,698,112 were of the female sex.

II MOVEMENT OF THE POPULATION

Births, Deaths, and Marriages

Year	Marriages	Living Births	Ultimate Births	Deaths	Surplus Births over Deaths	Still born
1906	306,487	806,847	71,466	780,196	26,651	37,326
1907	314,061	772,681	71,075	791,752	-19,071	38,765
1908	315,641	792,178	70,413	744,135	+48,043	37,536
1909	307,687	769,585	67,505	754,957	+14,608	36,076
1910	307,710	774,390	66,978	702,972	+71,418	36,000
1911	307,788	742,114	—	776,933	-34,869	33,810

In 1911 the average birth rate for France (living births) was 1.87 per cent. of population. The departments in which the rate was highest were Finistere, 2.15 per 100; Pas-de-Calais, 2.62 per 100, Morbihan, 2.56 per 100. It was lowest in Gers, 1.26; and Lot-et-Garonne, 1.34. The marriage rate in 1911 was 1.55 per cent., and the death rate 1.98. In 1910 the living

births comprised 395,669 male and 378,721 female births, or 1,046 male to 1,000 female

The number of divorces was 10,518 in 1907, 11,461 in 1908, 12,770 in 1909, 12,975 in 1910, and 13,058 in 1911, the number having steadily increased since 1900

III. PRINCIPAL TOWNS

The following towns, according to the census of 1911 have each a total population over 35,000.—

Paris	2,883,110	Rennes	79,372	Loirent	49,039
Marseille	550,619	Grenoble	77,438	Caen	46,934
Lyon	523,796	Dijon	76,847	Clusby	46,676
Bordeaux	261,678	Tours	73,399	Bourges	45,735

Limoges	92,181	Boulogne sur Mer	53,128	Roubaix	36,397
Brest	90,540	Baziers	51,042	La Rochelle	36,371
Angers	83,786	Avignon	49,304	Donai	36,314
Tourcoing	82,641			Rochefort	35,019
Nîmes	80,437				
Montpellier	80,230				

On March 4, 1906 the urban population was 16,537,231, and rural 22,715,011

In 1906 the resident population of the communes, in 1911 the number of communes was as follows —

Communes with Population	Number 1911	Number 1906	Population 1906
Not over	19,270	18,716	5,077,781
501- 1,000	9,409	9,716	6,740,687
1,001- 2,000	4,845	5,068	6,985,251
2,001- 3,000	1,260	1,289	3,180,118
3,001- 4,000	512	522	1,790,267
4,001- 5,000	276		1,198,264
5,001- 10,000	371	361	2,469,982
10,001- 20,000	164	153	2,180,576
20,001- 30,000	184	57	1,413,795
30,001- 50,000		34	1,263,000
50,001-100,000			1,588,544
Over 100,000		15	5,470,148
Total	36,241	36,222	39,252,245

For fiscal and electoral purposes the population of each [redacted] is divided into *agglomerated*, *scattered*, and *separated (comptée à part)*, the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is [redacted] 2,000, and rural where under 2,000.

Religion.

No religion [redacted] recognised by the State

Under the law promulgated [redacted] December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised [redacted] form associations for public worship (*associations cultuelles*), and the State, the Departments and the Communes were relieved from payment of salaries. As transitory measures, ecclesiastics over 45 years of age and of [redacted] 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over after an inventory was taken, to the associations for public worship; the place of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion, but, in each case, there is required an administrative act drawn up by the *prefet* [redacted] regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government, but the arrangement has not been accepted by the clergy, and the religious difficulty (April, 1909) still continues.

The grants paid by the State [redacted] the last year of the old regime amounted to 37,528,800 francs (1,501,150*l.*), those paid by Departments and Communes to 7,555,042 francs (302,200*l.*). The question of pensions and allowances to be paid under the law of December 9, 1905, [redacted] not settled, the clergy having refused to submit [redacted] that law.

There [redacted] 17 archbishops and 67 bishops of the Roman Catholic Church [redacted] France, not including Algeria or the colonies. The Protestants of the Augsburg Confession are [redacted] their religious affairs, governed by [redacted] General Consistory, while the Reformed Church [redacted] under a Council of Administration, the [redacted] of which is [redacted] Paris.

The Associations law, passed July 1, 1901, requires religious communities [redacted] be authorised by [redacted] State, and no monastic association can be authorised without [redacted] special law in [redacted] particular case. [redacted] the [redacted] that law there [redacted] 910 recognised associations, and [redacted] not recognised, the establishments, mostly not recognised, numbered 18,514, and their [redacted] bers 159,628 (30,136 [redacted] and 129,492 women). After the passing of the law, of the [redacted] [redacted] not recognised, [redacted] dissolved the [redacted] and 446 [redacted] for authorisation, which was refused by the Chambers to the majority of them.

Instruction.

The Minister of Instruction, seconded by the Government educational bureaux and inspectors general, directs public and controls private schools. The Superior Council of ■ members has deliberative, administrative and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors general are ■ direct communication with the Minister. For local educational administration France is divided into 17 encadrements, called Academies, each of which has ■ Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each ■ under a Rector, and each is provided with academy inspectors, ■ for each department except Nord which has two (one being for primary instruction) and Seine which has eight (one being director of primary instruction) besides primary inspectors of schools, usually one for each *arrondissement*, ■ inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters, the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

Since 1878 primary instruction has been entirely reorganised and great progress has been made. The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school masters, the other for school mistresses, there are two higher normal schools of primary instruction ■ at Fontenay sur Rose for professors for normal schools for school mistresses, the other at St Cloud for professors for normal schools for school masters. The law of June 16 1881 made instruction absolutely free ■ all primary public schools, that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30 1886 is the organic law of primary instruction now in force, it established that teachers should be lay for infant schools it substituted *écoles maternelles* instead of *salles d'asile*, it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities. The laws of July 19 1889, and July 25, 1891, March 1 and Dec. 30, 1903, and April 22, 1904 determined the payment of the teachers, who are nominated by the prefect on the recommendation of the Academy inspector under the authority of the minister and who (except ■ towns of ■ than 150 000 inhabitants) ■ paid directly by the State, which itself receives the right ' additional centimes ' for primary instruction formerly collected ■ behalf of the ■ and departments.

The application of the law of July 1, 1901 ■ regards the teaching congregations, resulted in 1902-03 in the refusal of authorisation to the congregations applying for it and the closing of many private establishments. A law of July 7, 1904, decided on the suppression of all congregationist teaching within a period of 10 years.

The following table shows the condition of primary instruction ■ ■ ■ (in the figures of 1876-77 Algeria ■ not included, it has been included since 1887-88) —

Description of schools	France		France and Algeria	
	1870-77	1904-05	1910-11

1 Masters

- Mistresses

Boys.

4 Girls

The number of pupils enrolled in the schools, public or private, is greater than the number attending them, since children changing their schools in the course of the year are enrolled several times.

Since 1903-04 the number of pupils in public schools increased, and that of the pupils in private clerical schools decreased as much, the cause being, of course, the closing of congregationist schools. From 1901-02 to 1906-07 3,107 public clerical primary schools and 13,327 private clerical schools were closed by order of the Government, while 3,840 public lay and 9,015 private lay schools were opened to take the place of the schools closed. Many of the clerical schools have been transformed into lay schools, retaining their confessional character. From 1907-08 to 1908-09 there was an increase of 25,876 pupils in the lay public schools, and a diminution of 7,810 in the clerical public schools.

In the infant schools the number of pupils was 753,708 in 1901-02; and 690,222 in 1910-11 owing to the closing of many clerical private infant schools.

The pupils of superior public primary schools and of supplementary courses (which are comprised in the total of pupils of primary instruction) in public and private schools in 1901-02 68,611 (40,644 boys and 27,967 girls), and in 1910-11 102,063 (51,659 boys and 50,404 girls).

Courses of instruction for adults are conducted in the evening by teachers in their schools, and the number of adult pupils was estimated in 1910-11 at 51,925, and for 1911-12 52,797. Besides, there are many popular lectures.

Besides the courses for adults in the primary schools, there are many courses provided by private associations, subventioned or not by the communes.

Pupils leaving primary schools can obtain a certificate; in 1911

194,405 pupils (103,580 boys and 90,825 girls) obtained the certificate of primary instruction, and 6,185 pupils (3,553 boys and 2,632 girls) that of higher primary instruction. In 1911, ■■■ per cent. of the conscripts could neither read nor write, as compared with 3·0 per cent. in 1910 and ■■■ per cent. in 1909. In 1906 3 per cent. of the ■■■ married and ■ per cent. of the ■■■ signed the register with a ■■■.

In 1911 there ■■■ granted 5,810 elementary licences (brevets élémentaires) to school-masters and 14,812 to school-mistresses; 1,668 higher licences to masters, and 4,496 to mistresses (brevets supérieurs); 2,261 certificates of pedagogic efficiency to masters, and 2,915 to mistresses.

The number of primary normal schools (exclusive of Fontenay and St. Cloud) is ■■ for school-masters, and 82 for school-mistresses (France and Algeria). The number of pupil-teachers in primary normal schools in 1911-12 ■■■ 4,466 men and 4,892 women.

The cost of public primary instruction ■■■ in 1877 for France, 89½ million francs (over 3½ millions sterling) of which 22 millions (or 880,000*l.*) from the State; in 1897 for France and Algeria, ■■■ millions (8 millions sterling) of which 180 millions (or 5½ millions sterling) from the State. In 1912 the cost to the State was about 216 million francs, ■■ 10½ millions sterling, exclusive of 10 millions for the cost of school building.

Secondary Instruction: Boys.—Secondary instruction is supplied by the State in the lycées, and by the ■■■ in the collèges, by associations and by private individuals in free establishments. The course of study extends over 7 years, 4 in the first cycle, and 3 in the second, with four different courses of study; 1, Latin, Greek; 2, Latin, sciences; 3, Latin, living languages; 4, sciences, living languages.

Teachers must not belong to any congregation, must have the diploma of licence, and a diploma proving aptitude in teaching, and free secondary schools must be open to State inspectors.

The number of public ■■■ secondary schools for boys and the number of pupils in 1905, 1910 and 1911 were as follows:—

Public Institutions: France and Algeria	1905		1910		1911	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i>	110	60,211	111	60,618	■	61,104
Communal collèges.	■	34,954	231	36,173	■	36,816

In the *lycées* 74·2 per cent. of the boys received secondary instruction, ■■■ per cent. ■■■ in the elementary or primary classes. In ■■■ collèges there ■■■ 13,191 boarders and 23,127 day-pupils, the proportions ■■■ ■■■ per cent. in the secondary classes, properly so-called, 27·8 per cent. in the elementary, preparatory and infant classes, and 12·8 per cent. in the agricultural, commercial and industrial classes.

Private Institutions	1876		■		1906	
	No.	Pupils	No.	Pupils	No.	Pupils
Lay	404	21,246	196	13,813	266	19,986
Clerical	309	46,616	345	40,938	371	44,628

From 1869 ■■■ ■■■ number ■■■ lay establishments ■■■ by

163, that of clerical establishments increased by ■■■ From 1876 to 1909 the number of lay establishments still ■■■ ther decreased, and that of ecclesiastical establishments increased

Besides, there ■■■ ■ 1906, 132 small seminaries under the authority of bishops, intended primarily for the preparation of pupils for the ecclesiastical career. They contained 13,966 pupils, but since the separation of the Church from the State they have been changed into free establishments, and ■■■ included without distinction in the total number of free clerical institutions

Girls.—The following table shows the condition of the institutions for girls —

Institutions	1890		1910		1911	
	No	Pupils	No	Pupils	No	Pupils
Lycees (France)	42	14,500	43	15,000	51	15,000
Colleges (France and Algeria)	0	0	76	11,000	76	11,000
Secondary colleges (France and Algeria)	63	7,500	57	5,500	56	5,500
Total	105	22,000	176	31,000	183	31,500

In 1910 the expenditure of the *lycees* for boys amounted to 44.5 million francs, that of the *lycees* for girls to 5 millions, nearly 5 millions ■■■ devoted to scholarships and prizes to *lycees* for boys and girls. In Paris and a number of provincial towns there are colleges of secondary instruction for girls, either private ■■■ organised by the communes. Secondary instruction is also given to girls in a great number of day schools and boarding schools, lay and clerical. Many of the clerical institutions for girls as well as for boys have been transformed into lay institutions.

Higher Instruction ■■■ supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction ■■■ established by the law of July 12, 1875, modified by that of March 16, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, ■■■ accomplished ■ 1897 in virtue of the law of July 10, 1896.

The faculties ■■■ of four kinds: 14 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers, which had (Jan 15, 1912), from 7,507 (Paris) to 351 (Grenoble) matriculated students; 8 faculties of Medicine (Paris, 4,360, Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, 329), 16 faculties of Sciences (Paris, 1,762, Besançon, Bordeaux, Caen, 100, Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers); 16 faculties of letters (at the towns last named) having from 3,011 (Paris) to 75 students; 8 higher schools and mixed faculties; 15 schools with full functions and preparatory schools ■■■ medicine and pharmacy, with from 691 ■■■ 8 students. The following statement shows ■■■ number of students by ■■■ or schools in January, 1904, 1911, ■■■ 1912:—

Students of	1904	1911	1912
	State Institutions	State Institutions	State Institutions
Protestant Theology	117	—	—
Law	11,084	17,292	17,027

Sciences	4,662	6,096	6,463
Letters	4,069	6,237	6,309
Pharmacy	3,014	1,339	1,858
Schools of Medicine and Pharmacy	—	1,944 ¹	1,772
Total	30,405	41,190	41,194

¹ 1 medicine 2 pharmacy

1 - medicine 200 pharmacy

In 1912 the total number of students in the public establishments was 41,194, of whom 35,621 were French, and 5,569 foreigners, 3,910 women (2,114 French, and 1,796 foreign). The numbers comprise not only matriculated students (among whom are students by correspondence), but also non-matriculated students.

There are free faculties at Paris (the Catholic Institute of Paris comprising the law and advanced scientific and literary studies), Angers (theology, law, sciences, letters, agriculture), Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics), Lyon (theology, law, sciences, letters), Marseille (law), Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction the *École libre des sciences politiques* (43 courses).

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Admission to degrees (agregations) is by special competition, which lead to the title of *professeur* in secondary and higher instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the Collège de France (founded by Francis I in 1530), which has 12 courses of highest study bearing on 12 subjects, literature and language, archaeology, mathematical, natural, mental and social science (political economy, &c.), the Museum of Natural History giving instruction in the sciences of nature, the École Pratique des Hautes Études (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne (18 courses), the École Normale Supérieure, which prepares teachers for secondary instruction, and which follows the curricula of the Sorbonne without special teachers of its own, the École des Chartes, which trains the archivist paleographers (8 courses), the École des Langues Orientales vivantes (16 courses), the École du Louvre devoted to art and archaeology, the École des Beaux-Arts, and the Bureau des Longitudes, the Central Meteorological Bureau, the Observatoire of Paris, and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Beaumont, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

Professional and Technical Education.—The principal institutions of higher or technical instruction dependent on other ministries are the Con-

servatoire des Arts et Métiers at Paris (with evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures, the École des Hautes Études Commerciales, higher schools of commerce with about 600 pupils, dependent on the Ministry of Commerce; the National Agronomic Institute at Paris, the Veterinary school at Alfort, a school of forestry at Nancy, national agricultural schools at Grignon, Rennes, Montpellier, practical schools of Agriculture, &c., dependent on the Ministry of Agriculture; the École Polytechnique, the École Supérieure de Guerre, the military school at St. Cyr, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War; the Naval School at Brest dependent on the Ministry of Marine; the School of Mines at Paris, the School of Bridges and Roads at Paris, with other schools dependent on the Ministry of Public Works; the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai; the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique at de Déclamation depend on the department of the Under Secretary for the Fine Arts, which is attached to the Ministry of Public Instruction. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Commerce) are very numerous, comprising six national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris), two schools of horology, four national professional schools, 38 practical schools of commerce and industry (of which seven are for girls), 20 practical schools of industry; there are also schools of industries, with 6,550 pupils: 18 municipal professional schools in Paris, with 1,385 pupils, and about 370 private schools, with 92,000 pupils.

Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*), one in each *canton* who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including those involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of a President and a variable number of members, for all criminal cases which have been tried without a jury; and the Court of Cassation which sits at Paris, for all criminal cases tried by jury, so as regards matters of law.

For civil cases wherein the amount in dispute is between 1,500 francs, there is, in each *arrondissement*, a tribunal of first instance; above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in the towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts. Throughout France there were 2,890 justices of the peace in 1908, 22 being in Paris.

Judges are nominated by the President of the Republic. They

be removed only by a decision of the Court of Cassation constituted in the *Conseil Supérieur* of the magistracy.

The agencies for the prosecution of misdemeanours and crimes in 1909 appeared as follows:—Gendarmes, 21,167; commissaires de police, 914; agents de police, 17,741; gardes champêtres, 31,864; private gardes, 46,401; forest gardes, 7,430; fishery police, 2,409; railway police, 275.

The following table shows the number of persons convicted (exclusive of convicts under 16 and certain others) before the various courts in five years —

Year	Assize Courts	Correctional Tribunals	Other Courts
1905	2,285	196,346	484,928
1906	2,107	188,906	408,173
1907	2,351	202,572	491,021
1908	2,379	206,826	505,783
1909	1,975	198,837	512,825

The French penal institutions consist, first, of Houses of Arrest (3,276 *chambres de sûreté* and 70 *dépôts de sûreté* in 1910). Next come Departmental Prisons, also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to, reformatories. The reformatories are 15 for boys and 1 for girls, 10 for boys and 4 for girls being public, and 5 for boys and 5 for girls being private. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 1 for men and 2 for women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to New Caledonia or Guiana (military and *recidivistes*); the *dépôt de force* of St Martin-de-Re is a *dépôt* for transferred hard-labour convicts. Of 735 prisoners detained in this *dépôt* in 1910, 746 were sent to Guiana (430 to hard labour and 316 to relegation).

Pauperism and Relief of Old Age.

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. They are partly under the care of the *bureaux de bienfaisance* and partly of the departments, both of which contribute, and ultimately under the supervision of Government. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1910 16,623 bureaux expended 47,564,536 francs and assisted 1,182,360 persons excluding 100,322 persons in Paris. Public assistance is rendered to poor or destitute children. At the end of 1910 the institutions for this purpose contained 226,204 children; the expenditure during the year amounted to 4,061,000 francs. In 1910 the hospitals for the sick, infirm, aged, or infants, numbered 1,878; they contained 191,761 beds, and at the end of the year had 62,897 patients, besides 72,785 aged infirm inmates; their expenditure for 1910 amounted to 188,318,000 francs. In the same year 900,334 persons received gratuitous medical treatment at home, 141,621 in hospitals, the expenditure for such purposes amounting to 24,794,436 francs. At the end of 1910 the asylums for imbeciles national, departmental, and private, had 76,606 patients.

An Act passed in for the relief of aged poor, infirm, and the permanently incurable, limit, 70; but by amendment of the Act, April 5, 1910 this reduced 65. It provided that the cost of the scheme should be borne by the communes, the departments, and State. The number of persons registered for relief at their homes, has risen from 516,430 December 31, 1908, to 607,501 December 31, 1911. cost to the State alone for 1910 was 48,000,000 francs; for 1911, 50,000,000 francs; and for 1912 (voted) 51,200,000 francs. In addition, contributions of the departments and communes totalled 43,800,000 francs in 1909, and 45,700,000 francs in 1910, but it to be remembered that the increased expenditure under this law is in part balanced by the diminished activities of the 'bureaux de bienfaisance' in assisting invalids under of age. The Old-Age Pensions Law of April 5, 1910, amended February 27, 1912, provides for all wage-earners old-age pensions towards which both employers and workers contribute. Contributions are to be paid up to the year of the worker's life, and the pension then will be 100 francs. will be increased by one-tenth for every insured worker who has brought up 5 children of the of 16. On October 1, 1912, 7,698,856 persons were registered under the scheme.

Finance.

I. STATE FINANCE.

The following tables show the budget estimates of the revenue and expenditure proposed for 1913 as compared with those voted for 1912:—

Sources of revenue	1912	1913
Direct contributions	Francs 553,112,861	Francs 561,929,705
Taxes assimilated to direct contributions	52,137,804	54,245,202

1908	3,966,405,129	4,020,549,697	—	54,144,569
1909	4,140,912,961	4,186,090,463	—	45,177,502
1910	4,278,890,789	4,321,918,609	—	48,027,820
1911	4,689,045,845	4,547,915,740	—	141,130,105

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

The French National debt has grown from 5 millions sterling in 1800 to 50.9 millions in 1815, 236.5 millions in 1848, 111 millions in 1871, 1,302 millions in 1912, (32,557,899,787 francs) and the interest from 1.5 millions in 1800 to 51.4 millions in 1912.

On January 1, 1911, the capital of the debt of France stood provisionally as follows:—

	Capital
Ministry of Finance —	
Rentes, 3 per cent, not redeemable	21,922,217,484
Rentes, 3 per cent, redeemable by annuities	3,458,174,000
Treasury debt	491,300,000
— railways	1,180,254,589
— buildings	24,619,035
Treasury	221,250

Republic of canal companies	54 40
Annuity ■ redemption of Rentes (1901)	1 35 140
Annuity July 1901	4 867 344
Total	27 538 0 802
Ministry ■ Instruction	
Debt for school buildings—	
For higher instruction	1 940 5 4
For secondary instruction	" 100 3
For primary instruction	5 36 1 4
Total	
Ministry of Public Works &c —	
Annuities to railways	94 000 000
Purchase annuity of Western Railway Company	61 000 000
Social Insurance	3 100 000
Total general debt	31 162 000
Floating debt (April 1 1912)	1 395 000 000
Grand total	82 557 000 78"
	(1 000 915 001/)

The following table shows the interest and annuities to be paid under the various heads of the public debt according to the budget estimates for 1913 —

	France
Consolidated debt	4 343 276
Reconvertible debt interest and annuities	30 000 000
Annuities	37 571 111
Total	1 070 414 427
	(1 113 732)

The general debt amounts to 1,257,287,029/ sterling, and its charge to 38,642,225/, or the capital is about 32/ per head, and the charge about 19s 8d per head of population.

II. LOCAL FINANCE

For 1908 the revenue of the departments of France, excluding a balance of 128,610,612 francs from 1907, amounted to 516,086,408 francs (20,648,856/), and the expenditure to 507,728,667 francs (20,309,146/). The departmental debt stood at 914,873,064 francs (36,594,922/). For 1911 the ordinary revenue of the communes amounted to 1,000,414,614 francs (including 80,929,325 francs for Paris) and expenditure to 965,518,996 francs (including 380,929,325 for Paris), while the debt on December 31, 1910, amounted to 4,254,290,902 francs (including 2,501,548 francs, the debt of Paris). For the year 1912, the revenue of the City of Paris is estimated at 447,879,992 francs (17,915,199/), and the expenditure at the same amount.

The capitalised value of private property has been the subject of many calculations, which, however, differ too greatly to be considered reliable. The estimates by M. de Foville put the aggregate private fortunes in land, 3,000,000,000/; buildings, 2,000,000,000/; specie, 200,000,000/; convertible securities, 2,800,000,000/; agricultural implements and live stock, 400,000,000/; other personal property, 680,000,000/; total private wealth, 8,080,000,000/. M. Leroy Beaulieu estimates that the total yearly revenue of the nation reaches about 1,000,000,000/; of which three fifths is the product of personal labour. M. Yves Guyot from 1881 (which he shows provide a insufficient and a trustworthy estimate) suggests that the private wealth of France (movable and immovable) is 9,520 millions sterling, the revenue therefrom (exclusive of income from agricultural profits and personal work) about 100 millions sterling.

The results of the decennial valuation of buildings in France show that in the fiscal year 1909-10 there were, outside of public buildings, monuments, 9,478,786 houses and 137,676 workshops and factories in the Republic.

The rental value of these 9,613 structures given in the returns is 3,672,142,128 francs. The rental value in the Department of the Seine, which includes Paris, is 1,206,851,213 francs, practically one third of the total rental value of the whole of France.

The real value of all structures in the Republic exclusive of public buildings, monuments, &c., is given as 64,798,641,000 francs.

Defence

I. LAND DEFENCE

France has a coast line of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,575 miles, of which 1,156 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

The fortified places are specially administered by a 'service des fortifications'. Paris, which is considered as the centre of defence, is surrounded by a wall which has 97 bastions, 17 old forts and 38 new advance forts or batteries, the whole forming two entrenched camps at St Denis and Versailles.

The strong places of first class, each of them with numerous forts, are—On the German frontier, Verdun, Toul, Epinal, Belfort, forming an advanced line, Mauberg, La Fère, Reims, Langres, Dijon, Besançon, a second line. On the Italian frontier, Briançon and Grenoble are the chief places, with Lyon in the rear. There are also a few isolated 'forts d'arts' Nancy, Lunéville, Remémont, Nice. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts. In recent years, most second class and third class fortresses have been dismantled or at least 'déclassées'.

II. ARMY.

The French Army consists of the national army, styled the 'Metropolitan' Army, and the Colonial Army. Both are under the War Minister, but the estimates for colonial troops abroad are included in the budget of the Minister for the Colonies. The considerable forces maintained in Algeria and Tunis, however, are all regarded as belonging to the Metropolitan Army, and their cost is included in the War Minister's budget.

Military service in France is compulsory, and it is universal in the fullest sense of the term, exemptions being allowed except for physical disability. Liability to service extends from the age of 20 to the age of 45, but men do not join till they are 21, nearly so. According to the law promulgated on 10 March, 1905, the term of service in the ranks of the first line, the 'active' army, is 3 years, as in Germany. The soldier then belongs to the reserve for 11 years, after which he passes to the territorial army for 6 years, finally completing his service with 6 years in the territorial army. Men of the reserve of the active army are called up for training and manoeuvres twice in their period of service, for 2 weeks on each occasion. The men of the territorial army have only 1 training of 2 weeks. Those of the territorial army have no periodical training.

There are no "one year volunteers" in France, but voluntary engagements for 3, 4, or 5 years are encouraged, especially for the colonial army.

Owing to the length of the service, also to a number of the men being released after only one year in the ranks, the number of reservists per battalion is very large (2,000 or more.) On mobilisation, therefore, the not only brings unit to strength, but every battalion and regiment forms a corresponding unit, and there is still a certain surplus left for the depot.

Two infantry regiments make a brigade (usually 6, but sometimes 7 or 8, battalions); a brigade a division; and 2 divisions an army corps. French batteries have only a guns each. Each division has a field artillery regiment of a batteries (36 guns), while the corps artillery consists of 9 field and 3 howitzer batteries: altogether 30 batteries to the corps. In addition there are 6 'reinforcing batteries' to each corps, which only exist as a cadre till mobilisation; if they can be placed rapidly on their footing it gives a total of 144 guns to the corps. To an army corps in the field are also attached a cavalry brigade of 2 regiments, 1 chasseur battalion, a companies of engineers, &c. There are also 42 heavy batteries, of 2 guns each, to be distributed amongst the army corps.

A cavalry division is nominally composed of 3 brigades of 2 regiments each, with a division of horse artillery of 2 batteries, in all 24 squadrons, 12 guns. There are 8 permanent cavalry divisions, and a will be formed on mobilisation. Those now in existence are mostly stationed on the eastern frontier, but half of them have only 4 regiments.

The mobilised strength of a normal army corps would be nearly 38,000 combatants. The strength of a cavalry division of a regiments would be about 4,700 combatants.

The French army is localised and territorialised. There are 20 army corps 'regions' including Algeria (the 19th); the division in occupation of Tunis is furnished by Algerian troops. Each region, Algeria excepted, furnishes a complete army corps; also a variable number of units of cavalry, garrison artillery, &c. Each of the 3 infantry regiments of an army corps is recruited from its regimental district; but there is also an additional regiment (the 'regional' regiment) which is recruited, like the chasseur battalions, the cavalry, &c., from the region at large. The regional regiments, and also the chasseur battalions, are usually stationed out of their own regions, in the neighbourhood of the eastern frontier. The 6th army corps (Châlons) and the 7th (Besançon) are by this augmented to 3 divisions, and there is a brigade of a regional regiments and 2 chasseur battalions at Lyons. This is the general arrangement: there are certain variations which need not be detailed. Information regarding the distribution of the troops in N. Africa is given under *Algeria*.

The *Reserve Troops* form divisions corresponding to those of the first line. Therefore usually two in each region. There are in all 36 reserve divisions of approximately the composition and strength, on mobilisation, as the first line divisions. The reserve formations of the regional regiments, of the foot artillery, and of the engineers, are available for garrisoning the fortresses.

The *Territorial Army* similarly consists of a divisions, and garrison troops. The Algerian troops have their own reserve formations, and also territorial cadres for a battalions of Zouaves, 6 squadrons of Chasseurs d'Afrique, a field batteries, &c.

The surplus of the reserve and territorial army would be called the depôts, as required, after mobilisation has taken place, and would be drafted to make good the of the army in the.

The military *Customs Corps* of 38 battalions, and a large number of *Forestiers* recruited from who have been passed

into the territorial army. They could be employed as garrison troops, if necessary.

The *Gendarmerie* is a force of military police, recruited from the army, but performing civil duties in time of peace. There is a legion in each army corps region, and regions have more than one legion. The total strength is about 21,700 men, of whom about half are mounted. It is proposed to create a mobile gendarmerie, to deal with strikes and riots, so as to avoid the necessity for calling out troops on such occasions.

The *Garde Républicaine* is also a police force, and performs duties in Paris similar to those performed by the gendarmerie in the departments. Its strength is nearly 3,000, of whom about 800 are mounted.

The *Colonial Army* is entirely distinct from the Metropolitan, and consists partly of white troops and partly of native troops. The colonial troops are recruited, for the most part, by voluntary enlistment, or by voluntary transfers from the Metropolitan Army, but compulsion may be used for native corps in West Africa if sufficient volunteers do not come forward. The colonial troops at home consist of 12 regiments of infantry, each of 4 battalions, and 3 regiments of artillery, each of 12 batteries (6 field and 6 garrison). These are all permanently stationed in France in peace time.

The troops in the Colonies according to the Budget estimate for 1912 consist of 3 battalions of the Foreign Legion (in Indo-China),¹ 13 battalions and 1 companies of colonial infantry, 32 batteries of artillery (field, mountain, and garrison), 1 squadron of native cavalry, 1 companies of native sappers, and 49 battalions of native infantry (12 Senegal Tirailleurs, 3 squadrons Confinis Sahariens, 12 Tonkinese, 2 Malagasy, and 1 Annamite Tirailleurs, 3 battalions of West African natives, and 1 battalions in French Congo). The batteries of artillery are of 'mixed' type, half to two-thirds of the rank and file being natives. In the native corps the officers, and most of the non-commissioned officers, are French.

The following table shows in round numbers the distribution of both Metropolitan and Colonial troops between (1) France, (2) Algeria and Tunis, and (3) the French colonies (excluding administrative corps).

	Metropolitan Army		Colonial Army		Total
	Europeans	Natives	Europeans	Natives	
France	43,000 ²	—	28,000	—	571,000
Algeria and Tunis	45,000	20,000	—	—	73,000
French Colonies	—	—	10,000	40,000	70,000
Total	88,000 ²	20,000	47,000	40,000	705,000
	615,000 ²		87,000		

The total number of troops maintained by France in garrisons is about 134,000, of whom 75,000 are Europeans.

The field army of France may be reckoned as 19 army corps (two of divisions), the Lyons brigade of 14 battalions, and 10 cavalry divisions. Total about 740,000 combatants. There are also 1 complete divisions of troops and 1 reserve cavalry, amounting to about 490,000 men. Total strength about 1,230,000 combatants. It is, of course, uncertain how the reserve divisions may be employed, but it is conceivable that all the two-division army corps would be converted to three-divisional strength by the

¹ The Foreign Legion consists of 2 regiments, each of 4 battalions. Headquarters of both regiments are in Algeria (s.w.).

² Including 24,800 men of the gendarmerie and of the garde républicaine.

incorporation of reserve divisions. It would also appear that in requiring France to put forward her whole strength, two additional army corps, each of two divisions, could be provided by the Algerian troops and the troops of the Colonial Army in France. These corps, with the Algerian cavalry division, would add about 70,000 men, making a grand total of about 1,300,000 combatants.

The depôts of the field army, when augmented by the surplus of the territorial army who would be first called up (all fully trained soldiers), would amount, it is said, to about 626,000 men, besides which, 600,000 to 700,000 additional men are supposed to be available to make good losses in the field.

The organised territorial troops are said to muster 596,000. The military customs corps, numbering about 40,000, and the Chasseurs Forestiers, about 10,000, would also be available for local defence.

The administration of the French army consists of a general staff and a number of departments, all under the War Minister. In the consideration of general questions the War Minister is assisted by a council, called the Conseil Supérieur de la Guerre, consisting of himself as president, and 12 generals of rank, including the Chief of the General Staff (the Generalissimo of the Army in case of war) and the Chief of the Staff of the Army.

The following table shows the peace establishments of the Metropolitan Army and of the Colonial Army in France according to the budget estimate for 1913.

	France	Algeria	Tunisia	Total
Staffs and Services, &c.	7,74	1	—	8,74
Military Schools	2,55	—	—	2,55
Infantry	312,429	4,34	1,538	318,311
Cavalry	14,061	44	181	14,286
Artillery	1,47	1	180	1,658
Engineers	16,41	180	467	17,058
Train	80,00	18	11	80,199
Administrative troops	14,50	3,750	701	19,001
Gendarmes and garrisons public order	4,64	—	143	4,783
Indigenous Companies	—	1,00	—	1,00
Total Metropolitan Army	481,010	4,44	1,769	487,223
Colonial Troops in France	2,144	—	—	2,144
Total	483,154	4,44	1,769	489,367

The military budget of France for 1913 shows an estimated expenditure of 812,819,193 francs (\$2,512,767), for the Metropolitan Army, 43,287,384 francs (1,731,493) for the Colonial troops in France, 191,051,374 francs (4,042,054) for armament, works and buildings, and stores. Total 957,157,901 francs (38,286,316). The military expenditure charged in the budget of the Minister of the Colonies for 1913 amounts to 97,133,766 francs (3,485,350).

The of the French infantry is the Lebel magazine rifle, calibre 8mm. The cavalry carry the Lebel carbine. The present French field gun is the 75 mm (2.95 in.) Q.F., shelled, gun, model '97. The howitzer batteries are armed with 12 cm (4 in.), 155 mm (6.2 in.) pieces.

NAVY

The Navy Estimates for 1913 amount to 461,288,219 francs (18,451,528), in 1912, 423,278,924 francs (16,931,157).

The French navy is under the supreme direction of the Minister of Marine, who is by a of the. The functions of the last named officer,

who is ■■■■ admiral, were enlarged in 1898. Under the Minister he has charge of ■■■■ the work of the department having reference ■■■■ the building, maintenance, commissioning, and mobilization of the fleet, and particularly of all that concerns preparations for ■■■■. He is chief of the Military Cabinet, while the Civil Cabinet, devoted to administrative work, is directly under the Minister. There are two sub-chiefs of the staff, of whom one is in charge of ■■■■ sections, and the other of the work of the Military Cabinet. The central administration also embraces the directorates ■■■■ personnel, material, and artillery, the inspectorate of works, the finance department, the ■■■■ of submarine defences, hydrography, and other special branches. In addition to these are the Superior Council of the Navy, and the committee of inspectors-general, with a ■■■■ of particular inspectorates, the council of works, and a number of special and permanent technical and professional committees. For purposes of administration the French coast is divided into five maritime arrondissements, having their headquarters ■■■■ the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, ■■■■ each of which the Government has important shipbuilding establishments. At the head of each arrondissement is a vice admiral, with the title of Maritime Prefect, who is responsible for the port administration and the coast defence, mobile and fixed. The chief torpedo stations are Dunkirk, Cherbourg, Brest, Lorient, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona. The naval forces afloat are the Mediterranean squadron, the northern squadron in the Channel, and the divisions of the Atlantic, the Pacific, the Far East, Coochin China, and the Indian Ocean, and there are ships on local stations. In 1898 the principal squadrons were reorganised, the most modern battle ships being collected in the Mediterranean, while the older battleships went into the Channel with the recent coast defence ships.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population'—that is, men and youths devoted to a seafaring life, from the 18th to the 50th year of age—France is provided with a ■■■■ of 114,000 men, of whom about 25,500 are serving with the fleet. The time of service in the navy for the 'Inscrits' is the same as that in the army, with similar conditions as to reserve duties, furloughs, and leave of absence for lengthened periods. It is enacted by the law of 1872 that a certain number of young ■■■■ liable to service in the Active Army may select instead the naval service, if recognised fit for the duties, even if not enrolled in the 'Inscription Maritime.' The 'Inscription' will furnish at least 50,000 ■■■■ than the army would require upon mobilization.

A summary of French ships is as follows:—

912	4 872 950	1,940 765	—	—	340,350

In 1911 there were 1,522,192 vine growers returned and the vintage ■■■■ valued at 1,331,785,144 francs (53,271,405/)

The value of the crop of chestnuts, walnuts, olives, cider apples, plums, and mulberry leaves ■■■■ estimated in 1910 at 187,419,040 francs (7,496,761/)

On December 31, 1911, the numbers of farm animals were Horses, 3 236,110, mules 194,040, asses 360,950, cattle 14,552,430, sheep and lambs, 16,425,330, pigs, 6,719,570, goats, 1,424,190

Silk culture, with Government encouragement (*primes*), is carried ■■■■ in 24 departments of France—most extensively in Gard, Drôme, Ardèche, and Vaucluse

Silk production for 3 years —

Year	Number of producers	Quantities of cocoons put into incubation	Total production	Average yield in Cocoons from 25 grams of eggs
		2 grams	logs	Kilogs
1910	114 263	178,711	4,369 709	■ 390
1911	102 601	141 724	3 169,436	■ ■■

II MINING AND METALS

In France there were in 1910, 557 ■■■■ (out of 1,483 conceded mines) in work, with 228,969 workers, including ■■■■ and children. The annual yield of all the conceded ■■■■ valued ■■■■ 675,198,405 francs (26,807,936/), ■■■■ against 13,884,630/ ■■■■ 1894. The output of non-conceded ■■■■ in 1910 was valued ■■■■ 7,670,907 francs (306,836/)

The following ■■■■ statistics of the leading mineral and metal products of conceded mines, in metric tons —

Year	Coal and lignite	Iron Ore	Pig Iron	Finished Iron bleed	Worked ■■■■
	Metric Tons	Metric Tons	Metric Tons	Metric Tons	Metric ■■■■
1908	37,884,384	9,428,591	3,400,771	560,200	1,852,000
■■■■	37,840,086	11,381,485	3,573,848	558,000	2,040,000
1910	38,349,942	14,046,982	4,038,497	526,000	2,828,500
1911	39,229,591	16,000,000	4,426,469	—	3,837,062
1912 ¹	41,808,580	—	4,826,553	—	4,408,668

1 ■■■■

In 1910 there were 47 smelting works in activity, with 117 blast furnaces.

In 1910, the production of ores was : lead and silver, 14,536 metric tons ; zinc, 50,824 tons ; copper, 222 tons ; antimony, 28,130 tons ; arsenic, 8,045 tons ; manganese, 7,925 tons ; and salt, 1,051,427 tons. In 1910 the output of quarries (for building stone, slate, cement, phosphates, &c.) amounted to the value of 261,151,200 francs (10,446,048*l.*).

III. MANUFACTURES.

In 1906 the numbers of persons employed in the more important industries (apart from agriculture, mining, commerce, and transport) were :—

Nature of Industry	Persons employed	Nature of Industry	Persons employed
Cotton (textile)	117,200	Metallurgy	101,829
Wool " " " "	171,349	Iron work, tool making, &c.	291,240
Silk " " " " " "	121,000	Foundry work	282,670
Flax, Hemp, Jute (textile)	47,518	Copper and bronze	60,776
Rosetry	56,682	Tinned ware	42,513
Lace, &c. " " " "	150,154	Musical and scientific instruments, clocks, &c.	61,104
Ribbons, &c. " " " "	48,551	Pottary	166,831
Clothing of all kinds	949,900	Building, earthwork, &c.	50,180
Linen garments	212,716	Flour milling, &c.	101,693
Hats, &c.	95,283	Baking, pastry, &c.	206,858
Leather-work	134,209		
Wood-work	704,600		

Total number of women workers in France (1906 census) was 4,150,000 employed as follows: Agriculture, 949,000; factories (out-workers), 1,385,000; home workers, 540,000; business, public services, liberal professions, 504,000; servants, 772,000.

The values of the yearly imports and exports of woollens and silks in million francs are seen from the subjoined table :—

Years	Woollens				Silks	
	Imports		Exports		Imports	
	Yarn	Cloth	Yarn	Cloth	Issues	Issues
1909	9·436	42·014	64·988	212·092	59·589	316·860
1910	8·940	44·717	71·944	205·733	67·217	338·156
1911	6·770	44·796	75·178	190·875	50·713	291·955

Sugar.—In 1911-12 there were ■■■ sugar works, employing 81,135 men, 1,646 women, and 1,010 children. The yield of sugar during the last 12 years (expressed in metric tons of refined sugar) ■■■ :—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
■■■	1,010,294	1908-04	717,266	1906-07	682,851	1909-10	743,902
■■■	1,031,080	1904-05	632,736	1907-08	676,832	1910-11	620,668
■■■	776,158	1905-06	984,672	1908-09	723,071	1911-12	465,877

Alcohol.—In 1906, 59,616 thousands of gall ■■■ of alcohol ■■■ produced ; in 1908, 55,836 ; in 1909, 53,388 ; ■■■ 1910, 52, ■■■ ; ■■■ 1911, 53,130 gallons.

IV. FISHERIES.

In the French fisheries, including those of Algiers, the following ■■■ statistics for ■■■ years :—

Year	No. of persons employed	Sailing	Tonnage	Steamers	Tonnage	Value of products
1907	12,344	25,425	195,307	211	32,574	Tuna 121,801,607
1908	140,784	27,712	199,722	—	89,223	129,046,081
1909	1,15,000	21,000	190,707	280	35,807	134,661,725

Statistics of the French cod fisheries in Iceland, in the North Sea, and at Newfoundland, are given as follows for 1909 —

Cod fisheries	Boats		Fishers	Produce		Value of produce
	No	Tons		Tons	Barrels	
Iceland	124	13,600	2,682	11,771	4,000	7,300
North	10	300	348	291	27	300
Newfoundland	224	12,205	6,705	51,820	1,907	15,007
Totals	358	26,105	9,735	63,882	6,934	22,607

The chief produce of the inshore fisheries, in weight and value, in 1909 was as follows. —

	Tons	1,000 Francs		Tons	1,000 Francs
Herring	1,188	7,101	Tunny fish	0,458	4,205
Mackerel	2,570	5,370	Lobsters	1,211	9,088
Sardines	31,231	35,500	Oysters	227	48,452
Anchovies	—	—	Mussels	—	3,337
Sprats	1,275	1,172		(1,000 gals)	—

¹ Prices

Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

Commission Permanente des Valeurs annually determines the values (called actual values) which represent the average prices of the different articles in the Customs list during the year. The values fixed at the end of one year and applied to that year retroactively, are applied also during the following year, at the end of which provisional results thus obtained are revised according to new values definitely by Commission. Thus each year there are published the provisional and the definitive commercial statistics. The customs returns show the country of origin of imports and that of ultimate destination of exports. For five years (provisional 1912) the values were —

Years	General Commerce		Special Commerce	
	Imports	Exports	Imports	Exports
	1,000	1,000	1,000	1,000
1908	257,216	264,812	225,620	202,028
1909	314,260	299,292	249,844	228,724
1910	364,000	324,000	286,938	249,852
1911	392,396	320,488	322,633	243,094
1912	—	—	318,034	265,454

¹ Excluding postal packets

The chief subdivisions of the special trade were :—

	Imports (1,000,000 fr.)			Exports (1,000,000 fr.)		
	1910	1911	1912	1910	1911	1912
Food products	56	51	68	34	29	34
Materials	174	181	186	78	73	77
Manufactured goods	56	61	64	137	140	154
Total	286	323	318	249	242	265

The chief articles of import and export (special trade) were in millions of francs (25 fr. = £) :—

Imports	1910	1911	Exports	1910	1911
Wine	206.5	201.5	Textiles, woollen	213.5	190.0
Wool	652.4	628.2	" silk	232.8	202.0
Cereals	201.3	215.1	" cotton	325.2	334.2
Raw silk	246.3	317.4	Wine	213.4	167.7

Total	4366 8	4894 3	5894 9	6136 1

The share of the principal French ports in the general trade (1911) follows—imports and exports combined—in millions of francs:—

Marseille	3358.3	Bordeaux	950.6	Tourcoing	465.9
Nantes	2714.5	Boulogne	502.3	Belfort, P.C.	388.7
Paris	1535.2	Rouen	497.7	Le Havre	346.0
Dunkirk	1104.1	Dieppe	468.2	Calais	326.7

The imports and exports (special trade) of gold and silver coin and bullion and of bronze coin were as follows in 1911. —

	Gold	Silver	Bronze	Total
Imports	10,562,516	7,409,795	1,400,000	19,372,311
Exports	3,677,840	5,781,277	41,740	9,499,857

The value of goods in transit in 1907 was 35 million sterling; in 1909, 40 million sterling; in 1910, 44 million; and in 1911, 46 million.

The import duties, including shipping and other dues, amounted in 1908, to 21,428,190*l.*; in 1909, to 22,025,680*l.*; in 1910, to 24,540,320*l.*; in 1911, to 32,247,225*l.*

The treaty of 1826 provides for 'the most favoured nation treatment' between the United Kingdom and France in matters of navigation, and that of 1882 (which includes Algeria), in matters of commerce, customs duties, &c.; in 1897 the treaties in force between the United Kingdom and France were extended to include Tunisia.

The following table gives the declared value, in pounds sterling, of the staple articles consigned to the United Kingdom from France in four years:—

Staple Imports into U.K.	1908	1909	1910	1911
Apparel	1,498,977	2,068,988	1,888,000	1,880,591
Milk	3,278,915	4,017,090	4,087,980	3,986,748
Woolen	4,138,880	3,966,009	3,561,051	3,420,688
"	1,802,470	1,981,080	1,675,244	1,418,075
"	2,364,229	2,818,887	2,110,073	1,066,702
Wine	1,774,795	1,908,641	2,163,197	2,231,609
Sugar	1,195,970	1,179,651	1,018,169	98,014
Leather and manufactures	1,162,850	1,300,141	1,262,505	1,238,115
Carrriages, &c.	2,736,011	2,544,044	2,665,014	2,504,250

The total quantity of wine imported into the United Kingdom from France in 1911 was 3,468,049 gallons.

The following table exhibits the value of the principal articles of British produce consigned from the United Kingdom to France in four years :—

Staple Exports from U.K.	1908	1909	1910	1911
	£	£	£	£
Woolen manufactures & yarn	1,710,203	1,714,774	1,532,006	1,714,221

Cotton manufactures and yarn	1,375,345	1,336,610	1,387,481	1,322,382
Machinery	2,051,715	1,965,012	1,870,864	2,379,511

Total trade between France and United Kingdom for 4 years (in thousands of pounds) :—

Imports from France into U.K.	41,502	44,205	44,398	41,630	45,411
Exports to France from U.K.	22,101	21,455	22,400	24,421	12,241

Shipping and Navigation.

On December 31, 1910, the French mercantile navy consisted of 15,895 sailing vessels, of 636,031 tons net, with crews 71,966, and 1,726 steamers of 915,567 tons, and crews numbering 16,610, plus 10,625

Of the sailing vessels 168 of 15,213 tons were engaged in the European sea, and 259 of 370,728 tons in ocean navigation ; of the steamers 261 of 255,891 tons were engaged in European sea, and 229 of 506,748 tons net in ocean navigation. The rest were employed in the coasting trade, in port service, or in the fisheries.

In 1909 and 1910 the navigation at the French ports was as follows :—

Entered	With Cargo		In Ballast		Total	
	Vessels	Tonnage	Vessels	Tonnage	Vessels	Tonnage
1909

The most important ports (1911) Marseille, with 4,795 arrivals and 4,083 departures; Bordeaux, with 1,456 arrivals and 899 clearances; Havre, with 2,277 arrivals and 1,624 clearances; and Calais, with 1,788 arrivals and 1,630 clearances.

Internal Communication.

I. RIVERS, RAILWAYS, ETC.

On January 1, 1911, there were in France 23,721 miles of national roads, in addition to the vicinal roads.

Navigable (1910), 5,450 miles; actually navigated, 3,843 miles; canals, 8,104 miles; actually navigated, 3,051 miles; rivers navigable for rafts, 1,908 miles.

By a law of 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State; which now constructs lines which the companies work, and works its own account its important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the great companies expire at various dates from 1900 to 1920; the periods of State guarantee of four of them terminate at the end of 1914, and of the others in 1934 and 1935.

The length of line open for traffic in 1912 was 25,390 miles of lines of general interest and 6,001 miles of lines of local interest. Total cost to December 31, 1908, 744,800,000L., receipts (1909) 708,400,000L., expenses 41,480,000L., passengers carried 491,936,930, goods carried 165,027,920 metric tons. On January 1, 1909, the Western Railway system was transferred to the State under a law of July 13, and December 18, 1908.

On December 31, 1911, the length of tramways worked was 5,613 miles.

II. POSTS AND TELEGRAPHS.

In 1911, France had 14,379 post-offices. The receipts on account of posts, telegraphs, and telephones, amounted to 376 million francs; the expenditure 302 million francs. The number of letters, &c., carried in 1911

	International			Transit

	millions	millions	millions	millions
Letters	1 306	102	1	1 1
Post cards	4.6	1	—	5
Other messages	1 18	115	—	60
Total	2 330			

The total length of the telegraphic lines in 1911 was 394 miles, with 439 802 miles of wire. There were 21 396 telegraph companies and private belonged to the State and there despatched 65 519,497 telegrams, of which 51,005,166 were international. In 1911 there, 649 649 international 1 892 682 in transit, and 2,971,000 were official. France 9 423 urban telephone systems with 30 030 miles of line where with 16 789 inter urban circuits with 64,517 miles of line. 296,209,491 miles of wire, conversations in 1911 94 445 577. In 1911 the and 326 407 telegrams were received, 50,434 582 from France telegraph.

Money and Credit.

The nominal value of the French money coined in France during 1909, the 1 1911 was —

Year	Gold	Silver	Bronze	Total
	Francs	Francs	Francs	Francs
1 07	200 72 0 0	1 874 34	73 97	211 944 1 1
1 11	138 194 110	100 118	46 97	1 18 7,41
1 11	1 47 30	6 00 1	1 0 00	1 48 60 51

The statistics of private banking are too unsatisfactory to be given. The ordinary savings banks numbered 550 (with 1 837 branch offices) on December 31 1912, the number of depositors was (in 1911 12) 8,532,412 to value of 167,838 4571, thus giving an average of 1971 for each account. The National savings banks on December 31, 1911 held deposits and the total amounting to 1,704,094 437 francs due to 5 970 834 depositors, at the average 285 58 francs to each depositor. The Bank of France, founded in 1806, has the monopoly of emitting bank notes. The situation of the bank on December 31 1910, was —

Money, Weights, and Measures.

The *Franc* of 100 *centimes* is of the value of 2½d = 225 francs to the pound sterling

Gold coins in common use are 20 and 10 franc pieces. The 20 franc gold piece weighs 6.4516 grammes fine, and thus contains 806.45 grammes of fine gold. Silver coins are 5, 2, 1, and half franc pieces and 1 centime pieces. The 5 franc silver piece weighs 25 grammes fine, and thus contains 22.5 grammes of fine silver. The franc piece weighs 5 grammes fine, and contains 4.175 grammes of fine silver. Bronze coins are 10 and 5 centime pieces.

There is a double standard of value, gold and silver the ratio being theoretically 15½ to 1. Of silver coins, however, only 5 franc pieces are legal tender, and of these the free coinage has been suspended since 1876.

The present monetary convention between France, Belgium, Italy, Switzerland, and Greece is tacitly continued from year to year but may be denounced by any of the contracting States, and, if denounced, will expire at the end of the year, which commences on January 1, following the denunciation. According to its terms, the five contracting States have their gold and silver coins respectively of the same fineness, weight, diameter, and current value, and the allowance for wear and tear in each case is the same. The coinage of 5 franc pieces, both gold and silver, is temporarily suspended, and the issue of subsidiary silver is, with certain exceptions, for special reasons, limited to 7 francs per head of the population of each State (but 6 francs for Greece). Each Government is its public officer, except payments in the silver 5 franc pieces of each of the others, and in subsidiary silver to the amount of 100 francs for each payment. Each State engages to exchange the excess of its issues over its receipts of subsidiary silver for gold or 5 franc silver pieces, and at the termination of the convention each is bound to resume also its 5 franc silver pieces, and to pay a gold sum equal to the nominal value of the coin resumed. [But see also Italy.] The following are the total issues of the five States authorized by the convention of 1897: France, 394 millions of francs, Italy, 232.4, Belgium 46.8, Switzerland, 28, Greece, 15.

The monetary system of the Union has been adopted, either wholly or partially, in Spain, Rumania, Bulgaria, Servia, Russia, Finland, and in many of the South American States.

ANDORRA.

The republic of Andorra, which is under the joint suzerainty of France and the Spanish Bishop of Urgel, has an area of 175 square miles and a population of 5,231. It is governed by a council of twenty-four members elected for four years by the heads of families in each parish. The council elects a first and a second syndic to preside; the executive power is vested in the first syndic, while the judicial power is exercised by a civil judge and two magistrates (*viguier*). France and the Bishop of Urgel appoint each a magistrate and a civil judge alternately. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France in the republic.

Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area roughly estimated at about 4,000,000 square miles with a population of about 41,600,000. Algeria, however, is not regarded as a colony but as a part of France, and Tunis is attached to the Ministry of Foreign Affairs. The administration of the colonies is directed or controlled by the Ministry of the Colonies which was organized as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies; French India, a senator and a deputy, Senegal, Guiana, and Cochin-China each a deputy, while most of the others are represented on the "Conseil Supérieur des Colonies." This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a sufficient revenue for the cost of administration. In the budget estimates of 1912 the expenditure of France directly on the colonial service is estimated at 108,477,406 francs (exclusive of a large expenditure in Algeria). Of this expenditure 327,340 francs were for civil administration, 84,755,887 francs for military services, and 7,417,900 francs for penitentiary services. The French Ministries of War and Marine have also to bear heavy colonial expenses not included in the budget relating to the colonies. The military contribution of the colonies for 1912 is put at 14,650,000 francs of which 18,550,000 francs are from West Africa, 700,000 from Madagascar, and 300,000 from Guiana.

The area and population of the colonial domain of France in 1907, as given in the Report of the Budget Commission in the Budget for 1909, are as follows:

	Year of Acquisition	Area in Square Miles	Population

FRENCH INDIA

The French possessions in India, as established by the treaties of 1814 and 1815, consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had in 1909 the following estimated populations —

*Pondichery	48,538	Bahour	19,665	Nodoukadon	5,703
Oulgaet	26,353	Settipacom	14,560	Cotchery	11,645
Modeliapeth	15,153	*Karikal	17,857	*Chander-nagar	25,298
Anancoupom	15,267	Grande Aldie	8,827	*Mahe	10,729
Villenour	23,459	Neravy	6,359	*Yanaon	1,033
Frourbouvane	21,769	Imroular	6,186	Total	282,386

In 1912 the population of the Provinces was as follows: Pondichery, 184,754; Karikal, 56,579; Chander-nagar, 25,298; Mahe, 10,729; Yanaon, 5,033; Total, 282,386.

The colonies are divided into five *dependancies* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichery. The colonies are represented in the Parliament at Paris by a senator and one deputy. At Pondichery the birth rate in 1911 was 42.7, and the death rate 34.8 per 1,000. There were in 1911 12, 53 primary schools and 4 colleges, all maintained by the Government, with 266 teachers and 5,240 pupils. Local revenue and expenditure (budget of 1912) 1,709,312 rupees, expenditure of France (budget of 1913), 230,000 francs. Outstanding debt, January 1, 1912, 470,400 francs. The principal crops are paddy, groundnut, and ragi. There are at Pondichery 5 cotton mills, and at Chander-nagar 1 jute mill, the cotton mills have, in all, 1,622 looms and 78,092 spindles, employing 12,020 persons. There are also at work 2 oil factories and a few oil presses for ground nuts, 2 ice factories and a cocoanut factory. The chief exports from Pondichery are oil seeds. At the ports of Pondichery, Karikal, and Mahe in 1911 the imports amounted to 8,618,802 francs, and the exports to 37,988,286 francs. At these three ports in 1911 372 vessels of 783,527 tons entered and 353 of 759,821 tons cleared. Pondichery is visited by French steamers sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. Railway open, 18 miles, Pondichery to Villapuri, and Peralam to Karikal.

FRENCH INDO-CHINA

French Indo-China, with an area of about 256,000 square miles and a population in 1911 of 11,990,229, of whom 20,784 were European (excluding military forces), consists of 5 States: Annam, Cambodia, Cochin China, Tonking, and Laos, and Kwang Chau Wan leased from China (see below). The whole country is under a Governor General, assisted by a Secretary-General, and each of the States has at its head a functionary bearing the title of Resident Superior or Lieutenant Governor, according to the status of a Protectorate or a direct French Colony.

Throughout the country there are native tribunals from which there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

In 1906 the penal system was reformed, punishment by torture (the *cangue*, &c.) being abolished.

There is a general budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces, about 120 in number, have also their budget, as have the municipalities. The general budget is supported by receipts from customs, government monopolies, indirect contributions, posts, telegraphs, and railways—all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1912 the revenue and expenditure estimated in all the budgets amounted to 59,580,391 piastres. Expenditure of France (budget of 1913) for military purposes was 17,979,772 francs. The outstanding debt of Indo-China on January 1, 1910 amounted to 345,913 francs. On Dec. 20, a loan of 90,000,000 francs was agreed to by the French Chamber of Deputies.

The military force projected for 1913 consists of 10,878 European troops and 18,816 natives, total, 29,694. The forces are commanded by the Commandant Supérieur, a general of division with the rank of army corps generals in France. The naval force comprises ships of quite modern construction: 1 armoured battle ship, 3 armoured cruisers, 3 protected cruisers, 4 torpedo destroyers, 1 armoured gunboat, 12 torpedo boats, 1 submarine, and about half a score of gunboats or other vessels of little fighting value. The naval force is provided with about 4,500 tons.

In Indo-China there are mines yielding in 1911—coal, and lignite 434,016 (metric) tons, zinc ore, 28,241 tons. The value of the total output was 5,355,978 francs.

In 1887 the French possessions in Indo-China, including Annam, Tonking and Cambodia, were united into a Customs Union. The total value of the imports in 1911 was 244,143,000 francs, and the exports 250,147,000 francs. The chief export is rice, amounting for 1911 to 117,470 metric tons. Other exports are fish, pepper, hides, coal, cotton, rubber and sugar.

Into Great Britain in 1911 the imports from Indo-China amounted to 142,805 tons (chiefly rice).

In 1911, 1,884 vessels of 1,681,893 metric tons entered, and 1,677 vessels of 1,638,845 tons cleared.

The oldest railway in Indo-China is that from Saigon to Mytho, which is being extended from Mytho to Cantho (60 miles). In recent years there has been rapid development of the railway system. Total length of line in 1912, 1,183 miles. There are trunk lines and light railways at Hanoi and Saigon. Within the union there were (1912) 8,719 miles of telegraph line with 376 telegraph offices, and 12 urban and 5 inter-urban telephone systems with (together) 1,100 miles of line. There were 1,100 post offices (1912).

The Bank of Indo-China, with an authorised capital of 36 million francs and reserve and redemption funds amounting to 24,265,000 francs, has the privilege not only of making advances on security, but also of engaging in financial, industrial, or commercial enterprise in Indo-China and New Caledonia. For French Indo-China there is a coinage of silver pieces, piastres, $\frac{1}{2}$ -piastres, 1 piastre, and $\frac{1}{4}$ -piastres, the piastre (since 1895) weighs 27 grams, and the fractional pieces in proportion; 1 piastre and $\frac{1}{2}$ -piastre are fine, but the $\frac{1}{4}$ - and $\frac{1}{8}$ -piastre (since 1898) only 835 fine. The piastre is Mexican, usually worth less than 100. There are two bronze coins, one equal to $\frac{1}{4}$ piastre, the other $\frac{1}{8}$ 375th part of a piastre.

In 1890 the territory of Kwang Chau Wan on the coast of China, ceded from China in 1898, and increased in 1900 by the addition of 11 islands.

the bay, placed under the authority of the Governor-General of Indo-China. The territory has been divided into 3 administrative circumscriptions, but the Chinese communal organisation maintained. Its area is about 1 square miles and its population about 150,000. The imports are chiefly cotton yarns, opium, petroleum; the exports are straw sacks, swine, mats. The port a free port. The territory is regularly visited by the vessels of two French companies. Official buildings, a post office, roads, &c., have been being constructed.

British Consul Hanoi.—T. F. Carlisle.

British Vice-Consul Saigon.—J. L. O'Connell.

Annam.

French intervention in the affairs of Annam, which began early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Huế on February 23, 1886, by which a French protectorate has been established over Annam. The King Than Thai, who succeeded to the throne in 1889, has, in accordance with the wishes of the French Government, abdicated in favour of his second son, Duy-Tan, 11 years of age (1907), who is placed under the control of a Council of Regency. The ports of Turan, Qui-Nhon, and Xuan Day opened to European commerce, and the customs conceded to France; French troops occupy part of the citadel called Mang-Ca) of Huế, the capital (population 60,611). Bin-Dinh, the largest town, has 74,400 inhabitants. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 52,100 square miles, with a population in 1911 of 5,554,822, including 1,899 Europeans (exclusive of the military forces). The population is Annamite in the towns and along the coast, and consists of tribes of Moïs in the hilly tracts. There are 5 secondary schools with teachers and pupils. Local budget, 1912, balanced at 3,256,462 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. The productions rice, maize and other cereals, the nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo, excellent timber, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced, amounting annually to about 300,000 kilogrammes, one-third of which is exported, and the remainder used in native manufactures. There about 216,000 head of cattle in Annam and cattle rearing is of some importance. There iron, copper, zinc, and gold in the province of Quang-nam; the mines worked by natives. At Nongson, Tourane, coal mines worked. In North, Central, and Southern Annam there are salt works. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco; chief exports, sugar, rice, cotton and silk tissues, and paper. 132 vessels of 62,336 metric tons entered at the ports in 1908.

Cambodia

Area, 45,000 square miles; population in 1911, 1,634,252, of whom 1,092 Europeans (excluding military forces). The present King, Sisowath, in succeeded late brother, Norodom, who had recognised the French protectorate in 1863. The country divided into provinces. The two chief towns Pnom-Penh (population 62,255), capital of the territory, and Kampot, a seaport but not for sea-going vessels. \$2,282,416, dollars, including a sum of 525,000 dollars

for the civil list of the king and princes. The chief cultures are rice, betel, tobacco, indigo, sugar tree, and silk tree, pepper, maize, cinnamon, coffee. Pepper is grown by 61 villages with 4,780 planters, the production being 750,000 kilogrammes annually. Cotton growing is extending, the production is estimated at 3,000 tons, the whole of which is exported. Salt is worked. There are important factories at Khsach Kandal, Pnom Penh, for the shelling of cotton seeds. The external trade is carried on mostly through Saigon in Cochin China. The imports comprise salt, wine, textiles, and the exports comprise salt fish, cotton, tobacco, rice, also boats.

Cochin-China.

The area of French Cochin China is estimated at 20,000 square miles. The whole is divided into 21 provinces. The towns of Saigon and Cholon have been formed into municipalities. The Colonial Council contains 18 members. The colony is represented in France by a deputy. The population consists mainly of Annamites, Cambodians, Moïs, Chams, Chinese, and a few Indians, Malays, Tagals, and foreigners. In 1911 the total population was put at 3,050,785 of whom 11,251 were Europeans (excluding the military forces). In 1911 there were 325 births among the white and 105,012 among the coloured population, and of deaths, 177 among the former, and 79,785 among the latter. Saigon had in 1911 a population of 64,845, of whom 2,939 were Europeans, the town of Cholon has about 191,655 inhabitants. There are about 380 schools, with 1,000 teachers, and 19,000 pupils. In 1903 it was decided to found a school of medicine at Saigon. There are many establishments for medical aid.

The total area is put at 5,011,277 hectares (1 hectare = 2.47 acres) of which 1,522,666 hectares are cultivated, and 3,488,611 hectares uncultivated (1,748,694 hectares being forest). The chief culture is rice, to which 1,358,706 hectares are devoted. Other crops are maize, beans, sweet potatoes, earth nuts, cotton, cane, tobacco, coffee, coco-nuts, betel-nuts, pepper, oranges, bananas, &c. The farm animals comprise 11,243 horses, 241,744 buffaloes, 109,071 cattle, 709,380 pigs, 3,492 sheep and goats.

Extensive irrigation and drainage works are in progress in the central and south western provinces. River and coast fishing is actively carried on, there are about 73,520 boats on the rivers, and 3,000 on the coast, the fishery products are valued at 2,800,000 francs yearly. There are 1,000 mills in Saigon and Cholon, turning out each from 450 to 500 tons a day. In these towns are also 200 mills, 5 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 22,000 Annamites are small traders. The chief exports are rice, fish and fish oil, pepper, cotton, copra, silk, shrimps, singlass, hides, cardamoms. 756 vessels of 1,549,962 metric tons entered at the ports of the colony in 1911. The Messageries vessels, the steamers of the French National Company, of the Messageries Fluviales, of the Chargeurs Réunis, of the British India and O. Company, and of the Norddeutscher Lloyd visit Saigon regularly. (For railways see Indo China.) At Saigon there are 5 banks and bank agencies.

Tonking.

This territory, annexed to France in 1884, has an area of 46,400 square miles, and is divided into fourteen provinces, with 8,000 villages and a population in 1911 of 6,119,720, of whom 6,182 are Europeans (exclusive of military forces). The King of Annam formerly represented in Tonking by a viceroy, but, in July, 1897, he consented to the suppression

of the vicerealty and the creation of a French residency in its place. Chief town Hanoi, an agglomeration of many villages, with a population of 136,676 in 1911. This town became on January 1, 1902, the capital of Indo-China, instead of Saigon. There are 38 schools. In 1902 a school of medicine for natives was opened at Hanoi. The chief crop is rice, exported mostly to Hong-Kong, other products are sugar cane, silk, cardamoms, cotton, coffee, various fruit trees, and tobacco. About 500,000 kilogrammes of silk are produced annually, of which 300,000 kilogrammes are used in native weaving and the remainder exported. At Haiphong a cotton mill with 25,000 spindles. At Hanoi there is another with 10,000 spindles. The chief industries are silk, cotton, sugar, pepper, and oils. Chief imports are metals and metal tools and machinery, yarn and tissues, beverages, chief exports rice and animal products. The principal port is Haiphong, which is visited regularly by the steamers of two French lines. In 1908, 1,254 vessels of 398,979 metric tons entered at the ports of the colony. The transit trade to and from Lungchau and Moukzo is small.

The Laos territory, under French protectorate since 1893, is estimated to contain 98,000 square miles, and in 1911 there were 640,877 inhabitants. The capital is Vientiane. In the country there are three protected states, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator, the other protected states are Bissac and Muong Sing. The soil is fertile, producing rice, cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. But there are serious difficulties with the natives and for commercial purposes the country is almost inaccessible. It can be entered only by the Mekong, which is barred at Khont by rapids. A railway, four miles in length, has been constructed across that island, and by means of it several steam launches have been transported to the upper waters, where they ply. A telegraph line connects Hué in Annam with the towns on the Mekong, and thence with Saigon. The cost of the Laos administration is borne by Cochin-China (to the extent of six thirtieths), Tonkin and Annam (five thirtieths), and Cambodia (two-thirtieths).

AFRICA.*

(L'ALGÉRIE.)

Government.

The government and administration of Algeria ■■■ centralised ■■■ Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which ■■■ under competent ministers, all the ■■■ are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans ■■■ the ■■■ of the Colony.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under ■■■ the imposts of ■■■ sort which ■■■ collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still ■■■ the cost of the mother country, ■■■ also the burden of guarantee of interest ■■■ railways up to 1926. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations ■■■ instituted in ■■■ to enable the body of tax-payers to ■■■ their views ■■■ questions of imposts by means of elected delegates. There are three Delegations representing ■■■ respectively the French colonists, the French tax-payers other ■■■ colonists, and the Mussulman natives. The Superior Council ■■■ composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by ■■■ purely consultative council of government.

* See ■■■■

The French Chambers have the right of legislating for Algeria, while such matters do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends a senator and two deputies to the National Assembly.

Governor-General.—M. Lutaud, appointed March 22, 1911.

Area and Population.

The of March 4, 1906, showed a population (including the military forces) amounting to 5,231,850 of 184,474 sq. miles. Since 1901 the has been increased by the acquisition of territories in the south, and now extends to about 343,500 sq. miles. The colony has been organised in 2 great divisions, called respectively Northern and Southern Algeria. Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements and 269 communes and 74 mixed communes. Southern Algeria consists of the Territories of Ain Sefra, Ghardaia, Tougout, and the Saharan Oases, organized under decree of August 14, 1905. These territories contain 12 communes of which 5 are mixed and 7 native.

Population, including military forces, on March 5, 1911 :—

	Municipal Population		Population numbered separately				
		Native Total	French	Native Total	Total		
Northern Territory	740,110	4,219,471	5,005,961	44,014	21,000	61,526	5,009,522
Southern Territory	5,213	481,052	486,565	4,511	4,250	7,721	494,306
Grand Total	745,323	4,740,523	5,492,526	48,525	25,250	71,200	5,563,826

Population according to Departements and Territories in 1911 :—

Northern Algeria (Departement)	Population	Southern Algeria (Territoires)	Population
Alger . . .	1,720,881	Ain Sefra . . .	146,800
Oran . . .	1,210,193	Ghardaia . . .	141,877
Constantine . . .	2,116,446	Tougout . . .	165,651
Total . . .	5,047,520	Saharan Oases . . .	40,379
			494,306

The total population in 1891 was 4,124,732, in 1896, 4,429,421. In 1906, the native population numbered 4,447,149; French, 440,420; naturalised Jews and their offspring, 64,645; Tunisians, 3,083; Moroccans, 25,277; Spaniards, 117,475; Italians, 83,153; other foreigners, 17,849. Of the municipal population of Northern Algeria, 2,484,400 were males, and 2,286,574 were female.

The following statistics of movement of population are given for 1910 —

—	Marriages	Divorces	Births	Deaths
European	59	—	1,574	11,806
Musulman	5,681	—	1,227	34,611
Total	47,214	—	148,63	104,617

Still births ■■■ included ■■ births and deaths. The European still births numbered 676, Musulman, 1 ■■.

The chief towns with the total communal population in 1911 were Alger, 172,307, Oran, 123,086, Constantine, 65,173, Bone, 42,039, Sidi bel Abbas, 30,942, Tlemcen, 39,874, Mostaganem, 23,166, Mascara, 24,254, Blida, 35,461, Philippeville, 27,107, Setif, ■■ 261.

Religion ■■■ Instruction

The native population is entirely Musulman, the Jews being now regarded ■■ French citizens. The Roman Catholic Church has an archbishop and ■■ bishops, with 386 officiating clergymen. There are 21 Protestant pastors and 7 Jewish rabbis sharing in Government grants.

At Algiers (city) there is an institution for higher instruction attended in 1911 by 1,292 students (809 for Law, 211 Medicine and Pharmacy, 108 Science, 164 Lettres), Professors (1911), 102. There are higher Musulman schools (*medersas*) ■■ Algiers, Tlemcen, and Constantine where 213 pupils in 1911 ■■■ prepared for native employments. In Algeria there are 22 establishments for secondary instruction with (1911) 5,988 pupils (4,411 boys and 1,577 girls). In 1911 there were 1,235 primary and infant schools, public and private, with 3,026 teachers and 141,537 pupils, inclusive of 226 Musulman schools. There were four normal schools for men teachers with 25 professors and 110 students (70 Musulman), and six normal schools for women teachers with ■■ professors and 218 students. The estimated expenditure on public instruction by the State was, for 1911, 8,861,798 francs.

Crime

There ■■ ■■ Appeal Court at Algiers, and ■■ the *arrondissements* ■■ 16 courts of first instance. There ■■ also commercial courts and justices of the peace with extensive powers. Criminal justice ■■ organised ■■ in France for Europeans. Since ■■■ there have been criminal courts and special repression tribunals for trying natives accused of ■■■. In 1911, 3,502 persons ■■■ arrested for ■■■ crimes. On December 31, 1911, the number in carcerated ■■ 5,876, including ■■ females.

Musulman justice ■■ administered to natives by the *Cadis* in the first instance with ■■ appeal to French courts.

Finance.

The natives ■■ only direct taxes. The departments of War and Marine are excluded from ■■ estimates, but the proceeds of the military tax, the Government monopolies, and some other revenues ■■ paid to France. The ■■■ expenditure (including military and extraordinary disbursements) exceeds ■■ Algerian ■■■ by about 75,000,000 francs. The budget estimates ■■ 1911 showed revenue 144,549,940 francs, and expenditure

140,546,551 francs, for 1912 the estimated **revenue** and expenditure will be as follows —

Revenue		Expenditure	
	Francs		Francs
Taxes (direct)	17,428,191	Administration debt	578,411
Taxes (indirect)	44,173,432	Interior	2,177,040
	8,270,469	Native affairs	1,798,514
Monopolies, &c.	9,677,924	Finance	1,434,111
Various	2,714,626	Posts and Telegraphs	12,111,874
Receipts & orders	29,569,464	Public Works	1,113,879
Extraordinary	5,999,000	Agriculture &c.	8,562,556
		Various	78,000
		Extraordinary	8,999,000
Total	145,117,014 (180,641,111)	Total	145,165,971 (180,241,111)

For the Southern Territories in 1912 the revenue was put at 523,301 francs, and the expenditure at 6,513,284 francs.

At the end of 1906 the debt of Northern Algeria amounted to 53,713,000 francs in capital and 107,997,045 francs in annuities, amortisation and interest.

Defence

The military force in Algeria constitutes the XIVth Army Corps. French residents are under the same obligation to serve as in France, natives are under the obligation to serve 3 years with the colours and 7 in the Reserve, but the total number taken is fixed, and there is a ballot, substitution being allowed. The troops are mainly stationed in North Africa, but they belong to the 'Metropolitan, not to the Colonial Army. There are 4 regiments of zouaves, each of 5 battalions and 5 battalions of African light infantry, each of 5 companies. 6 regiments of cavalry (Chasseurs d'Afrique), of 5 squadrons, 12 African field batteries, and 2 garrison battalions, also about 12 companies of engineers. These are all European troops and the case of the artillery and engineers their recruiting depôts are in France. [The Foreign Legion of 2 regiments of 1 battalions recruited from foreigners of any nationality, but officered chiefly by Frenchmen, the headquarters of both regiments are in Algeria, but battalions sent to any colony where they may be required. The Natives 1 regiments of Algerian Tirailleurs each of 1 battalions (one has now 8), and 1 regiments of Spahis (Arab cavalry) each of 5 squadrons. The officers and a proportion of the non-commissioned officers, of the native regiments are French. The troops are organised in 3 divisions with headquarters at Algiers, Oran, and Constantine, respectively, but none of them at present form part of the field army in Morocco. Those in occupation of Tunis form a fourth division, headquarters in Tunis. The Algiers and Constantine divisions each consist of only 1 infantry and 1 cavalry brigade, with a field artillery division of 1 batteries. The Oran division, and that in Tunis, have each 1 infantry brigades, and a cavalry brigade. The Oran division has 3 field batteries, the Tunis division 6 field batteries. The battalions of garrison artillery are at Algiers and Biseria, and the headquarters of 1 engineer battalions at the same places. The strength of the troops in Algeria, according to the budget estimate for 1912, is 56,164 of all ranks.

Agriculture and Industry.

There is in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which

cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable part of the mountainous region is without adequate means of communication and is very inaccessible.

The soil is, under various systems, held by proprietors, by farmers, and by Métayers or Khammés. Most of the State lands have been appropriated to colonists. The population engaged in agriculture in 1909 was 3,322,520; 213,756 being Europeans. In 1911 the chief cereal crops were, wheat 3,303,405 acres, yielding 19,599,727 cwt.; barley, 3,360,435 acres, yielding 20,464,953 cwt.; oats, 433,964 acres, yielding 3,453,770 cwt. Other crops are maize, potatoes, beans, and drais. Flax, tobacco and silk are cultivated.

In 1911 there were 371,700 acres under vines, yielding 185,754,096 galls. of wine. The orange, date, mandarine, citron, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil is an important industry. In 1909 12,907,908 trees yielded 4,871,087 cwt. of olives and 7,073,572 galls. of oil. Forests cover 6,559,490 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 645,000 acres are cork-oak trees, from which in 1909, 140,434 cwt. of cork valued at 186,631*l.*, were obtained. The dwarf-palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, for pasturage for cattle, sheep, or pigs. The forest revenue annually amounts to over 240,000*l.*

In 1911 there were in Algeria 226,764 horses, 192,484 mules, 279,815 asses, 1,118,952 cattle, 8,528,610 sheep, 3,861,847 goats, and 110,012 pigs.

There are extensive fisheries for sardines, anchovies, sprats, tunny-fish, &c., and also shell-fish. In 1909, 5,180 persons, and 1,822 boats of 4,914 metric tons were employed in fishing, and the fish taken were valued at 152,034*l.*

In 1909, 44 mines (out of 94 concessions) were worked for iron, zinc, lead, mercury, copper, antimony, and petrol. The quantity of iron ore extracted (1909) was 127,426 tons, valued at 59,600*l.*; of lead and zinc ore, 24,758 tons, valued at 150,800*l.*; of copper ore, 14,940 tons, valued at 17,000*l.* The output of all the mines in Algeria in 1909 was valued at 21,634,043 francs. Petroleum has been found in Oran, 121,020 metric tons being produced in 1908. The output of phosphates in 1908 was 452,060 metric tons, as compared with 373,763 metric tons in 1907.

Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000*l.* sterling):—

	Imports	Exports		Imports	Exports
1907	17,935	12,539	1910	20,213	19,731
1908	17,970	12,768	1911	23,007	20,537
1909	18,190	12,169	1912	20,302	20,793

In 1912 the imports valued at 22,426,000*l.* came from France; of the exports the value 15,419,000*l.* went to France.

ALGERIA

In 1911 and 1910 the distribution of special trade among the principal countries follows, in thousands sterling) —

From or to	Imports (1910)	Imports (1911)	Exports (1910)	Exports (1911)
France	10001	10001		10001
French Possessions	1771	506	1641	17
Germany	152	32	709	758
Britain	36	1	794	1077
Belgium	15	10	424	
Spain	43	61	41	474
Italy	247	79	165	194
Russia	314	1,000	305	312
Austria Hungary	4	1	198	14
United States	11	147		167
Morocco	16	271	107	110
Brazil		550		10
Netherlands	364	10	40	
		14	910	

Chief imports and exports in thousands of francs —

Imports	Exports
Cottons	14
Woolens	710
Clothing and linen	1432
Skins and manufactures	21046
Machinery and tools	2361
Other metal work	771
Furniture and woodwork	
Toys brushes &	726
Paper	1717
Coal	10964
Sugar	1204
Vegetable oil	951
Coffee	11001
	187
	Slacks
	Hides and skins
	Wool
	Wheat
	Oats
	Bulky
	Olive oil
	Cork
	Wine
	Phosphates
	Iron ore
	Zinc ore
	Fruit fresh and dried
	Tobacco (cigars &c)

In 1912 the receipts of the customs authorities amounted to 39,075,546 francs (1,563,0217)

Shipping and Communications

In 1912, the French and Foreign trade, 614 vessels of 5,973,490 tons net entered, and 4,688 of 5,956,416 tons net cleared Algerian ports

On January 1, 1912, the mercantile of Algiers consisted of 81,771 tons net

Algiers is the most important coaling station in the Mediterranean
National roads have a length of 1,826 miles

In 1911 there were 2,031 English miles of railway open for traffic (excln of lines in Tunisian territory) The railway receipts (1910) amounted to 51,824,778 francs

The postal receipts in 1911 were 5,239,903 francs, and there were 665 post offices The telegraphic receipts were 2,103,764 francs, and those from telephones 1,617,992 francs The receipts for the three services were 8,085,666 francs

The telegraph of Algeria consisted in 1911, of 8,977 miles of line and 24,550 miles of wire, with 684 offices. Telephone urban systems, 4,690 miles of line, inter-urban, 7,667 miles of line.

The Bank of Algeria, whose privilege has been extended to the end of 1920, is a bank of issue, with a capital of 20,000,000 francs, but its note circulation must not in any case exceed 150,000,000 francs. Several co-operative agricultural banks, assisted by Government funds, are in operation. There are in Algeria 7 savings banks with, on December 31, 1909, 19,427 depositors, the amount due to depositors being 6,786,367 francs.

British Consul General for Algeria—B. Cave, C.B.

Vice Consul at Algiers—L. C. Graham.

Vice Consuls at Aïzeu, Bône, Oran and Philippeville.

EQUATORIAL AFRICA (FRENCH)

The French Congo extends along the Atlantic coast between the German Kamerun colony and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N lit to the German Kamerun, and inland to the meridian of 11° 20' of Greenwich, and the Kabinda region which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr el Ghazal and Lake Chad. French acquisition began on the Gabon river in 1841; Libreville was founded in 1849, Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. By a convention, dated November 14, 1911, France agreed to cede certain parts of the colony to Germany in return for German recognition of the French protectorate in Morocco. The total area ceded is about 107,270 square miles with a population of about 1,000,000. Sleeping sickness is very prevalent in the district and is fast decimating the population. At the same time Germany ceded to France from her Cameroons territory 6,450 square miles (see map in the STATISMAN'S YEAR BOOK for 1912).

The French Congo is about 669,000 square miles containing a population estimated at 10 millions of negro and other. By decree of February 15, 1906, the French Congo is divided into four circumscriptions which form three colonies, viz.—the Gabon Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari-Chad Colony (capital Bangui), the Chad region is, however, for administrative purposes administered as a military Territory. The three Colonies have each a Lieutenant Governor, they all have financial and administrative autonomy, and each an administrative council. The population of Gabon in 1911 was 28,000 (587 French), of Libreville, 210 (163 French).

Decrees have been issued changing the name of the French Congo into French Equatorial Africa and extending to the Gabon, the Middle Congo, and the Ubangi-Shari Colonies, and Chad Military Territory the authority of the Governor General.

The Lieutenant Governors are under the Governor General of the French Equatorial Africa, who is assisted by a Secretary-General and a Council of Government. There is a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues

chiefly from customs duties, there are native hut and poll taxes. The sale of alcohol to natives is restricted, and in some places prohibited. For 1911 the colonial budget gave the following figures: General budget, 5,542,900 francs, loan fund 6,046,700 francs. The colonial budgets were as follows: Gabon 1,584,300 francs, Middle Congo, 2,087,000 francs, and Ubangi, 1,401,000 francs, Chad Military District, 7,506,000 francs. The estimated expenditure of France on the French Congo for 1913 was 8,583,802 francs. In the colony there are 43 primary schools for boys and 10 for girls, with about 3,600 pupils (724 being girls). There is considerable shipping at Loango, but Libreville is not accessible for large vessels. Both these ports are visited by the vessels of the Chargeurs Réunis. The total imports were valued in 1910 at 11,119,000 francs, and the exports at 17,454,000 francs. The military force of the colony (1912) consists of 4,832 men, of whom 357 are Europeans. The development of the Ubangi Colony has progressed, but trade is in an indifferent state in Middle Congo, and is in a bad state in Gabon, owing to the critical condition of the concession companies. The natives cultivate cotton. Europeans successfully grow coffee, vanilla, and cocoa. The forests contain valuable woods, and rubber is collected. The mineral resources of the territory include gold, copper, and iron. The exports comprise rubber, ivory, various woods, palm oil, palm kernels, coffee, cocoa, kola nuts, piassava and other produce. In 1909, 115 vessels of 244,829 tons entered, and 116 vessels of 246,537 tons cleared the ports of the French Congo. The chief port is Libreville. The tenure of conceded land by concession companies now (since July, 1910) depends on actual cultivation or exploitation of the soil. A decree came into force on January 1, 1911 forbidding the manufacture and exportation of impure stout beer, it being expected that an improvement of the quality produced will soon have beneficial effects upon the trade of Gabon. The Central African telegraph line connects Brazzaville with Loango, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles and also Brazzaville and Leopoldville. A line is being laid to connect Brazzaville with Stanley Pool in the Belgian Congo, and ultimately with the German East African telegraph system at Lake Tanganyika. The total length of line in operation (end of 1911) is about 900 miles.

On the north east of Lake Chad is the state of Kamm, which was completely subjected to France in 1903, and is now only a district of the Shari territory with M'Id for its capital. Wadai to the east of Kamm, with an area of about 170,000 square miles, and a civilised population of about 2,000,000, accepted the French Protectorate in the year of 1903. In 1911 the French force occupied Aradpa, some miles to the north of the capital Abesht, which is in communication with Benghazi, on the coast of Tripoli, by caravans.

British Consul—W. J. Lamont

MADAGASCAR.

Government.

The last native sovereign of Madagascar, Rānavālonā III. (born 1861), succeeded in 1883. The French having claimed a portion of the north-west coast ceded to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1890, Diégo Suarez being surrendered to France. A French Resident-General received at the capital, and the foreign relations of the country claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar recognised by Great Britain; but the Native Government steadily refused to recognise any protectorate. In May, 1895, a French expedition despatched to enforce the claims of France, and on October 1, the capital having been occupied, a treaty signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

On February 27, 1897, the Queen was deposed by the Resident-General, and on March 11 she and her family were deported to the island of Réunion; whence, in March, 1899, she was transferred to Algiers.

Governor-General.—M. Albert Piequis (1910).

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, nor has it any elective assembly. The island is partly under civil and partly under military administration. In 19 provinces or districts there are civil administrators; in 11 military territories circles military officers direct affairs. The administrative system is based on the autonomy of the different districts. The administrators appoint as local governors and chiefs of districts usually those who have been chosen by popular vote. Natives employed to a large extent in subordinate positions both in the civil and military administration.

Area and Population.

Madagascar is situated on the south-eastern side of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; greatest length, 980 miles; greatest breadth, 380 miles. The area is estimated at 228,000 square miles. The census of June 1, 1911, showed a population of 3,104,881, of whom 9,919 were French, 2,201 of other European birth, 5,663 were Asiatic, 14,717 African, and 3,072,381 were Malagasy (1,301,716 male and 1,888,665 female). For the movement of population is given as: Civil European and mixed population, births 481, deaths 511, marriages 85, divorces 4; natives, births 68,862, deaths 81,778. The Malagasy tribes very numerous, the more important being the Hova (847,480), the Betsileo (408,024), the Betsimisaraka (288,159), the Tanala (156,720), the Sakalava (155,126), and the Bara (140,450). Hindu, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe the Hova, whose language, allied to the Malayan and Oceanic tongues, understood over a large part of island. The people are divided into great many clans, who seldom intermarry. The slave trade nominally abolished in 1877; slavery and all parts under its authority abolished by proclama-

tion on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 to 60 years of age, formerly 5 francs, has been increased to 10, 15, in some provinces 20, and at Antananarivo to 25 francs. The population of the chief towns were: The capital, Antananarivo, in the interior, 94,813, Fianarantsoa 8,179, Tamatave 8,761, Andovoranto 6,600, Majunga 7,205, Diego Suarez 10,377, Ambositra 3,000, Tulcar 2,900, Mananjary 2,600. The principal ports are Tamatave, on the east coast, and Majunga on the north-west coast.

In 1897 Diego Suarez (a French colony from 1885), the island of Nosy Be (area, 130 sq. m.) on the east coast, and the island of Ste Marie (the east coast (area, 64 sq. m.)) were placed under the authority of the Governor-General of Madagascar.

Religion, Education, Justice.

Up to 1895 a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 50,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission, and the Anglican Mission); there is also a Norwegian Lutheran Mission, French Catholic. There were 238 members (67 female); Protestant and Anglican missions had 177 (78 female). The outlying tribes are still mostly heathen.

Education is compulsory from 6 to 14 years of age. In 1911 there were 574 official schools for Europeans with 917 teachers and 54,048 pupils, and 402 non-official schools, with 1,201 teachers and 39,469 pupils. Of the official schools in 1911, 20 were for European children, having 44 teachers and 1,201 pupils; and 552 schools were for native children, having 873 teachers and 53,146 pupils. Since 1905, no state subvention has been given to private schools. The State expenditure on education in 1911 was 38,539 francs. Private (or mission) schools are required to carry out the Government programmes. Children are required to learn the French language.

For the administration of French justice there are a *Parquet* consisting of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts and provinces, and the natives have the right of appeal from lower to higher tribunals, and finally to the Governor-General.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a personal tax and taxes on land and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources, and from subventions granted by France. The chief branches of expenditure are general administration, public works, the post office, and the public debt. For 1911 the local budget showed a revenue of 1,202,506 francs, and expenditure of 1,202,506 francs, apportioned as follows: ordinary expenditure, 923,076 francs; extraordinary, 158,518 francs; railroad, 55,629 francs; native medical assistance, 65,281 francs. The expenditure on France for Madagascar in 1913 (2,514,551 francs) was wholly for military purposes.

The colony in 1897 contracted debt to the amount of 4,200,000 francs at an average yearly rate of 3.02 per cent. Of this debt the amount outstanding on Jan. 1, 1910, was 99,283,000 francs. The loans were made for the purpose of public works or for the redemption of loans for public purposes.

Defence

The troops in Madagascar (including the forces at Diego Suarez) consist of 2,411 Europeans, and 6,376 natives. The police and militia are trained on the local budget.

Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified, foreigners were permitted to acquire land, and registration of land was begun. Government lands urban or non urban, may be let or sold to private persons, or to companies for agriculture, pasturage, or mining.

Cattle breeding and agriculture are the chief occupations of the people, there were in 1910, 4,392,131 cattle on the island, 2,125 horses, asses, and mules, 246,955 sheep (rough, native breed) 98,421 goats, and 407,782 pigs. The area under cultivation by Europeans in 1910 was 976,379 acres in extent, of which 105,343 acres were actually cultivated. In addition the following areas were under crops cultivated by natives: sweet potatoes, 55,622 hectares, manioc, 42,794 hectares, maize, 764 hectares, potatoes, 12,421 hectares, haricots, 10,635 hectares. Madagascar is a rice exporting country. In 1910 there were 875,000 acres under rice cultivation producing 700,000 tons. Other farm products are sugar, coffee, cotton, cacao, vanilla, tobacco, cloves, mulberry trees, and rubber trees. Sericulture is encouraged. The forests abound with many valuable woods, while caoutchouc, gums, resins, plants for textile, tanning, dyeing and medicinal purposes abound. The principal article at present produced in the island is caoutchouc, which is exported to London, Hamburg, and Marseilles. Silk and cotton weaving are carried on, and the manufacture of textures from the raphia palm fibre, and of metal work. Works for the preparation of sugar, rice, soap, beer, &c., are being undertaken by Europeans.

Of minerals, gold, iron, copper, lead, silver, zinc, antimony, manganese, nickel, sulphur, graphite, lignite (March, 1912) and also coal have been found. Mining is carried on under the Decree of May 23, 1907. In 1909, concessions for gold mining, embracing 299,894 hectares were worked. In 1912 metals and minerals were produced as follows: gold, 64,185 ozs., graphite, 2,732 tons, rock crystal, 56½ tons, and corundum 469 tons.

Commerce

The trade of Madagascar has been as follows in five years -

	1906	1908	1909	1910	1911
Imports	£ 1,095,140	£ 1,046,770	£ 1,341,113	£ 1,338,477	£ 1,740,000
Exports	£ 1,114,520	£ 1,235,440	£ 1,335,127	£ 1,917,531	£ 2,001,416

The chief articles of import and export in 1911 are the following -

Imports	1911	Exports	1911
Cottons	£ 715,766	Gold	ozs. 92,022
Wines, cognac	£ 277,617	Rubber	head 20,441
Spirits	£ 230,729	Tanning, Bark	head 38,338
Coal	tons 6,805	Rice	tons 6,175
Cement	4,081	Manila fibre	tons 6,408
Lime	2,742	Manioc	tons 13,704
Ironwork	1,557		

Of the imports in 1911, the value of 1,541,127*l* from France, and 65,157*l* from French colonies (the two together being per cent of the whole) Of the exports, the value of 1,202,273*l* to France, and 63,823*l* to French colonies

Shipping Communications

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by steamers plying monthly In 1911, 11,928 vessels of 1,616,687 tons entered and cleared at the ports of Madagascar Of the total tonnage 18,579 vessels of 2,533 tons were French, 4,182 vessels of 306,236 tons were British There are as yet but few roads in Madagascar in the European sense of the word At the end of 1911 there were 1,175 miles of metalled roads The transport of mails and passengers by motor cars is being extended A fortnightly service of motor cars has been established between Antananarivo and Manakirao (61 miles), and a service—twice weekly—between Antananarivo and Ambositra, a distance of 166 miles Waggon roads have been made from Tamatave to Antananarivo, from Antananarivo to Mjunga, and between most of the chief military posts A road (124 miles) is being constructed between the port of Tamatave and Lake Alaotra in the north, of which 20 miles had been completed in 1910 Tamatave is also connected by a railway of about 7 miles with Ivondy, then by canal with Brickaville whence a railway of 168 miles is open to Antananarivo (total, 190 miles) Transport over the waterways, near the coast, is in the hands of a French Company

There is postal communication throughout the island The telegraph line has (1911) a length of 4,461 miles, and a cable connects with Mozambique, and another with Mauritius There are 385 miles of telephone line, and three Government wireless telegraph stations

Money and Banks

The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diego Suarez, Manakirao, Mjunga and Iulcar In 1911 the Bank of Madagascar, with headquarters in Paris, was opened at Tamatave (soon to be removed to Antananarivo) with a capital of 600,000 francs

The only legal coin is the silver 5 franc piece, with its silver sub-divisions as well as copper coins of 5 and 10 centimes, but the Italian 5 lire piece and Belgian Greek and other coins of equal value are also in circulation For smaller sums the coin used to be cut up into fractional parts, and weighed as required, but this is an illegal practice The Government has withdrawn this cut money at the rate of 30 grammes of silver for 5 francs, and has replaced it by fractional silver and copper coin

Consular and other Representatives

OF GREAT BRITAIN IN MADAGASCAR

Consul at Antananarivo—F. P. Porter

Vice Consul at Tamatave—C. B. B.

There is also a Vice Consul at Mjunga and a Consular Agent at Diego Suarez

MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands, comprising Mayotte, Anjouan, Grande Comore and Moheli, forms a colony which in 1906 was united to the general government of Madagascar.

The island of Mayotte (140 square miles) had a population (1906) of 9,989 inhabitants. There is an increasing emigration to Zanzibar and Madagascar. In 1879 there were 3 schools with 1 teacher and 78 pupils. The product was formerly sugar, but the cultivation of vanilla has now superseded that of the cane. There are now only three sugar works and two distilleries for vanilla, sugar, cacao, and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grand Comore, Moheli, Anjouan, and a number of smaller islands, of about 1,000 square miles and population in 1911 of 94,844 (94,847 natives, and 497 Europeans). The island of Grande Comore February 7,

1910, ceded his sovereign rights to France. Vanilla and perfume plants successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

Local budget of Mayotte and dependencies, 1909, 221,341 francs, and of Grand Comore 176,200 francs. Outstanding debt January 1, 1910, 883,760 francs.

Imports into Mayotte and Comores in 1911 amounted to 52,565, exports, 188,261. The principal imports cotton fabrics, metals, and rice, the principal exports, hides, sugar and vanilla.

REUNION.

Reunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1767. It is administered by a governor assisted by a privy council, and an elective Council General, and is represented in the French Parliament by a Senator and two deputies. It has an area of 870 square miles and population (1912) of 173,822, of whom 159,218 are Europeans, there were also 8,841 British Indians, 1,868 natives of Madagascar, 2,927 Africans, Chinese, and Arabians. The chief towns are St Denis, with 23,972 inhabitants in 1912, St Pierre, 29,481; St Paul, 18,646; St Louis, 13,346. The towns are under the French municipal law. In 1911 there were 165 schools with 1,000 teachers and 15,051 pupils. The chief port, Pointe-du-Galet, is connected by a coast railway of 80 miles with St Benoit, on the one hand, and St Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar (40,000 tons exported in 1911), (953,877 gallons), coffee (81 tons), tapioca (2,860 tons), vanilla (51 tons), spices. The chief imports are rice (1911, 293,709 bags), grain, &c.; the chief export is sugar. In 1911, 121 vessels of 240,729 tons entered, and 113 vessels of 217,730 tons cleared at the ports of the Island. The Tamatave Reunion Mauritius Telegraph Cable is open for traffic. The local budget for 1912 showed income and expenditure 3,071,980 francs. Expenditure of France (budget 1913) 2,238,190 francs. The Colony, which has no debt, 18 communes have debts, amounting in January, 1913, to 6,898,386 francs, incurred for works and buildings. The Bank of Reunion has a capital of 3,000,000 francs and reserve fund (1913) of 1,500,000 francs.

and Amsterdam, small islands in the Indian Ocean, belong to France.

Kerguelen, a desolate island, about 50 S lat and 70 E long, was annexed by France in 1893.

British Consul at Reunion.—E. G. B. Maise, C.M.G.

There is a British Vice-Consul at St. Denis.

SOMALI

The Somali Coast Protectorate lies between the Italian Colony of Eritrea and Somaliland, the inland boundary towards Abyssinia being, by convention, 20, 1897, at a distance of 100 kilometres (about 100 miles) from the coast. The territory is an area of about 5,790 square miles, and the population is estimated in 1910 at about 208,000. It is administered by a Governor with a Privy Council. The port of Obok was acquired for Britain in 1862, but it was not until 1884 that its active protection began. In 1884 Sagallo and Tajurah were ceded to France; in 1885, Ambado; in 1886 the territory was delimited by agreement with Britain; in 1888 a port was created at Djibouti, and the government

FRANCE:—FRENCH AFRICA AND SAHARA

Djibouti has (1911) 13,396 inhabitants, of whom 1,000 are European (267 French). The natives are either of the Somali or the Somali. In 1902, a French mission school for boys and one for girls were opened at Djibouti with 100 pupils. The expenditure of France on the Somali coast (budget of 1913) was 1,097,500 francs. The local budget for 1911 balanced 1,411,000 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The chief imports are cotton goods, butter, sugar, galvanised iron; the chief exports were coffee, ivory, hides and skins. The total imports in 1911 reached 32,620,638 francs, and the total exports 18,774,926 francs. The export of the products of Abyssinia in 1911 amounted to 18,974,926 francs. Merchandise imported at Djibouti, destined for Abyssinia, amounted to 22,708,001 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by Djibouti by railway to Diré-Dawah. The French Somaliland has about 192 miles of railway. [See also under *Abyssinia*.] The vessels of 4 French, 1 English, 1 German, 1 Austrian and 1 Russian, and 1 Italian shipping company visit Djibouti, which is also in communication with Aden by a line of French and English steamboats for local traffic. In 1911 there entered at Djibouti 379 steam merchant vessels of 692,188 tons, and cleared 578 of 692,019 tons.

FRENCH AFRICA AND SAHARA

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other 100 of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 486 yards; the lease, at first, to be for 99 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbakunda on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Loos Islands were ceded to France.

By an agreement, dated July 6, 1911, between England and France, the boundary line between French Guinea and Sierra Leone was re-adjusted.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Mauritania. The French Sahara may be roughly estimated at about 1½ million square miles.

A decree of October 1, 1902, divided French West Africa as follows:—(1) The colony of Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) the Territories of Senegambia and of the Niger. The Senegambia and Niger Territories consist of the protectorate which was formerly dependent on Senegal, the territories of the Upper Senegal, the Niger, and the Military Territories, all being united under one administrative and financial régime. In 1902 the French Protectorate was extended over the Moorish tribes of Mauritania and Brakna to the north of the lower Senegal, and for these territories a provisional government, with civil

and military functionaries, was formed under the of Mauritania. Over the whole of French West Africa there is a Governor-General, who is assisted by a Secretary and by a Council, the seat of the general government being Dakar.

In a further reorganisation took place by which the Territories of Senegambia-Niger were broken up, the Senegal Protectorate restored to that Colony, and the rest of the Territories formed into a fifth colony called Upper Senegal-Niger, with its capital at Bamako on the River Niger. At the same time Mauritania made a Civil Territory in five circles, Trarza, Brakna, Gorgol, Tagant and Guidimaka, administered by a Commissioner. In January, 1909, the whole of Mauritania was formed into a French protectorate.

The five Colonies are each under a Lieutenant-Governor, subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of the five Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

The expenditure of France on French West Africa (budget estimates for 1913) amounts to 20,555,575 francs, most of which is military expenditure. The general budget of the Colonies for 1911 amounted to 20,875,000 francs; in addition there are the separate budgets of the Colonies. The outstanding debt of French West Africa on January 1, 1910, amounted to 156,277,000 francs. The military forces consist of 3,956 men, of whom 2,098 are Europeans.

The population of French West Africa is (1911) 11,100,000, of whom 7,104 are Europeans, including 6,377 French, 112 English, and 75 Germans. The area 1,510,000 sq. miles (including Mauritania). Schools are at work for elementary primary, superior and commercial primary, and technical education, with a central normal school for training native teachers for the village schools. The whole system is supervised by an Inspector of Education for French West Africa. Over 10,000 children are receiving elementary instruction, about 3,000 of the pupils being girls. The expenditure on the schools for 1908 was put at 1,015,380 francs.

The principal imports and exports of French West Africa in 1911 were as follows:—

Imports			Exports		
Articles	Pounds	Value	Articles	Pounds	Value
		£			£
Textile fabrics . . .	13,601,231	1,579,415	Mahogany . . .	52,387,210	57,324

Other . . .	—	2,863,474			
Total . . .	—	5,819,374	Total . . .	—	4,074,574

The imports into French West Africa are mostly food substances, tissues, and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds.

The use of French weights and measures, and money, is compulsory throughout French West Africa.

The colony of Senegal consists of :—

1. The four municipal towns of St. Louis, the capital of the Colony (population, 1910, 22,093, Europeans, 995); Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 24,914, Europeans, 1,096); Rufisque (population, 12,457, Europeans, 318); and Goree (population, 1,131, Europeans, 153). The total area is 438 square miles. The natives of these towns are French citizens, and have the right of vote.

2. The territories of direct administration, in which the Government exercises absolute authority, which consist of :—

The district of Tivaouane and 100 kilometre on each side of the Dakar-St. Louis Railway.

A rectangle with a front of two kilometres and a depth of one kilometre around the posts of Richard Toll, Dagana, Podor, Saldé, Matam, and Bakel on the river Senegal; Kaolack, Fatick, and the island of Foundiongne in the Sine-Saloum; Sédhiou, Ziguinchor, and the island of Carabane on the river Casamance; and Portudal, Nianning, and Joal on the sea coast east of Rufisque.

In these territories the natives are not French citizens, and are not electors.

The former Protectorate has been restored to the Colony, but with a separate budget. The total population of Senegal in 1911 was put at 1,172,096 (including 4,875 Europeans), and the area 74,000 sq. miles.

The Colony is represented in the French Parliament by a deputy, elected by the four communes. The budget of the directly administered territory provided for 1911, 3,124,000 francs; the budget of the Protectorate 4,947,000 francs; the budget of the port of Dakar, 310,000 francs.

Education is supervised by the Inspector of Education for French West Africa under the Decree of 1903. All towns having a sufficiently numerous European or assimilated native population have urban schools giving the same instruction as the French primary schools, modified to suit local requirements. At Dakar there is a superior technical school open to all the colonies. At St. Louis there is a superior commercial primary school also open to all the colonies, and a normal school for the training of native teachers, and of interpreters, kadis (native judges), and chiefs' schools. In Senegal there are public schools with 3,608 pupils and a private Catholic school with 20 pupils. There is a Mussulman superior school at St. Louis with 20 pupils. A large hospital for natives is in construction at Dakar.

The natives cultivate ground-nuts, millet, maize, and rice; other products are castor beans, coco-nuts, gum from the Sahara, and rubber from the Casamance river. Ground-nuts form the bulk of the exports.

Native industries comprise weaving, pottery, brick-making and jewellery.

The chief imports are cottons, foodstuffs, metal-work, coal. The chief exports are oil-seeds and rubber.

There are 1,360 miles of telegraph and about 100 miles of telephone lines. A submarine cable from Brest to Dakar was completed in April 1905, so that the French West African Colonies are now independent of foreign cables.

One railway connects Dakar, Rufisque and St. Louis (165 miles); another Kayes to the Niger (344 miles); a third, Thiès to Kayes (83 miles); a fourth, Kayes to Ambidédi (27 miles).

There is a river service on the Senegal from St. Louis to Kayes, the former

capital of Senegambia Niger (490 sea miles), during the rainy season, and extensive works for the improvement of the river have been carried out. The Senegal is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 4 French lines, and with Liverpool and Hamburg by a British and a German line. Works are in progress for the extension and deepening of the harbour, the erection of wharves and workshops, and the construction of a large dry dock. The colony of Senegal, with a capital of 5,895,000 francs, and 254,000 francs, was founded in 1901 for the purpose of carrying on financial, industrial, or commercial operations, with it the Bank of Senegal at St. Louis has been fused.

H. B. M.'s Consul General at Dakar — Captain C. Brathwaite Wallis.
Acting Vice Consul — P. H. Stormont.

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone and extends inland so as to include the territories of Dingiray, Sigui, Kouroussa, Kanku, Kessidogo, and Beyla. The area is about 95,000 square miles and the population was estimated in 1906 at about 1,498,000, including 1,147 Europeans. A regular system of Government day schools has recently been introduced all over French West Africa. In 1907 there were 22 official schools with 1,304 pupils, and 1 Catholic school with 67 pupils. The principal product is rubber, others are palm oil and nuts, millet, earthnuts, gum and coffee, which is grown in the N'kessé region. There is an experimental garden near Konakry (the capital) where the culture of bananas, pine apples, rubber trees, and other plants is being tried. Futa Jallon contains cattle in abundance. In 1909 there were 8,974 cattle and 2,812 sheep. Gold is found in the Finkisso and in the Bowie and Siki districts. The principal exports are rubber, cattle, ground nuts, and palm kernels. Total commerce in 1911 87,948,169 francs. A road from Konakry to the Niger has been made, and will be connected by branches with the railway stations. The railway which is to run from Konakry to the Niger at Kouroussa (866 miles long) was opened in January, 1911. It will be continued beyond the Niger to Kankan (49 miles). The jetty, 1,066 feet long at Konakry has been completed. In the colony there are 1,650 miles of telegraph and 1,128,719 miles of telephone line, with 1,128,719 miles of submarine line. In 1910 imports were 1,728,719 francs, and exports 792,240 francs. Konakry is visited regularly by the steamers of two French, one English, and one German company. The budget of the colony provided for 1911 the sum of 6,192,000 francs.

The Ivory Coast lies between Liberia and the British Gold Coast Colony, and, including the kingdom of Kong, extends inland to the military territories of the French Sudan. The French obtained and asserted rights on the coast about 1843, but did not actively and continuously occupy the territory till 1893. Area about 130,000 square miles. Population in 1910, 1,132,812, Europeans about 750. The seat of administration is Bingerville, formerly called Adjame. (European population, 127), where extensive building operations are now in progress. There were in 1907 11 official schools with 573 pupils and 1 Catholic private school with 11 pupils. The principal centres of population are trade centres at Bassam, with a lagoon forming an excellent harbour of refuge, Assinie, Grand Lahou, Sassandra, Tabou, and, in the interior, Abidjan, Aloé, Tiassali, Bondoukou, and Korbogo. The natives cultivate plantains, bananas, pineapples, and other fruits, European agriculture is successful, especially in Elima near Assinie, coco-nuts, etc.

collected. The mahogany forests inland are worked; gold is found near Grand Bassam in Brouhi, on the Comoë River and on the Bia River; gold ore output in 1908, 2,957 gr (7,412 francs). The ports of the Colony are visited by the liners of two French, British (Kaiser, Dempsey), one German, and one Belgian shipping company. It is proposed to make a port and railway at Petit Bassam, and a sum of 10,000,000 francs has been assigned from the colonial loan for this purpose. The port works at Petit Bassam (now called Port Bouët) are in progress, and from Abidjan, on the north side of the lagoon, the railway is being constructed. On June 1, 1909, there has been communication between Abidjan and Dimbokro, (114 miles). There were at the end of 1907, 1,840 miles of telegraph and 1 mile of telephone lines with 5 miles of submarine wires. Telegraph lines connect the principal towns and extend to adjoining colonies. Telephonic communication exists between Bassam and Bingerville and other places. The budget of the colony for 1911 provided for the sum of 5,474,000 francs.

British Vice Consul at Grand Bassam—Vacant

Dahomey stretches from the coast between German Togoland on the west and the British possessions of Lagos and Nigeria on the east, and extends northwards to the French Military Territories. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The colony is divided into 11 circles. The circles of Fada N'Gourma and Ségou (comprising about 24,000 square miles) were, in March 1907, transferred to the Upper Senegal and Niger Colony. The population in 1910 was about 825,950, including 377 Europeans. The seat of government is Porto Novo (the chief business centre), which has about 19,000 inhabitants. Village, regional, and urban schools are instituted under the West African educational system. In 1907 there were 6 official schools with 709 pupils, and 21 private schools with 1,944 pupils. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and potatoes. The forests contain brodiaea trees and coco nut and oil palms. At Porto Novo there is an experimental farm. Total imports (1910), 1,427,931; exports, 715,294. The principal imports are cottons, machinery, liquors, and tobacco, the chief exports were maize, palm kernels, palm oil, copra, the exports of kola nuts and of rubber are decreasing. In 1907, 489 vessels entered and cleared. There are few roads in the colony. At Kotonou an iron pier has been erected, and from that port a railway runs into the interior to Savé (156 miles) with a branch line to Whydah and Seghoroué. Lake Ahémé (20 miles). The line is intended to run to Chaorn (400 miles). The gauge is a metre gauge open (1908), 192 miles, under construction, 125 miles. A metre gauge railway has also been constructed from Porto Novo to Sakété (25 miles) along the Lagos frontier. A telegraph line connects Kotonou with Abomey, the Niger, and Senegal. In the colony there are 1,725 miles of telegraph line, and 1 mile of telephone line. French and English coins are in circulation as well as cowrie shells. On coins other than French there is an import duty of 10 per cent. The budget of the colony for 1911 provided for the sum of 3,582,000 francs.

The Colony of Upper Senegal and Niger formed from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal.

The new Colony is bounded on the north by the Algerian sphere; on the west by the Fildes river and the frontier of French Guinea; on the south by the frontiers of the Ivory Coast, the Coast, Togoland, and Dahomey, and it includes Fada-N'Gourma and Sij, whence the boundary goes to the frontier of N. Nigeria which it follows to Lake Chad, and the east by a line northward from Lake Chad. It therefore includes the valley of the Upper Senegal, more than two thirds of the course of the Niger, the whole of the countries enclosed in the great Bend, and the Sahara to the Algerian sphere of influence. The Colony is about 72,000 square miles with a population in 1910 of about 4,471,031, including 100,000 Europeans.

At the same time that this Colony was formed the Military Territories, which now form an integral part of it, were broken up. The Second Military Territory, which included nearly all the country within the Bend, was handed over to the Civil administration, and the Fust (Timbuktu) and Third (Zinder-Chad) were amalgamated under a colonel as the Military Territory of the Niger, divided into 4 districts, Timbuktu, Gao, Niamey, Zinder, each under a major. This Military Territory is administered under the authority of the Lieutenant Governor of the Colony, and its budget forms an annex to the Colonial budget, and amounted, for 1911, to 1,510,000 francs.

With the exception of the Military Territory of the Niger the whole of Upper Senegal Niger is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the colony for 1911 provided for an income of 9,963,342 francs, and an expenditure of 8,616,962 francs.

The most important and populous towns in the Upper Senegal and Niger are Bobo Dioulasso (7,700 inhabitants), Bamako (6,500 inhabitants), Segou (6,200 inhabitants), Kayes (5,900 inhabitants), Djénne (4,900 inhabitants). The most important centres of the military territory are Timbuktu (5,100 inhabitants), Goundam (3,200 inhabitants), Dori (3,400 inhabitants), Filingue (2,700 inhabitants). All the principal towns have urban schools. At Kayes is a professional school and a school for sons of chiefs. In 1907 there were 100 Upper Senegal and Niger, including Military Territories, 50 official schools with 1,639 pupils, and 2 Catholic private schools with 100 pupils. There is a Muslim superior school with 100 pupils (official).

The natives cultivate ground nuts, millet, maize, rice, cotton; other products are rubber and karité.

Native industries comprise pottery, brick making, jewellery, weaving, leather making. Chief imports are cottons, food stuffs, metal work. Chief exports are ground nuts, cattle, rubber, skins and wool.

There is a very complete system of telegraph throughout the Colony from Kayes to Niamey and Zinder, and soon to Lake Tchad. There were at the end of 1907, 4,050 miles of telegraph line and 74 miles of telephone line.

The Senegal Niger Railway goes from Kayes to Koulikoro, a distance of 100 miles. Small steamboats perform the service from Koulikoro to Timbuktu, so that it is possible to perform the whole journey from Europe to Timbuktu by rail and steamer.

A telegraph line is shortly to connect Timbuktu with Algeria.

Mauretania, formed into a protectorate in January, 1909, consists of the five districts of Tiarza, Biakna, Gorgol, Guidumaka, and Tagant, with a total area of 344,967 square miles. The northern limit of the protectorate is approximate, and the foregoing area was obtained by taking the latitude 23° 3' N as the northern boundary. The population in 1909 was about

228,000, of whom 190,000 were nomad Moors. Military operations were in 1909, to subdue revolts of the tribeamen, and successful. Fights with robber bands of and Tripolitans took place in 1910. The budget of the protectorate for 1911 provided for the sum of 1,619,800 francs. There were 187 schools. Total length of railway (1910) 1,190 miles.

(AFRIKA.)

Government.—*Sidi* [redacted] Ben Nasr Bey, born 1855, son of Mohamed Pasha Bey, nephew of Sili Ali, former Bey of Tunis; succeeded his cousin, *Nidi Mahomed el Hadi*, May 12, 1906. The heir-presumptive is *Sidi Mohamed Ben Mahmoud Bey*, born 1858.

The reigning family of Tunis, occupants of the throne since 1705, descend from *Huaseim ben Ali*, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of Kasr es-Said (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of [redacted] heads of departments, 7 of the ministers being French and 2 Tunisian. The country is divided into 18 districts (*contrôles civils*), 2 military circles, and 1 military post; the district governors (*contrôleurs*) are French; the subordinate officials (*Kaïda* and *Sheikhs*) [redacted] Native. French tribunals administer justice between subjects of European powers, and also between them and natives; there are Native courts for [redacted] between natives. French administration in Tunis has been confirmed by conventions with [redacted] the European Powers regulating the status and the conditions of trade of their respective citizens within [redacted] Regency.

French Resident-General.—Gabriel Alapetite.

The army of occupation for 1913 numbers 17,514 men, including [redacted] officers. The cost of maintaining this force is borne by the budget of the Republic, and is estimated for 1913 at 1,198,924 francs. The Tunisian army (which is little [redacted] than the Bey's guard) numbers about [redacted] officers and [redacted]. There is a French gendarmerie of [redacted]; also rural Tunisian police, and in the larger towns a civil police.

Area and Population.—The present boundaries [redacted] the north and [redacted] the Mediterranean Sea, on the west the Franco-Algerian province of Constantine, and [redacted] the south the great desert of the Sahara and the Turkish Pashalik of Tripoli. Area about 50,000 English square miles, including that portion of the Sahara which is to the east of the *Beled Djerid*, extending [redacted] *Gadames*. Population, in 1910, about 1,923,217, but [redacted] proper [redacted] ever been taken. [redacted] majority of the population consists of Bedouin Arabs and Kabyles with about 50,000 Jews. The French population in 1911 was estimated [redacted] 46,044, exclusive of the army of occupation. [redacted] foreign population in [redacted] estimated at 148,476, of whom 88,082 [redacted] Italian, 11,800 Anglo-Maltese.

FRANCE:—TUNIS

The capital, the city of Tunis, had a population, at the end of 1907, of 187,000 Moslems, and 43,000 Jews, besides a large population of French, Italians, and Maltese. By means of the Suez canal, which was opened in 1869, Tunis is directly accessible to ocean-going vessels.

The bulk of the population is Mohammedan under the Sheikh-ul-Islam, and the remainder from the "Habus" lands, that from the "Wakf" lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 35,000 Roman Catholics, under the ministrations of the Archbishop of Carthage, and about 100 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—Within the Regency in 1908 there were 179 public schools, 11 lycées and colleges, and 21 private schools; total, 205. At all the schools there were 25,531 pupils, of whom 15,543 were boys. Of the total number of pupils, 6,568 were French; 4,993 Mussulman; 5,990 Jews; 6,068 Italian; 1,684 Maltese; 277 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 50 and in the interior 1,214 Mussulman primary schools, 100 of them assisted by Government funds. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

Finance.—For 1911 the receipts were estimated at 49,274,774 francs (1,970,990*l.*), and the expenditure at 45,748,656 francs (1,829,946*l.*)

At the end of 1906 the total Tunisian debt amounted to 9,287,260*l.*, of which 7,667,320*l.* was the balance still due on the consolidated debt (1892), and the remainder for a railway and other loan (1903). In 1910 the Tunisian Government was authorised to contract a loan of 90,000,000 francs for railways, roads, and colonisation. In 1911 the interest and sinking fund of floating debt amounted to 10,365,832 francs (414,633*l.*).

The loan was raised in 1907, 1908 and 1909.

Industry.—The chief industry is agriculture. The area of wheat in 1911 was 1,401,725 acres; and in 1910, 1,217,626 acres; the production in 1911 was 1,009,766 quarters. The area in 1911 of barley was 1,192,768 acres, and the production 1,678,646 quarters; and of oats the area was 148,200 acres, and the production 464,062 quarters. The total area of vineyards in 1911 was 40,168 acres, and 9,680,000 gallons of wine produced; there were also 11,428,660 olive trees and 990,000 gallons of olive oil produced. In the south of Tunis there are about 1,350,000 date palms; the export of dates in 1910 was 4,915 metric tons. Other products are almonds, oranges, lemons, shaddocks, pistachios, alfalfa grass, henna, and cork. The cork forests in the north-west have an area of 348,270 acres; the quantity of cork exported in 1910 amounted to 4,922 tons. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants. In 1911 the total area occupied by French colonists was 1,720,000 acres, by Italians 222,000 acres, and by other Europeans 98,000 acres.

In 1911 there were 11 mines worked. These are being developed, and the output steadily increases. Copper ore, lead-ore, zinc-ore are all found. By far the greatest development has been in phosphates, the output of which is increasing yearly. Iron has been found near Kef.

In 1911 the numbers of animals were:—horses, 39,441; asses and mules, 74,240; cattle, 191,450; sheep, 686,780; goats, 468,828; camels, 110,707; pigs, 17,898.

Native industries — the spinning — weaving — wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting, tanning and silk weaving are declining

The fisheries are in the hands of Italians, Maltese and Greeks. In 1910, 1,975 boats — engaged — this industry, with a total of 7,165 men. Sardines, anchovies, albacore, tunny (978,091 francs) — caught, and the total value amounted to £ 100 000 francs.

Commerce

Commerce.—The imports and exports in recent years have been to the following amounts (including precious metals) —

Imports	4 114 410	1 1130	4 7 871	1 1001	1 047 991
Exports	4 131 440	3 1	4 301 441	4 910 042	44 0 0

Imports in 1910 and exports in 1911 were —

Imports (1910)		Exports (1911)	
Corn	170 9 1	Coin	1,924 72
Flour	40 1	Cattle	144 09
Iron and steel	464 1	Hides	110
Machinery	20 11	Fertilizer	760
Coal	126 231	Oil	1 0 000
Sugar	14 112	Phosphates	1 388,400
Timber	100 104	Iron	174,120
Cotton goods	47 008	Zinc ore	168,680
Tobacco	27 719	Lead ore	28,300
Petroleum	14 79	Wine	148
Wool, wool	79 133	Fish	139 271

The distribution of the trade in 1910 was mainly as follows —

From or to	Imports from	Exports to
France	2 370 197	2,871 114
Algeria	417	258 192
Great Britain	410 47	170
Italy	234 952	679 24
Spain	19 142	47 907
Germany	40 474	10, 127

In the year 1911 there entered the ports of the Regency 11 — vessels of 4,350,405 tons; and cleared, 12,210 of 4,149 077 tons, of the tonnage entered 1,924,028 — represented French vessels.

Good roads to the length of 1,987 miles have been constructed between 1882 and 1910.

Length of railways, 117 miles — 1111

There — in 1910, 2,870 miles of telegraph and 9,942 miles of —, — telegraph offices, messages (1910), 1,347,186. In — urban telephone

systems had 777 miles of line; inter-urban systems 2,545 miles of wire. There were in 1910, 415 post offices; letters sent received, internal service, 11,006,891; external service, 39,192,146. The savings banks had 5,620 depositors with deposits of 6,073,000 francs in 1910.

Money, Weights, and Measures.—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage consists of pieces similar to the French, the pieces being coined in France.

The *milligramme* is 31.487 grammes; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 1000.

The *Kafis* (of 16 *whibas*, each of 12 *sahs*) = 16 bushels.

The principal measure of length is the *pik*. the *pik Arabi* to linen = 1.2 yd.; the *pik Turki* for silk = 7058 yd.; the *pik Andouls* for cloth = 7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kafis* and *whibas*.

British Consul-General at Tunis.—Ernest J. L. Berkeley, C.B.; appointed July 1, 1899.

Vice-Consul.—P. Wilkinson.

Vice-Consuls at Bizerta, Sfax, and Sussa, Consular Agents at Melhia, Monastir, Gabes, and Gela.

AMERICA.

GUADELOUPE AND DEPENDENCIES

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a channel, that to the west being called Guadeloupe proper or Basse-Terre, and that to the east, Grande-Terre, with a united area of 150,940 hectares (583 sq. m.); it has five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Desirade, Barthelemy, and Martin, the total area being 1,100 square miles. It is under a governor and an elected council, and is represented by a senator and two deputies. Population (1911) 212,430, of whom 3,461 were born in France and 12,806 were foreigners. Instruction (1911) is given in 1 lycée with 1,100 pupils, a secondary school for girls at Pointe à Pitre, with 100 pupils, and 105 public and private elementary schools. The public elementary schools have 1,100 teachers and 12,290 pupils, and the private have 770. The colony is divided into arrondissements, cantons, and communes. The seat of government is Basse-Terre (8,656 inhabitants). Pointe à Pitre (32,664 inhabitants) has a fine harbour. Revenue and expenditure balanced at 4,622,551 francs in the local budget of 1911; expenditure of France (budget of 1913), 331,673 francs. Outstanding debt, January 1, 1910, 250,000 francs. Chief cultures sugar, 41,329 tons exported in 1911, coffee, 2,114,600 pounds exported in 1911, cacao, 2,337,610 pounds exported. For local consumption there are grown bananas, sweet potatoes, manioc, tobacco, Indian corn, and vegetables. The area of the colony is 439,660 acres, divided as follows, in — Sugar cane, 64,220; coffee 12,350; cacao 9,880; products for local use, 41,165; forests, 78,000; arable land not cultivated, 113,425; and waste land, 114,620. The forests, covering 71,256 hectares of mountainous district, are interspersed with valuable timber, which is little worked. The total value of the imports in 1911 was 748,194 francs and of the exports 781,476 francs. In 1911, 307 vessels of 338,234 tons cleared the ports of the colony. Guadeloupe is in direct communication with France by mail and navigation companies. Within the islands traffic is carried on by means of roads. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 843,746 francs, advances loans chiefly for agricultural purposes, even on the security of jewellery. Silver coin has disappeared from circulation, nickel treasury tokens (bons) of 1 franc and of 50 centimes are authorised up to a total amount of 1,000,000 francs.

British Vice Consul at Guadeloupe.—J. de Vaux.

GUYANA.

The colony of French Guiana is administered by a Governor, appointed by a Privy Council of 5 members. The colony is a Council General of 15 members and is represented in the French Parliament by one deputy. Area about 80,500 square miles, and population, 1911, 49,009. Cayenne, the chief town and only seaport, has a population of 18,527, and the other communes have 12,798. At Cayenne there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. A decree of November 12, 1905, established a justice of the peace at Sinnamary. The military force of the colony consists of 1,000 European men. In the colony there are 28 primary schools, with 1,100 pupils, and a college at Cayenne, which has also a local museum and a library. Local budget for 1911 balanced at 3,592,099 francs.

There is little agriculture in the colony, only about 8,800 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, cane, indigo, tobacco, and gutta percha. The most important industry is gold-mining (placer), the quantity of gold declared produced in 1906, 117,470 oz., in 1907, 185,059 oz., in 1908, 131,758 oz., in 1909, 127,416 oz., in 1910, 123,168 oz. (troy). Silver, iron, and phosphates are also worked. The exports consist of cocoa, phosphates, woods, gold, rosewood essence, and hides. In 1910, 314 vessels of 60,113 tons entered at Cayenne. The total imports in 1910 were valued at 12,213,420 francs and the exports at 11,567,168 francs. Gold valued at 11,549,190 francs exported in 1910. Cayenne is visited twice a month by mail steamers from Martinique. There are a few roads connecting the capital with various centres of population in the interior. Since 1855 Guiana has had a penal settlement for habitual criminals and convicts sentenced to hard labour. In 1910 the penal population consisted of 4,290 transported and undergoing reclusion, 2,614 recluses, and 1,753 freed. In the local budget for 1909 the revenue and expenditure balanced at 3,497,394 francs. The expenditure of France (budget of 1912) was 6,422,622 francs, of which 5,688,200 francs were for the penal establishment.

The Bank of Guiana, with a capital of 600,000 francs, with statutory fund amounting to 300,000 francs, advances loans for agricultural and other purposes.

British Consul at Cayenne—H. Fourrage.

MARTINIQUE

The colony is under a Governor, a General Council, and elective municipal councils. It is represented by a senator and two deputies. Area 385 square miles, divided into 31 communes, population in 1911, 184,004. The military force consists of 17 officers and 394 men. There is a law school (at Fort de France) with 56 students, 2 secondary schools, with 671 pupils, 2 normal schools with 27 pupils, primary schools with 16,889 pupils (including 7 private schools). Chief commercial town, Fort de France (population, 27,019). Sugar and cocoa are the chief productions then come coffee, tobacco, and cotton. There are 12,000 hectares under the food producing crops. Tobacco culture is under special regulations. There are 15 sugar works and 67 rum distilleries. In 1911, sugar to the value of 485,098 francs, rum to the value of 268,652 francs, and cocoa to the value of 41,854 francs were exported. The total imports in 1911 were valued at 794,194 francs and the exports at 903,809 francs. Vessels entered in 1911, 387,330 tons, and cleared 390 of 393,107 tons. The island is visited regularly by the steamers of French and American lines. For local traffic there are subsidised mail coaches, and subsidised steamers ply on the coast. The colony is telegraphic communication with the rest of the world by telegraph cables. The local budget for 1912 balanced at 5,326,390 francs, expenditure of France (budget of 1913), 1,187,534 francs; debt outstanding, January 1, 1912, 4,474,210 francs. The Bank of Martinique at Fort de France with a capital of 3,000,000 francs and a reserve fund of 2,001,411 francs in 1912, advances loans for agricultural and other purposes.

British Consul at Martinique—H. J. Meagher.

ST. PIERRE AND MIQUELON

The largest islands of two groups close to the south coast of Newfoundland. Area of St. Pierre group, 1 sq. miles; population in 1911, 4,209, of Miquelon group, 83 sq. miles, population, 446, total area,

93 sq miles, total population, 4,209. In May, 1906, for economical reasons, a change was made in the form of administration. Instead of a Governor there is now an Administrator who organizes and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St. Pierre. Primary instruction free. There are 3 public schools for boys, and 2 for girls, with (in all) 16 teachers and 340 pupils. There are, besides, infant schools, 'salles d'asile', frequented by 125 children. There is a private boarding school and two private schools with 385 pupils.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod fishing, which has steadily declined. In 1912 there were 40 local smacks engaged in fishing on the Newfoundland banks, the average catch per vessel being 1,328 metric cwts. The 'Metropolitan' (French) fleet numbered 240 vessels and had 6,838 men engaged in the work in 1912. The imports comprise textiles, salt, wines, food stuffs, meat, and the exports, cod, dried and fresh, and fish products. In 1912 1,495 vessels, 168,789 tons entered and 1,495 of 168,480 tons cleared at the islands. The imports were valued at 203,000 francs, and the exports at 327,918 francs in 1911, the latter consisting mainly of dried codfish. St. Pierre is in regular steam communication with Boston and Halifax, and is connected by telegraph cable with Europe and the American continent. Local budget for 1910, 497,660 francs. Expenditure of France (budget 1913), 242,948 francs. Debt outstanding January 1, 1910, 439,000 francs.

British Consul—Mr. A. P. Murray.

AUSTRALASIA AND OCEANIA.

NEW CALEDONIA AND REUNION.

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary General, the Procureur Général (the head of the Judicial administration), the Superior Commandant of the Troops, the Director of Penitentiary administration, the head of the Department of Domaines and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council General.

Nouméa, capital, has a municipality; other centres of population are locally administered by municipal commissions. The colony contains a penal settlement at Nou Island. Since 1896, however, no convicts have been sent thither, and the convict element in the population is quickly decreasing. Area, 7,650 square miles. The penal population comprised 6,741 men, 293 women; total 7,034; of whom 1,750 convicts undergoing hard labour; 3,980 freed; and 1,404 simply relégués (banished). In 1912 the population was 50,608, of whom 13,188 free, 5,671 of convict origin, and 28,075 black. Nouméa had (1912) 8,961 inhabitants, of whom 5,207 free. The immigrants from France are not only French but also other immigrants—Javanese, Tonkinese, Indians, and islanders from the New Hebrides to the number of 3,000. Primary instruction is provided in public and also in private elementary schools, the latter being assisted by the municipalities. In 1912 there were 11 public and 11 private primary schools with 2,018 pupils (987 being girls). There is a secondary school at Nouméa with 110 pupils. Local budget for 1912, receipts, 8,969,680 francs, expenditure, 3,686,602 francs. The expenditure of France on the colony in the budget of 1913 was 2,869,443 francs, the greater part of which was for the penal establishment. In 1912 the military force consisted of 1,000 Europeans. Of the total area, more than half is mountainous, not cultivable; about 1,000 square miles is pasture land; about the same is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 11 domains: that of the State (in which gratuitous concessions may be made); that of the penal establishment (about 400 square miles); and that of the native population. The chief agricultural products are coffee, copra, cotton, manioc (cassava) maize, tobacco, bananas, pine-apples. There are 100,000 cattle and about 5,000 sheep. Local industries develop slowly; there is a grain storage and cleaning depot, a perfumery manufactory and meat preserving works. About 199,798 hectares of mining land are owned and 97,660 hectares have been granted for prospecting. There were 11 mining concessions in 1910, employing altogether 3,521 workmen, mostly Japanese. In 1911 the mineral export comprised nickel ore, 120,059,297 metric tons; and cobalt and chrome ore, 32,806,098. The value of the mineral export was 4,745,831 francs. The imports in 1911 were valued at 606,228 francs, and the exports at 523,970 francs. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, rubber, guano. In 1911, 117 vessels of 188,612 tons entered and 193,074 tons cleared at the port of Nouméa. Nouméa is connected with Sydney in N. S. Wales by a steamer sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. A railway from Nouméa to Bourail (90 miles) is under construction; it is open for 11 miles (about 10 miles). Harbour improvements are in progress; a pier and a slip are being constructed, dredging operations are about to begin, and a wharf and a dry dock are contemplated. There are 580 miles of telegraph line and 115 of telephone line.

Dependencies of New Caledonia are:

1. Isle of Pines, 80 miles to the south-east, with an area of 58 square miles and a population of about 1,000.

2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square miles and about 4,500 inhabitants. The islands are placed under the French protectorate in 1887. There is a French Resident, and the archipelago is in regular communication with France.

3. The Loyalty Islands, 60 miles ~~■~~ of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvée, and many small islands with a total area of about 800 square miles. The chief culture ~~■~~ the islands is that of coconuts; the chief export, sandal-wood and rubber.

4. The Huon Islands, 170 miles north-west of New Caledonia, a most barren island.

5. Futuna and Alafi, south of the Wallis Islands, with about 1,500 inhabitants ~~■~~ annexed by France in 1888.

The ~~■~~ Hebrides, in accordance with the Anglo-French convention of February (ratified in October), 1906, ~~■~~ jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. There are French and English courts, and ~~■~~ mixed court with ~~■~~ judge foreign to both nations. Maize, coffee, vanilla, coconut trees ~~■~~ grown. In some places sulphur is abundant.

British Consul ■ Nouméa.—W. J. Holmes.

FRENCH ESTABLISHMENTS IN OCEANIA.

These, scattered ~~■~~ a wide area in the Eastern Pacific, ~~■~~ administered by a governor with a privy council, and ~~■~~ Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the Society Islands, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and 11,091 inhabitants, the latter with an area of 50 square miles and 1,564 inhabitants. Other groups are the Marquesas Islands, with a total area of 480 square miles and 3,421 inhabitants, the two largest islands being Nukahiva and Hiva-oa; the Tuamotu group, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island ~~■~~ the south, their total population being 3,828; the ~~■~~ ~~■~~ (Iles ~~■~~ le Vent), of which the more important are Huahiné (pop. 1,230), Raiatea and Tahaa (pop. 3,347), and Bora-Bora-Maupiti (pop. 1,295); the Gambier, Tubuai, and Rapa Islands; the Gambier group (of which Mangareva is the principal) having six square miles of area and 1,533 inhabitants; the Tubuai (or southern) Islands, of which Rurutu and Rimitara are the largest, Raiavavae (or Vavitu), and, far to the south, Rapa, having together ~~■~~ 115 square miles and about 2,650 inhabitants. The total ~~■~~ of the Establishments is estimated at 1,520 square miles, and their population ~~■~~ December 29, 1911, at 31,477, of whom 26,219 ~~■~~ natives. There ~~■~~ 23,876 French, 2,656 other Europeans, and ~~■~~ Chinese. In 1903 it ~~■~~ decreed that separate islands or groups should ~~■~~ longer be regarded ~~■~~ distinct Establishments, but that all should be united to form a homogeneous colony.

The most important of the islands is Tahiti, whose chief town ~~■~~ Papeete with 3,617 inhabitants, of whom 1,909 ~~■~~ French. A higher primary school, with ~~■~~ normal school, has been established at Papeete, and there are ~~■~~ primary schools, each with about 100 pupils, in various islands, besides 4 Catholic and 2 Protestant mission schools. Pearls and mother-o'-pearl ~~■~~ important products. The island is mountainous and picturesque with ~~■~~ fertile coast-land bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. Cotton, coffee, and tobacco are ~~■~~ little cultivated. The chief industries are the preparation of copra, ~~■~~, and ~~■~~. Value of imports (1911) 233,257*l.*, exports, 300,765*l.* The chief imports are tissues, wheat, flour, metal work. The chief exports ~~■~~ copra, mother-o'-pearl, vanilla-coconuts and oranges. In 1911 ~~■~~ shipping entered consisted of ~~■~~ vessels ~~■~~ 166,588 ~~■~~ 65 of 164,513 tons cleared; the greater part of the tonnage represents visits of

steamers connecting the islands with New Zealand. The New Zealand company (with a French subvention) runs a monthly steamer connecting San Francisco, New Zealand and Australia with Papeete, the Tuamotu Islands, the Marquesas, and the Leeward Islands. The shipping between the islands is carried on by sailing boats, of which, in 1911, there entered 267 with a tonnage of 21,803 (value of cargo, 92,424), and cleared 266, tonnage 24,646 (value of cargo, 165,968).

For all the islands the local budgets for 1910 showed a revenue of 109,232/ and an expenditure of 100,548/. For 1913 the French subventions amounted to 204,000 francs.

GERMAN EMPIRE.

(DEUTSCHES REICH.)

Reigning Emperor and King.

Wilhelm II. German Emperor, and King of Prussia, born January 27, 1859, became German Emperor June 15, 1888 (see *Prussia*).

Heir Apparent.

Prince *Friedrich Wilhelm*, born May 6, 1882, eldest son of the Emperor-King (see *Prussia*).

The present German Empire is essentially different from the Holy Roman Empire which came to an end in 1806, amid the convulsion of the Napoleonic wars, and of which Austria was the leading member. The East Frankish or Germanic throne, after the extinction of the Karling line, was filled by election, though with a tendency towards the hereditary principle of succession. At first the King and Emperor were chosen by the vote of all the great Princes of the realm; but the mode came to be changed in the thirteenth century, when a limited number of princes, fixed at seven for a time, and afterwards enlarged to eight (nine from 1692 to 1777), assumed the privilege of disposing of the crown, and, their right being acknowledged, were called Electors. The election of Wilhelm I., King of Prussia, as German Emperor (1871) was by vote of the Reichstag of the North German Confederation, on the initiative of all the reigning Princes of Germany. The Imperial dignity is hereditary in the House of Hohenzollern, and follows the law of primogeniture.

Since Charles the Great was crowned by the Pope at Rome Emperor of the West in the year 800, there have been the following German Kings and Roman Emperors, those never crowned or called Emperors being marked with an asterisk:—

<i>House of Charles the Great.</i>			
Karl I., 'Der Grosse'	800-814	Heinrich III.	1039-1056
Ludwig I., 'Der Fromme'	814-840	Heinrich IV.	1056-1106
Ludwig II., 'Der Deutsche'	843-876	Heinrich V.	1106-1125
Karl II., 'Der Kahle'	876-877	<i>House of Saxony.</i>	
Karl, 'Der Dicke'	881-887	Lothar II., 'Der Sachse'	1125-1137
Arnulf	887-899	<i>House of Hohenstaufen.</i>	
*Ludwig III., 'Das Kind'	899-911	*Konrad III.	1138-1152
<i>House of Franconia.</i>		Friedrich I., 'Barbarossa'	1152-1190
*Konrad I.	911-918	Heinrich VI.	1190-1197
<i>House of Saxony.</i>		*Philipp and rivals	1198-1208
*Heinrich I., 'Der Vogel-		Otto IV. of Brunswick	1208-1215

Sigmund of Brandenburg.	1410-1437	Franz II.	1792-1806
<i>House of Habsburg or Austria.</i>		Confederation of the Rhine 1806-1815	
*Albrecht II.	1438-1439	German 'Bund'	
Friedrich III.	1440-1493	North German Confedera-	
Maximilian I.	1493-1519	tion	
Karl V.	1519-1556	<i>House of Hohenzollern.</i>	
Ferdinand I.	1556-1564	Wilhelm I., 'Der Grosse' 1871-1888	
Maximilian II.	1564-1576	Friedrich III.	1888 (March-June)
Rudolf II.	1576-1612	Wilhelm II.	1888 (June)

1 Maximilian I., in 1493, took the title of Emperor Elect from Ferdinand I. to Francis II. all the Emperors, as never crowned by the Roman Pontiff, took formally the title of Emperor Elect (Erwählter Römischer Kaiser).

Constitution and Government.

The Constitution of the Empire bears date April 16, 1871. By its terms, all the States of Germany 'form an eternal union for the protection of the realm and the ~~of~~ of the welfare of the German people.' The supreme direction of the military and political affairs of the Empire is vested in the King of Prussia, who, in this capacity, bears the title of Deutscher Kaiser. According to Art. 11 of the Constitution, 'the Emperor represents the Empire internationally,' and can declare ~~war~~ if defensive, and make peace, ~~as well as~~ enter into treaties with other nations, and appoint and receive ambassadors. But when treaties relate to matters regulated by imperial legislation, and when ~~the Emperor~~ is not merely defensive, the Kaiser must have the consent of the Bundesrat, or Federal Council, in which body, together with the Reichstag, ~~the Diet of the Realm~~, are vested the legislative functions of the Empire. The Emperor has no vote ~~in the~~ laws passed by these bodies. ~~The~~ Bundesrat represents the individual States of Germany, and the Reichstag the German nation. The 61 members of the Bundesrat ~~are~~ appointed by the Governments of the individual ~~States~~ for each session, while the members of ~~the~~ Reichstag, 397 in number (about ~~one~~ for every 131,640 inhabitants), are elected by universal suffrage ~~by~~ ballot, for the term of five years. By a law passed in 1890, members of the Reichstag are paid 3,000 marks (150*l.*) for the session with deduction of 20 marks (1*l.*) for each day's absence; they ~~are~~ free passes ~~on~~ German railways during session. The duration of the legislative period ~~is~~ five ~~years~~. The ~~members of the~~ of Germany are represented ~~in the~~ the ~~Imperial~~ and the Reichstag:—

States of the Empire	Number of Members in Bundesrat	Number of Deputies in Reichstag
Kingdom of Prussia	17	236
" " Bavaria	4	48
" " Saxony	4	17
" " Württemberg	4	14
Grand-Duchy of	3	9
" Hesse	2	3
" Mecklenburg-Schwerin	1	3
" Saxony	1	1
" Mecklenburg-Strelitz	1	1
" Oldenburg	2	3

" Saxe-Meiningen	1	1
" Saxe-Altenburg	1	2
" Saxe-Coburg-Gotha	1	2
" Anhalt	1	1
Principality of Schwarzburg-Sondershausen	1	1
" Schwarzburg-Rudolstadt	1	1
" Waldeck	1	1
" Reuss Älterer Linie	1	1
" Reuss Jüngerer Linie	1	1
" Schaumburg-Lippe	1	1
" Lippe	1	1
Free town of Lübeck	1	1
" Bremen	1	1
" Hamburg	1	1
Reichsland of Alsace-Lorraine	3	15
Total	61	397

The last elections (January, 1912) resulted in the return of the following : Socialists, 110 ; Centre Party, 90 ; National Liberals, 44 ; Conservatives, 45 ; Radicals, 41 ; Poles, 18 ; Free Conservatives, 13 ; Anti-Semites, 11 ; Other Parties, 1 (5 Alsatians, 1 Lorrainers, 5 Guolphs, 1 Dane, 2 Bavarian Peasants' League, 1 German Peasants' League, and 6 Independents).

The total number of electors to the Reichstag inscribed on the lists at the general election of 1912 was 14,441,436, while the number of voters was 12,260,626 (4,350,401 Socialists, 1,906,843 Centre Party, 1,662,670 National Liberals, 1,497,041 Radicals and 1,126,270 Conservatives).

The Bundesrat and the Reichstag meet in annual session, convoked by the Emperor. The Emperor has the right to prorogue and dissolve the Reichstag after a vote by the Bundesrat. Without consent of the Reichstag a prorogation may not exceed thirty days ; while in case of dissolution new elections must take place within sixty days, and the Reichstag must open within ninety days. All laws for the Empire receive the assent of a majority of the Bundesrat and the Reichstag. The Bundesrat is presided over by the Reichskanzler, Chancellor of the Empire, and the President of the Reichstag is elected by the deputies.

Since the foundation of the Empire there have been five Chancellors :— (1) Otto von Bismarck, 1871-90 ; (2) Count Caprivi, 1890-94 ; (3) Prince Hohenlohe, 1894-1904 ; (4) Prince Bulow, 1904-1909 ; (5) Dr. Theobald von Bethmann-Hollweg, 1909.

The laws of the Empire, passed by the Bundesrat and the Reichstag, to take effect must be promulgated by the Emperor, and the promulgation, like all other official acts of the Emperor, requires the counter-signature of the Chancellor of the Empire. All the members of the Bundesrat have the right to be present at the deliberations of the Reichstag.

The following are the imperial authorities or Secretaries of State; they do not form a Ministry or Cabinet, but act independently of each other, under the general supervision of the Chancellor.

1. *Chancellor of the Empire.*—Dr. **Bismarck**.

2. *Secretary for Foreign Affairs.*—**von Jagow**.

3. *Imperial Home Office and 'Representative of the Chancellor.'*—**Delbrück**.

4. *Imperial Admiralty.*—**von Tirpitz**. *Admiral Commanding-in-Chief.*—**Prinze von Prussia**.

5. *Imperial Secretary of Justice.*—**Herr Dr. Lisco**.

6. *Imperial Treasury.*—**Herr Kühn**.

7. *Imperial Post-Office.*—**Herr Kracke**.

8. *Secretary for the Colonies.*—**Herr Dr. Solf**.

And, in addition, the following presidents of imperial bureaux —

9. *Railways.*—**Herr Wackerzapp**.

10. *Imperial Exchequer.*—**Herr von Magdeburg**.

11. *Imperial Bank.*—President, **Herr Havenstein**.

12. *Imperial Debt Commission.*—**Herr Kühn**.

13. *Administration of Imperial Railways.*—**Herr von Briesenbach**.

14. *Imperial Court Martial.*—General der Infanterie **von Lindt-Sudern**.

Acting under the direction of the Chancellor of the Empire, the Bundesrat represents also a supreme administrative and consultative board, and as such has twelve standing committees—namely, for army and fortifications; for naval matters; tariff, excise, and taxes; trade and commerce; railways, posts, and telegraphs; civil and criminal law; financial accounts; foreign affairs; for Alsace-Lorraine; for the Constitution; for the Standing orders; and for railway tariffs. Each committee consists of representatives of at least four States of the Empire; but the foreign affairs committee includes only the representatives of Bavaria, Saxony, Württemberg, and two other representatives to be elected every year.

Area and Population.

I. PROGRESS AND PRESENT CONDITIONS.

The following table gives the area and population of the twenty-five States of Germany in the order of their magnitude, and of the Reichsland of Alsace-Lorraine, as returned at the census of Dec. 1, 1910:—

Name of Empire	Area English sq. miles	Population Dec. 1, 1910			Pop. per sq. mile 1910
		Male	Female	Total	
Prussia	134,616	19,847,725	20,317,494	40,165,219	224.0
Bavaria	29,292	3,379,580	3,507,711	6,887,291	234.4
Württemberg	7,534	1,192,392	1,245,182	2,437,574	322.0
Baden	5,823	1,059,579	1,083,254	2,142,833	367.9
Saxony, Kingdom of	5,789	2,323,903	2,482,758	4,806,661	829.0

Bremen	99	148,529	150,997	299,526	3,017.6
Alsace-Lorraine	5,604	965,625	908,389	1,874,014	333.9
Total	208,780	32,040,166	32,885,327	64,925,993	310.4

The population of the lands now included in the German Empire (without Helgoland) was 24,831,396 in 1816, and 31,569,547 in 1887, showing an average annual increase of nearly 1.3 per cent. The following table shows the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent	Year	Increase	Annual Rate per cent
1867 ¹	3,220,083	0.97	1890	2,572,766	1.07
1871	970,171	0.60	1895	2,861,431	1.12
1875	1,668,568	1	1900	4,087,277	1.50
1880	2,500,701	1.14	1905	4,274,311	1.46
1885	1,621,643	0.7	1910	4,234,504	1.36

¹ Since 1856.

The increase of population during 1905-10 was greatest in Bremen, Hamburg, Oldenburg, Lubeck, Prussia, Hesse, Baden and Saxony, and least in Anhalt, Brunswick, and Mecklenburg-Schwerin.

The number of households in 1905 was 13,274,531 (in 1900, 12,260,012). Of the total population in 1895, 50.2 per cent., in 1900, 47.0 per cent., in 1905, 54.3 per cent., lived in towns of 2,000 inhabitants and above. Of every 100 inhabitants there lived in—

	No. of Towns	1885	No. of Towns	1900	No. of Towns	1906
Large towns ¹		11.1	33	16.2	41	19.0

93,032 ; Dutch, 80,361 ; Italian, 66,961 ; Moravian, 64,882 ; Czech, 43,016 ; Frisian, 20,677 ; English, 20,217 ; Walloon, 11,841).

On December 1, 1910, Germany contained 1,259,873 subjects of foreign powers, as follows:—

Subjects of:			
Belgium	13,455	Norway	3,334
Denmark	26,233	Switzerland	63,257
France	19,140	Other European countries	10,044
Great Britain and Ireland	18,319	Total Europe	1,236,048
Italy	104,204	United States	17,572
Luxemburg	14,356	Other	6,258
Netherlands	144,175	Total extra-European	23,825
Austria-Hungary	667,159	Total foreign subjects	1,259,873
Russia and Finland	137,697		
Sweden	9,075		

In 1905 the number of foreign subjects was 1,028,560.

II. MOVEMENT OF THE POPULATION.

The following table shows the movement of the population of the Empire during five years:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1907	508,964	2,060,973	61,040	179,178	1,178,349	882,624
1908	500,820	2,076,660	61,608	184,112	1,197,098	879,562
1909	494,127	2,038,357	60,079	183,700	1,154,296	884,061
1910	496,398	1,982,836	58,058	179,584	1,108,723	879,113
1911	512,819	1,927,039	56,310	177,056	1,186,608	740,431

The still-births in 1911 were 2.9 per cent., and the illegitimate births 9.19 per cent. of the total number of births.

Of the children born in 1911, 992,062 were boys, and 934,970 girls.

In the various German States in 1910 the movement of population was as follows:—

States	Marriages	Births			Deaths
		Total	Still-born	Illegitimate	
Prussia	321,151	1,225,228	36,881	93,456	732,796

III. PRINCIPAL TOWNS.

German towns are officially distinguished as large towns (with 100,000 inhabitants upwards); medium towns (20,000–100,000 inhabitants); small towns (5,000–20,000 inhabitants), and country towns 2,000–5,000 inhabitants). In 1905, only 1 town over 1,000,000 inhabitants; 11 others 250,000; 30 over 100,000; 43 between 50,000 and 100,000; and 187 between 20,000 and 50,000. According to the results of the census of December 1, 1910, the population of the principal towns was:—

AREA POPULATION

11

Town	State	Pop (1910)	Town	State	Pop (1910)

Religion.

The Constitution provides for entire liberty of conscience and for complete social equality among all religious confessions. The relation between Church and State varies in different parts of the Empire. The Jesuit order is interdicted in some parts of Germany, and some convents and religious orders, except those engaged in nursing the sick and purely contemplative orders, have been suppressed. There are 5 Roman Catholic archbishoprics, 14 suffragan bishoprics, and 6 bishoprics immediately subject to Rome; there are 11 apostolic vicariates. The 'Old Catholics' have a bishop at Bonn.

The following show the results of three religious censuses:—

Creed	1871	Per Ct. of Pop.	1880	Per Ct. of Pop.	1910	Per Ct. of Pop.
Protestants	35,251,104	62.5	37,646,552	62.1	39,991,421	61.6
Roman Catholics	20,327,913	36.1	22,109,644	36.5	23,921,453	36.7
Other Christians	203,793	0.4	259,717	0.4	283,946	0.4
Jews	586,833	1.0	607,862	1.0	615,021	1.0
Others and unclassified	17,536	0.03	17,203	0.03	214,152	0.3

Roman Catholics in 1905 were in majority in only three of the German states, Alsace-Lorraine, Bavaria, Baden; and formed more than 20 per cent. of the population in only four others, Oldenburg, Württemberg, Hesse, Prussia.

Instruction.

Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volksschulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Empire. The school age is from six to fourteen.

The following table shows for the different German States the number of elementary public schools, the teachers employed in them and children attending them, according to a school census taken in 1911:—

States	Schools	Teachers		Pupils		
		Males	Females	Males	Females	Total
Prussia	38,684	91,648	24,650	3,392,877	2,270,388	5,663,265

Empire	11,177	21	39,368	157,446	5,121,508	

There were also in 1911, 480 private schools with 11,894 boys and 14,257 girls who received instruction similar to that given in the Public Elementary Schools.

The system of secondary education is also practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürger schulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungsschulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasien* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities and the learned professions. The *Progymnasien* differ from these only in not having the highest classes. In the *Realgymnasien*, Latin, but not Greek, is taught, and what are usually termed 'modern subjects' have more devoted to them. *Realprogymnasien* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favour of modern languages. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's probation. Higher schools for girls are called *Höhere Töchterschulen*. Besides these there are *Gewerbeschulen* or technical schools, *Polytechnica*, normal schools, seminaries, and the universities.

In 1911 the number of secondary schools was as follows:—For boys, *Gymnasien*, 1, with 9,769 teachers and 160,237 pupils; *Realgymnasien*, 1, with 8,708 teachers and 70,375 pupils; *Oberrealschulen*, 167, with 3,473 teachers and 76,892 pupils; *Progymnasien*, 81, with 570 teachers and 9,509 pupils; *Realschulen*, 411, with 4,265 teachers and 89,968 pupils. For girls, *Gymnasien*, 39, with 1,039 teachers and 22,137 pupils; *High schools*, 789, with 11,359 teachers and 212,324 pupils.

There were 11 fully-equipped Technical High Schools,¹ with the power of granting degrees. They were all aided by the States to which they respectively belong. The statistics for the winter school year 1911-12 are as follows:—

Schools	Teaching Staff	Students	Schools	Teaching Staff	Students
Berlin	11	2,828	Anchen	11	596
Munich	11	2,828	Brunswick	11	1,308
Darmstadt	61	1,780	Danzig	11	
Karlsruhe	83	1,282	Breslau	30	
Hanover	67	1,708			
Dresden	65	1,485	Total	773	10,167
Stuttgart	78	1,126			

¹ The last, at Breslau, was opened on Nov. 30th, 1910.

the students, 11,045 were fully qualified students, 1,910 women

For instruction in agriculture there are Agricultural High Schools at Berlin (805 students in 1911-12), Hohenheim (216), Bonn-Poppelsdorf (511), and Weihenstephan at Munich (226), at 8 of the universities there are Agricultural Institutes, at Weihenstephan (Bavaria) an agricultural and brewing academy, in Prussia 12 secondary agricultural schools, and in other German States 6, in Prussia 26 farming schools, in other States 19, in Prussia 118 lower agricultural winter schools, and in other States 77, besides many schools for special agricultural instruction (in Prussia alone, 1,820). Other technical schools 5 Veterinary High Schools with 1,329 students, 15 schools of mining, 15 schools of architecture and building, 5 academies of forestry 27 schools of art and art industry (*Kunst and Kunstgewerbe Schulen*), 429 commercial schools (including commercial universities), about 100 schools (including universities) for textile manufactures, 12 for special metal industries, 12 for wood working for ceramic industries, 11 for naval architecture and engineering, for ships' engineers, 19 for navigation, and 11 public schools. There are also numerous smaller as well as private music and other schools, and a large number of artisans or trade schools. There is a naval academy and school at Kiel, and military academies at Berlin and Munich, besides 47 schools of navigation, military schools, and 9 cadet institutions.

In 1911 the proportion of illiterates among the recruits was 01 per cent.

There are 21 universities in the German Empire, besides the Lyceum Hosianum at Braunsberg (13 teachers), which has only faculties of theology (Roman Catholic) and philosophy, the academy at Posen, and the Colonial Institute at Hamburg. Negotiations are in progress, and are nearly complete, for the establishment of a University at Frankfurt.

The following table gives the number of teachers and students for the winter half year 1911-12.

Universities	Professors and teachers	Students				
		Theology	Jurisprudence &c	Medicine	Philosophy	Total
Berlin	434	411	2,221	1,873	4,637	9,140
Bonn	197	447	842	591	2,030	3,987

Heidelberg	173	124	280	557	1,091	2,211
Jena	115	70	262	256	1,010	1,786
Kiel	123	22	228	517	719	1,616
Königsberg	—	94	280	—	701	1,605
Leipzig	244	511	872	1,091	2,816	5,170
Märburg	123	151	816	393	1,068	1,927
Münich	256	171	1,491	2,387	2,548	6,795
Münster	80	285	418	160	1,169	2,072
Rostock	—	86	98	333	118	—
Strassburg	177	234	426	468	1,008	2,188
Tübingen	113	462	454	212	174	1,863
Würzburg	100	101	270	741	340	1,458
	3,310	4,576	11,365	13,644	26,041	50,426

The matriculated students included 2,796 ———. In addition there were 10,129 non matriculated students (8,080 ——— and 2,049 women). The total number of students was thus 64,508.

In four universities, namely, ———burg, München, Münster, and Würzburg, the faculties of theology are Roman Catholic, four ——— mixed, both Protestant and Roman Catholic—Bonn, Breslau, Strasburg, and Tübingen, and the remaining thirteen ——— Protestant.

Justice and Crime.

A uniform system of law courts exists throughout the Empire, though, with the exception of the Reichsgericht, ——— courts ——— directly subject to the Government of the special State in which they ——— jurisdiction, and not to the Imperial Government. The appointment of the judges is also a State and not an Imperial function. The Empire enjoys uniform codes of commercial and criminal law.

The lowest courts of first instance are the *Amtegerichte*, each with ——— or more judges, competent to try petty civil and criminal ———. The *Landgerichte* ——— a revising jurisdiction over the *Amtegerichte*, and also a more extensive original jurisdiction ——— both civil and criminal cases, divorce cases, &c. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. But in the courts with appellate jurisdiction only three judges sit. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside, the jury are twelve in number. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in ——— cases, the number of the judges is ———. There are twenty nine such courts in the Empire. The total number of judges on the bench in all the courts above mentioned is 9,974. In Bavaria alone there is an *Oberster Landengericht*, with 22 judges, with a revising jurisdiction ——— the Bavarian *Oberlandesgerichte*. The supreme court is the *Reichsgericht*, which sits at Leipzig. The judges, 100 ——— number, are appointed by the Emperor on the advice of the Bundesrat. The court exercises an appellate jurisdiction over all inferior courts, and also an original jurisdiction in ——— of treason. It has a criminal and 7 civil senates.

The following table shows the number of criminal cases tried before the courts of first instance, with the number and sex of convicted persons, and the number of the latter per 10,000 of the civil population ——— twelve years of age ———.

Year	Cases tried		Persons convicted		Total	Conviction per 1000 inhabitants
	Amtegerichte	Landgerichte	———	Females		
1906	1,309,927	83,337	451,137	82,630	533,767	12.2
1907	1,291,802	81,141	449,227	91,496	530,723	12.2
———	1,327,331	85,734	462,715	85,665	548,380	12.4
———	1,337,239	85,457	458,304	85,879	544,183	12.6
1910	1,337,242	87,369	459,492	86,926	546,418	11.9

——— the persons convicted in 1906, 53,277, 1907, 54,113, 1908, 51,693, 1909, 49,697, 1910, 51,325 ——— under eighteen years of age, and ——— 1906, 234,443, 1907, 235,257, 1908, 246,091, 1909, 249,737, 1910, 247,480 had been previously convicted. In 1911, 552,556 persons were convicted of whom 50,888 were juveniles.

Pauperism.

The general principles as to poor-relief in all the German States, except Bavaria and Alsace-Lorraine, are laid down by the Imperial law of June 8, 1874, amended by the law of March 12, 1877. The territory under this law is divided into local unions (*Ortsarmenverbände*) and provincial unions (*Landarmenverbände*). Usually a local union is a commune (*Gemeinde*), while a provincial union consists of a large administrative division such as a circle (*Kreis*), a province, or a whole State. For the purposes of poor-relief a settlement is acquired by two years' continuous residence (after the age of 18), by marriage, or by descent. A German in distress must be relieved by the local union in which he becomes destitute, and the cost is refunded by the local union in which he has a settlement, or by the appropriate provincial union. In communes poor-relief forms part of the ordinary local government business; in towns the actual administration is carried out by a special committee under the presidency of the burgher-master. Poor rates are usually levied. In some large towns the Elberfeld system of unpaid district visitors is in force. Statistics of pauperism are not published regularly; the last issue related to the year 1886.

Compulsory Insurance.

As preventive measures under this head must be mentioned the imperial laws introducing the compulsory insurance of workmen against sickness, insurance against accidents by employers, and the insurance of workmen against old age and infirmity.

Under an imperial law of 1883 and amending Acts (codified in 1912), workmen are insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. Accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have united into associations according to the nature of the industries in which they are engaged. The working of these associations is controlled by Government. For invalidity and old age insurance, under an Act of 1889, amended in 1899, contributions are paid half by the workmen and half by their employers, while towards each pension Government grants an annual subsidy of 50 shillings. The employers are responsible both for their own and the workmen's contributions, but the workmen's contributions are deducted from wages paid subsequently.

Contributions are paid by the purchase of stamps from the Imperial Office; these are contributed by the person to cards on which these stamps are for stamps for 52 weeks. When contributions are complete, the card is handed over to a specified employer and a certificate given in return.

A pension is given on the completion of the 70th year of a workman's life, having been paid for 1,200 weeks (equal to about 23½ years), a margin of 6 weeks being allowed each year. The amount of wages per annum of each class, the contributions of workman and employer for each class, and the pension in shillings or pence respectively are—

	Class I.	Class II.	Class III.	Class IV.	Class V.
Yearly wages shillings	Up to 250	250-350	350-450	450-550	550-650
Weekly wages pence	12	24	28	32	44
Yearly pension shillings	110	110	200	200	290

The amount of the pension, we have seen, is 50 shillings annually paid to the pensioner.

The amount expended on compensation (in various forms) in 1890 under the sick insurance (Act of 1884 and subsequent Acts) was 10,575,000l.; under the accident insurance (Act of 1884 and subsequent Acts), 9,095,000l.; under invalidity pensions (Acts of 1889), 1,000,000l.; total, 20,670,000l.

the operation for the benefit of working men, for insurance at sickness, according to statistics published March, 1912, had 1910 (excepting the 'Knappschaftskassen' [Societies for Miners]) 885,698 members) 23,188 with altogether 18,000,871 members.

In the three years 1908-10 the operations showed:—

	1908	1909	1910
Members	12,324,094	12,519,785	12,009,370
of Sickness	5,306,148	5,045,794	5,197,080
of Sickness	101,604,200	102,368,412	104,706,104
Ordinary revenue	16,604,400	16,505,200	17,880,658
Ordinary expenditure	16,302,734	16,723,187	17,327,306

To the revenue each member contributed in 1910 about and bore a share of the expenditure amounting to about 26s 4d. The cost of sickness in 1910 amounted to 16,001,041l. of which each member's share amounted to about 24s 5d.

Finance.

The common expenditure of the Empire is defrayed from the arising from customs, certain branches of the excise, and the profits of the posts, telegraphs, and State railways. The individual States are assessed to make up any deficit in proportion to population.

The following tables exhibit the revenue and expenditure (in pounds sterling) for five years, beginning April 1, the figures for the last 2 years being budget estimates (20 marks = 12) —

Years beginning 1 April	REVENUE			EXPENDITURE		
	Ordinary	Extraord (loans, &c)	Total	Ordinary (recurring and non recurring)	Extraord (military, &c)	Total
1900	181,612,77	2,742,24	184,355,010	131,145,780	42,130,44	173,276,22
1910	140,095,290	7,075,68	147,170,968	146,170,120	12,833,020	159,003,140
1911	111,301,71	10,448,790	121,750,500	111,300,715	10,448,790	121,749,505
1912	137,551,100	6,723,055	144,274,155	137,551,100	6,723,055	144,274,155
1913	152,455,140	4,331,700	156,786,840	152,455,140	4,331,700	156,786,840

The amounts raised by customs, excise, and stamps are as follows (in thousands of pounds sterling):—

	1908	1911	1912
Customs	97,800	58,193	62,145
Stamps	58,193	9,927	63,276
Total	155,993	68,120	125,421

The sums paid in of customs and excise by the parts of the Empire not in Zollgebiet are in the above figures. The share of imperial taxation is 12s 6d per head.

The of Imperial expenditure, ordinary extraordinary in years (estimates for the last two years) have in pounds sterling:—

GERMAN EMPIRE

Years beginning 1 April	Army	Navy	Assignments ¹	
1908	41,519,535	17,872,420	9,772,115	8,037,000
1909	43,431,395	20,996,605	6,025,475	8,658,760
1910	40,409,030	22,108,815	9,000,000	11,248,810
1911	40,814,985	22,901,685	8,174,635	14,287,400
1912	47,263,435	23,521,835	9,753,355	12,001,630

¹ These assignments (*Ueberweisungen*) are payments to the State of the surplus of the *Reich* spirit duties

The following table gives the estimated total revenue and expenditure for the financial year ending March 31, 1913 —

Expenditure	Marks	Revenue	Marks
1 Ordinary —		1 Ordinary —	
Reichstag	2 143,300	Customs and Excise	1 613,081
Chancery	314,500	Posts and Telegraph	791,681,000
Foreign Office	15 721,400	Printing Office	11 786,000
Home Office	13 310,100	Railways	141,760,000
Colonial Office	2 891,100	Banks	15 938,000
Imperial Army	655 944,600	Various	72 142,000
Navy	181 163,300	Income of the Treasury	104 635,700
Ministry of Justice	3 569,100

Hesse	233,965	Schwarzburg-Ros		Bremen	54,065
Mecklenburg		Schwarzburg	16,410	Hamburg	185,190
Schwerin	118,775	Schwarzburg-Rudolstadt	18,375	Alsace-Lorraine	942,115
Saxe-Weimar	76,135	Waldeck	11,260		
Mecklenburg-Strelitz	19,625	Reuss, Elder Branch	18,260	Total	11,737,695
Oldenburg	85,155				

In October, 1912, the total funded debt amounted to 4,523,656,700 marks, of which 860,474,500 marks were at 4 per cent; 1,982,202,200 marks at 3 per cent; 1,680,967,200 marks at 3 per cent; the Treasury

DEFENCE

bonds amounted to 300,000,000 at 4 per cent. There is a debt of 593,000,000 marks free of interest, and the 'Reichs Kassenachaine, or Imperial Treasury bills, amount to 120,000 million marks.

As a set off against the debt of the Empire there exists a variety of vested funds. The treasure fund, 120,000,000 marks, is not invested, but preserved in gold at Spandau.

Defence

I. FRONTIERS

Germany has a total frontier length of 4,570 miles. On the north it is bounded by the North Sea (203 miles), Denmark (47 miles), and the Baltic (927), on the south well defined mountain ranges and the Lake of Constance separate it from Austria (1,043) and Switzerland (256 miles). On the east Germany is bounded by Russia for 1,700 miles, on the west by France (242 miles), Luxemburg (111 miles), Belgium (70 miles), and Holland (877 miles).

Some of the coast defences and batteries have been placed under the jurisdiction of the Admiralty. The empire is at present divided into ten fortress districts (Festungs Inspektionen), each including a number of fortified places. The following is a list of these districts, and the names of the fortresses in each, the fortified places of the first class, serving as camps, being distinguished by italics, while those specially designed for railway protection or obstruction are marked by asterisks (*), and coast fortresses by a dagger (†) —

1 KÖNIGSBERG *Königsberg, Danzig,† Pillau,† Memel,† Boyen* 2 POSEN *Posen, Glogau,* Neuve Glitz* 3 BERLIN *Spandau, Magdeburg, Torgau,* Kustrin* 4 MAINZ *Main, Ulm, Rastatt* 5 METZ *Metz, Diedenhofen,* Bitsch ** 6 COLOGNE *(Köln) Cologne, Koblenz, Wevel,* Saarlouis ** 7 KIEL *Kiel, Friedrichsort,† Lütjehaven,† Geestemünde,† Wilhelmshaven,† Swinemünde†* 8 THORN *Thorn, Graudenz, Vistula Passages (Weichselübergänge), Dirschau* 9 STRASBURG *Strasbourg* 10 MUNICH *(München) Ingolstadt* *Germersheim **

These fortresses are all connected with each other by means of underground telegraphs, while strategical railway lines lead from the principal military centres towards the frontiers.

II ARMY

Military service in Germany is compulsory and universal with the usual exemptions. Liability (Wehrpflicht) commences at the age of 17, and ends at 45, but actual service (Heerpflicht) begins at 19. The term of service in the First Line, or active army, is 7 years, 3 in the ranks, and 5 in the reserve, except in the cavalry and horse artillery, in which the periods are 4 and 3. During the period of reserve service the soldier is regarded as belonging to his corps, and is obliged to join it twice in the 5 (or 4) years for training. The duration of training is limited by law to 8 weeks: it is usually 6 weeks, or perhaps only a month.

The next stage is 5 years (cavalry and horse artillery 3 years) in the first 'ban' in the Landwehr, or Second Line Army. The Landwehr are twice called for service during this period, for 10 to 14 days on each occasion. Landwehr cavalry, however, are not called out for training in time of peace. After 5 years in the first 'ban' of the Landwehr, the soldier passes to the second 'ban,' and remains in it until he has completed his 12th year, or for 7 years (8 to 10 in the case of cavalry and horse artillery). There is no training during this period.

Finally all are passed into the Landsturm (second 'ban') which

they remain until they have reached the age of 45, that is for 11 years. The Landsturm is purely home force. The first 'ban' consists of those between the ages of 17 and 39 who for reason or another have received no military training. The second 'ban' contains all the men, whether trained or untrained, between 39 and 45.

Well educated young men are admitted into the German army as volunteers, serving for 1 year only, but paying all their expenses. These supply almost all the Reserve and Landwehr officers.

There are about 1,100 reservists per battalion available, a considerable proportion of whom are taken to form Reserve Troops on mobilisation. There are, therefore, a large number of Reserve Troops intermediate between the First Line and Landwehr. The balance of the reservists will join the depots, and will be available for making good the losses in the field. The depot units would be augmented by the annual contingent of recruits, and if necessary by other young men whose 'Wehrpflicht' has commenced.

The Ersatz (lit. compensatory) reserve is composed of the young men of 20 who are fit for service, but are in excess of the numbers required for the annual contingent of recruits. They are liable to, and a certain number receive, 3 trainings of 10, 8 and 4 weeks, respectively. The primary object of this reserve is to supply the waste of war; for which purpose men would be called to the depots on mobilisation, and their training completed. But a certain proportion of the ordinary (fully trained) reservists will also be available for this purpose, and the depot, or Ersatz, battalions will apparently be formed at first of about one-third fully trained, and two-thirds partially trained, reservists. On the other hand a large number of Ersatz reservists are now trained in special (non-combatant) duties, though they can of course be called to the depots if required.

Two regiments of infantry (6 battalions) form a brigade, two brigades a division, and two divisions an army corps. Ten divisions, however, have each 3 brigades. The intended employment of the reserve troops in has not been divulged, but it seems possible that most of the 2-brigade divisions will be augmented by a reserve brigade, and that all army corps will take the field with six brigades (36 battalions), the artillery being proportionately increased by reserve regiments. To each infantry division is attached in an artillery brigade (12 batteries) and a regiment of cavalry (4 squadrons): to each army corps 4 batteries of howitzers; also a battalion of rifles and a pioneer (engineer) battalion. All field and horse artillery batteries have 4 guns. The strength of a complete division, of two brigades, without reserve units, is about 14,000 combatants, and of an army corps of two divisions, about 30,000. The strength of a 3-brigade division would be about 21,000, and of an army corps of 6 brigades about 43,000 combatants. There are altogether 23 army corps in the army of the German Empire.

There is only one permanent cavalry division, that of the guard, in which at least eight divisions would be formed from the line regiments. The normal strength of a cavalry division is 3 brigades of 4 regiments each, with 2 (or possibly 3) batteries of horse artillery. In all 18 squadrons (or 18) guns.

The kingdom of Prussia, together with Hanse and Hesse, is divided into 11 military districts, which furnish a complete army corps, and 2 (or 3) Landwehr divisions, as well as a proportion of cavalry, garrison artillery, and the Prussian Corps, drawn from the whole kingdom. Saxony furnishes an army corps (XIIth); Württemberg an army corps (XIIIth); Reichsland (Alsace and

Lotharing) ■ army corps (XVth ■ XVIth), and the kingdom of Bavaria 3 army corps (1st, 2nd, and 3rd Bavarian) The strength of ■ army (25 army corps and independent cavalry) together with ■ troops, amounts to about 1,220,000 combatants To this ■ be added the mobile Landwehr, the total strength of which amounts to about 800,000 The total of the mobile forces of the German Empire is therefore about 1,820,000 Behind this there are, according to ■ computations, about 1,500,000 men, wholly or partially trained, to supply the waste of ■ These figures do not include garrison units, ■ any part of the Landsturm

The constitution of 1871 provides that the whole of the land forces of the Empire shall form a united army in war and peace, under the orders of the Emperor. All German troops are bound by the constitution to obey unconditionally the orders of the Emperor, and accordingly take the oath of fidelity, but this oath is not administered to the Bavarian troops at time of peace. The Prussian War Office performs the functions of the Imperial Ministry of War, but Bavaria, Saxony, and Württemberg have also War Ministers of their own. The king of Bavaria also retains by a special convention the general administration of the Bavarian troops. The military budgets of Saxony and Württemberg are prepared in Berlin and Bavaria is bound to vote military supplies in a fixed proportion to the other budgets.

The German infantry are armed with the Mauser magazine rifle, model 1898, calibre 311". The cavalry have the Mauser magazine carbine. All classes of cavalry carry the lance. The field and horse artillery are armed with a Krupp gun firing a 15 lb shell, of 1896, the carriage of more modern date. The light field howitzer is a 30 lb the heavy howitzer is a 94 lb.

The military expenditure of the German Empire, entered in the budget for 1912-13, amounted to 34,447,230^l ordinary, and 189,933^l extraordinary, total, 34,637,163^l. This is exclusive of expenditure on colonial troops.

The following table gives in detail the peace establishment of the German Army in 1912 —

	Officers	Non-commissioned Officers	
Infantry, 217 regiments	312	746	
Rifles (J)	400	11	
gun	73	1 1/2	
Headquarters 30'	927	1	
combatants	2 066	661	
infantry	17 548	411 061	9 210
Cavalry, regiments	2 565	70	60 9 4
non	671	308	—
Field Artillery, regiments	8,368	60,764	12 799
"	1,163		—
Artillery, regiments	1,175	347	9,26
non-combatants	237	49	—
"	769	19 57	—
non combatants	161	65	—
Railway, telegraph and balloon		10 418	1,29
(including non combatants)		7,861	5,736
Train, battalions (ditto)	547	2,580	
	784	1,615	
Non-regimental officers,	2,568	—	
Total	28 241	632, 753	195,480

With regard to [redacted] garrisons, Germany maintains about 2,700 men at Kiauchau; these are [redacted] and sailors, but native troops [redacted] being organised. There is also a colonial force with a special colonial staff, these troops [redacted] not included in the army, and they serve under the direct orders of the German Chancellor, their total establishment is about [redacted] officers, 2,250 German [redacted] commissioned officers and men, and 3,830 native soldiers. The officers and non commissioned officers are mostly seconded from the home army.

The normal strength in South-west Africa is about [redacted] officers and 2,000 other ranks, all German.

There are also about [redacted] native police, with white officers, mostly in the minor colonies.

III NAVY

Estimates — 1912, 22,870,000/ , 1911, 22,901,700/ , 1910, 22,127,740/ , 1909, 20,426,780/ , 1908, 16,966 186/ , 1907, 13,628,247/

After the war of 1870-71 the German navy was re-organised, and a *Flottengrundungsplan* laid down. By a cabinet order of March 30, 1889, the administration was wholly re-organised. The chief command was separated from the administration, and vested in a naval officer, while the administration was transferred to the *Reichsmarineamt*, having at its head, under the chancellor, the naval secretary of state. The first of these officials deals generally with the movements of the fleet, and with questions relating to coast defence, training, the efficiency of the personnel, &c , while the imperial arsenal and dockyards, matters more especially concerning the material, clothing, victualling, &c , fall to the department of the secretary of state. The ships of the German navy are divided between the Baltic and North Sea stations. The chief naval establishments are at Kiel — the Baltic and Wilhelmshaven on the North Sea, and the Kaiser Wilhelm Canal, [redacted] the Schleswig Holstein neck from Kiel to the Elbe, which was opened in the month of June, 1895, facilitates the transference of forces from [redacted] here to the other. Danzig is [redacted] an effective base also, with a dockyard. In [redacted] Cuxhaven and Sonderburg were also selected as naval bases.

The following is a statement of the strength of the German fleet —

Class	Effective in middle [redacted]		
	1912	1913	1914
Battleships	13	17	21
Pre-Dreadnought battleships	20	[redacted]	20
[redacted] coast defence battleships	2+7		
Armoured cruisers	9	9	9
Protected cruisers	72	96	[redacted]
Destroyers	120	141	[redacted]
Torpedo boats (old)	[redacted]	47	47
Submarines	[redacted]	26 or more	1

[redacted] — German ships are usually completed for sea about June each year. Certain ships which have no fighting value are [redacted]

Germany subsidises, as auxiliary merchant cruisers, seven vessels with a nominal speed of from 18 to 24 knots or more, viz. the *Kronprinzessin Cecilie*, *Kronprinz Wilhelm*, *Kaiser Wilhelm der Grosse*, *Kaiser Wilhelm II.*, *George Washington*, *Prinz F. Wilhelm*, and *Berlin*. There are also sub-mentioned to some extent the *America* and *Kaiserin Augusta Victoria* (28,000 tons), of about 17 knots speed.

The German navy is manned by the obligatory service of the maritime population (*seemannische Bevölkerung*)—sailors, fishermen, ships' carpenters, and others; and also of the semi-maritime population—that is, of those who have smaller experience of the sea. All these are freed from this account from service in the army. Great inducements are held out for able seamen to volunteer in the navy, and the number of these in recent years has been very large. The total seafaring population of Germany is estimated at 80,000, of whom 48,000 are serving in the merchant navy at home, and about 6,000 in foreign navies. The naval personnel is 33,500 plus a reserve of about 110,000. It is extremely efficient, especially in torpedo service. Practically the entire navy is always in commission. Very elaborate precautions are taken to keep the personnel free from certain diseases which imperil efficiency.

Production and Industry.

I. AGRICULTURE.

In Germany (except the Mecklenburgs) there is complete free trade in land. Generally speaking, small holdings and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

According to the latest returns (1893 and 1900), 97 per cent. of the area of Germany is productive and 3 per cent. unproductive. The subdivision of

the soil, according to the latest official returns (1900), was as follows (in acres:—Arable land, vineyards, and other cultivated lands, 65,199,530; grass, meadows, permanent pasture, 21,397,300; woods and forests, 34,569,800; all other, 12,383,390.

On June 12, 1907, the total number of agricultural enclosures (including arable land, meadows, cultivated pastures, orchards, and vineyards) each cultivated by one household, was as follows:—

Under ½ acre	½ acre to 1 acre	1 acre to 2 acres	2 acres and over	Total
3,71,055	674,032			6,780,092

On June 12, 1907, these farms employed 15,169,549 persons; in the year ending June 12, 1907, the greatest number employed at the same time was 19,732,424.

The areas under the principal crops, in acres were as follows:—

Wheat . . .	4,528,460	4,901,010	4,935,493	4,814,027
Rye . . .	15,328,830	15,465,830	15,171,850	15,670,890
Barley (Summer) . . .	4,115,890	3,926,130	3,963,012	3,873,980
Oats . . .	10,774,920	10,723,020	10,818,862	10,966,385
Potatoes . . .	8,309,330	8,210,210	8,303,705	8,353,675
Hay . . .	14,903,840	14,902,690	14,827,995	11,806,580
Vines . . .	286,840	281,390	275,077	272,265
Tobacco . . .	40,460	38,550	38,510	39,440
Hops . . .	72,410	68,670	66,710	67,530
Beet . . .	1,130,563	1,180,485	1,243,652	

The total yield of their products in the years indicated, in metric tons (1 metric ton = 2,204 lbs. or .984 an English ton), or hectolitres (hectolitre = 2.64 gallons), was as follows:—

			1911	
	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Wheat . . .	8,736,747	8,661,479	4,066,388	4,360,624
Rye . . .	11,943,415	10,511,169	10,866,110	11,508,389
Barley . . .	3,405,616	2,002,938	3,160,916	3,481,974
Oats . . .	9,123,816	7,000,376	7,704,191	8,520,183
Potatoes . . .	46,708,282	43,466,305	34,374,225	50,204,466
Hay . . .	22,140,927	11,943,657	7,070,465	7,940,162
Hops . . .	6,068	20,411	19,628	20,514
Tobacco . . .	28,178	28,818	28,554	—
Wine, Hectol. . .	2,020,620	816,139	—	—

In 1911 there were within the Empire 168,432,000 fruit trees, comprising 52,382,000 apple-trees, 25,116,000 pear-trees, 69,436,000 plum-trees, and 21,548,000 cherry-trees.

The number of domestic animals in Germany on December 2, 1907.

States	Horses	Cattle	Sheep	Pigs	
Prussia	3,040,801	12,011,584	5,408,867	15,095,854	2,240,580
Bavaria	302,001	3,723,430	735,113	2,056,222	808,150
Saxony	171,711	741,528	66,120	744,517	144,854
Alsace Lorraine	198,077	544,661	67,980	602,443	67,070
Württemberg	115,352	1,073,122	278,337	537,185	88,301

Other States	30,602	1,871,070	1,013,278	2,012,033	73,741
Total, 1907	3,445,017	20,140,544	7,703,710	22,146,122	3,583,971
Total, 1912	3,516,397	20,147,736	7,747,648	21,682,076	3,848,071

II. FORESTRY

Forestry in Germany is an industry of great importance, conducted under the supervision of the State by scientific methods. The forest area of the Empire is put at 34,569,800 acres, of which crown forests occupy 675,540 acres; State and partly State forests, 11,015,910 acres; communal forests, 5,577,470 acres; private forests, 16,130 acres, and forests belonging to various associations or foundations, 1,277,560 acres. Of the whole forest area about one-third (11,225,680 acres) is under foliage trees, oak, birch, ash, beech, &c., and two-thirds (23,344,240 acres) bear pine, larch, fir and white fir, &c. The forests yield, according to the latest report, 26,183,410 cubic yards of timber and 23,348,640 of firewood.

III. MINING

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal and iron, the Harz for silver and copper, and Silesia for zinc. Saxony has coal, iron, and silver mines, Lorraine rich coal and iron fields, and the Grand Duchy of Luxembourg rich iron fields.

The quantities of the principal minerals raised are as follows:—

	1907	1908	1909	1910	1911
	Metric Tons	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Coal	143,185,691	147,671,149	148,788,000	152,827,777	160,747,580
Lignite	62,546,871	67,615,200	63,657,606	69,517,299	73,760,867
Iron ore	27,697,128	24,278,151	25,504,464	28,709,700	29,879,361
Zinc	698,425	706,441	723,566	718,318	699,070
Lead ore	147,272	156,861	159,853	148,497	140,154
Copper ore	771,227	727,334	798,618	925,657	868,600
Rock Salt	1,285,138	1,331,984	1,369,505	1,424,063	1,436,492
Potassic salt	5,749,368	6,092,022	7,042,034	8,311,671	9,606,876
Other products	534,298	552,351	528,664	554,049	561,426

The total value of the minerals raised in Germany and Luxembourg was in 1908, 1,971 million marks; in 1909, 1,980 million marks; in 1910, 2,009 million marks; in 1911, 2,066 million marks.

GERMAN EMPIRE

The following table shows particulars of the production of the foundries in Germany and Luxemburg in 1910 and 1911 (provisional) :—

	Quantity in metric tons 1910	Value in sterling 1910	Quantity in metric tons 1911	Value in sterling 1911
		£		£
Pig iron	14,793,604	40,142,650	15,280,527	42,525,550
Zinc	221,396	4,969,950	235,776	5,717,950
Lead	159,851	2,067,000	161,287	2,207,600
Copper	34,926	2,119,300	37,452	2,200,700
Silver	420	1,532,750		1,606,850
Gold	5	645,950		698,750
Tin	11,394	1,556,750	12,412	1,974,800
Sulphuric acid	1,616,336	2,155,600	1,584,465	2,031,050

In 1912 the total output of pig iron was 17,852,571 tons.

IV. FISHERIES.

In 1907 the persons engaged in fishing numbered 33,665, of whom 15,811 were employed in sea and shore fishing, and 17,854 on inland waters. In 1911, 701 boats, with an aggregate crew of 6,876, were engaged in deep-sea fishing in the North Sea. In 1910, the yield of the North Sea fisheries was valued at £825,963*l.*, and the Baltic fisheries, 392,443*l.*; total value of fish caught, 1,908,804*l.* Fresh fish, valued at 2,389,150*l.*, in 1910 were imported; in 1911, 2,608,250*l.*

V. MANUFACTURES.

The chief seats of the German iron manufacture are in Prussia, Alsace-Lorraine, Bavaria, and Saxony. Steel is made in Rhenish Prussia. Saxony is the leading State in the production of textiles, but Westphalia and Silesia also produce linen; Alsace-Lorraine, Wurtemberg, Baden, and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony and Bavaria; in Rhenish Prussia, Alsace, and Baden. Beetroot sugar is an important manufacture in Prussia, Brunswick, Anhalt, and Bavaria, &c.; glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria, and Saxony; clocks and wooden ware in Wurtemberg and Bavaria; and beer in Bavaria, Prussia, Saxony, Baden, Hamburg, Bremen, &c.

The following table shows the statistics of the beetroot sugar manufacture in the Zollgebiet :—

Years beginning 1 August	Number of factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1 Kg of Sugar
			Raw Sugar	Refined Sugar	
1907		13,482,750	2,017,071	287,266	
1908	358	11,809,182	1,980,387	275,395	
1909		12,892,068	1,947,580	282,411	
1910		15,748,981	2,512,928	328,058	6·27
1911	342	9,060,575	1,407,781	292,935	6·47

In 1901-11 there were 24 of sugar from starch, which yielded 10,064 of dry sugar, 62,316 tons of syrup, and 4,519 of colour

The following table shows the quantity of beer brewed within the Beer-district (*Bräusteuergebiet*), which includes all the of the Zollgebiet, except Bavaria, Württemberg, Baden, and Alsace-Lorraine. The given in thousands of hectolitres (1 hectolitre = 22 gallons) —

Years beginning 1 April	Beer Dist	Bavaria	Württemberg		Alsace-Lorraine	(Zollgebiet)
1907	42,183	18,641	3,975	3,286	1,450	69,555
	40,190	18,483	3,660	3,227	1,401	66,961
1909	37,340	18,254	3,516	3,186	1,290	63,754
1910	38,080	18,110	3,981	2,801	1,206	64,484
1911	41,348	19,647	4,378	3,208	1,483	70,853

The total number of active breweries in the Beer district was in 1911, 4,204. The amount brewed per head of the population in 1911 was in gallons — the Excise district, 17, Bavaria, 54, Württemberg, , Baden, 32, Alsace-Lorraine, 21, the entire Zollgebiet, 28 gallons. In 1911, there were 67,236 distilleries in operation, which produced 80,121,558 gallons of alcohol.

In 1911, 518,821 juvenile workers were employed in Germany, 340,316 being males and 178,505 females. Of these, 7,434 were boys and 5,070 girls under 14 years of age.

Commerce.

The of the Empire is under the administration and guidance of special laws and rules, emanating from the Zollverein, or Customs Union, which, March 1, 1906, embraces practically the whole of the states of Germany and the Grand Duchy of Luxemburg, as also the Austrian communes of Jungholz and Mittelberg. A few districts in Baden (3,863 inhabitants), on the Swiss frontier, and the Island of Helgoland, the Free Haven of Hamburg, Bremen, Bremerhaven, Geestemünde, Cuxhaven and Emden, still are unincorporated. The commercial statistics, however, exclude only the commerce of the island of Helgoland and the districts of Baden. Population of the entire Zollgebiet in 1905, 60,871,554.

Since 1879 Germany has been protectionist in her commercial policy. Of total imports in 1911, the value of 229,665,500 was subject to duty, and 255,636,050 duty-free (exclusive of the precious metals). The duties levied amounted to 48,680,500, or per cent of the value of the imports subject to duty.

following shows (in pounds sterling) the special trade for years —

	Imports	Exports	Years	Imports	
	£	£		£	£
	450,081,064	354,745,800		490,000	382,370,000
1908	408,854,650	334,074,300	1911	347,250	411,219,000
	443,020,500	343,904,650		500,020,000	437,021,000

The following are the principal of special for years 1911 and 1912 (20 marks = £1)

Classes of goods	Imports		Exports	
	1911	1912	1911	1912
	million marks	million marks	million marks	million marks

Jewellery, clocks, toys, etc.	31	1	102	201

In Germany, the average value of most imported articles is fixed annually, under the direction of the Imperial Statistical Office, by a commission of experts. Since April 1, 1911 the value ■ all exports and of imports ■ declared. The price ■ is that of ■ goods ■ the moment of crossing the frontier. For imports the price does not include (customs duties, cost of transport insurance warabon, ■ incurred after the frontier is passed. For exports the price includes all charges within the territory but drawbacks and bonuses are not taken into account. The quantities are determined according to obligatory declarations, and for imports the fiscal authorities may actually weigh the goods. For packages, ■ official tare is deducted. The countries whence goods are imported, and the ultimate destination of exports ■ registered.

The imports of gold (coined and ■ bars) in 1911 amounted to 11,925,100/ of silver (coined and in bars), to 3,959,550/; the exports of gold amounted to 3,840,900/; of silver to 2,001,050/.

Some of the leading imports and exports under the above heads were, in thousands of marks value, as follows ■ 1911 —

		1,000 Marks			1,000 Marks			1,000 Marks
Imports	Horses	106,436	Coffee (raw)	251,569	Bean	150,532		
	Eggs	171,555	Tobacco (raw)	116,531	Woolen yarn	113,780		
	Wheat	298,876	Maize	86,720	Raw	131,965

The ports of Hamburg and Bremen are the chief gates of commercial intercourse of Germany with the United Kingdom and the United States.

Shipping and Navigation.

The following are the distribution of the mercantile navy of Germany only ships of more than 17·65 tons gross-tonnage) on January 1 of the last three years:—

	North Ports		Shipping	
	Number	Net tonnage	Number	tonnage
1910.—				
Sailing vessels	400	17,302	2,308	509,750
		225,755	1,411	2,340,557
Totals		303,058	2,719	2,850,307
1911.—				
Sailing vessels		17,215	2,702	506,887
Steamers	550	292,092	1,978	2,896,738
Totals	945	309,307	4,680	3,403,625
1912.—				
Sailing vessels	392	12,556	2,722	
Steamers		298,321	2,009	
Totals		310,877	4,731	3,028,725

Of the total shipping — January 1, 1912, 2,260 of 812,713 tons; 1911, 2,246 of 297,998 tons; 1910, 2,247 of 286,271 tons; 1909, 2,240 of 283,098 tons; 1908, 2,218 of 284,081 tons belonged to Prussian ports. The total number of sailors required for manning the ships of the merchant navy was, on January 1, 1912, 75,130; 1911, 73,993; 1910, 73,516; 1909, 72,462. The of the various ships in 1911 — follows:—

	Under 100 Tons gross	100-500 Tons gross	500-1,000 Tons gross	1,000-2,000 Tons gross	2,000 Tons gross and over
Sailing vessels	2,039	479	49	74	82
Steamers	234	517	249		710

Of the sailing vessels 1,310 — totally of iron — steel; of the steamers 1,997 were of iron — steel.

Built in German private yards, 1911, — vessels of 406,763 tons gross (including — vessels of 49,544 tons gross). Of these, 151 of 18,784 tons gross (including — vessels of 2,230 tons gross) were built for foreigners. Built in foreign yards for Germans, — trading vessels of 61,708 tons gross.

Shipping of the German Empire, in which each vessel, if it entered several ports on a single voyage, is counted only once:—

	With Cargoes		Ballast		Total	
	Number	Net tonnage	Number	Net tonnage	Number	tonnage
1908:—						
Entered.	95,822	25,417,998	11,872	2,015,472	107,694	27,433,477
Cleared.	76,904	17,628,882	30,536	9,462,630	107,440	27,091,412
1909:—

Internal Communications.

1. RAILWAYS

Out of 38,747 miles of railway open for traffic 2,917 miles belonged to private companies. The following table gives details:—

Years	Total Length, in English miles	Total Capital £	Expenditure	Receipts	Percentage on Capital of Surplus
1906	35,235	735,166,100	77,485,000	122,432,850	6.11
1907	35,760	759,843,550	85,305,050	132,054,800	6.15
1908	36,200	789,697,700	95,218,800	137,904,650	5.41
1909	37,026	821,379,310	99,753,320	112,350,000	4.86
1910	37,441	861,853,011	100,933,477	115,950,000	4.92
1911	38,747	876,917,215	103,726,098	152,524,442	5.57

In 1910, 531,527,817 metric tons of goods, including live cattle, were carried, and paid 1,903,193,721 marks; the number of passengers in 1910 was 1,541,278,095, yielding 835,031,618 marks.

In 1910 there were 2,809 miles of tramway, and 6,404 miles of Kleinbahnen. The length of the railway line of normal and narrow gauge respectively

belonging to each of the State systems, and the length of private line, were as follows on March 31, 1912 —

Railway system	gauge	Narrow	Total
	Miles	Miles	Miles
Prussian	28	148	23 771
Bavarian	5,112	71	5,183
Saxony	1,744	314	2 058
Württemberg	1,231	—	1,238
Baden	1,080	17	1,097
Mecklenburg	661	—	661
Oldenburg	404	—	404
Royal Military	—	—	—
Alsace Lorraine	1,253	48	1,301
Total	35,171	600	35,881
Private	2,307	709	2,916
Grand Total	37,478	1 309	38 787

II CANALS AND NAVIGATIONS¹

Length navigable vessels of draught

Nature of Waterway	Over 16ft 4 8in	13ft 1 4in to 16ft 4 8in	9ft 10in to 13ft 1 4in	6ft 6 7in to 9ft 10in	Under 6 7in	Total
	miles	miles	miles	miles	miles	miles
Navigable rivers	—	268	295	1,330	2 878	4,989
Canalised rivers	—	3	1	116	758	878
Canals	—	2	10	374	961	1,315
Ship canals through lakes, &c.	—	75	211	—	427	1,251
Totals	—	348	517	2,129	4,922	8,436 ¹

¹ — 100 miles of unclassified waterways. ² Latest available figures (for 1904).

Up to the end of — there were added — miles.

The — Wilhelm canal, connecting the North — and the Baltic, has a length of 61 miles; breadth at bottom 72 ft., — surface — ft., depth — ft. 6 in.; cost of construction, 7,800,000^l. In the year ending March 31, 1912, 52,817 vessels of 8,478,261 tons net used the canal.

III. POSTS — TELEGRAPHS

The postal and telegraphic — are retained in the hands of their respective Governments. All parts of the Empire except Bavaria and

Württemberg united to form an imperial postal district (*Reichspostgebiet*).
Statistics for 1911 —

	Employees	No. of Post Officers	No. of Boxes	No. of Tele- graph Offices
Reichspostgebiet	210,338	34,536	130,715	36,312
Bavaria	16,468	5,273	19,320	7,909
Württemberg	6,414	1,178	5,731	2,223
Total in Empire	233,270	40,987	155,766	46,444

Amount of business transacted in 1911. —

	Reichspostgebiet	Bavaria	Württemberg	Empire
Letters	2 754,891,550	253 952 410	107 406,640	3,115,650,600
Post Cards	1,675,855,420	155,492 410	66,885,900	1,897,233,730
Printed matter	1 551,381,150	161,763 170	65,942,310	1,778,286,630
Business papers	23 552,890	1,414 100	175,140	25,132,130
Samples	540	10 360 200	2,766,030	103,982,330
Journals	1,922,601,720	257,247,660	49,566,830	2,629,415,210
Total, including other despatches	5 287,101 600	674,737 690	333 067,490	6,294,906,780
Money sent (& tele- ling)	2,241,384,321	224,791,771	94,467,327	2,560,643,419

1 The number of post cards for inland correspondence in Germany is almost double that in any other country.

Finances of the postal and telegraphic and telephonic services in 1911
(in marks) —

	Reichspostgebiet	Bavaria	Württemberg	Empire
Receipts	556,575,064	72,797,680	28,719,923	658,092,667
Expenditure	664,702,662	59,839,100	20,969,419	745,511,181
Surplus	90,812,412	13,958,580	7,750,503	112,521,495

The following are the telegraph statistics for the year 1911 —

	Telegraph Lines, kilometres	Telegraph Wires, kilometres	Telegrams	Radio Telegrams
Reichspostgebiet	150,583	596,906	24,022,310	15,167,170
Bavaria	27,904	88,709	2,007,470	1,180,819
Württemberg	11,918	18,940	735,710	412,970
Total in Empire	189,405	704,555	26,765,490	16,760,959

In 1911 the urban telephone systems had 117,612 kilometres of line and 5,022,771 kilometres of wire; conversations, 1,696,753,080. The 9,375 interurban systems had 1,290,965 kilometres of line and 11,377,262,849 kilometres of wire; conversations, 377,262,849.

Money

Money (in thousands of marks) coined since the foundation of the present Empire :—

Year beginning 1 April	Gold		Nickel	Copper	Total
1907	67,070·9	74,929·2	5,460·7	1,283·0	148,201·8
1908	68,243·7	58,369·7	5,418·9	741·0	132,817·2
1909	159,634·5	49,021·6	2,988·1	784·9	211,794·2

Imports from the German colonies into Germany 1911, 2,152,400*l.*; exports from Germany to the colonies, 2,512,200*l.*, against 2,477,200*l.* and 2,439,900*l.* respectively in 1910. Total imports to the German colonies in Africa and the Pacific, 1911, 7,110,610*l.*; exports from these colonies, 1911, 4,899,810*l.*, against 6,442,110*l.* and 5,042,065*l.* respectively in 1910. Imports into Great Britain from German colonies, 1911, 468,880*l.*, British domestic exports to the German colonies, 646,694*l.*

Togo.

Togo, with Little Popo and Porto Seguro, in Upper Guinea, between the Gold Coast Colony to the west and French Dahomey on the east; 33,700 square miles; coloured population 1,000,000; European population, 1910, 363, of whom 927 were German. Coast line about 32 miles, but inland the territory, between the rivers Volta and Monou, widens to three or four times that breadth. Togo is under an Imperial governor, assisted by a secretary, an inspector of customs, and a local council of 11 unofficial members. Lome, the chief port, and capital; Aneho (now closed to maritime trade), Porto Seguro, and Bagida on the coast. The government stations are Misahöhe with Kpandu, Kete-Kratchi with Bismarckburg, Sansanne-Mangu, Bassari, Atakpame, Sokodé. Togo station is on Lake Togo. The military force is small. There are two Government schools with 312 pupils, being trained as clerks and interpreters and learning handicrafts. Missionary societies have 308 schools with 10,198 native children. In the courts of justice in the year 1910 57 Europeans and 6,602 natives were sentenced. The climate at the coast is unhealthy for Europeans. Inland the country is hilly with streams and watercourses. There are long stretches of forest and brushwood, and dry plains alternate with cultivable land. Maize, yams, tapioca, ginger, and bananas are cultivated by the natives, most of whom are Ewe negroes; oil-palms, caoutchouc, and dye-woods grow in the forests; but the main trade is the barter trade for palm oil, palm kernels, and gum, carried on by a few factories on the coast. There are considerable plantations of palms, coffee, cocoa, kola, kinkra, and manihot. In 1910 484,470 kilos of cotton and 137,045 kg. of cocoa were produced; tobacco is being tried, also rubber, fibrous, and other plants. In 1909 there were 135,000 sisal plants in the Colony. In the Sokode and Mangu districts are about 85,000 head of cattle; sheep, goats, poultry, and pigs are found, but nowhere in large numbers; in some districts horses of small size are bred. Native industries are weaving, pottery, smith-work, straw-plaiting, wood-cutting. There is mining by Europeans, but the natives in the Sokode district extract iron (1910 10 tons were extracted). Revenue estimated for 1912 3,150,000 marks; expenditure, the same amount. Total imports (1911), 9,620,030 marks; exports, 9,317,552 marks. Exports comprised palm kernels, 1,636,438 marks; palm oil, 911,666 marks; rubber 969,478 marks; cotton, 417,499 marks; maize, 979,023 marks. The chief imports are cottons, 1,816,641 marks; cotton yarn, 179,406 marks; spirits, 684,000 marks; iron and ironwares, 607,392 marks; tobacco, wood, colonial produce. In 1910, 576,639 tons (365,697 German tons) of goods were imported. There are good roads, connecting Lome with Atakpame, and other roads are in construction. A railway connects Lome with Aneho (Little Popo) and Palime, 128 miles. Cost of service, 1910: 346,155 marks; the receipts, 502,614 marks. Total length of line (1913), 200 miles. There are 15 post and telegraph stations and 11 sub-stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

Governor.—Duke Adolphus Frederick, of Mecklenburg.

British Consul-General.—C. Wallbridge Wallis.

Kamerun.

The Kamerun Protectorate, lying between British Nigeria and the French Congo, extends from the coast north-eastwards to the southern shore of Lake Chad; 191,190 square miles; population 2,720,000. Bantu negroes near the coast, Sudan negroes inland. In 1911 there were 1,455 whites, of whom 1,111 German. The protectorate is under imperial governor, assisted by a chancellor, two secretaries, and a local council of three representative merchants. The seat of Government is Buea. Military force, 171 Germans and 1,300 natives; police force, 175 Germans and 621 coloured. Four Government schools at Duala, Victoria, Jaunda, and Garna, have about 783 pupils. Four missionary societies have schools with 24,270 pupils. In 1910, 94 Europeans and 6,360 natives convicted in the criminal courts. The soil in the coast region is fertile, and numerous valuable African vegetable productions grow in profusion. Plantations of 8,583 hectares; coffee, 10 hectares; rubber of various sorts, 6,472 hectares; kola, 152 hectares. There 175,049 oil palms. In Victoria, the experiments being made towards the cultivation of cloves, vanilla, ginger, pepper, and many other products; active trade in ivory and palm-oil. The colony is rich in hardwood; ebony is abundant. Cattle-rearing is carried on with success in the hinterland. Revenue (mainly from import duties) and expenditure for 1912, 9,590,000 marks, including 2,345,000 marks of subvention. Duala (pop. 22,000), Victoria, Kribi, Rio del Rey and Campo are important trading stations, and Aquatown and Belltown are the principal native settlements. Gold and iron have been found.

Imports over sea, 1911: 29,317,614 marks; exports: 21,250,883 marks. Chief exports: palm kernels, rubber, palm oil, ivory, cocoa. Chief imports: textiles, spirits, timber, salt, iron wares, and colonial produce. In 1910 there entered at the ports 529 trading vessels of 1,290,829 tons. Roads being constructed between the coast towns and from the coast inland. The total length of railway line (1913) is 149 miles. The Manenguba railway is constructed the length of 160 kms. The receipts were (1911), 380,482 marks. A line from Duala to Edea and Widiwengo is projected, and other lines the south-west coast. The telegraph system being rapidly extended. Kamerun is connected by cable with Bonny in Southern Nigeria. A direct cable is in construction.

British Consular-Agent at Duala—K. C. Holder.

German South-West Africa.

This Protectorate includes the region lying between Portuguese West Africa and Cape Colony, and extending eastward to the British sphere, exclusive of Walvisch Bay, which belongs to Cape Colony. Area 322,450 square miles; population, 82,235, belonging to the Hottentot and Bushman, the and the Damara races. European population, 1911, 13,962 (11,140 German); the military force (inclusive of police) 8,547. In 1910, Government schools had pupils, and the Mission schools had about 3,000. In 1910, Europeans and 2,871 natives convicted in the criminal courts. The whole southern part and much is barren and desert. There have been extensive boring operations for water, in many successful. The coast lands are held by the 'Deutsche Kolonial für Südwest Africa,' which has given the special of Deutsch-Namaland to the southern part of territories, and Deutsch-Damaraland the northern. The of administration Windhoek, other stations being Gobabis, Otjimbingue, Swakopmund, Keetmanshoop, Gibeon. The natural harbours

XX Sandwich Harbour, which is being gradually sanded up, and Angra Pequena, or Luderitz Bay. A new harbour has been constructed at Swakopmund. For farm purposes, crown lands and native lands have been disposed of to the extent of several millions of XXXX. Up to April 1, 1911, 1,141 farms of XXXX lying according to the district from 5,300 to 31,800 hectares had been sold. There is, however, little agriculture, but market gardening is common. Cotton cultivation has begun in the Otjo district, viticulture, silk culture, and tobacco-growing XXXX being tried. The government has experimental stations for agriculture, gardening, and forestry. The chief industry is pastoral. In 1911, the live stock consisted of 144,445 cattle, 384,248 sheep, 10,257 angona goats, 334,986 other goats, 12,683 horses, 6,064 mules, 6,629 asses, 7,761 swine, 954 camels. Large herds and flocks of cattle and sheep belong XX natives.

Copper has been found at Otavi and Otjuzougati, at Tsumeb, XX the Otavi region, copper mining XX carried on; 40,256 tons of copper XXXX were exported in 1910. Diamonds have been found XXXX Luderitz Bay, and in 1912 768,465 carats were produced, valued at 968,423*l*. Gold XXXX been found, but not in sufficient quantity XX working, and marble, asbestos, graphite, and other minerals have been observed.

The revenue and expenditure for 1912 were put XX 36,020,000 marks, 13,828,000 marks being Imperial contribution.

The total imports (including government imports) in 1911 amounted to 45,801,955 marks, exports, 28,573,244 marks. In 1911 the imports comprised cereals and flour, 13,267,000 marks, tobacco, 973,000 marks, beer, 1,752,000 marks, timber, 1,028,000 marks, meat, 1,105,000 marks, textiles, 4,843,000 marks, iron and iron work, 10,713,000 marks. The chief exports were animal products, guano, and copper ore, the last named to the value of 5,697,000 marks. German imports, 3,634,000 marks; exports to Germany, 20,693,000 marks. In 1910, 483 vessels of 1,328,356 tons entered at the ports of the colony.

There is a railway of 237 miles (gauge about 23½ in.) from Swakopmund to Windhoek, from Swakopmund to Tsumeb (359 miles), from Otavi to Grootfontein. The Luderitz Bay-Kettmanshoop railway was completed in July, XXXX. Total length open, 1,304 miles (1913). The State has bought the Otavi and Otavi Grootfontein railways, the latter from the South-West Africa Company, and leases the line to the company for XX years, reserving the right to terminate the lease in 20 years. The cost of the service XX the XX lines were in 1910, 6,507,000 marks, the receipts, 9,939,000 marks. The mining rights in the lands transferred to the State XXXX be a monopoly of the company. A telegraph line connects Swakopmund, Karibib, Okahandja and Windhoek, and a telephone XXXX works XX connection with this line. The colony has 1,599,436 miles of telegraph line and 415 miles of telephone line. The Protectorate communicates with European countries by XXXX of the Cape and Mozambiques cable which touches XX Swakopmund.

British Consul.—R. H. W. Muller.

German XXXX Africa.

German sphere, XXXX Africa, has a coast line of about XXXX miles, estimated area, 384,000 square miles. The Sultan of Zanzibar's rights XXXX the narrow strip of coast territory were acquired by Germany in XXXX for a payment of 4,000,000 marks. The coast line extends from the mouth of the Umba to Cape Delgado, XX (more accurately) XX 10° 40' S lat. The German Empire is

represented in the Protectorate by an Imperial governor. There are 9 communes, each with an administrator and a council of from 8 to 11 members. The members are appointed by the Governor; they may be German or not, but they represent native interests; local finance and other matters are submitted to these councils. The native population is estimated at 10,000,000, consisting mostly of tribes of mixed Bantu. Estimates of local populations for 1910: Tabora, 500,000; Dar-es-Salaam, 195,500; Ujiji, 175,000; Tanga, 77,101; Bagamoyo, 77,500; Kilwa, 100,791; Lindi, 354,287; Pangani, 66,757. Arabs, Indians, Syrians, and Goanese number about 7,000. The European population in January, 1911, numbered 4,227 (3,113 Germans). Justice is administered in the Chief Judicial Court and in District and Native Courts. In the year 1910, 164 Europeans and 16,084 natives were convicted in the criminal courts. Of the natives, 11 were sentenced to death. The military and police force consists of about 320 Germans and 4,540 natives. In 1909 there were 11 Government schools, including 4 for handicrafts, with 14 European and 77 native teachers and 3,821 pupils. Five Protestant and three Catholic missionary societies have schools with 50,000 pupils. Near the forests of mangrove, coco-palm, baobab, tamarind, &c., in the higher regions the acacia, cotton-tree, sycamore, banian, and other trees. Government forests, 260,827 hectares. Near the coast there are German plantations of coco-palms, coffee (on the higher lands), vanilla, tobacco, caoutchouc, cacao, sugar, tea, cotton, cardamom, cinchona. Fibre plants are successfully cultivated. There are several Government experimental stations for tropical culture and cattle-rearing. In 1911 there were 1,489,178 head of cattle, 2,798,437 sheep and goats. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt; gold ore is extracted to the extent of 7,833 tons in 1911, valued at 943,645 marks (46,400*l.*). Agates, topaz, moonstones, tourmalin, and quartz crystals are found, and garnets in large quantities. The production of salt (36,530 cwts. in 1911) is the largest yet recorded. The chief seaports are Dar-es-Salaam, Bagamoyo, Saadani, Pangani, Kilwa, Lindi, Mikindani, and Tanga, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. Wide, well-kept roads (on many of which rest-houses and stores are provided) run all through the colony. The Usambara railway from Tanga to Muheza (218 miles) is open for traffic. Costs of service in the year 1910 on the Usambara railway were 616,900 marks, the receipts from all lines, 2,436,600 marks. The Central Railway from Dar-es-Salaam to Tabora (528 miles) was completed in February, 1912. Total length of line (1918), 743 miles. There are also Government coasting, river, and steamers. Dar-es-Salaam is in telegraphic communication with the towns, Zanzibar, many inland centres, and Ujiji, with the African trans-continental line, post offices and 29 telegraph stations. The revenue and expenditure for the year 1912 were put at 19,320,000 marks (including Imperial contribution of 3,618,600 marks). Imports, 1911, 45,891,642 marks; exports, 22,487,760 marks. Chief exports: rubber, 5,764,000 marks; copra, 1,909,000 marks; ivory, 703,000 marks; coffee, 572,000 marks; vegetable fibre (sisal), 3,011,000 marks; insect wax, 449,000 marks. Imports: cottons, rice, articles for consumption, hardware and iron. Trade is chiefly with Zanzibar and Germany. In 1910, 983 vessels of 2,000,000 entered various ports. There visited the ports also 87,420 tons.

Governor.—Dr. Schnee.

British Consul-General.—E. A. W. Clarke, 1909 (residing at Zanzibar).

Kiau-Chau

Kiau-Chau, on the east coast of the Chinese province of Shan tung, was seized by Germany in November, 1897, its town, harbour, and district were by treaty transferred to Germany on a 99 years' lease, March 6, 1898, and the district was declared a Protectorate of the German Empire, April 27, 1898. The administration was entrusted to the navy department, and a naval officer was governor.

Area, about 1,200 square miles, exclusive of the bay (about 200 square miles). There are 38 townships, and a population of about 165,000, white population with the garrison, 1910, 8,896 (Germans, 8,806). Surrounding district and bay is a neutral zone, whose outer limit is 10 miles from highwater mark. The area of the bay, its being about 2,500 square miles, and population about 1,200,000. There are numerous German schools for Chinese, mostly taught by missionaries. At Tsing Tan there is a school for European children with 140 and a higher class school with 145 pupils. For the year 1912 the amount required for administrative expenses was 14,640,000 marks (Imperial subvention, 8,298,000 marks). The garrison (2,391 men) consists of German marines, with a small force of Chinese soldiers. There are judicial officers for European residents, with an appeal to the German consular court at Shanghai, Chinese residents are subject to this jurisdiction only in specified cases. In the year 1909, 119 Europeans and 119 natives were convicted in the criminal courts.

The products are fruits, beans, ground-nuts, sweet potatoes, &c., and silk culture, coal mining, briquette making, brewing, soap making are carried on, and there is a prosperous silk factory. Over 1,000 Chinese are employed on the floating dock. At Kiau Chau in 1910 the imports amounted to 69,875,000 marks and the exports to 60,561,000 marks. The chief imports were cotton, cotton goods, and cotton yarn, metals, paper, sugar, and matches. The chief exports were straw braid, silk, ground nut and bean oil, and Shantung ponies. In 1910, 555 vessels of 832,245 tons entered Kiau-Chau, 6,014 junks entered, and 5,550 cleared. A railway, Tsing Tan to Poshan — 100 miles.

In the Pacific.

1. *Kaiser Wilhelm's Land* — Kaiser Wilhelm's Land, the northern section of south east New Guinea, was declared a German protectorate in 1884. Including Long Island, Dampier Island, and many small islands, it has an estimated area of 70,000 square miles, and a population of 591,000 natives, white population (1910) 578. There is a chief judicial court in Rabaul and district courts there and a Friedrich Wilhelmshafen. In the year 1910, 325 Europeans and 325 natives were convicted in the criminal courts. Three Protestant and two Catholic missionary societies are at work with schools in the territory and the Bismarck Archipelago, attendance about 7,500. The development of the Protectorate has been entrusted to the German New Guinea Company, but the administration was transferred to the Imperial Government on April 1, 1906. Area and products, palms, bamboos, ebony, and other woods abound. Cultivated area 20,520 hectares, chiefly under coco-palms, and casuarina. The natives barter copra, mother-of-pearl, and trepang. Horses, cattle, and goats flourish on the islands. Gold has recently been found in the Bismarck Archipelago. Imports of the whole colony except Samoa (1911) 8,014,881 marks, exports, 12,026,851 marks (mostly copra). In 1910, 111 merchant vessels of 695,200 tons entered the port of Friedrich Wilhelmshafen, the Bismarck Archipelago. The harbours are Friedrich Wilhelmshafen,

GERMAN EMPIRE

Berlinhafen and Konstantinshafen. The of Government is Herbertshöhe in the Bismarck Archipelago. and expenditure (for all the with the exception of the Samoan Islands), 1911, 2,760,000 marks, including 1,208,000 of Imperial subvention.

2. *Bismarck Archipelago*.—In November, 1884, a German Protectorate declared the New Britain Archipelago and several adjacent groups of islands, then renamed the Bismarck Archipelago. The chief islands Neu Pommern (formerly New Britain), Neu Mecklenburg (New Ireland), Neu Lauenburg (Duke of York Islands), and Neu Hanover, Admiralty, Anchorite, Commerson, Hermit, and other islands. Native population (1906) about 188,000; coloured non-native population was (mostly Chinese). White population (1909) 474 (364 German). Wesleyan and Catholic missions at work. In 1908, the total cultivated 13,464 hectares; chief products, copra, cotton, coffee, and rubber.

3. *Solomon Islands*.—Germany part of this group, including the islands of Bougainville and Buka, but Choiseul, Isabel Mahaga, and various smaller islands to the east of Bougainville transferred Great Britain November 14, 1899. Missionary societies at work; their schools have about 120 pupils. Sandal wood and tortoiseshell the chief commercial products. The German islands placed under the officials of Kaiser Wilhelm's Land.

4. *The Caroline, Pelew (or Palau), and Mariann (or Ladrone) Islands*.—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands), ceded to the United States in 1898, passed October 1, 1899, from Spanish to German possession for payment of 840,000*l*. For administrative purposes the islands divided into two groups: the Eastern Carolines, with Ponapé as the seat of Government; the Western Carolines, the Pelew Islands, and the Marianne Islands, with Yap administrative centre. They all form part of the German New Guinea Protectorate. White population (1910): 320 (Germans 194). The native population (1911) 55,000. Imports into and West Carolines and the Pelew and Marianne Islands (1910), 1,057,616 marks; exports, 1,664,553 marks (mostly copra).

The Carolines consist of about coral islets, Ponapé having about 2,000 inhabitants, Yap 7,155, and Kusaí 400. The population is mainly of Malay origin, with Chinese and Japanese. The chief export is copra. The Pelew (Palau) Islands, to the west of the Carolines, have (1904) 8,101 inhabitants; they about in number, mostly coral, many of them uninhabited; the largest is Babelthuap, which contains the bulk of the population. The German Marianne Islands, to the north of Pelew, have (1904), 2,646 inhabitants; their northern group is actively volcanic and uninhabited.

Islands.—The Marshall Islands, consisting of two chains rows of lagoon (several uninhabited), known respectively as (with islands) and Ralik (with eleven islands), have belonged to Germany since 1886. European population in 1910, 179 (91 German). Other population, estimated, 15,000. The administration taken Jaluit Company by German Colonial authorities on April 1, Since Marshall have formed a district (Bezirk) under the New-Guinea government. The chief and of the German Imperial Commissioner is Jaluit; populous island Majuro, 2,600 inhabitants. Protestant (American) Catholic are work. There are plantations of coco-palm (1,275 hectares). Imports in 1910, 1,296,958 marks;

exports, 2,877,831 marks. The chief export ■ phosphate (8,561,000 marks in 1910).

■ *Samoa Islands*.—Among German dependencies ■ included Savaii and Upolu, the largest of the Samoan ■ Navigator Islands. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights ■ the islands in favour of Germany ■ regards Savaii and Upolu, and in favour of the United States ■ regards Tutuila and other islands. Under the German Imperial Governor there ■ a native High Chief with a native council, the several districts being administered by chiefs. Justice ■ administered by native ■ well as European judges and magistrates.

Savaii has ■ of about ■ square miles, Upolu 340 square miles. Both islands ■ mountainous, fertile, and well watered. Several adjacent islets, exceedingly fertile and populous, ■ included in the German dependency. The port of Apia is in Upolu. There is a Government Council containing 8 unofficial members (3 of whom ■ British) chosen by the Governor from among the settlers. In Apia there is ■ central and also ■ district Court. 27 Europeans and 452 natives were convicted in these Courts (1910). The inhabitants of the islands ■ Polynesians, nominally Christian (Protestant, Catholic, and Mormon), but native superstitions ■ prevalent. Population 1910, 34,480, distributed ■ follows:—Upolu, Manono and Apolima, 20,662; Savaii, 12,816. There were in 1911 490 white inhabitants (294 German, ■ British); also 1,354 Chinese and 1,003 non-native inhabitants of mixed race. There is a German Government school with 201 pupils, and mission schools with over 8,000 pupils. There are 60 miles of good roads. The ■ and expenditure for 1911 ■ estimated at 950,000 marks. Trade is in the hands of German, British and American firms. Except in the 'Plantation District' Europeans may not lease land from natives, and cannot buy land from natives except formerly leased. The Governor's consent is required for sale ■ lease of land in the 'Plantation District,' about 7 sq. miles, and the purchase or lease of other lands must be with the Government. Natives cannot contract debts with Europeans. The staple product is copra. Rubber trees are being planted. Imports (1911): 4,066,238 marks; exports, 4,389,983 marks. The imports ■ chiefly haberdashery, kerosene, provisions, &c., mainly from Australia and New Zealand. The chief exports are copra and ■ beans. In 1911, 69 vessels of 115,103 tons (exclusive of coasters and ships of war) entered at the port of Apia (of these ■ with ■ tonnage of 112,516 ■ British), and 67 vessels with a tonnage of 114,085 cleared (62 of these with a tonnage of 112,516 ■ British). Regular steam communication with New Zealand. Wireless stations have been erected at Apia, in Samoa, and Nauru (or Pleasant Island, ■ of the Marshall Islands), respectively. Two other stations ■ planned—at Rabaul in New Guinea, and on Yap, one of the Caroline Islands.

The currency is in marks but English and American gold and silver coin are legal tender: 11. = 20.42 marks; 5 U.S. dollars = 20.95 marks.

British Acting Vice-consul at Apia.—T. Trood.

STATES OF [redacted]

Statistics of area, population, births, deaths, marriages, emigration, primary schools, universities, and railways [redacted] given collectively for all the German States under the head of *German Empire*.

ALSACE-LORRAINE.

(REICHSLAND ELASS LOTHRINGEN.)

Constitution—The fundamental laws under which the Reichsland, [redacted] Imperial Land, of Alsace-Lorraine is governed [redacted] voted June 9, 1871, June 20, 1872, June 25, 1873, July 4, 1879 and May 31, 1911. By the law of June 9, 1871, it is enacted, 'The provinces of Alsace and Lorraine, ceded by France [redacted] the peace preliminaries of February 26, 1871, under limits definitely fixed in the Treaty of Peace of May 10, 1871, shall be for [redacted] united with the German Empire.' The Constitution of the German Empire [redacted] introduced [redacted] Alsace-Lorraine on January 1, 1874. By the law of May 31, 1911, a Constitution was granted to Alsace Lorraine, by which it received 8 votes in the Federal Council. The Emperor exercises sovereign powers in the country, and [redacted] the head of the Government [redacted] Governor (*Statthalter*), appointed and recalled by the Emperor, who lives at Strassburg. Local laws [redacted] made by the Emperor with the [redacted] of the Diet, which [redacted] of two Chambers. The First Chamber [redacted] made up of five representatives of the religious communities (2 Catholic, 2 Protestants, 1 Jew), the President of the Supreme Court [redacted] Colmar, a representative of the University of Strassburg, four representatives of the [redacted] cities—Strassburg, Metz, Colmar and Mulhausen, a representative of the Chamber of Commerce [redacted] each of those towns, [redacted] representatives of the Agricultural Councils, two representatives elected by the Chamber of Craftsmen of Strassburg, and a number of [redacted] nominated by the Emperor—this number not to be greater than the rest of the members, and at present amounts to 18, all of whom hold office for 5 years. The Second Chamber, consisting of [redacted] members, [redacted] elected on general direct suffrage, by secret ballot, [redacted] a period of [redacted].

Statthalter.—Count v. Wedel, appointed October 18, 1877

Area and Population.—The [redacted] has an area of 14,522 square

3 x 2

kilometers or 5,605 English square miles. It is administratively divided into three *Bezirks*, or districts.

	Area, English square miles	Population		Pop. per sq. mile. 1910
			1905	
Oberelsass	1,354	517,865	512,079	
Unterelsass	1,648	700,938	686,696	379.2
Lothringen	2,403	655,211	616,790	272.6
Total	5,605	1,874,014	1,814,564	324.3

In 1910 the population speaking German numbered 1,634,260, French 204,262. The number of foreign subjects was 76,386. The garrison (1910) consisted of 82,276 men. In 1910, 63.2 per cent. resided in towns of 2,000 inhabitants and upwards; 46.8 per cent. in rural areas. Chief towns, Strassburg (178,891 inhabitants in 1910), the capital of Alsace-Lorraine; Mulhausen (95,041), in Oberelsass; and Metz (68,598), in Lothringen. Marriages, 1911, 13,071; births, 46,930; deaths, 34,081; surplus of births, 12,849. Of the births, 1,265 (2.70 per cent.) were still-born, and 3,181 (6.8 per cent.) were illegitimate.

Religion, Instruction, Justice, and Crime.—In 1910, there were 1,428,343 Catholics, 408,274 Protestants, 3,863 other Christians, 30,483 Jews. There is a university (at Strassburg, see *German Empire*), and in 1910 18 Gymnasias, 1 Progymnasias, 6 higher Realschulen, 11 Realschulen (4 united with gymnasias), 1 agricultural school, 1 technical school, 7 seminaries, 5 preparatory schools for teachers, 68 higher girls' schools, 2,852 elementary schools, 78 private elementary schools, 491 infant schools, 49 intermediate schools, 5 institutions for the deaf and dumb, 2 for the blind, 2 for idiots.

There is an Oberlandesgericht (Supreme Court) at Colmar, and six Landgerichte. In 1909, 13,421 persons were convicted of crime.

Finance.—Budget estimate for year ending March 31, 1912, 3,681,529 $\frac{1}{2}$, expenditure ordinary, 3,484,498 $\frac{1}{2}$; extraordinary, 197,031 $\frac{1}{2}$, total, 3,681,529 $\frac{1}{2}$. More than half the revenue from customs and indirect taxes, one of the largest branches of expenditure, is for public instruction. Debt of 3 per cent. rentes in circulation to the amount of 1,265,022 marks, equivalent, if capitalised, to a debt of 42,167,000 marks.

Production and Industry.—Area under principal crops and yield in 1911 (1 hectare = 2.47 acres; 1 metric ton = 2,204 lbs.):—

Crops	Hectares	Metric Tons	Crops	Hectares	Metric Tons
Wheat	137,423	208,399	Potatoes	93,154	670,890
Rye	53,502	83,992	Oats	116,407	175,855
Barley	48,635	93,886	Hay	189,805	808,681

Vineyards, 1911, 20,220 hectares, yield, 3,820 tons of dried tobacco; hops, 1911, 8,947 hectares, yield, 3,190 metric tons.

Cotton manufacture is important in Germany; woollens are produced on a smaller scale. Mineral products, 1911, 17,754,571 metric

tons of iron ore valued at 2,466,100*l.*; pig iron, 2,998,229 tons (8,810,650*l.*); cast iron products, 79,989 tons (685,100*l.*); sulphuric acid, 32,728 tons (51,500*l.*); coal, 3,023,436 tons (1,636,500*l.*); salt, 80,790 tons (80,700*l.*), besides gypsum and limestone.

ANHALT.

(HERZOGTHUM ANHALT.)

The reigning Duke is Friedrich, born August 19, 1856, son of the late Duke Friedrich of Anhalt and of Princess Antoinette of Saxe-Altenburg. Succeeded at the death of his father, January 24, 1904; married, July 2, 1889, to Princess Marie of Baden.

Brothers and Sisters of the Duke.—I. Princess Elisabeth, born September 7, 1877; married, April 17, 1877, to the Grand-Duke of Mecklenburg-Strelitz II Prince Edward, born April 18, 1861; married, February 6, 1895, to Princess Louise of Saxe-Altenburg, offspring, Princess Marie, born June 10, 1896. Prince Joachim Ernst, born January 11, 1901, Prince Eugen, born April 17, III Prince Aribert, born June 18, 1864; married, July 6, 1891, to Princess Louise of Schleswig Holstein, the marriage dissolved December 13, 1900. IV Princess Alexandra, born April 4, 1868, married, January 25, 1897, the Prince Suzo of Schwarzburg-Rudolstadt.

The entailed property belonging to the ducal family is the sole resource of the Duke. Part of it, called 'the select entail,' yielding about 600,000 marks, cannot be sold by the Duke without the approbation of the Diet. To the entailed property belong very large private estates in the State and in Prussia embracing an area of nearly 250 square miles.

The legislative power is vested in a Diet of 36 members, two appointed by the Duke, eight representatives of landowners who pay the highest taxes, two of the highest taxed inhabitants belonging to the mercantile and industrial classes, fourteen of the other inhabitants of towns, and ten of the rural districts, the representatives being chosen for 6 years by indirect vote. The executive power is entirely in the hands of the Duke, who governs through a Minister of State.

Population, 1910, 331,128. The capital, Dessau, 56,605 inhabitants; Bernburg, 33,724; Cothen, 23,416; Zerbst, 19,210; Rossau, 11,354. Population mostly Protestant (1910), 12,755 Catholics, 1,383 Jews.

Income and expenditure, 1912-13, 1,613,791*l.* Public debt, June 30, 1911, 276,478*l.*; property, June, 1911, 1,352,847*l.*

British Minister Plenipotentiary.—Sir W. E. Goschen, G.C.V.O., K.C.M.G.

Consul-General.—H. Boyle.

BADEN.

(GROSSHERZOGTHUM BADEN.)

Reigning Grand-duke.—Friedrich II., born July 9, 1857, son of the Grand-duke Friedrich I. and of the Grand-duchess Luise, Princess of Prussia; succeeded to the throne on death of his father, September 28, 1891; married, September 20, 1885, to Hilda, daughter of Grand-duke of Luxemburg, Duke of Nassau.

Sister of the Grand-duke.

Victoria, born August 7, 1862; married, September 20, 1881, to Crown Prince Gustaf, King Gustaf V. of Sweden.

Till 1771, Baden a Margraviate divided into two lines; it then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-duke in 1806.

The Grand-duke has a civil list of 79,499*l.* (exclusive of the appanages of the other members of the Grand-duke's family).

Constitution.—The Constitution of Baden vests the executive power in the Grand-duke, the legislative authority is shared by him with a representative assembly (Landtag), composed of two Chambers. The Upper Chamber comprises the princes of the reigning family who are of age; the heads of the mediatised families; the Roman Catholic Archbishop; the prelate of the Protestant Church; elected for years eight members by the territorial nobility; one representative for each of the two Universities and one for the Technical High School; three of the Chambers of Commerce, two of the Chamber of Agriculture, one of the Chambers of Trades; two Oberbürgermeister of the towns subject to the municipal law, and Bürgermeister of of the other towns (of more than 3,000 inhabitants); one member of of the District Councils; and (at the most) eight members appointed for years by the Grand-duke, two being high legal functionaries appointed during their term of office. The Second Chamber is composed of 73 representatives, of whom are elected by towns, and by rural districts for years. Every citizen 25 years of age, not convicted of crime, nor receiving parish relief, has a vote. Citizens 30 years of age are eligible. The Chambers must be called together at least every two years. Members of the First Chamber whose are not hereditary, are paid 1,500 marks (75*l.*), of the Second Chamber 3,000 marks (150*l.*), living at Karlsruhe 1,000 and 2,000 marks (50*l.* or 100*l.*) for the session, with deduction of marks for each day's absence; they travel free of charge. Railways during session.

Election, October, 1909: Centre Party, 17 National Liberals, 20 Socialists, 2 Conservatives, 7 Democrats, 1 Peasants' League.

The executive is composed of four departments—the Ministers of Interior, of the Grand-ducal House, Justice and Foreign Affairs, of Finance, and of Ecclesiastical and Instruction.

For general administrative purposes there are 'Amtbezirke,' superintended by general commissioners (Landes-Kommissare). For local government there are 11 circles (Kreise), and 1,595 (Gemeinden), communal cities, and 1,475 parishes.

Population:—

District	Area : Square miles	Population		Pop. per square mile 1910
		1910		
Konstanz . . .	1,610	325,924	311,318	
Freiburg . . .	1,830	564,580	548,805	
Karlsruhe . . .		610,784	587,397	615.1
Mannheim . . .	1,386	641,545	588,708	
Total . . .	5,819	2,142,833	2,010,728	

Including a part of the Lake of Constance, is 5,689 square miles.

Principal towns, 1910:—

Mannheim . . .	193,902	Konstanz . . .	27,591	Lahr . . .	15,191
Karlsruhe . . .	134,313	Baden . . .	22,066	Lorrach . . .	14,756
Freiburg . . .	83,324	Offenburg . . .	16,848	Weinheim . . .	14,170
Pforzheim . . .	69,082	Bruchsal . . .	15,391	Durlach . . .	13,896
Heidelberg . . .	56,016	Rastatt . . .	15,196	Villingen . . .	10,924

Marriages, 1911, 15,339; births, 61,345; deaths, 38,014; of births, 28,381. Included in the births were 1,696, or 2.58 per cent., still-born, and 4,998, or 8.08 per cent., illegitimate children.

Religion and Instruction.—In 1911 there were 1,276,836 Catholics, 826,864 Protestants, 5,408 other Christian sects, 25,896 Jews, and 6,329 others.

The Grand duke is Protestant, and head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside the Grand Duchy. State contributions to the Roman Catholic Church, 1912, 25,392*l*. (besides 5,120*l*. donation of the archbishopric); to the Protestant Church 23,611*l*. To a certain number of 'Old Catholic' parishes, the State contributes yearly 2,118*l*. The Jews have 15 rabbinate, and receive (1912) 1,122*l*.

Instruction is general and compulsory. The elementary schools are maintained by the municipalities and by the State, and administered by local authorities under the inspection of Government. Public schools in Baden:—

		Teaching Staff	Students & Pupils
Universities (summer session 1912)	1	333	6,227
Academy (winter 1911-12)	1	92	1,376
Academy of Arts (1911-12)	1	16	
Handels-Hochschule (winter session, 1911-12)	1	31	
Gymnasias (1910-11)	17	404	5,159
Realgymnasias, Realprogymnasias, Oberrealschulen, Realschulen, and Bürgerschulen (1910-11)	49		13,248
Higher Schools (1910-11)	10		5,613
Elementary (1908-09)	1,717	7,060	
Schools (1910-11)	12		
Technical, Agricultural, and other special schools (1910-11)	250	1,042	32,316

Besides a great number of private schools, elementary schools, and special schools.

In 1910, 16,681 were convicted.

Finance.—The Budget is voted for a period of two years. Estimates for 1912:—

Ratisbon (Regensburg)	53,624	Ingolstadt	23,745
Bamberg	43,063	Speyer	23,045

The populations of the two largest towns, Munich and Nuremberg, were calculated at the end of 1911 to be approximately 590,616 and 334,000 respectively.

Religion.—Religious division of the population, December 1, 1910.—

Provinces	Roman Catholics	Protestants	Jews
Upper Bavaria	1,395,047	114,494	11,652
Lower Bavaria	716,435	7,087	—
Palatinate (Rheinpfalz)	414,955	506,651	8,998
Upper Palatinate	549,960	48,404	1,395
Upper Franconia	282,999	374,967	2,946
Middle Franconia	251,458	659,502	14,219
Lower Franconia	571,827	126,128	11,925
Swabia	679,552	106,202	3,462
Total	4,862,233	1,942,386	55,065

Beales above there are included in other Christian sects 5,516 Catholics, 3,017 Mennonites, 104 Anglicans, 1611 Greek Catholics and Russian Orthodox, 1,180 Irvingites, Anabaptists, 1,533 Methodists, 5,841 Free Christians, 1,649 other Christians, 1,870 of religion not Christian, 4,240 of religion not stated, without religion. 408 of religion ascertainable.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 1 suffragan bishoprics; 215 deaneries; and 3,693 parishes. The Protestant Church is under a General Consistory—'Ober-Conseistorium'—and three provincial consistories, 41 deaneries, and 1,044 parishes. Of the three universities of the kingdom, two, at Munich and Würzburg, Roman Catholic, and one, at Erlangen, Protestant.

Instruction.—(For Universities, see under *Germany*.) Education compulsory from six to sixteen. In 1910-11 there were 7,600 elementary schools (public and private), with 18,352 teachers (13,521 male, 4,831 female), and 1,046,806 pupils. The year's expenditure on the public schools (7,566) 3,099,455. There 333 agricultural schools, with 6,841 pupils, besides 411 winter schools, with 1,820 pupils.

Justice, Crime, and Pauperism.—Bavaria is the only German State with *Oberstes Landesgericht*, appeal-court intervening between the *Oberlandesgerichte* and the *Reichsgericht*; it has a bench of 22 judges. Under it *Oberlandesgerichte*, 28 *Landgerichte* and 288 *Amtsgerichte*. The number of judges was (1911) 1,388. In 1910, 65,021 criminals were convicted.

In 1909, poor receiving relief 235,269 (123,663 permanent paupers), the sum expended of the ordinary budget, 690,505.

Finance.—The Bavarian budget is voted for a period of two years. The estimates of the ordinary budget for each of the years 1910 and 1911 balanced at 81,807,480. For 1912 and 1913 the estimates were .—

Revenue	Branches of Expenditure
3,155,000	Public debt 347,427
Stamps, dues, &c 1,704,655	Civil list and 370,123
Indirect taxes 3,499,798	85,255
State railways, posts, tele- 423,946	Foreign Affairs 29,450
graphs, mines, &c 244,511	Communications 3,898
State domains 3,878,296	Justice 1,882,881
Various 879,505	Interior 2,020,674
Imperial repayments	Finance 740,510
	Worship and Education 3,512,550
	Pensions and allowances 1,068,050
	Contributions to Imperial expenditure 2,417,400
	Administration 22,272,603
	Reserve fund 28,895
Total gross revenue 33,610,706	Total expenditure 33,610,706

BAVARIA

Since January 1, 1912, the direct income tax, trade tax, house-tax and land tax. The estimates of the extraordinary budget for each of the years 1912 and 1913 balanced at \$1,201,631.

Debt, December 31, 1910, 118,887,902, 94,302,194, being railway debt. Gross receipts from the State railways (estimates for 1912 and 1913), 15,416,640, net receipts, 1,500.

Army.—The Bavarian army, though forming an integral part of the German army, is in time of peace under the command of the King of Bavaria, and has its own administration. The military supplies, though voted by the Bavarian Parliament, must bear a fixed proportion to the amount voted for the rest of Germany by the Reichstag. The Bavarian troops form the 1st, 2nd, and 3rd Bavarian army corps, not numbered consecutively with the other German army corps, and there are certain differences in the matter of uniform permitted to the Bavarian troops. The administration of the fortresses in Bavaria is also in the hands of the Bavarian Government during peace.

The peace strength of the Bavarian army is between 72,000 and 78,000.

Production and Industry.—Of the total area, nearly half is under cultivation, one sixth under grass, and one third under forests.

The area under the chief crops and the yield in 1911, were as follows:—

	Area acres	Metric Tons		Area acres	Metric Tons
Wheat	717,652	431,347	Oats	1,260,507	741,151
Rye	1,376,387	764,862	Potatoes	924,370	2,510,811
Summer barley	923,700	671,269	Hay	3,193,180	4,628,075

Vines, 51,426 acres, yielding 15,697,242 gallons, 43,437 acres under hops yielded 4,800 metric tons.

In 1911 the output of coal was 2,311,637 metric tons, iron ore, 375,409 tons, pig iron, 165,684 tons, cast iron ware, 171,977 tons, sulphuric acid, 170,039 tons.

The quantity of beer brewed in 1911 was 132,116,080 gallons. In 1910 11, the distilleries produced 3,579,796 gallons of alcohol.

Strikes and lockouts in 1910 and 1911:—

	Number	Workmen affected	Results		
			Entirely successful	Partially successful	Unsuccessful
Strikes (1910)	260	—	61	131	68
(1911)	265	484	66	106	—
Lockouts (1910)	76	19,712	7	57	12
(1911)	18	5,335	5	8	5

Minister Resident.—Sir V. Corbett, K. C. V. O.

British Consuls.—Ludwig Buchmann (Munich), S. Eichenbacher (Nuremberg).

British Vice Consul.—Arthur Abbott (Munich).

BREMEN.

(FREIE HANSESTADT BREMEN.)

The [] and Free City of Bremen form a republic, governed, under a Constitution proclaimed March 5, 1849, and subsequently revised by a Senate of sixteen members, chosen for life, forming the executive, and the 'Bürgerschaft' (or Convent of Burgesses) of 150 members, invested with the power of legislation. The Convent is elected for six years by the votes of all the citizens, divided into classes. University [] return 14 members; the merchants [] members; the mechanics and manufacturers [] members, and the other inhabitants who have taken the burgher oath [] rest. The Convent and Senate elect the sixteen members of the Senate, ten of whom at [] must be lawyers, and three merchants. Two burgomasters, elected for four years, direct the affairs of the Senate, through a Ministry divided into twelve departments—namely, Foreign Affairs, Church and Education, Justice, Finance, Police, Medical and Sanitary Administration, Military Affairs, Commerce and Shipping, Ports and Railways, Public Works, Industry, and Poor Laws. All the ministers are senators.

Area, 99 square miles; population census (1910), 295,715. (1911), 305,724.

On Dec. 1, 1910, Bremen contained 257,930 Protestants (87.2 per cent.), 21,074 Roman Catholics (7.1 per cent.), 1,217 other Christians, 1,251 Jews; others 14,243. Marriages in 1911, 2,609; births, 7,932; deaths, 4,870; [] of births, 3,262; still-births, 220; illegitimate births, 804.

Bremen contains two *Amtegerichte* and a *Landgericht*, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

In 1911-12 the [] 2,498,776*l.*, and expenditure 3,027,468*l.* Thirty-six per cent. of the [] is raised from direct taxes, [] per cent. of which is income-tax. The chief expenditure is for interest and reduction of the public debt. Debt, 1912, 15,080,305*l.*, the whole incurred for the promotion of [] and navigation, and for public works.

Next to Hamburg, Bremen is the largest port for the international trade of Germany. Seventy-six per cent. of the [] was, in 1911, under the German, and about 9 per cent. under the British flag. Aggregate value of imports, 1911, 106,336,480*l.*, of which 3,810,320*l.* [] from Great Britain; exports, 102,390,690*l.*, of which 7,548,570*l.* went [] Great Britain.

For shipping entered and cleared, [] under 'German Empire.' [] vessels belonging [] Bremen December 31, 1911, 713 of 898,767 tons net register, including [] steamers of 754,258 tons. Bremen [] several important shipping companies, the chief of which [] the 'Norddeutscher Lloyd' with, [] December 31, 1911, 253 sea-going ships of 718,549 gross register tons, [] of which [] Transatlantic steamers of 603,558 []; [] Indo-Chinese coast-steamers of 71,725 tons and [] training-ships of 6,833 tons; the 'Hansa' Company, with [] ships [] 297,072 tons; the 'Neptun' Company [] [] of 51,683 tons; the 'Argo' Company with [] ships of 48,088 tons; the 'Roland Line' with 11 steamers of 54,480 tons; the 'Hamburg-Bremer Afrika Line' with 14 [] of [] []; and the Rickmers Reismuhlen, [] Schiffbau, [] (1911), with 20 [] of 74,142 [].

at Bremen.—Christian Meale. There is a Vice-Consul
Bremerhaven.

BRUNSWICK

(HERZOGTHUM BRAUNSCHWEIG.)

The last Duke of Brunswick was [REDACTED] I., born April 25, 1806, the second [REDACTED] of Duke Friedrich Wilhelm and of Princess Marie of Baden; ascended the throne April 25, 1831, and died October 18, 1884.

The heir to Brunswick is the Duke of Cumberland, excluded owing to the refusal to give up claim to the throne of Hanover. On the death of the late Regent, Prince Albert of Prussia, September 13, 1906, it was proposed that, the Duke of Cumberland having for himself and his eldest son renounced the right to succeed, the second son should be called to the throne. On February 28, 1907, the Brunswick Diet adopted the proposals of the Constitutional Commission which were unfavourable to the proposed compromise. On May 28, 1907, Johann Albrecht, Duke of Mecklenburg, was elected regent. He accepted the regency on June 5, 1907. Married December 12, 1909, Princess of Stolberg-Rossla.

The Brunswick regency law of February 16, 1879, that in case the legitimate heir Brunswick throne be absent prevented from assuming government, a Council of Regency, consisting of Ministers and the Presidents of the Landtag and of the Supreme Court, should carry on government; while German Emperor should assume command of the military forces in the Duchy. rightful heir, after the space of a year, unable to throne, the Brunswick Landtag shall elect regent from reigning members German reigning families.

legislative power is vested in one Chamber, consisting of forty-eight members. These are elected for years by the of towns, fifteen by those of rural districts, two by the Protestant clergy, four by the landlords, three by the industrial classes, four by the scientific professions, by those who are highest . The every two years. The executive is represented by a responsible Ministry of

State, consisting ■ present of three departments, namely—of State, Foreign Affairs and Finance, of Justice and Ecclesiastical Affairs, ■ of the Interior

Area, 1,418 square miles, population (1910), 494,839 There ■ only 25,888 Catholics ■ 1910 Marriages, 1911, 4,123, births, 12,281, deaths, 8,426, excess of births, 3,805, still-births, 415, illegitimate births, 1,407.

The capital, Brunswick (Braunschweig), had 143,552 inhabitants, 1910

The budget is voted by the Chamber for the period of two years, but each year separately It ■ ■ two parts, the first, Staatshaushalts Etat, ■ prehends the particular expenditure of the State, the other, Kloster und Studienfonds-Etat, principally the expenditure for schools, arts and ■ F ■ the year from April 1, 1912, to April 1, 1913, the budget of the Staatshaushalt ■ fixed ■ 788,220/ revenue and 748,075/ expenditure The revenue and expenditure of the Kloster und Studienfonds Etat ■ put ■ 219,820/ Not included ■ the budget estimates ■ the civil list of the Duke—56,266/ The public debt of the Duchy, exclusive of ■ premium-loan repayable by 60,990/ yearly till 1924, on August 31, 1912, ■ 1,481,093/, three-fifths of which ■ contracted for railways The property of the State ■ chiefly of domains and forests and of active funds amounting to about 1,882,200/ ■ 1912, besides an annuity of 181,250/ till 1932, stipulated at the sale of the railways of the State

British Minister Plenipotentiary—Right Hon Su W E Goulton, G.C.V.O., K.C.M.G.

Khamm (A.) Die Verfassungsgesetze des Herzogthums Braunschweig Braunschweig, 1900

(FREIE UND HANSE-STADT HAMBURG.)

Constitution.—The State and Free City of Hamburg is a republic The present Constitution came into force on January 1, 1861, revised 1879 and ■ The Government ■ entrusted, in common, to two Chambers of Representatives, the Senate and the Bürgerschaft, ■ House of Burgesses. The Senate, which exercises chiefly, but not entirely, the executive power, ■ posed of eighteen members, ■ half of whom must have studied law ■ finance, while seven out of the remainder must be merchants The members of the ■ are elected for life by the House of Burgesses, but a senator may retire ■ ■ end of six years A first and ■ burgomaster, chosen annually by ballot, preside ■ the Senate No burgomaster ■ ■ in ■ longer than two years; and ■ member of the ■ may hold any other public office. ■ House of Burgesses consists of 160 ■ ■ 80 of whom are elected by ballot by all tax-paying citizens ■ ■ remainder, ■ ■ chosen, by ballot, by the ■ of house-property, while the other ■ are chosen, by ballot, by burgesses who are or have been members of the Senate ■ of ■ House of Burgesses or members of ■ guilds, corporations, and ■ ■ justice. All ■ members of ■ House of B ■ are chosen for six years, in such a manner that every ■ years ■ elections ■ place for

one half the number. The House of Burgesses has in permanence a Committee of the House, consisting of ■ deputies, of whom no ■ than five may be members of the legal profession. The Committee watches the proceedings of the Senate and the general execution of the articles of the Constitution. In all matters of legislation, except taxation, the Senate has a veto, and, in case of a constitutional conflict, ■ is ■ to an assembly of arbitrators, chosen in equal parts from the Senate and the House of Burgesses, also to the Supreme Court of Judicature of the Empire (Reichsgericht) ■ Leipzig.

The jurisdiction of the Free Port was, on January 1, 1882, restricted to the city and port, and ■ October 15, 1888, the whole of the city, except the actual port and the warehouses connected with it (population 1,729 ■ 1910), ■ incorporated ■ the Zollverein. This involved ■ expenditure of six millions sterling, to which the Imperial Government contributes two millions.

Area and Population.—Area 160 English square miles, population on December 1, 1880, of 453,869. December 1, 1910, 1,014,664. The State consists of two divisions, the population of each of which was as follows on November 1, 1911.—City of Hamburg, 953,079. Landgebiet (4 Landherrenschaften), 85,860. There were on December 1, 1910 28,675 foreigners—9,920 Austrians, 2,481 Swedish and Norwegians, 3,775 Danes, 2,277 British, 7,921 other Europeans, 1,775 non Europeans, and 526 unclassified.

Immigration via Hamburg for five years.—

Year	From Hamburg itself	Other German	Foreigners	Total	Bound for the United States	For other Destinations
1907	761	8,489	146,732	155,982	147,235	8,747
1908	729	■ 071	41,995	48,595	37,442	11,153
1909	502	5,851	107,182	113,535	98,322	15,213
1910	639	6,957	110,635	118,131	103,077	15,054
1911	612	5,895	80,388	86,895	67,528	19,367

Marriages (1911), 9,007, births, 23,414 (800, or 3.42 per cent, still born, 3,188, ■ 13.62 per cent, illegitimate), deaths, 15,040, surplus of births, 7,574.

Religion, Instruction, and Justice.—On December 1, 1910, 980,671 Protestants (91.66 per cent), 51,086 Roman Catholics (5.19 per cent), 8,942 other Christians (0.99 per cent), 19,472 Jews (1.94 per cent), and 10,143 'all other' (1.03 per cent).

In the year ending March, 1912, Hamburg (State) had 244 public elementary schools with 3,856 teachers (2,334 male, 1,522 female), and 120,740 pupils, cost for the year, 15,343,896 marks, of which 13,151,754 marks ■ provided by the State, 19 higher State schools with 11,662 pupils and 77 private schools with 19,770 pupils.

The State contains three Amtsgerichte, ■ Landgericht, and the "Hanseatische Oberlandesgericht," or court of appeal for the Hanse Towns and the Principality of Lubeck (Oldenburg). In 1910, 9,314, and 1911, 9,072 persons, ■ the State of Hamburg, were convicted of crime.

Finance.—For 1912 the ordinary revenue ■ estimated ■ 10,198,875*l*, and expenditure 10,198,875*l*. Direct taxes amount to nearly half of the whole revenue, and ■ to that the proceeds of domains, quays, railways, &c. Expenditure for the debt, 1,716,556*l* in 1912 for education, 1,153,112*l*. The Income Tax amounts to 2*l* ■ per head of population.

Public debt, January 1, 1912, 769,451,838 marks (38,472,591*l.*), incurred chiefly public

HESSE.

(GROSSHERZOGTHUM HESSEN.)

Reigning Grand-Duke.—Ernst Ludwig, born November 25, 1868; the son of Grand-duke Ludwig IV. and of Princess Alice of Great Britain and Ireland; succeeded at the death of his father, March 13, 1892. Married, first, April 19, 1894, to Princess Victoria, born November 25, 1876, the daughter of Duke Alfred of Saxe-Coburg and Gotha. The marriage dissolved December 21, 1901. Married, secondly, February 2, 1905, to Princess Elenore of Solms-Hohensolms-Lich, born September 17, 1871; offspring: Georg, born November 8, 1906. Ludwig, born November 20, 1895.

Sisters of Grand-duke.—Victoria, born April 5, 1863; married Prince Ludwig of Battenberg, April 30, 1881. II. Elisabeth, born November 1, 1864; married the Grand-duke Sergius Alexandrovitch of Russia, June 15, 1884; widow February 17, 1905. Irene, born July 11, 1866; married Prince Heinrich of Prussia, May 24, 1891. IV. Alice, born June 6, 1873; married (as Feodorovna) to Nicholas II. Emperor of Russia, November 26, 1894.

Prince Alexander, uncle of the late Grand-duke Ludwig IV. (died Dec. 15, 1888), and Julia von Battenberg, born Nov. 12, 1826 (died Sept. 18, 1895), are:—1. Marie, born July 15, 1857; married April 1871, to Prince Erbach-Schönberg; widow Jan. 30, 1908. 2. Ludwig, born May 24, 1854, commander in the navy; married to Princess Victoria of Hesse, April 30, 1884; offspring, Alice, born February 23, 1886; married to Prince Andrew of Greece, October 7, 1903; Louise, born July 12, 1887; George, born Nov. 9, 1892; Ludwig, born June 25, 1900. 3. Franz Josef, born September 24, 1891; married Princess Anna of Montenegro, May 6, 1895.

¹ Alexander, Prince of Bulgaria, 1879-86, afterwards Count Hatzefan, died Nov. 1898, married to Princess Beatrice of Britain, January 20, 1892.

former Landgraves of Hesse had the title of Grand-duke given them by Napoleon I. in 1806, together with a considerable increase of territory. At the Congress of Vienna the grant was confirmed, after some negotiations. The reigning family are possessed of much private property, but dependent almost entirely upon the grant of a civil list, amounting to 1,265,000 marks.

Constitution.—The Constitution bears date December 17, 1820; but was modified in 1856, 1862, 1872, and 1911. The legislative power is vested in two Chambers, the first composed of the princes of the reigning family, the heads of a number of mediatised houses, the Roman Catholic bishop, the chief Protestant superintendent, a representative of the University, of the Technische Hochschule, two members elected by the noble landowners, and twelve life-members, nominated by the Grand-duke, as well as a representative of commerce, agriculture and industry respectively; while the second consists of fifteen deputies of the towns that have a special franchise, and forty-three representatives of the smaller towns and rural districts. Electors are Hessians above twenty-five years of age who pay direct taxes. Elections are direct and the voting is by ballot. The members of the Second Chamber are elected for six years, one-half of the number retiring every three years. The Chambers must meet every year. Members not hereditary of both Chambers who reside more than 1½ mile from the place of meeting, receive an allowance of 9s. a day and 3s. for each night, and travelling expenses.

The executive is represented by a ministry of State, divided into three departments, namely, of the Interior; of Justice; and of Finance. The minister of state is also minister of the Grand-ducal House and Foreign Affairs, and head of the department of Justice.

For administrative purposes, the Grand-duchy is divided into three provinces, eighteen circles (Kreise), and numerous communes (Gemeinden).

Area and Population.

Provinces	Sq. Miles	Population			Pop. per sq. mile, 1910
		1900	1906	1910	
Starkenburg	1,169	489,604	642,096	590,380	505.0
Upper Hesse (Oberhessen)	1,269	282,047	306,755	309,283	243.7
Lower Hesse (Rhein Hessen)	530	343,334	349,424	332,438	721.6
Total	2,968	1,114,979	1,300,176	1,232,051	489.0

There were 639,198 males and 642,853 females in 1910. Increase from 1906 to 1910 at the rate of 1.20 per cent. per annum.

The largest towns are Mayence or Mainz (including Mombach and Kastel), with 110,634; Darmstadt, the capital, 87,089 (including Bessungen); Offenbach (including Burgel), 75,583; Worms, 46,819 (including Hochheim, Neuhausen und Pfälzheim), Giessen, 31,153 inhabitants, 1910.

Religion and Instruction.—At the end of 1910 there were 848,004 Protestants, 397,549 Catholics, 6,707 of other Christian sects, 24,068 Jews, and 5,728 unclassified, or of no religion. The Grand-duke is head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a consistory (Oberkonsistorium). The Roman Catholic Church has a Bishop (at Mainz). The contribution to the Protestant

Church in 1912 was 310,000 marks (15,500*l*) to the Catholic Church, 171,372 marks (8,586*l*)

Instruction ■ **compulsory** The elementary schools ■ maintained by the communes, but with contributions by the State. There are 986 public elementary schools with (1912) 3,417 masters, ■ mistresses, and 213,623 pupils. Continuation schools (Fortbildungsschulen), winter, 1911-12, 27,344 pupils. Hesse has 11 gymnasia, 2 progymnasias, ■ realgymnasias, ■ oberrealschulen, ■ realschulen, 1 Agricultural College (Landwirtschaftsschule), and 32 incomplete realschulen (höhere Burgerschulen), with (1911) 709 teachers, and a total attendance of 12,737, 6 higher girls' schools with (1912) 3,391 pupils, and 46 private schools with (1912) 3,645 pupils. The University at Gießen had 1,350 matriculated students, and ■ Technical High School at Darmstadt, with 1,394 students in 1912. There are many industrial, technical, agricultural and other special institutes.

In 1910 there were 9,115 persons convicted of criminal offences in the Grand Duchy.

Finance —The ordinary ■■■■ and expenditure ■■■■ estimated for the year 1912 to balance at 4,009,962*l*.

Direct taxes are income tax and property tax (only to be considered as ■ supplementary tax). The direct taxes paid to the communes are an income tax, land tax, trade tax, and rent tax, the indirect taxes are chiefly a stamp tax, dog tax, duties on successions, &c. Public debt 21,796,596*l*, 1912, nearly all railway debt.

Production and Industry —Of the area, 63.4 per cent is under cultivation, 31.5 per cent forests, 5.1 per cent uncultivated (houses, roads, water, &c.). Arable land occupies 916,909 acres, meadows and pastures, 249,964, vineyards 16,865, and forests, 546,801 acres, of the latter 180,169 belong to the State, 222,751 to the communes, 7,991 to other bodies, and 191,674 to private persons.

Areas and yield of chief crops, 1911 (1 hectare = 2.47 acres, 1 metric ton = 2,204 lbs.) —

Crops 1910	Area	Yield	Crops	Area	Yield
	Acres	Tons		Acres	Tons
Rye	175,479	143,709	Potatoes	169,635	639,248
Wheat	77,212	■ 268	Oats	143,621	124,547
Summer hay	125,425	118,406	Hay	231,602	388,125

31,861 acres under vines, yielding 8,527,750 gallons of ■■■■ to the value of 1,178,773*l*.

Domestic animals, December 2, ■■■■ —Horses, 61,951, cattle, 332,489, sheep 64,648, swine, 384,815, goats, 131,960.

Minerals ■ the value of 193,769*l*, and salt of 31,035*l* were raised in 1910. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and carriages, machinery, musical instruments, tobacco and cigars, sparkling ■■■■.

LIPPE.

(FÜRSTENTUM LIPPE.)

Reigning Prince, **Leopold IV.**, born May 30, 1871, **of the late** Count Ernst of Lippe Biesterfeld, and **Carola**, Countess of Wartensleben; married August 16, 1901, to Princess Bertha of Hessen-Philippsthal-Barchfeld; offspring: Ernst, born June 12, 1902; Leopold Bernhard, born May 19, 1904; Karoline, born August 4, 1905. Count Leopold assumed the Regency **succession to his father**, September 27, 1904, but the right of succession was claimed by Prince Georg of Schaumburg-Lippe, and the dispute was settled by **judicial court at Leipzig** on October 25, 1905.

The succession fell to the Lippe-Biesterfeld branch of the house of Lippe **the death of Prince Karl Alexander**, January 13, 1905. For the expenses of the court, &c., **allotted the** arising from the Domainium (farms, forests, &c.), which, according to the covenant of June 24, 1868, **indivisible and inalienable entail estate of the Prince's house**, the usufruct and administration of which belong to the reigning Prince. By the law of March 24, 1898, the Regent draws all the revenues from the domainium, and therefrom makes annual payments to the Landkasse.

A charter of rights **granted to Lippe by decree of July 6, 1836**, partly replaced by the electoral law of June 3, 1876, according to which the Diet is composed of twenty-one members, who are elected in three divisions determined by the scale of the rates. The discussions **public**. To the Chamber belongs the right of taking part in legislation **and the levying of taxes**; otherwise its functions **consultative**. A minister presides **the government**.

Except 5,925 Catholics and 780 Jews (1910), the people **Protestants**. Marriages, 1911, 1,261; births, 4,383; deaths, 2,400; stillborn, 146; illegitimate, 196. The Capital, Detmold, has 14,295 inhabitants (1910). Area **square miles**; population 1910, 150,937.

For 1912-1913 the **was estimated** **122,492/.**, **expenditure** at 125,613/. Public debt in 1912, 63,919/.

Consul-General.—W. E. **(Hamburg)**.

REFERENCE.—Amtsblatt für **Fürstentum Lippe**.

LÜBECK.

(FRANZ ■■■ HANSE-STADT LÜBECK.)

The free city and State of Lubeck form a Republic, governed according to a Constitution proclaimed December 30, 1811; since revised up to July 17, 1907. There ■■■ two representative bodies—the Senate, exercising the executive, and the *Bürgerschaft*, or House of ■■■ Burgesses, exercising, together with the Senate, the legislative authority. The Senate ■■■ composed of fourteen members, elected for life, and presided over by ■■■ burgomaster, who holds office for two years. There ■■■ 120 members in the ■■■ of Burgesses, chosen by all citizens of the town. A committee of thirty burgesses, presided ■■■ by a chairman elected for ■■■ year, has the duty of representing the legislative assembly in the intervals of the ordinary sessions, ■■■ of carrying on all active business. The government is in the hands of the Senate, but ■■■ House of Burgesses has the right of initiative in all ■■■ relative ■■■ the public expenditure, foreign treaties, and general legislation. To the passing of every ■■■ law the sanction of the Senate and the House of Burgesses is required.

The city of Lubeck had (1910) 116,599 inhabitants. Marriages in the State (1911) 868; births, 2,769; deaths, 1,825; excess of births, 944; there ■■■ illegitimate births, and 65 stillbirths.

On December 1, 1910, Protestants numbered 111,543, Roman Catholics 3,802, other Christians 276, Jews 623, and 'unclassified' 189. Education ■■■ compulsory between the ages of 6 and 14. There ■■■ (1912) ■■■ elementary schools (9 for boys, ■■■ for girls, 10 for either sex), with 11,209 pupils; for boys 1 gymnasium (650 pupils), 1 real gymnasium (612 pupils), 1 real school (586 pupils), 1 private higher school (483 pupils), and ■■■ public middle schools (1,846 pupils); for girls there ■■■ 1 public high school (568 pupils), 2 private high schools, 1 private middle school (708 pupils) and 2 public middle schools (1,865 pupils). There are also ■■■ public technical school for apprentices, 1 architectural school, 1 naval school, 1 school for engineers of steamers, 1 public and 1 private commercial school, and 1 private technical school for women. Lubeck contains ■■■ *Amtgericht* and a *Landgericht*, whence the appeal lies to the '*Hanseatisches Oberlandesgericht*' at Hamburg. In 1907 801; 1908, 1,006; in 1909, ■■■ and 1910, ■■■ criminals ■■■ convicted.* In 1910, 3,097 persons received poor-relief from the City '*Armen-Anstalt*,' which spent, in 1910, 301,245 marks (15,062*l.*).

Estimated ■■■ and expenditure for 1912, 16,891,800 marks (844, ■■■). About one-third of the ■■■ is derived from public domains, chiefly ■■■ and industrial establishments; and ■■■ one-third from direct taxation. ■■■ the expenditure, one-sixth is ■■■ account of the public debt, 70,401,683 marks (3,520,084*l.*) in 1911.

Total imports into Lubeck, 1910, 4,417,000*l.*; total exports, 6,437,500*l.*

Number of vessels entered 1911, 3,256 of 862,641 tons; cleared, 3,204 of 869,448 tons.

■■■ *Vice-Consul*.—D. E. ■■■ Eichenburg.

(GROSHERZOGTHUM MECKLENBURG-SCHWERIN.)

Grand-duke Friedrich IV., born April 9, 1882; son of Friedrich Franz III. and Anastasia Mikhailovna, daughter of the Grand-duke Michael Nikolaievitch of Russia, married June 7, 1904, to Alexandra, daughter of Ernst August of Brunswick-Lueneburg, Duke of Cumberland; succeeded the death of his father, April 10, 1897. Offspring: Prince Friedrich Franz, born April 22, 1910. Sisters of the Grand-duke are: 1. *Alexandrina*, born December 24, 1879; married April 26, 1898, to Christian, King of Denmark. 2. *Cecilie*, born September 20, 1886, married June 8, 1905, to Friedrich Wilhelm, Crown-Prince of the German Empire and of Prussia.

Uncles — *Aunts of the Grand-duke* — I. *Paul Friedrich*, born September 10, 1803; married May 5, 1831, the Princess Marie of Windisch-Graetz. Offspring: 1. *Antoinette*, born May 26, 1832; 2. *Henrich Borwin*, born December 16, 1835. Duke Paul in 1844 renounced all hereditary rights to the Grand-duchy for himself and his descendants; he himself became a Roman Catholic. II. *Marie*, born May 14, 1854; married August 28, 1874, to Grand-duke Vladimir, second son of Alexander II., Emperor of Russia. III. *Johann Albrecht*, born December 8, 1857, Regent of the Duchy of Brunswick, married in the second time to Elisabeth, daughter of the late Duke Rostko zu Stolberg-Rossla. IV. *Klischeth*, born August 10, 1868; married October 24, 1890, to Friedrich August, Grand duke of Oldenburg. V. *Adolf Friedrich*, born October 10, 1878. VI. *Henrich*, born April 19, 1876, married February 7, 1901, to Queen Wilhelmina of the Netherlands, with the title 'Prince of the Netherlands.'

The Grand-ducal house of Mecklenburg is the only reigning family in Western Europe of Slavonic origin, and claims to be the oldest sovereign house in the Western world. In their full title, the Grand-dukes style themselves Princes of the Wends. Their genealogical table begins with Niklot, who died 1160, and comprises 25 generations. The title of Grand-duke assumed 1815.

The political institutions of the Grand-duchy of Mecklenburg-Schwerin and of Mecklenburg-Strelitz are of an entirely feudal character, but in March, 1907, the Grand-Dukes of both Grand-Duchies intimated to the estates of Schwerin and Now Strelitz, respectively, their intention of introducing a form of constitutional government. Part of the legislative power (only in the Domain has the Grand-duke the whole legislative power) is in the hands of the Diet—'Landtag.' There is only one Diet for both Grand-duchies, and it assembles every year for a few weeks; when it is not in actual session it is represented by a committee of nine members. Seats and votes in the Diet belong to the Ritterschaft—that is, the proprietors of Rittergüter, the 'Knights' Estates—and to the Landschaft, consisting of the burgomasters of 11 towns of Mecklenburg-Schwerin and 7 towns of Mecklenburg-Strelitz. The Ritterschaft has nearly 1000 members, but only a few of them take seats in the Diet. The Domain has not a representation of its own. The only elected representatives of the people are the 11 deputies returned to the German Reichstag.

The executive is represented by a ministry divided into four departments, appointed by, and responsible to the Grand-duke alone. There is no other administrative division than that springing from the ownership of the soil, in which respect the country is divided as follows, with population in 1910:—Grand-ducal Domains, 198,250; Knights' Estates (Rittergüter), 120,454; Convent Estates (Klostergüter), 7,889; Towns and Town Estates, 313,365. Total, 639,958, half 319,979. The chief towns (1911) Rostock (65,383 inhabitants), Schwerin (42,519 inhabitants), the capital, Wismar (24,378 inhabitants), Gustrow (17,805 inhabitants), and Parchim (10,608 inhabitants). In 1910 there were: Protestants, 616,512; Catholics, 21,043; other Christians, 1,288; Jews, 1,413; not stated, 702. The parishes are generally well endowed with landed property.

There are 1,235 elementary schools with 92,912 pupils (1911); Gymnasien, 7 with 1,819 pupils; Realgymnasien, 6 with 1,492 pupils; Realprogymnasien,

2 with 167 pupils; Realschulen, ■ with 1,254 pupils, ■ preparatory schools with 618 pupils, higher private schools, 18 with 2,154 pupils, normal schools, 2 with ■ pupils, navigation schools, ■ with 129 pupils, agricultural school, 1 with ■ pupils, technical schools, ■ with ■ pupils in the ■ session and with ■ pupils in the winter session, institutions for the deaf and dumb, 1 with 54 pupils, institution for the blind, 1 with 90 pupils, schools for artisans, 50 with 5,843 pupils. There is a university at Rostock (see *German Empire*).

There ■ 43 Amtsgerichte, 3 Landgerichte, and 1 Oberlandesgericht ■ Rostock, which is also the supreme court for Mecklenburg-Strelitz. There are also certain special military and ecclesiastical tribunals.

There exists no general budget for the Grand duchy. There are three systems of finance, entirely distinct. 1. That of the Grand duke, estimated for July 1, 1912-13, at 1,143,100/. ■ The financial administration of the States, the resources of which are very small. 3. The common budget of the Grand duke and States, the receipts and expenditure of which balance at 899,845/ (for July 1, 1912-13). On July 1, 1912, the public debt was estimated at 7,026,670/. The interest of the railway debt (806,045/), and of the consolidated loan of 1886, amounting to 600,000/ is covered by the annuity of 48,000/ paid by the State railways, and the remaining debt is more than covered by the State funds.

Consul General — W. E. HARR (Hamburg)

(GROSSHERZOGTHUM MECKLENBURG-STRELITZ)

Grand duke **Adolf Friedrich**, born July 22, 1848, the son of Grand duke Friedrich Wilhelm and of Princess Augusta, the daughter of the late Duke Adolphus of Cambridge, succeeded ■ the death of his father, May 30, 1904, married April 17, 1877, to Princess Elizabeth of Anhalt, born September 7, 1857. Offspring: Mary, born May 8, 1878, Jutta, born January 24, 1880, married July 27, 1899, under the name of Militta, to Prince Danilo of Montenegro, Adolf Friedrich, born June 17, 1882.

The reigning house of Mecklenburg-Strelitz was founded, in 1701, by Duke Adolf Friedrich II, youngest ■ of Duke Adolf Friedrich ■ of Mecklenburg. There being no law of primogeniture at the time, the Diet ■ unable ■ prevent the division of the country, which ■ protested against by subsequent Dukes of Mecklenburg-Schwerin. The Grand-duke is, however, ■ of the wealthiest of German sovereigns, having sovereign rights over more than one-half of the country.

Mecklenburg-Strelitz has, ■ common with Mecklenburg-Schwerin ■ Diet consisting of landowners and town magistrates. The country is divided into two provinces: Stargard, which alone participates ■ the Constitution, and Ratzeburg, whose special Constitution, framed in 1869, was put in force in ■. Of the 48 burgomasters and nearly 800 members of the Ritterschaft (see *Mecklenburg-Schwerin*), 7 burgomasters and over 80 proprietors of Rittergüter belong to Mecklenburg-Strelitz.

A form of constitutional government is about to be introduced. The executive is entirely in the hands of the Grand-duke, and ■ exercised by him through his Government, ■ the head of which ■ ■ 'Minister of State'. For 1910-11 ■ ■ 236,660/, expenditure 226,500/. Debt, July 1, 1910, 119,040/.

GERMAN TITLE :—OLDENBURG

The overlordship of the soil within the State is distributed as follows :—The Grand-duke has seigniorial rights over 527 square miles ; titled and untitled nobles over 353 square miles, and town corporations 117 square miles.

Marriages, 1911, 776 ; births, 2,335 ; deaths, 2,061 ; surplus of births, 775. Among the births were 85 stillborn, and 384 illegitimate children.

the exception of 2,627 Catholics, 298 Jews and persons of other confessions (1905), the people are Protestants. The total population on December 1, 1910, numbered 106,347 (53,523 males and 52,824 females). The capital, Neu-Strelitz, had 11,928 inhabitants in 1910.

British Minister Plenipotentiary—Rt. Hon. W. E. Goschen, G.C.V.O., K.C.M.G.

Consul-General.—W. E. Hearn (Hamburg).

OLDENBURG.

(GROSSEHERZOGTHUM OLDENBURG.)

Grand-duke Friederich August, born November 16, 1852 ; the son of Grand-duke Peter and of Princess Elizabeth of Saxe-Altenburg ; succeeded at the death of his father, June 13, 1900 ; married (1), February 18, 1878, to Princess Elizabeth (died August 28, 1895) daughter of Prince Friedrich Karl of Prussia ; (2), October 24, 1898, to Princess Elizabeth of Mecklenburg-Schwerin ; daughter of first marriage, a daughter, Sophia, born February 2, 1879 ; married February 27, 1906, to Prince Eitel Friedrich, second son of the Emperor Wilhelm II., of the second, a son, Nicolaus, born August 10, 1897 ; and two daughters, Ingeborg Alix, born July 20, 1901, and Altborg Mathilda, born May 19, 1903. *Brother of the reigning Grand-Duke*.—Prince Georg, born June 27, 1855.

The house of Oldenburg is said to be descended from Witkind, celebrated of the heathen against Charles Great the 9th century a son of the House of Oldenburg, Count Christian VIII, was elected King of Denmark, Sweden, Norway. The main line became extinct Count Anton Gunther, in 1607, whereupon territory of the family to the King of Denmark, who in 1617, whereupon Paul of Russia, in 1773, in exchange for pretended claims upon Schleswig-Holstein. The Grand-duke (1773) gave Oldenburg to his cousin, Prince Friedrich August of Holstein-Gottorp, whose descendants it remained till 1810, Napoleon incorporated it with the Kingdom of Westphalia. But the Congress of Vienna not only restored it to its former sovereign, but, in the urgent demand of Czar Alexander I., added to it territory nearly 400 square miles, with 70,000 inhabitants, bestowing on it the name of Prince of Grand-duke. Part of the new territory consisted of the Principality of Lüneburg, on the Elbe, to the French frontier. Another consisted of the Principality of Lüneburg, and another of a piece of the secularized bishopric of Münster. Grand-duke a civil list of 400,000 marks, or 1,600,000 francs ; the (Krongut) is estimated at 24,000 marks, or 960,000 francs ; draws also a private of the family.

By the Constitution, 1849, revised 1852 and 1903, the legislative power is exercised by a Landtag, or Diet, elected for five years, by the whole of all citizens paying taxes. By a law of April 17, 1909, the direct mode of election was introduced in 1911. The Grand-Duchy is divided into districts. The Landtag consists of 11 delegates. The executive is vested, under the Grand-duke, in a responsible ministry of 7 departments. Outlying Principalities of Lüneburg and Birkenfeld have provincial councils, both members, summoned once a year by the provincial government.

The budgets are divided into the budget of the Grand-duchy, the budgets of the Duchy of Oldenburg and the Principalities of Lüneburg and Birkenfeld. The revenue, 1912, 819,245*l.* ; expenditure, 818,841*l.*

Children of the King.

1. Prince *Friedrich Wilhelm*, born May 6, 1882, Crown Prince of the German Empire and of Prussia, married June 6, 1906, to Princess Cecilie, born Sept. 20, 1886, daughter of the late Friedrich Franz III., of Mecklenburg-Schwerin; offspring, Prince *Wilhelm Friedrich*, born July 4, 1906; Prince *Ludwig Ferdinand*, born November 9, 1907; Prince *Hubertus*, born September 30, 1909; Prince *George*, born Dec. 19, 1911; 2. Prince *Wilhelm Edel-Friedrich*, born July 7, 1883, married, Feb. 27, 1906, to Princess Sophie Charlotte, daughter of the Grand-Duke Friedrich August of Oldenburg; 3. Prince *Adalbert*, born July 14, 1884; 4. Prince *August Wilhelm*, born Jan. 29, 1887; married, October 22, 1908, to Princess Alexandra Victoria of Schleswig Holstein; 5. Prince *Oscar*, born July 27, 1888; 6. Prince *Jocham*, born Dec. 17, 1890; 7. Princess *Viktoria Luise*, born Sept. 13, 1892.

Brother and Sisters of the King

1. Princess *Charlotte*, born July 34, 1866, married, Feb. 18, 1878, to Prince Bernhard, eldest son of Duke George II of Saxe-Weimingen; 2. Prince *Herarich*, born Aug. 14, 1862, married, May 24, 1888, to Princess Irene, daughter of the late Grand duke Ludwig IV., of Hesse; offspring of the union — two sons, Waldemar, born March 20, 1889; Sigismund born Nov. 27, 1896. 3. Princess *Victoria*, born April 12, 1866; married, Nov. 19, 1890, to Prince Adolf of Schaumburg-Lippe. 4. Princess *Sophie*, born June 14, 1870; married, Oct. 27, 1889, to Crown Prince Konstantin of Greece, Duke of Sparta. 5. Princess *Margarethe*, born April 22, 1872, married, Jan. 15, 1893, to Prince Friedrich Karl Ludwig of Hesse.

The Kings of Prussia trace their origin to Count Thasso, of Zollern in Swabia, one of the generals of Charles the Great. His successor, Count Friedrich I., built the family castle of Hohenzollern, near the Danube, in the year 980. A subsequent Zollern, or Hohenzollern, Friedrich III., was elevated to the rank of a Prince of the Holy Roman Empire in 1273, and received the Margraviate of Nuremberg in fief; and his great-grandson, Friedrich VI., was invested by King Sigmund, in 1415, with the Margraviate of Brandenburg, and obtained the rank of Elector in 1417. A century after, in 1511, the Teutonic Knights, owners of the large province of Prussia, in the Baltic, elected Margrave Albrecht, a younger son of the family of Hohenzollern, to the post of Grand-Master, and he, turning Protestant, declared himself hereditary duke. The early extinction of the male line of Albrecht brought the province of Prussia by inheritance to the electors of Brandenburg, who likewise adopted Protestantism. In the seventeenth century, the Hohenzollern territories became greatly enlarged by Friedrich Wilhelm, 'the Great Elector,' under whose fostering care arose the first standing army in Central Europe. The Great Elector, after a reign extending from 1640 to 1688, left a country of — and a half million inhabitants, a vast treasure, and 38,000 well-drilled troops to his son, Friedrich I., who put the kingly crown on his head at Konigsberg on January 18, 1701. His successor Friedrich Wilhelm I., after adding part of Pomerania to the possessions of the house, left his son and successor Friedrich II., called 'the Great,' a State of 47,770 square miles, with two and a half millions of inhabitants. Friedrich II., added Silesia, an area of 14,200 square miles; this, and the large territory gained in the first partition of Poland, increased Prussia to 74,340 square miles, with more than five and a half million inhabitants. Under the reign of Friedrich's successor, Friedrich Wilhelm II., the State was enlarged by the acquisition of the principalities of Anspach and Baireuth, as well as the territory acquired in another partition of Poland, which raised the area to nearly 100,000 square miles,

with about nine millions of souls. Under Friedrich Wilhelm III., nearly one-half of this State and population was taken by Napoleon; but the Congress of Vienna not only restored the loss, but added part of the Kingdom of Saxony, the Rhineland, much of Westphalia, and Swedish Pomerania, moulding Prussia into separate pieces of territory, of a total of 106,820 square miles. This shaped into a compact State of 134,463 square miles, with a population of 22,769,486, by the of 1866.

At present the total 'Krondotations Rente,' as far as it figures in the budgets, amounts to 15,719,296 marks, or 770,554*l*. The reigning house is also in possession of a vast amount of private property, comprising castles, forests, and great landed estates in various parts of the kingdom, known as 'Kronfideikommiss- und Schatullgüter,' the revenue from which mainly serves to defray the expenditure of the court and the members of the royal family.

The Royal Fideikommiss was last regulated by Cabinet Order of Aug. 30, 1843. Besides this the Royal Crown treasure, founded by King Friedrich Wilhelm III., consists of a capital of 6 millions, which has since considerably increased, and also the family Fideikommiss, likewise founded by King Friedrich Wilhelm III., for the benefit of princes born afterwards. It comprises the domains of Flatow, Krojanke, and Frauendorf, as well as the Fideikommiss founded by the late Prince Karl (Glienicke). Finally, the Royal House is also entitled to the House Fideikommiss of the Hohenzollern princes.

Dating from King Friedrich I. of Prussia (Elector Friedrich III. of Brandenburg), there have been the following

SOVEREIGNS OF THE HOUSE OF HOHENZOLLEHN.

Friedrich I.	1701	Friedrich Wilhelm III.	1707
Friedrich Wilhelm I.	1713	Friedrich Wilhelm IV.	1840
Friedrich II. called 'the Great'	1740	Wilhelm I.	1861
Friedrich Wilhelm II.	1786	Friedrich III. (Mar. 9-June 15) []	1888
		Wilhelm II.	1888

Constitution and Government.

Various fundamental laws vest the executive and part of the legislative authority in a king, who attains his majority upon accomplishing his eighteenth year. The crown is hereditary in the male line, according to primogeniture. In the exercise of the government the king is assisted by a council of ministers, appointed by royal decree. The legislative authority the king shares with a representative assembly, the Landtag, composed of two Chambers, the first called the 'Herrenhaus,' or House of Lords, and the second the 'Abgeordnetenhaus,' or Chamber of Deputies. The assent of the king and both Chambers is requisite for all laws. Financial projects and estimates must first be submitted to the Abgeordnetenhaus, and be either accepted or rejected *en bloc* by the Herrenhaus. The right of proposing laws is vested in the Government and in each of the Chambers.

The Herrenhaus is composed of, first, the princes of the royal family who are of including the scions of the formerly sovereign families of Hohenzollern-Hechingen and Hohenzollern-Sigmaringen; secondly, the of the mediatised princely houses, recognised by the Congress of Vienna, the number of sixteen in Prussia; thirdly, the heads of the territorial nobility formed by the king, and numbering fifty members;

fourthly, a number of life-peers, chosen by the king from among the rich landowners, great manufacturers, and 'national celebrities'; fifthly, eight titled noblemen elected in the eight older provinces of Prussia by the resident landowners of all degrees; sixthly, the representatives of the universities, the heads of 'chapters,' and the burgomasters of towns with above fifty thousand inhabitants; and seventhly, an unlimited number of members nominated by the king for life, or for a or less restricted period.

The Abgeordnetenhaus consists of 443 members—362 for the old kingdom, 80 added in 1867 represent the newly-annexed provinces, and 1 in 1876 for Lauenburg. Every Prussian who has attained his twenty-fifth year, and is qualified to vote for municipal elections of his place of domicile, is eligible to vote as indirect elector. Persons who are entitled to vote for municipal elections in several parishes only exercise the right of indirect elector, or 'Urwähler,' in . One direct elector, or 'Wahlmann,' is elected from every complete number of 250 souls. The indirect electors divided into three classes, according to the respective amount of direct taxes paid by each; arranged in such that each category pays one-third of the whole amount of direct taxes levied the whole. The first category consist of all electors who pay the highest taxes to the amount of one-third of the whole; the second, of those pay the next highest amount down to the limits of the second third; the third of all the lowest taxed, who, together, complete the last class. Direct electors may be nominated in each division of the circle from the number of persons entitled to vote indirectly, without regard to special divisions. The representatives are chosen by the direct electors. The legislative period of the Abgeordnetenhaus is limited to five years. Every Prussian eligible to be a member of the second Chamber who has completed his thirtieth year, who has not forfeited the enjoyment of full civic rights through a judicial sentence, and who has paid taxes during three years to the State. The Chamber must be re-elected within six months of the expiration of the legislative period, or after being dissolved. In either former members are re-eligible. The Landtag to be regularly convoked by the king during the month of November; and in extraordinary session, often circumstances may require. The opening and closing of the Landtag must take place by the king in person, by a minister appointed by him. Both Chambers to be convoked, opened, adjourned, and prorogued simultaneously. Each Chamber has to prove the qualification of its members, and to decide the . Both Chambers regulate their order of business and discipline, and elect their own presidents, vice-presidents, and secretaries. Functionaries do not require leave of absence to sit in the Chamber. When a member accepts public functions, a higher office connected with increased salary, vacates his seat and vote in the Chamber, and only the same by election. No can be a member of both Chambers. The sittings of both Chambers public. Each Chamber, the proposition of the president or of ten members, may proceed to secret deliberation. Neither Chamber adopt a resolution the legal majority of its members is not present. Each Chamber has a right present addresses to the king. No one deliver a petition address to the Chambers, or to either of them, in person. Each Chamber can refer documents addressed to to the ministers, and demand explanations relative complaints contained therein. Each Chamber has right to appoint commissions of investigation of facts for its own information. The members of both Chambers held to be representatives of the whole population. They vote according to their free conviction, and not bound by prescriptions

or instructions. They cannot be called to account, either for their votes or for opinions uttered by them in the Chambers. No member of the Chambers can, without its assent, be submitted to examination for any proceeding entailing penalties, unless seized in the act, within twenty-four hours of the offence. All criminal proceedings against members of the Chambers, and all examination and civil arrest, must be suspended during the session, should the Chamber whom it may concern so demand. Members of the Abgeordnetenhaus receive and must accept travelling expenses and diet money from the State, according to a scale fixed by law, amounting to 15 marks, or 15 shillings, per day.

Lower House composed as follows:—Conservatives, 151; Free Conservatives, 62; National Liberals, 65; Progressives, 37; Centre, 103; Poles, 15; Socialists, 6; Independents, 4.

The executive government is carried on by a Staatsministerium, or Ministry of State, the members of which are appointed by the king, and hold office at his pleasure. The Staatsministerium is divided into nine departments, as follows:—

1. *President of the Council of Ministers, Minister of State, Minister of Foreign Affairs, and Imperial Chancellor.*—Dr. von Bethman Hollweg.

2. *Minister of State and Minister of Finance.*—Dr. Lottner; appointed August, 1910.

3. *Minister of State and Minister of Public Works.*—Breitenbach, born 1856; appointed June, 1906.

4. *Minister of Ecclesiastical Affairs and Instruction.*—Dr. von Trott zu Solz; appointed July, 1909.

5. *Minister of Agriculture, Domains, and Forests.*—Dr. Frhr. von Schorlemer; appointed 1910.

6. *Minister of Justice.*—Dr. Bessler, appointed November, 1905.

7. *Minister for Interior.*—Von Dallwitz, appointed July, 1910.

8. *Minister of Commerce and Industry.*—Sydow; appointed Oct., 1909.

9. *Minister of State and Minister of War.*—General von Heeringen; appointed 1909.

Imperial Secretary of State for the Interior.—Dr. Delbrück; appointed Minister (without portfolio), July, 1910. *Imperial State Secretary of the Foreign Office.*—Von Kiderlen-Wächter, September, 1910. *Imperial Secretary of the Naval Office.*—Von Tirpitz, born 1849; Minister since March 29, 1898.

The salary of the President of the Council is 54,000 marks, and that of each of the other ministers 36,000 marks, and, since 1905, 14,000 marks "representation-money."

The local government of Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*). Urban circles consist of towns of more than 25,000 inhabitants; rural circles consist of the smaller towns, rural communities (*Landgemeinden*), and *Gutsbezirke*. For provinces and rural circles the local authorities of the constituent areas elect deliberative assemblies which appoint executive committees. Each province has a governor (*Oberpräsident*); each government district has a president, and deals chiefly with local concerns. In towns the deliberative authority is the town council (*Stadterordnetenversammlung*), elected on the 3-class system of property suffrage. The executive is a magistracy with the burgher-master as president. A rural circle has a *Landrat*. Local administrative business varies according to

the nature of the administrative division. The matters dealt with such as poor-relief, roads, light railways, &c., but in rural districts they include agricultural interests, and in towns, education, sick-insurance, valuation, collection of certain taxes, mustering of recruits, management of gas, water, and electric works, &c. The Crown controls the administration of all the administrative areas.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Provinces	Area : Square Miles	Population		Pop. per Square Mile, 1910
		1910	1905	
East Prussia (Ostpreussen)	14,786	2,064,175	2,080,176	139.6

Widowed	500,917	1,688,157	2,089,074
Divorced & separated	81,162	55,029	86,191

The division of the population according to occupation is shown in the section relating to the *German Empire*

In 1910 the number of foreigners (exclusive of other Germans) resident in Prussia was 688,839, of whom 301,710 Austrians and Hungarians, 137,440 Dutch, 90,687 Russians, 20,206 Danes, 7,602 Swedes and Norwegians, 9,898 British, 10,708 Belgians, 8,832 Americans (United States), 23,029 Swiss, and 4,288 French.

II MOVEMENTS OF THE POPULATION

Year	Marriages	Total Births	Illegitimate	Total Deaths incl Still-born	Surplus of
1906	800,922	1,306,912	94,779	712,970	593,942
1907		1,298,291	88,655	710,604	578,687
1908	811,81	1,306,283	39,884	712,111	576,675
1909	807,111	1,257,080	37,990	705,772	551,238
1910	810,418	1,256,612	37,111	676,148	580,464
1911	811,151	1,225,091	36,874	722,728	502,363

In 1911 98 per cent of the total births were stillborn, and 7.98 per cent illegitimate

The emigration from Prussia by German ports and Antwerp was in 1904, 16,402, in 1905, 16,206; in 1906, 16,088; in 1907, 18,005; in 1908, 10,889, in 1909, 12,318; in 1910, 14,021; in 1911, 11,835. The total number in 1911, 10,584 went to the United Kingdom. To the total, the province of Brandenburg (including Berlin), contributed 2,125, Hanover, 1,851.

Religion.

Absolute religious liberty is guaranteed by the Constitution. Nearly two-thirds of the population are Protestants, and rather one-third Catholics. In 1910, the numbers were: Protestants, 24,880,547; Roman Catholics, 14,581,829; Christians, 189,887; Jews, 416,926;

There are also ■ technical high schools (Berlin, Hanover, Aachen, Danzig, Breslau), 2 forestry schools (Eberswalde, Münden), 2 technical mining schools (Berlin, Clausthal), 2 agricultural high schools (Berlin, Poppelsdorf), agricultural institutes connected with universities, 2 veterinary high schools (Berlin, Hanover), a great number of other schools for various aspects of agriculture, 4 commercial high schools (Berlin, Köln, Frankfurt a. Main, Königsberg Pr.), besides other special schools and State establishments for art and music, the Academy of Posen, &c.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasien, Realgymnasien, and similar schools, ■ also all the normal schools, ■ maintained and administered by the Government, while ■ the other scholastic institutions are supported by the community, &c., under control of the Government (For number of professors, teachers, and students ■ each of the Universities of Prussia, see under *German Empire*).

The whole of the educational establishments (exclusive of agricultural and some technical institutes) ■ Prussia are under the control of the Minister of Public Instruction and Ecclesiastical Affairs, but there ■ local supervision for every province. The administration of each of them, ■ far as regards the *Regierungsschule*, is vested ■ President, who is the head of the Civil Government (*Regierung*), while the management of the higher (secondary) schools and the normal schools belongs to the Provincial Schul Collegium, under the supervision of the Oberpräsident, who is the head of the Civil Government of the province. As ■ general rule, the administration of school funds provided by the State is under the control of the Civil Government, which likewise takes upon itself nearly the whole management of the lower and elementary schools, while the Schul Collegium is responsible for the higher schools and the normal schools, for the general system of instruction and discipline therein, the proper selection of school books, the examination and appointment of masters, and the examination of those who leave school for the Universities.

According to the Constitution of 1850, all persons are at liberty to teach, ■ to form establishments for instruction, provided they can produce to the authorities the prescribed proof of their moral, scientific, and technical qualifications. Both private and public establishments for education ■ placed under the superintendence of the Minister of Public Instruction, while all public teachers are considered, directly ■ indirectly, State servants.

For the year 1911-12 the ordinary expenditure for instruction and similar purposes under the Department of the Ministry of Instruction amounted to about 212,000,000 ■ marks (10,600,000 £), besides 14,000,000 marks (700,000 £) for ■ recurring expenditure. For educational institutions under other ministries the ■ of about 19,000,000 marks, exclusive of ■ recurring expenditure, ■ set aside, ■ that the total ordinary expenditure of the ■ on instruction for the year amounted to nearly 231,000,000 marks. The total expenditure for all kinds of schools amounted ■ 1911-12 to about 600,000,000 marks.

Justice, Crime.

Prussia contains 14 Oberlandesgerichte (see under *German Empire*). The Oberlandesgericht ■ Berlin ■ called the *Kassationsgericht*, and ■ as ■ ■ appeal court for summary convictions, though for all ■ the ■ of final ■ is the Reichsgericht at Leipzig. The prosecution in all criminal cases ■ conducted by *Staatsanwälte*, ■ public prosecutors, paid by the ■. In 1910 there ■ 344,770 persons convicted of ■ in Prussia.

GERMAN

Table

Effective, ordinary and extraordinary and expenditure for years ending March 31 following the year indicated in the table (20 marks = £1) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Marks	Marks		Marks	Marks
1905	4 400 248 206	4 187 467 213	1906	4 151 159 130	3 958 126 488
	4 666 719	5 334 926 305	1908	4 408 103 497	4 892 873 416
	4 063 702 411	3 797 617 034	1910	4 521 745 351	4 531 156 108

Budget estimates for years ending March 31 —

Heads of Receipts and Expenditure	Revenue		Expenditure	
	1911-12	1912-13	1911-12	1910-11
	Marks	Marks	Marks	Marks
Ministry of Agriculture	161,213,504	169,944,004	70,846,120	71,855,150
" Finance	649,790,400	714,893,610	219,844,216	204,163
" Commerce, and Public works	284,609,390	299,073,420	267,675	267,427
Debt and financial administration	2,181,784,000	2,381,053,000	1,847,742,000	1,084,407,000
State administration (Justice, &c.)	478,626,925	507,496,983	642,556,614	671,056,059
	244,340,327	260,836,831	819,349,000	852,085,361
Total ordinary	4,635,466,749	4,268,846,450	4,871,914,496	4,078,284,600
Extraordinary	49,568,000	87,896,800	214,000,253	228,007,850
Total	4,685,034,749	4,356,743,250	5,085,914,749	4,306,292,450
	(4,685,034,749)	(4,356,743,250)	(5,085,914,749)	(4,306,292,450)

The total expenditure amounted (1911) to 5l. 1s. 2d. per head of population. The direct taxes amounted almost to 9s. per head. Since April 1, 1895, only the tax, a new supplementary tax (Vermögenssteuer), and the tax "vom Gewerbebetriebe im Umherziehen" direct State-taxes, the land-tax, the house tax, and the trading tax received by the communes.

The expenditure for the army and navy not entered in the budget of Prussia, but forms part of the budget of the Empire.

Public debt 1911 and 1912 —

	1911	1912
National bearing interest		
Consolidated	1,030,000,000	1,102,298,000
" "	1,203,378,750	1,090,675,900
" "	1,569,957,700	1,501,298,150
Treasury bonds	810,000,000	840,000,000
State railway	44,801,000	91,708,000
Debt of provinces annexed in 1910	2,419,243	2,902,706
Total national	5,531,577,100	5,428,874,000
	(5,531,577,100)	(5,428,874,000)

The sinking fund of the railway in 1912 amounted 159,261l. and of the annexed provinces' debt 2,827l. The charges interest, amortisation, management of the amounted 20,517,457l. in the 1912. The debt to 11l. 17s. 3d. per head of population, the annual charge to 6d. per head.

Army.—The conditions of service have been already described under *German Empire*. The total peace strength of the Prussian army at the present time is about 480,000 of all arms and ranks.

Production and Industry.

I. AGRICULTURE.

The number of farms in Prussia, in 1895, was as follows:—Under 1 hectare, 1,649,859; 1–10 hectares, 1,236,393; 10–100 hectares, 402,209; 100 hectares, 20,390; total, 3,308,651.

The total area of the farms in 1895 was 28,479,739 hectares. These farms supported, in 1895, a population of 10,948,476, of whom 4,633,055 were actively engaged in agriculture. The principal crops, and the yield in metric tons, 2 years, were as follows (1 hectare = 2·47 acres; 1 metric ton = 2,204 lbs.):—

	Hectares	Tons	Hectares	Tons
Wheat	1,146,626	2,482,971	1,175,104	2,900,041
Rye	4,720,771	8,041,946	4,700,755	8,197,386
Summer barley	830,610	1,698,713	820,979	1,716,457
Oats	2,801,337	5,291,611	2,818,083	6,210,493
Potatoes	2,231,254	22,780,313	2,240,370	25,630,203
Hay (meadow)	3,232,470	14,561,638	3,246,491	10,000,849

In 1911 there were vineyards on 17,100 hectares, yielding 537,197 hectolitres of wine; hops on 1,097 hectares, yielding 4,546 tons. On December 1, 1907, Prussia contained live stock comprising 3,046,304 horses, 12,011,584 cattle, 5,408,867 sheep, 15,095,854 swine, and 2,235,529 goats.

In 1905–06 Prussia contained 10 establishments engaged in the manufacture of beet-root sugar, which consumed 12,596,787 metric tons of beet-root in the production of 1,861,970 metric tons of raw sugar, and 260,859 metric tons of molasses. In 1905–6 there were 4,326 breweries in action in Prussia, which brewed 83,600,000 hectolitres of beer, at 90 litres per head of the population. In 1905–06 there were 6,404 distilleries in operation, which produced 3,722,082 hectolitres of alcohol.

II. MINERALS.

The output of coal increased from 17,571,581 tons in 1900 to 184,044,080 tons in 1907, and the output of lignite in the same time from 8,118,553 tons to 52,660,597 tons. Quantities (in metric tons) and values (in marks) of coal and iron ore raised, and of the pig-iron produced in 1908–09:—

	1911			
	Tons	Marks	Tons	Marks
Coal	143,771,612	1,417,750,850	181,324,080	1,462,665,251
Lignite	56,644,391	18,447,398	60,581,043	189,975,663
Iron ore	4,823,606	40,290,270	4,948,711	42,000,000
Pig-iron	2,995,612	375,130,821	10,477,303	1,000,000,000

In 1910 100,000 numbers employed in and about mines in Prussia. Underground workers, 484,504; surface workers, 147,054; boys (under 16), 24,468; females, 7,508; total, 663,534. The amount of their wages was 800,892,890 marks.

Commerce.—The trade of Prussia forms an important part of the general trade of the German customs district (Zollgebiet). This is carried on through the ports of the Baltic and North Seas, through many navigable rivers and canals, and an extensive network of roads, railways, telegraphs, and telephones. There are 92 chambers and corporations of the large towns of the Kingdom. There are no separate statistics for the trade of Prussia; it is included in that of Germany.

Internal Communications.—On April 1, 1910, the length of the system open for traffic was as follows: State owned, Broad gauge, main lines, 19,602 miles, broad gauge, local lines, 9,322 miles, total broad gauge, 28,924 miles. Narrow gauge, 208 miles. Total length of State lines, 132 miles. Private lines, 1,826 miles. Total railway mileage, 30,950. Plans for the electrification of main railway lines are being steadily pushed on. The line between Dessau and Bitterfeld was the first to be electrified and the experiment was successful that a longer stretch has been chosen, Magdeburg—Bitterfeld—Leipzig—Halle. It is uncertain whether electric traction will meet military requirements, and there will, therefore, be no electrification for the present of strategic railways or of lines which are of strategic importance.

REUSS, Elder Branch.

(FÜRSTENTHUM REUSS—ÄLTERER LINIE)

The reigning Prince is **Heinrich XXIV.**, born March 20, 1878; succeeded his father **Heinrich XXII.**, who died April 19, 1902. Sisters of the reigning prince: **Emma**, born Jan. 17, 1881; married May 14, 1903, to **Arch.**, Count of Kunigl; **Maria**, born 26, 1882; married Feb. 4, 1904, to **Ferdinand**, Baron Gnagnoni. **Hermine**, born Dec. 17, 1887; married Jan. 7, 1907, to **Johann Georg**, Prince of Schönaich Carolath. **Ida**, born Sept. 4, 1891; married November 7, 1911, to **Christopher**, Prince of Holberg-Rossia.

The Regent of the Principality is Prince **Heinrich XXVII.**, Prince of Reuss-Gera, Oct. 15, 1908.

The princely family of Reuss traces its descent to the old prefects of Weida, who were imperial functionaries and afterwards free lords. All

heads of the house, ever since ~~the~~ commencement of the eleventh century, have been called Heinrich. In ~~the~~ year 1701 ~~the~~ settled, in a family council, that the figures should not run higher than a hundred, beginning afterwards again ~~the~~. The present sovereign of Reuss-Greiz has no civil list, but a great part of the territory over which he reigns is his private property.

The Constitution, bearing date March 28, 1867, provides for a legislative body of ~~the~~ members, 3 nominated by the sovereign, ~~the~~ by the ~~the~~ of large estates, ~~the~~ elected by towns, and 4 by ~~the~~ districts. The public revenue and expenditure for 1912 ~~the~~ estimated ~~the~~ 92,203*l*. There is ~~the~~ public debt.

Area, 122 square miles; population (1910), 72,769.

The population is mainly Protestant, only 1,205 being Catholic. The capital, Greiz, has (1910) 23,245 inhabitants.

REUSS, Younger Branch.

(FÜRSTENTHUM REUSS—JÜNGERE LINIE.)

The reigning Prince is Heinrich XXVII., born Nov 10, 1868; the ~~the~~ of Prince Heinrich XIV. and of Princess Agnes; succeeded his father March 31, 1913; married November 11, 1884, to Princess Elise, born September 4, 1864, daughter of Prince Hermann of Hohenlohe-Langenburg. Offspring: I. Princess Victoria, born April 21, 1889. II. Princess Luise Adelheid, born July 17, 1890. III. Prince Heinrich XLIII., born July 25, 1893; died May 13, 1912. IV. Prince Heinrich XLV., born May 13, 1895. *Sister of the Reigning Prince: Princess Elisabeth*, born October 27, 1859; married November 17, 1887, to Prince Hermann of Solms-Braunfels; widow, August 30, 1900.

The reigning house forms a younger branch of the Reuss family. As in Reuss-Greiz, a great part of the territory of the Principality is the private property of the reigning family.

All the princes ~~the~~ called Heinrich, and to distinguish them they have numbers attached to their names, beginning and ending in each century. Number I. is given ~~the~~ the first prince of the branch born in the century, and the numbers follow in the order of birth until the century is finished, when they begin again with number I.

The Principality has a Constitution, proclaimed November 30, 1849, and modified April 14, 1852, and June 20, 1856. Under it restricted legislative rights ~~the~~ granted to a Diet of sixteen members, of whom three ~~the~~ elected by those paying the highest income-tax, and twelve by the inhabitants in general. The head of the collateral Reuss-Köstritz family is hereditarily ~~the~~ member. The Prince has the sole executive and part of the legislative power. In the administration of the State a cabinet of three members ~~the~~ under ~~the~~ direction. On November 23, 1892, the hereditary prince (Heinrich XXVII.) received authority from the reigning prince to carry on the government in his name, and on April 2, 1910, in consequence of the permanent incapability of the reigning prince, the hereditary prince was appointed Regent.

The annual estimated revenue, 138,965*l*. for the financial period 1911-13, expenditure, 188,965*l*. Public debt (1910), 52,027*l*.

~~the~~ the ~~the~~ population (152,752 in 1910), 147,272 were Evangelical, 3,498 Catholic, 779 other Christians, ~~the~~ Jews, 828 not included ~~the~~ these. The capital, Gera, ~~the~~ (1910) 49,276 inhabitants.

~~the~~ *Vice-Consul*.—R. ~~the~~ Turner.

SAXE-ALTENBURG.

(HERZOGTUM SACHSEN-ALTENBURG.)

The reigning Duke ■ Ernst, born August 31, 1871; the son of Moritz (brother of the late Duke Ernst) and Augusta, Princess of Saxe-Meiningen, succeeded to the throne February 7, 1908, on the death of his uncle; married, February 17, 1898, to Princess Adelheid of Schaumburg-Lippe, born September 22, 1875. Offspring, Princess Charlotte Agnes, born March 4, 1900; Prince Georg-Moritz, born May 13, 1900; Princess Elisabeth, born April 6, 1903; Friedrich-Ernst, born May 15, 1905.

There ■ a separate Duchy of Saxe-Altenburg from ■ till 1672, but its territories ■ afterwards incorporated with Saxe-Gotha until 1826, when the Duke of Hildburghausen, which had been ■ separate Duchy since 1680, exchanged Hildburghausen for Altenburg, and became Duke Frederick of Saxe-Altenburg. In 1874 the Duke resigned ■ right to a civil list, in exchange for a charge upon the State or crown-domains (Domänenfideicommiss).

The legislative authority is vested in a Chamber of thirty-two representatives, elected for three years, nine chosen by the highest taxed inhabitants, eleven by the inhabitants of towns, and twelve by those of rural districts. The Chamber meets once at least in each financial period.

The executive is divided into four departments, namely—1, of the Ducal House, Foreign Affairs, Worship; 2, of Justice; 3, of the Interior; 4, of Finance. The budget is ■ for three years, estimates for the period 1911-1913, ■ and expenditure, 259,946l. Two-thirds of the revenue ■ derived from the State domains and the remainder from direct taxes. Public debt, 1911, 44,870l., which the funds of the State (exclusive of reserve funds in the "Landesbank") exceeded by 242,277l.

Population, 1910, 216,128. In 1910, 207,825 Protestant, 7,246 Catholic. The capital, Altenburg, had 39,976 (1910) inhabitants. Many of the inhabitants ■ of Slavonic origin. The peasants of the "Ostkreis" (eastern part of the Duchy) ■ reputed to be more wealthy than those of any other part of Germany, and the rule prevails among them of the youngest ■ becoming ■ heir to the landed property of the father. Estates ■ kept for generations in the ■ family, and seldom parcelled out. The rural population, however, has been declining in numbers for the last thirty years.

Gymnasias, Realschule, and teachers' seminaries, 1912, 1,890 pupils; *Bürgerschulen* 5,620 pupils (2,845 boys and 2,775 girls); 204 public elementary schools, 611 teachers (53 female) and 37,321 pupils. Annual expenditure on elementary schools, 95,496l., of which 21,435l. ■ provided by ■ State.

■ Consul-General.—A. C. Grant Duff (Leipzig).

Vice-Consul.—R. ■ Turner.

SAXE-COBURG AND GOTHA

(HERZOGTHUM SACHSEN-COBURG-GOTHA.)

The reigning Duke **Ernst II.** (H.R.H. Duke of Albany), born July 19, 1884, of the late Leopold Duke of Albany, and Princess Helena of Waldeck and Pyrmont, succeeded his uncle, Alfred, July 30, 1900; married October 11, 1905, to Princess Victoria Adelaide, daughter of Duke Friedrich Ferdinand of Schleswig-Holstein-Sonderburg-Glücksburg; offspring Prince Johann Leopold, born August 2, 1906; Princess Sibylla Kalma Marie, born January 18, 1906; Prince Dietmar Hubert, born August 24, 1907.

Sister of the Duke is Princess Alice, born February 25, 1883; married February 10, 1904, to Prince Alexander of Teck.

Immediate ancestor of the reigning family of Saxe-Coburg and Gotha is Duke John Ernst, seventh of Duke Ernst the Pious, who succeeded his brother Albrecht, Ernst's second son, in 1409, as the Duke of Saxe-Coburg, which John Ernst's two sons ruled in common, under the title Dukes of Saxe-Coburg-Saalfeld; but their single son, Ernst Frederick I. (1744-1800) introduced the principle of primogeniture. On the extinction of the line of Saxe-Gotha-Altenburg in 1825, Ernst I. received, in 1826, Gotha in exchange for Saalfeld, which was assigned to Saxe-Meiningen, and assumed the title of Ernst I. of Saxe-Coburg and Gotha. The family is in possession of a large private fortune, accumulated chiefly by Duke Ernst I., to whom the Congress of Vienna made a present of the Principality of Lichtenberg. This Principality he sold, September 22, 1804, to the King of Prussia, for a sum of two million thalers, and other advantages. According to an agreement of July 19, 1807, the income of the Gotha domains is divided between the Duke and the King. The Duke further receives one-half of the excess of revenue over expenditure of the Coburg domains.

The fundamental law of the two Duchies, proclaimed May 3, 1852, vests the legislative power in the Duke in conjunction with two separate chambers, one for the Duchy of Coburg and the other for the Duchy of Gotha. For the common affairs of the two Duchies the two Chambers meet in common. The Coburg Chamber consists of eleven, and that for Gotha of nineteen members, chosen in as many electoral divisions, by the indirect vote of all the electors. Every male above the age of twenty-five who pays direct taxes has a vote, and every fully-qualified citizen above thirty may be elected a deputy to the Landtag or Chamber. Deputies resident in Coburg or Gotha receive six marks per diem, the others ten marks per diem and travelling expenses. New elections take place every four years. The two assemblies meet separately, regularly in the first and last years of their duration, otherwise when necessary; the 'United Parliament' meets alternately at the towns of Coburg and of Gotha.

The domain budget is voted for four years for Coburg. The annual domain budget for Coburg 1909-1913 is estimated at 27,035*l.*, and expenditure 15,965*l.* The special State budget and expenditure for the years ending March 31, 1911-12, for Coburg is 65,072*l.*, and 66,252*l.* respectively, and for Gotha 216,045*l.*; while the State-revenue and expenditure (1911-12) of Coburg and Gotha, are 121,794*l.* Public debt, 1912, 89,500*l.* for Coburg, and 122,546*l.* for Gotha, both being largely covered by real property and stocks. In 1910 there were 250,454 Protestant, 4,951 Catholic, and 319 other Christians; 1 Jew, and 670 persons of other religion. The chief towns, Gotha and Coburg, have respectively 23,789 and 23,789 inhabitants (1910).

Minister-Resident.—A. C. Duff.

Vice-Consul.—R. M. Turner.

SAXE MEININGEN.

(HERZOGTHUM MEININGEN.)

The reigning Duke is **Georg II.**, born April 2, 1826; the son of Duke Bernhard I. Succeeded, the abdication of his father, September 20, 1866. Married, (1) May 18, 1850, to Princess Charlotte of Prussia, who March 30, 1855; (2) October 23, 1858, to Princess Feodora of Hohenlohe-Langenburg, who died February 10, 1872; (3)morganatically, 18, 1873, to Helena Franz, Baroness of Heldburg. *Offspring* (first marriage):—I. Prince *Bernhard*, born April 1, 1851; married February 18, 1878, to Princess Charlotte, eldest daughter of the late German Emperor Friedrich III.; offspring: Feodora, born May 12, 1879; married September 24, 1898, to Prince Henry XXX. of Reuss, Younger Branch. II. Princess *Marie Elisabeth*, born September 23, 1853. (Second marriage) III. Prince *Ernst*, born September 27, 1859; marriedmorganatically Sept. 20, 1892, to Katharina Jensen, Baroness of Saalfeld. IV. Prince *Friedrich*, born October 12, 1861; married April 25, 1889, to Princess Adelheid of Lippe; offspring three daughters and three sons, Georg, born October 11, 1892; Ernst, born September 23, 1895, and Bernhard, born June 30, 1901.

The line of Saxe Meiningen was founded by Duke Bernhard, third of Ernst I. of Saxony, surnamed the Pious, the friend and companion in of King Gustaf Adolf of Sweden. The Duchy only one-third its present size up to the year 1826, when, by the extinction of the ancient family of Saxe Gotha, the territories of Hildburghausen and Saalfeld fell to the father of the present Duke. The Duke has a civil list of 394,286 marks paid out of the produce of the State domains. Besides these he receives the half of the surplus revenue, which is estimated for each of the three financial years 1912-14 at 40,788*l*.

There is a legislative organization, consisting of one Chamber of twenty-four representatives; four elected by those who pay the highest land and property tax, and four by those who pay income tax an income of 150*l*. or more; sixteen by all other inhabitants. There are elections every years.

Budget for the financial years 1912-14, revenue, 527,816*l*.; expenditure, 445,840*l*.; 81,476*l*. of the revenue drawn from domains. Chief expenditure, Matrikularbeiträge (or contributions) for the Empire, the interest of the public debt, the expenses for the administration of the domains and of the State, and the civil list for the Ducal family. Debt in 1911, 319,288*l*., largely covered by productive State capital.

Population, 278,762 in 1910. In 1910, 271,433 Protestants; 5,233 Catholics; 1,137 Jews. The capital, Meiningen, had, in 1910, 17,186 inhabitants. In 1911 there were 2,244 marriages; 7,854 births alive; 4,389 deaths; surplus of births, 3,464. Of the births (2.9 per cent.) stillborn, and 976 (12.0 per cent.) illegitimate.

In there public elementary schools with teachers (785 male, 118 female) and 48,923 (18.0 per cent. of the inhabitants) pupils.

GRAND-DUCHY OF SAXONY

(GROSSTHERZOGTHUM SACHSEN)

The reigning Grand-duke is **Wilhelm Ernst**, born June 10, 1876, son of the late Prince Karl August and Princess Pauline of Saxe-Weimar; succeeded his grandfather, the late Grand-duke Karl Alexander, January 5, 1901; married, April 30, 1903, **Caroline**, Princess of Reuss, who died January 17, 1905; married a second time, January 4, 1910, to **Feodora**, Duchess of Sachsen-Meiningen.

The family of the Grand duke stands at the head of the Ernestine or elder line of the princely houses of Saxony which include **Meiningen**, **Saxe-Altenburg**, and **Coburg**, while the younger, **Albertine** line, is represented by the Kings of Saxony. In the event of the Albertine line becoming extinct the Grand-duchy of Weimar would be the Saxon throne. Saxe-Weimar was formed into an independent Principality in 1640. In 1806 a temporary subdivision into Principality was finally, the **Principality of Eisenach** in 1761, united into a compact whole under Ernest Augustus (1729-1749) who introduced the principle of primogeniture. At the Congress of Vienna a considerable increase of territory, together with the title of Grand duke was awarded to Duke Karl August known as a patron of German literature.

The Grand-duke has a large private fortune. He has also a civil list of 1,020,000 marks, or 51,000*l*.

The Constitution was granted May 5, 1816, slightly altered October 15, 1850. It was the first liberal Constitution granted in Germany. The legislative power is vested in a House of Parliament of one Chamber, composed of 38 members, five chosen by landowners having a yearly income of from 150*l* upwards; five by other persons of the same rank (one each from the University of Jena, the Chamber of Commerce, the Chamber of Handicrafts, the Chamber of Agriculture, and the Chamber of Labour), and twenty-three by the other inhabitants. All deputies are elected directly. All citizens over twenty-five years of age have the franchise. The Chamber meets every three years. The executive, acting under the orders of the Grand duke, but responsible to the representatives of the country, is divided into three departments.

The budget is granted for a period of three years, from 1911 to 1913, annual income and expenditure, 612,769*l*. The State forests yield a large income, while there is a graduated tax on all incomes, the estimates for which are based on a total income for the population of 2,418,916*l* in January, 1909. Public debt, 145,825*l* in 1908. The debt is less than that of any other German State by real property and stocks.

The Grand duchy consists of the three detached districts of Weimar, Eisenach, and Neustadt, to which belong also some smaller exclaves. Population, December 1, 1910, 417,149. Marriages, 1911, 3,439; births, 11,797; deaths, 7,164, surplus of births, 4,633. Among the births, 375 (3.18 per cent.) were stillborn, and 1,408 (10.94 per cent.) illegitimate. In 1910, 48.94 per cent lived in rural districts. Weimar, the capital, had 34,582 inhabitants in 1910; Eisenach, 38,362; Jena, 38,487; Apolda, 22,610.

In 1910 there were 393,774 Protestants, 19,980 Catholics, 1,323 Jews, and 1,221 other Christians, and 1,221 not Christians.

The University at Jena (see Germany) serves the four Grand-duchies. The public schools in the Grand-duchy at the close of 1910-11 were as follows.—

Schools	No.	Teachers	Pupils
Elementary schools	405	1,159	65,888
Gymnasias	3	50	—
Realgymnasias	—	20	—
Realschule with Realprog.	—	12	174
Oberrealschule (recently founded)	—	20	407
Realschulen (1 private)	5	—	616
Normal schools	2	37	298
Drawing schools	2	7	—
Asylum	1	10	52

Saxe-Weimar contains two Landgerichte, while the district of Neustadt is subject to the jurisdiction of the Landgericht of Gera. Saxe-Weimar and the Reuss Principalities. The Oberlandesgericht of Jena is a court of appeal for the four Saxon Duchies, Schwarzburg-Rudolstadt, the two Reuss Principalities, and parts of Prussia.

British Minister Plenipotentiary—Rt. Hon. Sir W. R. Goetzen, G.C.V.O., K.C.M.G.

REPRESENTATIVE—Seibel (A.), Thuringen [in 'Land and Leute' series] Nienfeld, 1902.

KINGDOM OF SAXONY.

(KÖNIGREICH SACHSEN.)

Reigning King.—Friedrich August III., born May 25, 1865, of the late King Georg; succeeded to the throne on the death of his father, October 15, 1904; married November 21, 1891, to Princess Luise of Tuscany, born September 2, 1870. The marriage dissolved February 11, 1903. Offspring: Prince Georg, born January 15, 1893; Prince Friedrich Christian, born December 31, 1893; Prince Ernst Heinrich, born December 8, 1896; Princess Margarethe, born January 24, 1900; Princess Maria Alix, born September 27, 1901; Princess Anna Monica, born May 4, 1903.

The King has two sisters: Princess Mathilda, born March 19, 1868, and Princess Maria Josefa, born May 31, 1867, married October 2, 1886, to the late Archduke Otto of Austria, widow, November 1, 1900; and two brothers: Prince Johann Georg, born July 10, 1860; married (1) April 8, 1884, to Duchess Isabella of Württemberg (died May 21, 1904) (2) 30, 1900, Princess Immacolata of Bourbon; and Prince Max, born November 17, 1870, became a priest July 26, 1894.

The royal house of Saxony counts amongst the oldest reigning families in Europe. Heinrich of Eilenburg, family of Wettin, was Margrave of Meissen 1089-1108; he was succeeded by his son, Heinrich (1108-1125), and Konrad the Great (1125-1156), well known in Saxon history. The house subsequently spread into numerous branches, the elder of which, the Ernestine line, is represented by the ducal families of Saxe-Altenburg, Saxe-Coburg-Gotha, and Saxe-Meiningen, grand ducal family while the Albertine line, lives in the rulers of the Kingdom of Saxony. 1806 the Friedrich August III. (1763-1827), entering the Rhine, from Napoleon the title of King of Saxony, which was confirmed by Congress of Vienna in 1815. The predecessors of present King Friedrich August I. (1806-1827), Anton (1827-1830), Friedrich August II. (1830-1854), Johann (1854-1878), Albrecht (1878-1902), Georg (1902-1904).

King Friedrich August III. has a civil list of 3,741,902 marks per annum. Exclusive of the sum as appanage of the Prince Johann Georg, and the appanage of the Princess Mathilde amounting (1910-11) 349,554 marks. The formerly royal domains consisting chiefly of extensive forests, became, in 1880, the property of the State.

Constitution and Government.—The Constitution of Saxony was adopted September 4, 1831; but it has undergone alterations up to 1909. The crown is hereditary in the male line; but, at extinction of the latter, also the female line. The sovereign comes of age at the completed eighteenth year, and, during his minority, the heir to the throne is regent.

The legislature is jointly in the King and Parliament, the latter consisting of two Chambers. The Upper Chamber comprises princes of the royal who are of age; a deputy of the (Lutheran) archbishopric of Meissen, a proprietor (or one deputy) of the 'Herrschaft' of Wildenfels, one of the proprietors of mediatised domains, held by five owners, one deputy of the University of Leipzig, the two proprietors of 'Standesherrschaften,' a Lutheran 'Oberhofprediger' at Dresden, the Dean of the Roman Catholic Chapter of St. Peter at Bautzen in his character of 'Apostolic Vicar' at Dresden, the superintendent at Leipzig, a deputy of the collegiate institution of Wurzen, one of the proprietors of four estates in fee, twelve deputies elected by the King of other nobiliary estates for life, ten noble proprietors and five other members without restriction nominated by the King for life, and the burgomasters of eight towns. The Lower Chamber is made up of forty-three deputies of towns and forty-eight representatives of rural districts. The qualification for a seat in the Upper House is the possession of a landed estate worth at least 4,000 marks a year, and the qualification for the right of electing to the Lower House is the possession of a landed estate worth at least 3,000 marks a year, which qualification, however, is not required by the *ex officio* deputies of chapters and of the university. Members of the Lower House must be Saxon citizens thirty, and pay some direct State taxes, and electors are all Saxon citizens above twenty-five years of age who pay a direct contribution. Every elector has a right to one, two, or three additional votes according to (1) the amount of his income, (2) the value of his landed property, (3) the possession of an income (by public officials) over a certain amount, (4) his right as an elector for the Chamber of Industry or the Chamber of Agriculture, (5) his scientific education, (6) his scientific or artistic profession, (7) his age (an elector over 50 years of age has an additional vote). The members of both Houses, with the exception of the hereditary and certain of the *ex officio* members, are each allowed 12 marks per day (6 marks per day if they reside in the town where the Legislature meets) during the sittings of Parliament, and an allowance for travelling expenses. Both Houses may propose new laws, no taxes may be imposed, levied, or altered without the sanction of both.

Last election, 1911 Conservatives, 29, National Liberals, 26, Radicals, 10, Socialists, 1.

The executive is in the King and in the Ministry of the Interior (*Gesamminiisterium*), and in the separate Ministries of Justice, of Finance, of the Interior, of Education and Ecclesiastical Affairs, of Foreign Affairs, and of War.

Area and Population

Governmental Divisions	Area, Eng Hch Sq Miles	Population		Population per Sq Mile
		—	Dec 1900	
Dresden	1,674	1,350,287	1,284,397	806
Leipzig	1,378	1,234,623	1,146,423	9
Bautzen	953	443,549	426,420	467

Total	5,787	4,806,661	4,508,601	796

EMPIRE :—KINGDOM ■ SAXONY

The growth of the population ■ shown in the following table :—

Year	Population	Density per Sq. ■	Annual Increase per Cent.	Year	Population	Density per Sq. Mile	Annual Increase per Cent.
1875	2,760,586	471	1.99	■	4,302,216	720.6	2.10
1885	3,182,008	548	1.41	1905	4,508,601	770.1	1.46
1895	3,787,658	■	1.63	1910	4,406,861	■	1.33

The conjugal condition of the population ■ follows in 1910 :—

	Males	Females	Total
Children	784,656	790,512	1,575,168
Adults—			
Unmarried	553,954	557,231	1,111,185
Married	916,325	914,939	1,831,264
Widowed	54,798	198,603	248,396
Divorced ■ separated .	14,265	26,478	40,738

Saxony contains (1900) 47,009 Lusatian Wends, most of them in the district of Bautzen. In 1900 there ■ 161,534 foreigners (exclusive of Germans belonging to other German States).

The movement of the population is shown in the following table :—

Year	Marriages	Total Births	Stillborns	Illegitimate	Total Deaths	Surplus of Births
1909	88,541	111,490	4,754	20,062	75,766	60,885
1910	89,807	124,680	4,704	20,115	72,351	77,644
1911	41,386	130,257	4,374	19,700	70,750	46,133

The population of the principal towns was, 1910 (including the municipalities incorporated up to July 1, 1912) :—

Leipzig .	540,850	Zittau .	37,064	Rochenbach .	21,665
Dresden	540,365	Freiberg	26,387	Grimmitchau	28,618
Cheimnitz	287,807	Meißen	25,805	Meyers .	25,470
Plauen .	121,272	Bautzen	32,754	Glauchau .	26,156
Zwickau	73,542				

Religion.—Although the royal family is Roman Catholic, the vast majority of the inhabitants of Saxony ■ Protestants. In 1910, Lutherans, 4,601,510 ; Roman Catholics, 233,872 ; Reformists, 16,531 ; other Christians, 30,548 ; Jews, 17,587 ; unclassified, 6,613. Of the Lutheran Church, the chief governing body is the 'Landes-Consistorium' or National Consistory ■ Dresden ; and ■ also has a representative Synod (*Synode*) with 35 clerical and ■ lay members (1901).

Instruction.—In 1911, there were 2,303 public Protestant and 56 Roman Catholic common schools, ■ private and chapter schools, and 1,948 advanced common schools (*Fortbildungsschulen*), or altogether 4,365, with ■ total attendance of 971,915. ■ addition there were 1 technical high school ■ Dresden (winter term, 1911-12, 1,135 students), 1 mining academy ■ Freiberg

(358 students), 1 forestry academy at Tharandt (109 students), and 1 veterinary high school ■ Dresden (280 students); further, 11 Gymnasias, ■ Realgymnasias, 5 'Oberrealschulen,' ■ 'Realschulen,' 26 seminaries, ■ higher girls' schools and 'Studienanstalten' (1912), altogether 106 educational establishments, with ■ total attendance of 32,927 (1911), exclusive of the University and ■ large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany (5,170 students). ■ under Germany.

Justice, Crime, and Pauperism.—Saxony has ■ 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 111 'Amtsgerichte.' The 'Reichsgericht' has its seat at Leipzig. In 1909, 30,798 persons ■ convicted of criminal offences.

Recent statistics of pauperism are not available

Finance.—The financial period extends over ■ term of two years. The budget for each of the two years 1912-13 estimated the receipts from State property and taxes at 19,161,297*l.*, and the cost of working and of collection ■ 18,556,886*l.*, the surplus being 5,604,411*l.* Other receipts were estimated at 3,499,836*l.*, and expenditure at 9,104,247*l.*, so that the ordinary revenue and expenditure balanced at 22,661,133*l.* The extraordinary expenditure for 1912-1913 was put at 3,834,385*l.* More than one-half of the total revenue is derived from domains, forests, and State railways. Expenditure on public debt, 1,989,475*l.* for each of the years 1910 and 1911. Public debt, 1911, 48,494,725*l.* incurred almost entirely on railways and telegraphs, and other works of public utility.

Production and Industry.—Saxony is, in proportion to its size, the busiest industrial State in the Empire, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the leading branch of industry, but mining and metal working ■ also important.

In 1911, of the total area, 2,466,864 acres ■ under cultivation, viz. :— 2,028,246 ■ (82·32 per cent.) arable; 422,370 ■ (17·12 per cent.) meadow; 15,689 ■ (0·63 per cent.) pasture; 609 ■ (0·03 per cent.) vineyard; besides 950,256 acres under wood, of which 445,588 ■ belonged to ■ State.

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lbs.) in 1910 :—

Crop	Acres	Metric ■	Crop	Acres	■ tons
■	154,771	147,441	Oats	479,619	312,711
Rye	516,160	385,531	Potatoes	311,031	290,384
Barley	64,084	40,306	Hay	422,370	391,507

On May 1, 1911, the factory hands in Saxony ■ returned ■ 757,518, of whom 494,848 ■ males and 262,670 females; 246,069 ■ engaged in the textile industry, 121,208 in the manufacture of machinery and tools, 54,439 in industries connected with stone and earth, and 47,627 in those connected with paper and leather. The total number of factories and industrial establishments was 30,623. The following shows the mining ■ for five years :—

Year	Main Industry				Other		Total	
	No. of	Production in metric tons		in 1,000 marks	No. of Mines	Hands	No. of Mines	Hands
		Coal	Lignite					
1899	109	25,951	4,879,441	2,455,840	69,455	2,504	1,819	143
1900	105	31,896	7,908,600	75,768	26	2,373	1,543	84,287
1900		33,437	8,309,000	75,915		2,159	1,358	127
1910	110	33,294	8,691,000	75,060		1,941	1,438	85,395
1911	108	32,964	7,050,000	4,825,000	76,560	28	1,622	1,816
								84,606
								77,000

¹ Exclusive of mines not worked.

In 1910 the Saxon iron-foundries produced 512,844 metric tons of finished iron, value 4,697,408*l*. In 1910-1911, breweries produced 87 796,580 gallons of beer; and 554 distilleries consumed 118,163 metric tons and 294,247 gallons of material in the manufacture of spirits and produced 2,696,785 gallons of pure alcohol.

British Minister Resident.—A. C. Grant Duff (residing at Dresden).

British Consul.—Ch. W. Palmié (residing at Dresden).

There are vice-Consuls at Dresden, Leipzig and Chemnitz.

SCHAUMBURG-LIPPE

(FORSTENTHUM SCHAUMBURG-LIPPE.)

The reigning Prince is Adolf, born February 28, 1883, son of Prince Stephen Georg; succeeded his father April 29, 1911. *Brothers and Sister*:—1. Prince Moritz, born March 11, 1884. 2. Prince Wolrad, born April 19, 1887. 3. Prince Stephan, born June 21, 1891. 4. Prince Heinrich, born September 25, 1894. 5. Prince Friedrich Christian, born January 6, 1906. 6. Princess Elisabeth, born May 31, 1908.

of the Reigning Prince.—1. Princess Hermine, born 6, 1860, married, February 16, 1876, to Maximilian, Duke of Württemberg, who died July 28, 1888. 2. Prince Hermann, born May 19, 1868. 3. Prince Otto, born Sept. 18, 1864; married (morg.) 21 1898, to Anna von Koppen, created Countess von Hagenburg. 4. Prince Adolf, born July 20, 1869; married, November 19, 1890, to Princess Victoria Frusela, daughter of the late Emperor Friedrich. The reigning house of Lippe is from a count of the same name who lived in the sixteenth century.

SCHWARZBURG-RUDOLSTADT—SCHWARZBURG

Area, 131 sq miles population (1910), 46,656

There is a legislative Diet of 15 members, two appointed by the Prince, one nominated by the nobility, one by the clergy, one by certain functionaries, and the rest elected by the people. To the Prince belongs part of the legislative and all the executive authority.

For the financial year 1911 the revenue and expenditure were 45,130/. Public debt, 19,000/.

Except 653 Catholics and 246 Jews, the inhabitants are Protestant. Buckeburg, the residence town, had, in 1910, 5,740 inhabitants.

British Consul-General—W. Hearn (Hamburg).

OFFICIAL PUBLICATION

Schaumburg-Lippische Landesanzeigen bzw. Landesverordnungen

SCHWARZBURG-RUDOLSTADT.

(FÜRSTENTUM SCHWARZBURG RUDOLSTADT.)

The reigning Prince is Gunther, born August 21, 1852, succeeded his father Prince Georg, Jan. 19, 1890, married December 9, 1891, to Princess Anna Luise of Schaumburg-Lippenburg.

The Schwarzburg-Rudolstadt line is a younger branch of the house of Schwarzburg, being descended from Albrecht VII, 1605, who died in the middle of the seventeenth century. The present sovereign has a civil list of 300,000 marks. The State domains are the property of the reigning family.

For all legislative measures the Prince has to obtain the consent of a Chamber of Representatives of sixteen members, four elected by the highest assessed inhabitants, and the rest returned by the general population. The deputies are elected for three years.

There are triennial budgets. For the period 1909-11 the annual public income and expenditure were settled at 144,766/ each. Public debt (1911), 227,206/.

Area, 363 sq miles, population (1910), 100,702, Protestant (1910), 99,210, Catholics, 1,288, other Christian sects, and Jews, 78. Rudolstadt, the capital, had (1910) 12,937 inhabitants.

(FÜRSTENTUM SCHWARZBURG-SONDERSHAUSEN.)

Since the decease on March 28, 1909, of Prince Karl Gunther, the principality of Schwarzburg-Sondershausen has been united with Schwarzburg-Rudolstadt by a personal bond of union under the government of Prince Gunther. (See Schwarzburg-Rudolstadt.)

The princes of the house of Schwarzburg belong to a very ancient and wealthy family. The small territory of the house was left undisturbed at the Congress of Vienna. But it was now transferred to the state and in return for its cession the Prince of Schwarzburg-Sondershausen receives an annual grant (Dotation) of 25,000/.

Restricted legislative rights are given to a Diet which consists of eighteen members, six appointed by the Prince, six elected by certain highly taxed landowners and others, and six elected by the inhabitants in general. The executive part of the legislative power is in the hands of the Prince, who exercises his authority through a Government divided into five departments.

For the years 1912 to 1915 the annual revenue and expenditure ■■■ estimated to amount to 170,887½ Public debt (April 1, 1912), 201,584½ In the debt is included ■ railway loan of 115,000½, against which there are claims amounting ■ 112,000½

Area, ■■ sq miles; population (1910), 89,917, mostly Protestant The chief towns, Sondershausen and Arnstadt, have respectively 7,769 and 17,841 inhabitants

WALDECK

(FÜRSTENTUM WALDECK)

Reigning Prince, Friedrich, born January 20, 1865; the ■■■ of Prince George Victor and Princess Helena of Nassau; succeeded at the death of his father, May 12, 1893, married, August 9, 1895, to Princess Bathildis of Schaumburg Lippe, offspring Prince Jonas, born May 13, 1896, Prince Max, born September 13, 1898, Princess Helene, born December 22, 1899, Prince Georg Wilhelm, born March 10, 1902

Brother and sisters: ■ the reigning prince are —I Princess Pauline, born October 10, 1863, married May 7 1881 to the Hereditary Prince Alexis of Bentheim Steinfurt II Princess Emma born August 2 1866, married January 7 1879, King Willem III of the Netherlands, widow November 20 1894 III Princess Helene born February 17, 1861 married April 27, 1883 to Prince Leopold Duke of Albany, son of Victoria, Queen ■ Great Britain widow March 23 1884 IV Princess Elisabeth, born September ■ 1873, married, May 9 1900 to Alexander hereditary Count of Erbach-Schönberg V Prince Wolrad Friedrich (brother on the father's side) born June 22 1892

After the war between Austria and Prussia ■ the end of 1866 ■ 'Treaty of Accession' signed by the Prince on July 14, 1871 by which he surrendered his chief sovereign rights ■ King Wilhelm I for ten years, retaining merely nominal power, and renewed November 24 1877, till January 1 ■■ A Treaty made March 3 1887, continued the arrangement for the future making it terminable on notice given

There ■■ legislative assembly of fifteen members, with authority restricted to purely local affairs In terms of the 'Treaty of Accession' all public officials ■■ appointed by the King of Prussia, and take the oath of fidelity to him Prussia also manages the finances of the Principality

The ■■■■■ and expenditure for 1912 was 74,670½, and for 1913, 75,800½

The debt ■■ July 1, 1910, was 77,595½

Area, 488 sq miles, population (1910), 61,707 (30,544 males and 31,163 females) Protestants 57,817, Catholics, 2,858 other Christians, ■■, Jews, 590, unclassified, ■■ The residence town, Arolsen, had 1,793 inhabitants ■ 1910

WÜRTTEMBERG.

(KÖNIGREICH WÜRTTEMBERG)

Reigning King.—Wilhelm II., born February 25, 1848, ■■■ of the late Prince Friedrich of Württemberg (cousin ■ the late king ■■ I) and of the late Princess Katharine of Württemberg (sister of the ■■ king); ascended the throne on the death of ■■ I, October 6, 1891. ■■■■ (1),

February 15, 1877, to Princess *Marie* of Waldeck Pyrmont, who died April 30, 1882, ■■■ Princess *Pauline*, born December 19, 1877, married October 29, 1898, to Prince Friedrich of Wied (2) April 8, 1886, Princess *Charlotte* of Schaumburg-Lippe, born October 10, 1864

The former Duchy of Württemberg became, with a large increase of territory, an electorate in 1803, and ■■■ erected into a kingdom by the Peace of Pressburg, 1805, and by a decree of January 1, 1806. The civil list of the king amounts to 102,290*l.*, with additional grants of 2,528*l.* for the other members of the royal family

Constitution ■■■ Government—Württemberg ■■■ constitutional hereditary Monarchy the Constitution of which bears date September 25 1818, but certain changes were made by the law of July 16, 1906. The Constitution vests certain powers ■■■ the Landstände ■■■ two Estates of the realm called together at least every two years to discuss and sanction the estimates. In the first chamber are 1. The princes of the Royal House, ■■■ the heads of princely ■■■ county (gräflich) families to whose possessions ■■■ vote in the imperial or provincial diet was formerly annexed, also the heads of ■■■ other families conditionally, 3 members (not more than 6) appointed by the king, 4 ■■■ members of knightly rank, ■■■ ecclesiastical dignitaries, 6 ■■■ a representative of the University of Tübingen, and one of the technical high school of Stuttgart, 7 ■■■ representatives of commerce and industry, 2 of agriculture and 1 of handicrafts. The second chamber consists of 1 ■■■ deputy from each district (Oberamtsbezirk), 2 ■■■ deputies from Stuttgart and 1 from each of 6 other towns, 3 ■■■ deputies from the Neckar and Jagst circle, and ■■■ from the Black Forest and Danube circle. All the members of the second Chamber are chosen for 6 years, and they must be thirty years of age, property qualification is not necessary. The president of the Upper Chamber is appointed by the king the vice-president is elected by the Chamber from among the married princes and nobles (royal princes and life members being ineligible), the president and vice president of the second Chamber are both elected by the deputies. When the Chambers are not sitting they ■■■ represented by a committee of twelve persons, consisting of the presidents of both Chambers, two members of the Upper, and eight of the Lower House. A special court of justice, called the Staats Gerichtshof, is appointed guardian of the Constitution. It is composed of ■■■ president and twelve members, ■■■ of whom, together with the president, are nominated by the king, while the other six ■■■ elected by the combined Chambers. Members of both Chambers receive 1*l.* marks a day for attendance, ■■■ free pass ■■■ the railways, ■■■ reimbursement of incidental travelling expenses

Last election, 1906. Conservatives, 15, German Party 14, Socialists 16, People's Party, 23, Centre, 25

The executive is ■■■ Ministry of State of six ministerial departments. The heads being the Ministers of Justice, of Foreign Affairs and the Royal House, to whose province belongs also the administration of the State railways, posts, and telegraphs, of the Interior, of Ecclesiastical Affairs and Public Education, of War, and of Finance. There ■■■ also ■■■ Privy Council (Geheimer Rat), of which the Ministers and ■■■ Councillors (Wirkliche Staatsräte) ■■■ members, and which ■■■ sovereign has ■■■ right to consult ■■■ all ■■■

For administrative purposes the country is divided into ■■■ circles (Kreise) 64 districts (Oberämter), and 1,890 communes (Gemeinden)

Area and Population

Circles	Area in Sq Miles	Population		Population per Sq Mile 1910
Neckar	1,286	882,569	811,478	685.5
Black Forest (Schwarzwald)	1,844	570,820	541,662	299
Jagst	1,985	414,969	407,059	205
Danube (Donau)	2,419	569,216	541,980	229.0
Total	7,534	2,437,574	2,302,179	323.5

In 1910, there were 1,192,392 males and 1,245,182 females.

In 1910, 872,192, or 35.8 per cent, lived in communes of 5,000 inhabitants and upwards, and 1,565,382, or 65.5 per cent, in other communes. Foreigners, 25,848 in 1910. According to the last census of employment (1907), of the total population of 2,338,010, 882,421 were engaged in agricultural pursuits, 934,971 in industry, 224,077 in trade and commerce, 10,971 in domestic service, 124,481 in the army and the professions, and 161,139 without any calling.

The movement of the population for five years was —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1907	18,026	77,828	2,098	6,365	46,206	31,622
1908	18,073	78,584	2,216	6,648	47,010	31,574
1909	17,511	77,012	2,199	6,303	45,560	31,452
1910	17,449	74,016	1,985	6,146	43,611	30,405
1911	17,964	71,658	1,971	6,027	45,525	26,133

The population in 1910 of the largest towns was as follows —

Stuttgart ¹	286,218	Göppingen	22,373	Schwenningen	15,411
Ulm	56,109	Gmund	21,312	Heidenbach	14,244
Heilbronn	42,688	Tübingen	19,076	Zuffenhausen	12,752
Esslingen	32,216	Heidenheim	17,780	Ebingen	11,423
Reutlingen ¹	29,763	Tuttingen	15,862	Aalen	11,347
Ludwigsburg ¹	24,926	Ravensburg	15,594		

¹ Including extensions.

Religion.—The various creeds distributed as follows at the census of 1910:—

Circle	Protestant	Roman Catholic	Other Christians	Jews	Muslims
Neckar	762,178	105,617	7,404	6,276	1,094
Black Forest	418,409	147,507	3,381	1,359	11
Jagst	275,976	185,475	1,048	2,412	—
Danube	214,620	351,396	1,080	1,935	235
Total	1,671,183	789,995	12,863	11,982	1,551

In the king is vested the right of guardianship and direction over the churches, and, as far as he belongs to the Evangelical Church, also the conservation of the episcopal rights in this church. The administration of the Evangelical Church is in the hands of a consistorium of one president, nine councillors, and three general superintendents, at Ludwigsburg, Heilbronn, Reutlingen, Tübingen, Hall, and Ulm. The representative body of the Evangelical ecclesiastical communes is the Evangelical Landes synode, consisting of 25 clerical and 25 lay representatives of the dioceses and 1 of the evangelical theological faculty of the university, with 3 clerical and 3 lay members appointed by the evangelical princes. It meets at least every six years, oftener if necessary. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The State exercises its rights over the Catholic Church through the Catholic Kirchenrat, which is appointed by the king and is subject to the Ministry of Worship. The Jews likewise are under a special council (Oberkirchenbehörde), nominated by the king and the proposition of the Minister of Ecclesiastical Affairs and Public Education.

Instruction.—Education is compulsory, and there must be one public school or more in every commune. According to official returns, there is not an individual above the age of ten, unable to read and write. In 1911 there were 2,250 places with elementary schools with 6,081 teachers, attended by 362,708 pupils, 104 Real-schools with 17,009 pupils, 22 grammar schools (Elementar-schulen) with 4,939 pupils, 18 gymnasia, of which 4 are training colleges for the Protestant clergy, 6 Realgymnasien, 5 Progymnasien and 7 Real progymnasien, 50 Latin schools, having together 9,287 scholars. For girls there are 28 high schools with 6,776 pupils and 1 gymnasium with 76 pupils. There are, besides, the Technical High School at Stuttgart, the Veterinary High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The State funds appropriated to education amounted in 1909/10 to 588,100/ For Tübingen University under Germany.

Justice.—In addition to other tribunals there is one Oberlandesgericht at Stuttgart. In 1909, 20,029 persons were convicted of crimes.

Finance.—Estimated revenue and expenditure for two years ending March 31 —

Sources of Revenue	1911/12	
	Marks	£
Forests, Farms, Mines, Metal, and Salt Works	14,213,212	13,701,342

German Empire—Matricular contribution to	1,000,000	1,000,000
Postage	8,190,906	3,219,785
Increase in Salaries in the Civil Service		
Total Expenditure	106,886,630 (25,444,591)	112,568,160 (25,628,408)

Public debt, 30,425,9767, divided into the general debt and the railway debt. The latter amounted to 28,924,1167 on April 1, 1911

Army.—The troops of Württemberg form the 13 corps of the German Army (q v). Their strength on a peace footing is about 24,454

Industry.—Württemberg is primarily an agricultural State, and 2,918,900 acres, or 64 per cent. of the entire area, are under cultivation, and 1,452,240 acres, or 31 per cent., under forest

Areas under the principal crops and yield in metric tons in 1911 —

	Area	Yield, tons		Area	Yield, tons
Wheat	104,621	71,166	Oats	379,567	229,314
Rye	92,652	51,744	Potatoes	251,915	759,170
Barley	250,297	177,971	Hay	1,031,387	1,934,100
Spelt	230,220	173,869	Hops	7,859	2,175

In 1912, wheat, spelt, and rye produced 346,000 tons, barley, 171,000; oats, 195,700; potatoes, 1,297,200; hops, 22,260 (all preliminary figures)

Vines, 37,803 acres, yield 3,643,134 gallons of wine. In 1910 were produced 37,680,676 gallons of beer. The total value of the minerals raised in 1910 — 218,3507. There are active — foundries and salt works

British Minister—Sir V. Coibett, K C V O. (residing at Munich)
Consul at Stuttgart—J. H. Gastrell.

GREECE

(KINGDOM OF HELLAS)

Reigning King.

Konstantinos I, born August 2nd 1868 the eldest son of George (George I) succeeded ■ the assassination of his father, March 18 1913, married, October 27, 1889, to Queen *Sophia*, born June 14, 1870 Princess of Prussia, sister of the Emperor William II

Children of the King

I Prince *Georgios* born July 19, 1890 II Prince *Alexandros* born August 1, 1893 III Princess *Helen* born May 2, 1896 IV Prince *Pavlos*, born December 14, 1901 V Princess *Irene*, born February 14, 1904

Brothers and Sisters of the King

I Prince *Georgios*, born June 24, 1869, High Commissioner ■ Crete, 1898 1906, married, November 21, 1907, to Princess *Maria*, only child of Prince Roland Bonaparte, offspring — Prince *Petros* born December 3, 1908, Princess *Eugenia*, born February 11, 1910 II Prince *Nikolaos*, born January 21, 1872, married, August 29, 1902, to the Grand Duchess *Helena Vladimirovna*, daughter of the Grand Duke Vladimir of Russia, offspring, Princess *Oliga*, born June 11, 1903, Princess *Elizabeth* born May 23, 1904 Princess *Marina* born November 6 1906 III Princess *Maria*, born March 3, 1876, married, April 30 1900, to the Grand Duke George Mikhailovitch of Russia IV Prince *Andreas*, born February 1, 1882, married, October 7, 1908, to Princess *Alex*, daughter of Prince Louis of Battenburg, offspring, Princess *Margaret* born April 17, 1905 Princess *Theodora* born May 30, 1906 V Prince *Christophoros*, born August 10 ■

By decision of the Greek National Assembly of April 14, 1913, ■ civil list of 2,000 000 drachma (80,000 £) ■ settled on the king, and an annual ■ of ■ ■ drachma on the Queen Mother

Greece a province of the Turkish Empire ■ the latter part of the 15th century, gained its independence ■ the insurrection of 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the protection of Great Britain, France, and Russia The crown ■ accepted by ■ Otto of Bavaria, who ascended the throne January 25, 1833 being under the age of eighteen He was expelled the Kingdom after ■ reign of ■ years, ■ October, 1862, which event ■ followed by the election, under the directing guidance of the three protecting Powers, of King George I in 1 ■

The King, according to Art ■ of the Constitution of 1864, attains his majority upon completing his eighteenth year Within two months at the most the King must convocate the *Legislature* If the ■ to the throne ■ either ■ ■ absent ■ the ■ of the King's decease, and no Regent ■ been appointed, ■ Legislative Chamber has to assemble of its own accord within ten days after the ■ of that event The constitutional royal authority in this ■ has to be exercised by the ministerial council, until the choice of ■ Regent, ■ the arrival of the ■ to the throne The

present sovereign is allowed, by special exception, to adhere to the religion which he educated, the Protestant Lutheran faith, but his heirs and successors must be members of the Greek Orthodox Church

Constitution and Government.

The Constitution of Greece, adopted October 29, 1864, vested the whole legislative power in a single chamber, called the *Bulé*, consisting of 285 representatives, elected by manhood suffrage (in the proportion of 1 for every 12,000 inhabitants) for the term of four years. In 1911 the Constitution was modified and a substitute for a second chamber adopted in the re-establishment of the Council of State. The functions of this Council will be the elaboration of *Projets de Loi* and the annulling of official decisions and acts which may be contrary to law. The new Constitution came in force on June 1, 1911. The deputies must be at least 25 years of age and their number has been fixed at 181. The elections take place by ballot, and each candidate must be put in nomination by the requisition of at least one thirtieth of the voters of an electoral district. The *Bulé* must meet annually for not less than three, nor more than six, months. No sitting is valid unless at least one third of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members. Every measure, before being adopted, must be discussed and voted, article by article, twice, and on three separate days. A revision of any non fundamental provisions of the new Constitution may be demanded, after the lapse of ten years, by an ordinary Parliament by a two thirds majority, provided that the second vote shall not be taken until at least one month after the first, and provided also that such revision shall be carried out by a newly elected Chamber. The Chamber of Deputies, unless specially convoked at an earlier date, for extraordinary occasions, must meet on October 1 (old style) of every year. The deputies are paid 1,000 drachmai each per session except those living in Athens, who receive only 800 drachmai. In case of absence extending over more than five sessions, the deputy has 100 drachmai per session taken from the total amount due to him.

Chamber of Deputies (March 26 1912) Ministerialists, 147, Opposition, 13 (8 supporters of M Theotokis, 3 of M Zaimis, 7 of M Mavromichalis, 1 of M Rallis and 1 are Independents)

The Ministry, appointed October 19, 1910, is as follows —

Premier and Minister of War — M. Venizelos
Minister of Foreign Affairs — M. Coromilas
Minister of the Interior — M. Repoulis
Minister of Finance — M. Alexandre Thomaidis
Minister of Commerce and Agriculture — M. Michalakopoulou
Minister of Justice — M. Rallis
Minister of Public Instruction — M. Tsannoulas
Minister of Marine — M. Stratos

Area and Population.

At the close of 1879 Greece had a population (including Thessaly in 1881) of 1,973,768; in 1889, 2,166,008, in 1896, 2,432,806, on October 27, 1907, 2,631,952. In 1896 the population consisted of 1,266,816 males and 1,166,990 females, in 1907, 1,824,942 males and 1,807,010 females.

RELIGION

Estimated population 1909, 2,666,000. The ■■■■ of Greece is about 25,014 square miles, and thus has about 105 inhabitants to the square mile. The population of the nomes or departments into which Greece is divided ■■■■ follows¹—

Nomes or Departments	Population 1907	Nomes or Departments	Population 1907
Acarnania and Aetolia	141,405	Eurytania	47,192
Achaia	150,915	■■■■	24,941
Argolis	162,324	Lacedaemon	87,106
Attica	81,913	Laconia	61,522
Borotia	41,290	Larisa	95,086
Cephalonia	941,247	Lencaia	41,186
Corfu	65,616	Magnesia	162,742
Corinthia	71,335	Messenia	127,991
Cyclades	96,571	Phocis	82,246

Euboea	139,378	Trikkala	90,546
Evros	103,810	Triphyia	90,529
Flourea	116,903	Zante	42,502
		Total	2,681,952

¹ See note under population of Turkey

In recent years there has been considerable emigration. According to United States statistics, the number of Greek immigrants into the States was, in 1904-05, 10,515; 1905-06, 19,490; in 1906-07, 36,580; in 1907-08, 21,489; ■■■■ 1908-09, 14,111; in 1909-10, 25,888; 1910-11, 48,000

The principal towns are the following, with populations, 1907 —

Athens	167,479	Larisa	18,041	Calamata	15,397
Piraeus	73,579	Trikkala	17,809	Chalcis	10,958
Patras	37,724	Hermoupolis	17,773	Tripolitaa	10,958
Corfu	18,978	Pyrgos	13,690	Laurium	10,007
Volo	23,563	Zante	13,580	Syra	18,132

Religion.

The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. By the terms of the Constitution of 1864, the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship ■■■■ guaranteed to all other sects. Nominally, the Greek clergy ■■■■ allegiance to the Patriarch of Constantinople, though he now ■■■■ no governing authority; he is elected by the votes of the bishops and optimates subject to the Sultan; his jurisdiction extends over Thrace and ■■■■ countries, including Bosnia and Crete, as well as the greater part of Asia Minor. The real ecclesiastical authority, formerly exercised by him in Greece, was annulled by the resolutions of ■■■■ National Synod, held at Nauplia in 1833, which vested the government of the Orthodox Church, within the limits of the Kingdom, in ■■■■ permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and ■■■■ archbishops and bishops, who must during their year of office reside at ■■■■ of the executive. The Orthodox Church has ■■■■ archbishops and 8 bishops in Northern Greece; 4 archbishops and 8 bishops in the Peloponnesus; ■■■■ bishops in the islands of the Greek Archipelago; and one archbishop and ■■■■ bishops in ■■■■ Ionian Islands. There ■■■■ (1901) 171 monasteries and 9 nunneries, with 2,205 monks and 191 ■■■■. The Roman

For the year 1912 the total revenue and expenditure were as follows:—

Sources	Revenue	Branches	Expenditure
	Drachmas		Drachmas
Direct	24 100,001	Public debt	91 048
Duties	1 100,000	Pensions	9 130
Stamps and dues	18 491,100	Civil list	1 525 000
Monopolies	14 041 000	Chamber of Deputies	701,340
State property,	8 105	Ministries	
State property,	772,100	Foreign Affairs	4 457 740
Post and telegraph	5 889 000	Justice	1 703 002
Various	13,076,040	Interior	17,774
		Worship and Instruction	1 144,700
Total ordinary	130 047 544	War	21 580 940
Extraordinary	4 191,101	Marine	4 801 511
		Commerce and Agriculture	1 640 784
		Finance	25,781 278
		Various	164,600
Total	144 119,145	Total	143 821,200

The outstanding external debt of Greece amounted on December 31, 1912, to 92,493,360. The currency debt in December, 1911, stood at 180,225,845 paper drachmas. The estimated charge for the whole Greek debt in 1911 was 33,570,811 paper drachmas.

Defence.

Military service in Greece is compulsory and universal, with very few exemptions. It commences in the 21st year, and lasts for the long period of 36 years. The term of service in the active army, or first line, is 5 years, followed by 11 in the first reserve, and 9 years in the second reserve. The soldier then passes to the National Guard (territorial army) for 7 years, and completes his service with 7 years in the reserve of this force. Postponements and reductions of service are permitted in certain cases, but are conditional on the payment of a tax. Men in excess of the annual contingent of recruits receive 6 months' training in the ranks, and are then transferred to the 'Liability' reserve, which corresponds to the supplementary reserve of other armies. To counterbalance the extra expense, a large proportion of the men in their 2nd year are regularly released before their full term has expired.

The field army is to consist of 4 divisions, each containing 3 regiments of 3 battalions, and 1 or 2 battalions of *evzones* (light infantry). There are four field artillery regiments of 26 batteries all told, and 2 regiments of mountain artillery of 4 batteries, also 3 heavy batteries. There are 4 cavalry regiments of 16 squadrons all told, and two engineer regiments of 17 companies all told. Batteries have 4 guns. The total strength of the army in the field would be something over 80,000 men. The peace strength of the army is fixed at 1,888 officers and 22,000 other ranks, for 1912.

On mobilisation the reserve is to form divisions corresponding to those of first line, but at the present time the reservists of the active army would apparently be required to bring units to war strength. The 'liability' reserve, if not also absorbed by the first line, would be available to make good losses on field.

The territorial army is, of course, primarily intended for home defence, but it is understood that certain classes are liable to be drafted to the army in case of war. The territorial army has no definite organisation.

GREECE

present, and the men receive training. The country is divided into zones, or regions.

The Greek infantry are armed with the Mannlicher-Schönauer rifle, model 1903. The field artillery is armed with Schneider-Canet Q.F. guns.

The Greek Navy was re-organised in 1906, and, in view of the subsequent expansion of the Turkish fleet, a corresponding increase is under consideration. The principal vessels are as follows:—

	Launched	Displacement Tons	Armour Belt In	Armour In	Principal Armament	Torpedo Tubes	Horse Power	Max. Speed Knots
Spetsai	—	5,000	12	13½	3 10"3, 5 6in; 1 4in	5	6,700	17
Hydra	—							
Panara	1890	10,314	6	6½	4 9"2, 5 7"2in.	3	10,000	22½
Averoff	1910							
New Ship	Building	—	—	—	—	—	—	—

There are eight destroyers of about 400 tons launched in 1906-07. Some new boats are building or projected. There are also 11 old torpedo boats, some of which have recently been re-boilered, one submarine, and a number of miscellaneous craft, including an old battleship, *Raulus Georgion*, which dates from 1868.

The *Averoff* was acquired through a deceased millionaire of that name leaving the bulk of his fortune for improving the navy.

Production and Industry.

Greece is mainly an agricultural country, and the economic life is directly dependent on the products of the soil. The cultivated area extends to about 5,563,100 acres, of which about 1,112,000 are under cereals, 1,200,000 fallow, and 2,025,400 covered with forest; there are, besides, about 5,000,000 acres under pasture, and 3,000,000 acres of waste land. By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads, and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

While there are a few large proprietors in Greece, the land is to a large extent in the hands of peasant proprietors and *metayer* farmers. On the whole, agriculture is in a backward state, though the soil is of unusual fertility. The cereals grown are wheat, barley, rye, maize, meslin. The most favoured and best cultivated crop is the currant, which is raised in vast districts. The yield for 1911 was 325,000,000 lbs. Thirty thousand stremmata (stremma=0.2,471 acre) of currant plantations have been uprooted in accordance with a law to limit the production of currants. Five thousand stremmata still remain to be destroyed. Olives are next in importance to currants, yielding 31,224,000 oke (1 oke=2.85 lbs.) in 1911. The total yield of olive oil was about 20,292,000 gallons. The wheat of Thessaly yielded 2,478,941 bushels in 1911. About a similar quantity of wheat is imported into the country. Tobacco in 1911 yielded 76,820 cwts.; the vineyards, 140,551,000 oke; figs, 240,000 cwts. The fig industry is centred on the port of Calamata. Two kinds of cheese are produced in Greece—sliced cheese in brine and head cheese. The production of the former in 1911 amounted to 8,000 barrels, or 820,000 to 400,000 oke. Some of the cheese is consumed in Greece, chiefly in the cities of Athens and Piræa. The production of head cheese is

about 1,584,000 to 2,000,000 okes, and was valued at 177,700l. There are in Greece 100,000 horses, 360,000 cattle, 2,900,000 sheep. Greece has a great variety of mineral deposits, and there are in force about 35 mining concessions embracing a total area of nearly 20,000 acres. The principal minerals worked include iron, copper, zinc, lead, silver, manganese, aluminium, antimony, tin, nickel, magnesite ore, cobalt, coal, sulphur ochre, and other earths. The Laurium district, Thessaly, Euboea, the Aegean islands and other parts of Greece yield a large output of iron and earths.

The mineral output of all Greece in 1909 and 1910 is given as follows —

	1909	1910		1909	1910
	Tons	Tons		Tons	Tons
Chromite	7,470	7,000	Manganese	1,287	—
Copper	100	—	Magnesite	74,467	48,013
Emerald	10	—	Nickel	500	185
Iron	413,577	66,349	Sulphur	52,025	51,531
Manganese	46,004	5,591	Zinc	48,724	87,106
Iron pyrites	34,77	7,077	Total	154,673	1,011,081
Lead	40,013	15,307			
Lignite	2,749	1,500			

The total sale of minerals of all kinds, including salt (£118,000), is given as £1,086,366 in 1909 and £930,729 in 1910.

Commerce.

Value of the commerce of Greece (25 drachmas = £1) —

	1907	1908	1909	1910
	£	£	£	£
Imports	5,704,480	6,185,400	5,501,445	6,212,400
Exports	4,062,710	4,425,500	4,067,476	5,026,400

The special commerce for 1909 and 1910 was as follows with the leading countries (25 drachmas = £1) —

	Imports from (1909)	Imports from (1910)	Exports to (1909)	Exports to (1910)
	£	£	£	£
Austria Hungary	691,290	799,600	602	—

The customs ■■■■ amounted ■ 1911 to 1,051,582/ against 966,494/ in 1910

The commercial treaty of 1866 provides for 'the most favoured nation' treatment between the United Kingdom ■■■■ Greece, ■■■■ declaration of November, 1904, extends the ■■■■ of the treaty ■■■■ to include all British possessions, colonies, &c, which ■■■■ 'most-favoured nation' treatment to Greece (that is all except India, Canada, the Cape, and New South Wales). The treaty ■ terminable July 25, 1910, and ■■■■ after 12 months' notice

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) ■■■■ amounts the value of which ■■■■ in 1911 to 1,716,106/ Other articles of import in 1911 were —iron ■■■■ (including chrome), 205,462/; tarsins, 70,428/; sponges, 106,914/; wine, 443/; olive oil, 21,240/ Of the exports from the United Kingdom to Greece in 1911, cotton goods and yarns were valued at 438,839/; woollens, worsteds and yarn, 191,856/; coal, 404,924/; iron, 82,315/; machinery, 67,443/

The total trade between Greece and the United Kingdom for 5 years was (in thousands of pounds) as follows —

	1906	1907	1910	1911	1912
Imports from Greece ■ U.K.	1,942	1,600	2,280	2,273	2,118
Exports ■ Greece from U.K.	1,706	1,441	1,545	1,705	1,568

Navigation ■■■■ Shipping.

The merchant navy of Greece ■ 1912 had 811 sailing vessels of 145,264 tons, and 379 ■■■■ of 690,578 tons In 1910, 2,747 vessels of 8,763,586 tons entered and 3,005 of 4,099,686 ■■■■ cleared at the port of Piræus, which has ■■■■ three fifths of the total shipping of Greece A considerable amount of ■■■■ carrying trade of the Black ■■■■ and the Eastern ports of the Mediterranean is under ■■■■ Greek flag

Internal Communications.

There ■■■■ about 3,000 miles of roads There ■■■■ a canal across the Isthmus of Corinth (about ■ miles)

Railways ■■■■ open for traffic in ■■■■ for a length of about ■ miles The railway from Piræus to the Turkish frontier (275 miles), *via* Athens and Larissa, has been completed. It was always intended to connect the U.K. ■■■■ with the Turkish railroads, but ■■■■ Turkish Government long ■■■■ its consent. Greece ■■■■ thus completely isolated by land from ■■■■ rest of

Europe But in January, 1913, the Greek Government decided to prepare plans for linking up the Piræus Larissa Railway with the lines in Macedonia, so that the construction of the new line which will connect Greece with the rest of Europe, may be completed as soon as possible after the ■■■ In all probability the route along the coast by Gida, Katerina, and Salonika will be the one adopted The Piræus Athens Peloponnesus railway has a length of 423 miles, the Thessalian railway 145 miles, and the Piræus Athens railway 41 miles

The telegraph lines in 1910 had a length of 5,645 miles, with 10,247 miles of wire The number of offices was 770 They despatched 1,388,623 inland telegrams, 423,112 international, and 39,503 official Receipts, 2,031,037 drachmai In 1910 there ■■■ 1,047 miles of telephone line, belonging to ■■■ urban systems

Of post offices there existed 1,082 at the end of 1910, and there passed through the post in that year 18,952,000 letters, 1,786,000 post cards, and 16,482,000 printed papers and samples ■■■ the internal and the international services The receipts were 3,527,466 drachmai, and the expenses, 3,650,837 drachmai

Money and Credit.

The nominal value of the Greek coinage (minted in Paris) put in circulation since 1866 has been gold, in 1876, 1,000,000 drachmai, in 1884, 11,000,000 drachmai, total gold, 12,000,000 drachmai, silver, up to 1883, 26,262,865 drachmai, bronze, up to 1883, 6,816,065 drachmai, nickel, 1893-95, 3,000,000 drachmai Since 1884 there has been no issue of ■■■ except the nickel money In accordance with the Convention of the Latin Union, 1885, the Greek Government may issue fractional silver to the nominal value of 15,000,000 francs Up to 1910 it had struck silver coins of this kind to the value of 10,799,999 drachmai The total paper money in circulation at the end of 1909 was 142,437,627 drachmai (about 5,700,000l)

The National (with which is now united the Epuro Thessalian) and the Ionian Banks ■■■ authorised to issue notes to the amount of 88,000,000 drachmai, including 14,000,000 drachmai in notes under 1 drachmai This privilege has been extended to December 31, 1930 By successive agreements dated September 27, October 27, and December 1, 1910, the Bank was authorised to ■■■ supplementary notes up to 35,000,000 drachmai Up to December 31, 1911, the total paper circulation ■■■ 139,825,334 drachmai

The ■■■ of the National Bank of Greece ■■■ November 30, 1912, was 214,238,700 drachmai

Money, Weights and ■■■ ■■■ ■■■

Greece entered ■■■ the Latin Monetary Union

The *Drachma*, of 100 *lepta*, ■■■ equivalent ■■■ the franc (25 ■■■ francs = 1l sterling) ■■■ drachmai = 112 old drachmai The currency drachma is now nearly at par value

By Royal decree of January 30, 1893, the gold coins of Great Britain, Austria, Germany, Denmark, Russia, Spain, Turkey, Egypt, and the United States ■■■ accepted ■■■ by the Treasury and by private persons as legal tender, one-fourth per ■■■ being deducted from their nominal value

In September, 1898, it ■■■ announced that ■■■ had been decided to introduce ■■■ system ■■■ regards measures of length, weight, and capacity

The change from the old system is gradual, commencing with measures of length. The old system is as follows:—

The Oke	2 80	lbs avoirdupois
Stater	123 20	
Libra (Venetian)	1 05	
Baril (wine)	16	imperial gallons
Kilo	0 11½	„ quarter
Pike	1	of an English yard
Stremma	242	„

Diplomatic Representatives.

1. OF GREECE IN GREAT BRITAIN

Envoy and Minister —J Gennadius

Consul General —J Stavridis

There are consuls of Greece at Birmingham, Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester, and vice consuls and consular agents at other towns.

2. OF GREAT BRITAIN IN GREECE

Envoy and Minister —Sir E E H Elliot, G C V O., K C M G, appointed November, 1903

Secretary —H H D Beaumont

Consul (Piræus) —Charles J Cooke

There are British Consular representatives at Calamata (Kalamai), Cephalonia, Corfu, Engastria (Lanion), Patras, Milo, Puseus, Santorini, Seriphos, Syra, Volo, Zante, Zoa.

MOUNT ATHOS.

Mount Athos is inhabited by the monks of Greek (17), Russian, Bulgarian, and European monasteries. The monks till the fields, tend the vineyard, take in the harvest, fish, weave, sell in shops, and, indeed, take upon themselves all the secular duties of the community as well as the sacred. Originally inhabited by a medieval ascetic, Peter the Athonite, it has at last grown to a religious colony of thousands; and after paying taxes to Greece in the 18th century it was sacked by the Turks in 1839, and remained under Turkish rule until November 15, 1912, when the Greeks occupied it. The suggestion has been made that Mount Athos should be governed by an International Commission composed of representatives of all Orthodox States, which would preserve the independent administration of this Monastic Republic. At present each of the many monasteries is a sort of little republic in itself, each electing its own abbot or archimandrite. In the maintenance of the whole peninsula as a large republic, all the monasteries will be affiliated; and some new sort of franchise will have to be exercised to choose a supreme Patriarch and decide the new civil law which will take the place of Turkish law. Several among them have the opposition to the scheme of monks themselves, and at the present (March, 1913) no definite action has been taken.

Finance.

Ordinary revenue and expenditure in currency (61 paper dollars = £1 in 1907; 76 = £1 in 1908; 77 = £1 in 1910):—

	1910				1911
	dollars	dollars	dollars	dollars	
Revenue	85,297,823	37,335,958	49,289,722	51,571,440	62,047,475
Expenditure	44,580,222	49,929,752	70,544,261	45,959,410	69,161,969

The budget for the fiscal year 1912-13 shows an income of \$7,500,000 dollars, of which 26,500,000 is derived from customs. The expenditure is 42,720,332 dollars, distributed as follows: Government and justice, 4,724,170 dollars; foreign relations, 2,408,289 dollars; finance, 2,874,922 dollars; public credit, 22,000,000 dollars; war, 5,267,268 dollars; public instruction, 3,199,035 dollars; pensions, 511,093 dollars.

On December 31, 1910 (according to the report of the Council of the Corporation of Foreign Bondholders) the outstanding amount of the 5 per cent. External Debt of 1895 was 1,482,800£; certificates in respect of unpaid interest, 1898 and 1899, 29,656£; arrears of interest (1899-1911), 712,000£; total, 2,221,456£. On July 13th, 1911, the Council of Foreign Bondholders accepted a proposal made by Guatemala for a settlement of the long default upon her external debt. But the default continued, and the British Government was requested (in 1912) to take some action in the matter. The interest coupons of Guatemala have now been fourteen years in arrears. On December 31, 1908, the outstanding amount of the gold debt, according to the Finance Minister's Report, was 13,694,445 dollars gold. Currency debt (1909), 71,976,214 dollars currency.

Defence.

The military force of Guatemala, reorganised, numbers 85,585 officers and men when mobilised. The reserve army consists of 40,575, divided into 10 battalions. All male citizens are liable to conscription from 18 to 50.

Production and Industry.

By the National Land Law of 1894, the lands (except those on the frontiers and the sea-shore) were divided into lots for sale, the maximum allotment permitted to one person being 10 caballerias (or about 1,687 acres).

Uncultivated lands may be granted gratuitously to immigrants or to immigrant companies, to municipalities, villages, schools, and assistance towards road-making. The total area has an extent of 526,593 hectares.

The soil in general is exceedingly fertile. The most important crop is coffee, of which the yield in 1911 amounted to 735,551 quintals (100 lbs.), valued at 1,117,000£. There were in 1911 2,156 plantations, comprising an area of 880,320 hectares, and trees to the number of 88,161,628. The largest plantations are the hands of Germans. The crop for 1912-13 is expected to yield 650,000 quintals. About 1,680 hectares are devoted to tobacco culture. The sugar crop amounted in 1911 to 166,234 quintals, valued at 110,500£; bananas, 1,235,684 bunches, valued at 70,000£; wheat, 2,844,000 quintals, valued at 156,110£; maize, 2,844,000 quintals; and

potatoes, 173,000 quintals, and beans, 159,000 quintals. The exports of timber (chiefly mahogany and cedar) in 1910 totalled 4,700,000 cubic feet. The department of Peten is rich in mahogany and dye woods, for which there is a ready market in the United States, whither they are carried over land through British Honduras and Mexico. Cotton is grown in small quantities. On the high plateau the [redacted] of the cattle grounds (potreros) is about 758,640 acres. The agricultural production of the country in 1910 was valued at 428,825,081 pesos, of which 92,705,680 pesos were for coffee, 66,880,800 pesos for maize, 30,783,303 pesos for timber and 12,898,850 pesos for sugar. The number of horses in the Republic [redacted] was estimated at 50,343, cattle, 196,780, sheep, 77,600, swine, 29,784.

Placer gold [redacted] at Las Quebradas, near Yzabal, [redacted] worked successfully, silver [redacted] the departments of Santa Rosa and Chiquimula, and salt [redacted] departments of Alta Vera Paz and Santa Rosa. An American company has recently obtained a concession to explore for [redacted] the whole Republic and has already commenced operations.

Commerce

Value of the commerce (in gold pesos or dollars) —

	1907	1908	1909	1910	1911
	Dollars		Dollars	Dollars	Dollars

		Skins	20,138

In 1911 [redacted] United States imports amounted to 2,696,144 dollars; Germany, to 1,592,658 dollars; United Kingdom, to 1,314,202 dollars; [redacted] France, to 286,050 dollars.

Total trade between Guatemala and the U.K. for 5 years —

	1907	1908	1909	1910	1911
Imports [redacted] U.K.	1,000,000	194,721	212,890	345,017	271,375
Exports [redacted] from U.K.	1,000,000	240,898	230,746	345,316	268,839

Shipping and Communications.

In 1910, 623 vessels of 1,187,800 tons entered the ports of the Republic, and 1,145,990 tons cleared. Of the vessels entered 211 American, 130 German, and 81 British. The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, José, Champerico, and Ocos. The steamers of the United Fruit Company vessels from New Orleans and New York to Puerto Barrios, and the steamers of the Hamburg American line from Hamburg touch at Puerto Barrios and Livingston. The Pacific Line, the Kosmos Line steamers, and other companies' steamers visit Guatemalan ports.

The latest railway returns to hand are as follows:—(1) Central Railway (135 miles in extent): Number of passengers carried during 1911, 848,895; imports, 8,923 tons; exports, 24,831 tons; local freights, 94,860 tons. (2) Guatemalan Railway 195 miles in extent: Number of passengers, 116,306; exports, 15,533 tons; imports, 15,736 tons; local freights, 25,946 tons; bananas, 94,369 bunches. (3) Western Railway (51 miles in extent): Number of passengers, 192,140; imports, 10,411 tons; exports, 18,226 tons; local freights, 25,064 tons. (4) Ocos Railway (25 miles in extent): Number of passengers, 23,584; imports, 3,189 tons; exports, 8,130 tons; local freights, 4,391 tons. (5) Verapaz Railway (27 miles in extent): Number of passengers, 3,708; imports, 1,862 tons; exports, 1,603 tons; local freights, 1,603 tons. Total length of line (1911), 438 miles. Considerable progress was made with the Pan-American Railway, which would place the country in communication with Mexico. The Los Altos Railway was also progressing.

There are a few good roads, and many bridges have been recently built, but away from the railway most of the traffic is on mule-back.

There were in 1911, 311 post-offices, through which passed 12,270,364 letters, &c. Of telegraph and telephone lines in 1910 there were 4,196 miles. Despatches, 1,205,261. The telephone system has 280 offices.

Money, Weights, and Measures.

Important Guatemalan Banks are:—(1) The Bank of Guatemala (1895), capital, 10,000,000 pesos; paid-up capital, 2,500,000 pesos; reserve, 4,312,512 pesos. (2) The International Bank of Guatemala (1877), subscribed capital, 2,000,000 pesos; reserve fund, 1,651,000 pesos. (3) The American Bank (1895), paid-up capital, 3,000,000 pesos; reserve fund, 1,200,000 pesos. (4) The Western Bank (Banco de Occidente) of Quetzaltenango (1881), capital, 2,000,000 pesos; paid-up capital, 1,650,000 pesos; reserve fund, 3,300,000 pesos.

The silver peso or dollar is not now current, the money in use being paper and fractional nickel coin. The value of the paper peso in September 1911, was about 2½d.

The Dollar is 100 Centavos, weight, 3.75 grammes, .900 fine; nominal value, 4s. Nickel coins are the real, nominal value 6d., and the 10d. and quarter real.

The Spanish <i>Libra</i> of 16 onzas	..	= 1.014 lb. avoirdupois.
Arroba of 16 libras	..	= 25.35 lb. „
Quintal of 4 arrobas	..	= 101.40 „
Quintal of 100 libras	..	= 18.10 cwt.
Fanega	..	= 1½ imperial bushel.

The metrical system is now adopted.

Diplomatic and Consular Representatives.

1 OF GUATEMALA IN GREAT BRITAIN.

Chargé d'Affaires—Don José M. Landizabal.

Consul-General (London).—F. Arca.

There are also Consular representatives at Glasgow, Liverpool, Manchester, Southampton, Birmingham, Cardiff, Grimsby.

2 OF GREAT BRITAIN IN GUATEMALA.

Envoy Extraordinary, Minister and Consul-General—Sir Lionel E. G. Carden, C.M.G.

There is a British Consul at Quetzaltenango; Vice Consuls at Livingston, Puerto Barrios, and San José.

HAITI.

(RÉPUBLIQUE D'HAÏTI.)

Geography and Government.

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution of October 9, 1889. The legislative power is vested in a Chamber of the Communes of 99 members (1 for each Commune) chosen for 3 years by direct popular vote, and in a Senate of 39 members (chosen for 6 years (renewed to one-third every 2 years) by the Chamber of the Communes from a list made out partly by the President and partly by the electors. The President is elected for 7 years by the two Chambers in joint session. Members of both houses are paid by the month during session, (representatives \$100 dollars, and senators \$150 dollars).

President of the Republic—General Tancrède Auguste, elected August 11, 1912.

The administration of the Republic is carried on, under the President by 12 heads of departments. The President receives a salary of 4,800?

Area and Population.

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Republic of *Santo Domingo*—is estimated at 10,204 English square miles. The inhabitants are estimated to number 960,000 in 1887, the ecclesiastical estimate, based on parish registers, in 1909 put the number at 2,029,700. The majority of them are negroes, there are also great numbers of Mulatto Haytiens, the descendants of the former French settlers. There are about 5,000 foreigners of whom about 10 per cent are white. Capital Port au Prince, with 100,000 inhabitants, situated on a large bay, and possessed of an excellent harbour. Cape Haiti has a population of about 30,000? Las Cayes about 12,000, Gonaives, 13,000, Port de Paix, 10,000. The language of the country is French, though most of the people speak a debased dialect known as Creole French.

Religion and Instruction.

The religion is Roman Catholicism. There is an archbishop with 11 suffragan bishops. Public elementary education is free, the country being divided into 12 inspectors' districts. The amount allotted for public instruction amounts to nearly 1,000,000 dollars annually, but the educational system is still very imperfect, especially in rural districts. In 1910 education was made compulsory. There are 122 national schools, besides private schools, and 5 public lycées. The *Deutscher Schulverein* of Hamburg opened a school here in April, 1912.

Finance.

The revenue is derived almost exclusively from customs, paid in American gold on exports and imports. The largest portion of the expen-

liture is for debt charges, 2,882,468 U.S. gold dollars (\$81,154 gourdes). For 5 years ending September 30, the revenue is given as follows (in U.S. gold dollars for export duties and in paper gourdes worth at present about 1s. 6d. — average last five years 10d.)

	U. S. Gold dollars.	Currency gourdes
1909-09	2,760,887	7,408,542
1909-10	2,694,107	6,684,000
1910-11	3,279,858	7,717,799
1911-12	3,957,327	8,227,315
1912-13	3,914,480	7,571,082

On March 31, 1912 the debt consisted of gold loans amounting to 28,168,612 gold dollars of foreign debt, and 1,194,087 gold dollars internal debt, making a total of 29,362,699 gold dollars. The currency debt amounts to 15,514,812 dollars paper, including the paper and nickel money, and the floating debt.

Defence.

The army is at present actively undergoing a reform, and will consist of 5,000 trained troops. There is a special 'Guard of the Government,' numbering 650 men, commanded by 10 generals, who also act as aides-de-camp to the President of the Republic. The Republic possesses a flotilla of four small vessels, which are raised with difficulty:—17 December ex-American cruiser, and cruiser, *l'Eden*, *Le Nord Alexis*. A small second-hand yacht *Vertieres* has just been purchased in Europe.

Production and Commerce.

The industries of Haiti are mainly agricultural, and the most important product is coffee of excellent quality, but the export duty is so considerable as to prevent the development of its cultivation. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending, and a cigar and cigarette factory is successful. Sugar is extensively grown, and there are several sugar-making establishments. Rum and other spirits are distilled but not exported: the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is neglected. The output of soap from local factories cannot compete with imports from the United States.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone, porphyry are found but are little worked. In the last few years, and concessions have been granted for mining coal, iron, and copper.

Imports and Exports for 1911:—

	Imports	Exports
	Dollars	
1910	7,681,746	7,948,117
1911	7,948,117	7,682,000

For fiscal year 1911 (ending September 30) the quantities of the principal exports, and for 1910 and 1911 the value of imports were —

Exports		1911	Imports	1910	1911
Coffee, lbs		54,223 70	United States	702 065	790,209
Cocoa "		8,335 40	France	924	831,811
Logwood "		4,006 000	United Kingdom	301,770	88,517
Cotton "		5,228 41	Germany	799 818	439 732
Orange peel "		463 70	Other countries	473,139	499,810
Hides, skins "		361 731			
			Total	7 681,746	7, 48 117

Other articles exported are logwood root, fustic, various timbers, resin, honey, zinc, copper (old metal), wax, and tortoise shell. Coffee and [redacted] shipped to Havre, log wood to the United States. The chief imports are cottons, sacks, machinery, and [redacted] work.

The staple article of British produce exported to Haiti and [redacted] Domingo consists of cotton manufactures, valued at 276,728/; linens, 9,419/; iron, wrought and unwrought, 80,917/ in 1911.

Total trade between Haiti and the U K for 5 years. Imports, 1907, 299,127/; 1908, 193,742/; 1909, 335,152/; 1910, 1,183,918/; 1911, 576,377/. Exports, 1907, 252,129/; 1908, 311,816/; 1909, 282,461/; 1910, 791,388/; 1911, 413,722/.

Shipping and Communications.

In 1911 the registered shipping consisted of about 5 steamers of 1,410 tons (net), and 8 sailing vessels of 1,392 tons. At Port au Prince in 1909 there entered 192 steam vessels of 320,192 tons, and cleared 200 of 334,910 tons. Several lines of steamers (German, French, and Dutch) connect the ports of Haiti with New York and Hamburg and other European ports. The Hamburg America Line has the largest share in the shipping.

A light railway has been constructed from Port-au-Prince to Lake Assuet (28 miles), and to Lagane (22 miles), but the traffic is small. Construction of a railway from Gonaïves to Hincha, and thence to Port au Prince, begun and 14 miles executed, but not opened to traffic. A [redacted] has been granted the "National Railroad Company of Hayti" for a railroad from Cape Haiti to Port au Prince, now in construction. Total length of line, 64 miles. Port au Prince has 11 miles of tramway.

The principal towns are connected by the Government telegraph system. A cable [redacted] from the Mole St Nicholas to Santiago de Cuba and from the [redacted] Port au Prince, and also to Cap-Haiti, whence [redacted] to Puerto Plata (Santo Domingo) and to South America.

There are [redacted] post offices. Haiti joined the Postal Union in [redacted]. Length of Telegraph lines, 124 miles.

Money, Weights, and Measures.

The Banque Nationale de la République d'Haiti, established October 21, 1910, with a capital of 10,000,000 francs, undertakes to render services to the Government in respect of loans and other [redacted]. It has its [redacted] in Paris and its principal [redacted] in Port au-Prince.

The Gourde, a dollar, nominal value, 4s. Nickel coins are 50-, 20-, 10- and 5-centime pieces. [redacted] 3-, 2-, [redacted] 1-centime pieces. [redacted] money in circulation (1912) [redacted] of paper money, 3,289,812 gourdes,

nickel coins, 7,000,000 gourdes; [redacted] coins, 225,000 gourdes, total, 15,514,812 gourdes. It is estimated [redacted] also 2,100,000 dollars. American gold [redacted] circulation [redacted] bank notes [redacted] to be issued by the "Banque Nationale de la Republique d'Haïti" under the control of the [redacted] Government. In 1907 the premium on gold as against Haitian gourdes [redacted] to 500 per cent [redacted] consequence of the issue of 2,000,000 nickel gourdes. On August 19, 1912, a law was approved providing for the withdrawal from circulation within two years of 6,000,000 gourdes. On August 1, 1912, [redacted] 1,000,000 gourdes were to be withdrawn, and a similar amount [redacted] August 1, 1913, and 1914 respectively.

The weights and  are those of France

HONDURAS.

(REPÚBLICA DE HONDURAS.)

and Government.

THE Republic of Honduras, established January 11, 1839, before the dissolution of the Confederation of Central America in 1839, governed under a charter proclaimed October, 1894. It gives the legislative power to a Congress of Deputies consisting of 42 members, chosen for 4 years directly by popular vote, at the ratio of one per 10,000 inhabitants. It meets for 180 days in January each year. The executive authority rests with a President, nominated and elected by popular vote for 4 years.

President.—General Manuel Bonilla (1912-1916).

The administration of the Republic is carried on by a Council of five ministers, to whom are entrusted the departments of Foreign Relations, Government and Justice, War, Treasury and Public Credit, Public Works and Agriculture, and Instruction.

The active army consists of about 2,000 men, and the navy has 54,000

Area and Population.

Area about 46,250 English square miles, with a population, in 1910, of 558,446 (270,729 males and 287,724 females), according to official figures, at under 11 inhabitants to the square mile. The Republic is divided into 17 departments. The bulk of the inhabitants consists of aboriginal 'Indians,' and the sparse European-descended population, mainly of Spanish origin. Of the Indians about 90,000 are uncivilized. The capital is the ancient town of Tegucigalpa, with 22,137 inhabitants in 1911-12; other towns are Pesque, 7,132; Nacaome, 8,152; La Esperanza, 11,455; Roma, 10,574; Choluteca, 8,065; San Pedro Sula, 7,820. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), Ulúa, La Ceiba, Trujillo, Roatan, and Utila.

In 1911 there were 2,464 marriages, 20,552 births, 10,356 deaths. Excess of births over deaths, 10,196.

Religion, Instruction, Justice.

The Roman Catholic is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any. Instruction is free, compulsory (from 7 to 15 years of age), entirely secular. At Tegucigalpa there is a central university with faculties of medicine, and of science, law, and political sciences; at Comayagua there is a school of jurisprudence. For secondary instruction the Government maintains a Central Institute at Tegucigalpa, and subsidizes colleges in the departments. To these colleges five normal schools are annexed. In 1910 they had 325 pupils. For primary instruction there were 888 schools with, in 1911, 29,525 pupils, and an average attendance of 20,864. The number of teachers was 1,200. Expenditure on education in 1911 was 223,064 pesos, 82,514 being for primary and 78,688 for secondary.

The judicial power resides in the Supreme Court of five judges chosen directly by the people for 4 years; four Appeal Courts, and departmental and local judges.

Finance.

The revenue is mainly derived from customs, and from spirit, powder, and monopolies. For the year stated, ending July 30, the revenue and expenditure (in silver pesos) are given as follows:—

1907-08

1908-09

1909-10

1910-11

Revenue	3,899,287	3,503,215	4,149,082	10,763,888	13,140,415
Expenditure	4,205,995	3,503,215	3,992,623	10,763,888	13,095,101

In July, 1910, the external debt of Honduras consisted of four loans contracted from 1867 to 1870, amounting to 5,570,157 with arrears of interest amounting to 17,071,940, total 22,913,875. No interest has been paid since 1872. The internal debt on August 31, 1910, was stated to amount to 4,053,870 silver pesos. On Jan 11, 1911, a treaty was signed in Washington by which the United States became directly interested in the financial regeneration of Honduras.

Production and Industry

The chief culture is that of bananas, mostly on the Atlantic coast where coconuts are also grown. The coconut groves of Puerto Barrios extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain 28,182 fruit bearing trees. Rubber is produced in slowly increasing quantity, coffee is grown but there is scarcity of labour for the picking of the berries, sarsaparilla is exported. Tobacco too is grown. While the Department of El Paraiso has become noted for its fine quality of tobacco, the Department of Copan still leads in quantity, producing 75 per cent of the total amount raised in the Republic. This finds a market in the neighbouring Republics and also in Peru. The amount of tobacco land cultivated during 1910 is estimated at 4,450 acres, yielding about 1,726,180 pounds. Corn produced in 1911 totalled 246,452,925 pounds, or 860,025 pounds of beans, 2,396,025 pounds of rice, and 314,375 pounds of wheat. The total number of farms was 686, of cattle ranches, 1,019. Cattle breeding is carried on extensively, and dairy farming on a small scale. Cattle are exported to Cuba. In 1909 there were within the Republic about 466,215 head of cattle, 64,122 horses, 13,434 mules, 145,352 pigs, and 24,052 sheep. About 150,400 acres are devoted to pasture. There are considerable local industries such as the planting of straw hats. During 1910 sixteen concessions were granted for agricultural land, covering an area of 12,350 acres.

The mineral resources of Honduras are great—gold, platinum, silver, copper, lead, zinc, iron, antimony, nickel being found in almost every department. There is an American silver mining company at work, and giving an increasing output every year. Gold, silver, copper and lead, and iron are exported. Deposits of brown and other coal have also been found. The chief requirements for the development of the mining industries are capital, and facilities for transport.

Commerce.

	1908-09	1909-10	1910-11	1911-12
Imports	510,811	531,750	539,181	690,146
Exports	406,776	494,602	404,600	

The silver peso is worth 12 cents. The chief imports are cottons,

breadstuffs, and provisions. In the year 1911-12 the chief articles of import and export are as follows:—

Imports	1911-12	Exports	
	£		£
Cottons	230,641	Rubber	219,503
Provisions	94,715	Bananas	267,535
Iron and iron	38,482	Coffee	15,884
Timber	21,526	Cocoanuts	35,013
Postage stamps	54,400	Mahogany	12,241
Chemicals	35,251	Animals	60,782

Of the imports in 1912, 71 per cent. came from the United States.

The treaty of Commerce and Navigation of 1887 provides for the "most favoured nation" treatment between the United Kingdom and Honduras.

Total trade between Honduras and United Kingdom for 5 years is as follows:—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Honduras	1,530	4,465	1,001	3,009	1,827
Exports to Honduras	70,900	74,860	67,913	91,588	183,225

In 1911 the registered shipping comprised 2 steamers of 1,563 tons and 8 sailing vessels of 363 tons; total tonnage, 1,935 tons. The transport of fruit, &c., to the United States is effected largely by small vessels built for the purpose. Puerto Cortez, La Ceiba, and Tela are visited by the boats of three American companies, Puerto Cortez by Mexican cattle boats, and Trujillo by cattle boats trading with Havana; in autumn fruit is shipped at Rostan in American boats. Amapala, on the Pacific coast, is visited by the steamers of the Pacific Mail Steamship Company, and of the Kosmos Company.

Communications.

In general, travelling and transport is accomplished by means of mules and ox-carts. Little is done in the way of road-making or repairing. There is a railway of 57 miles from Puerto Cortez to Pedro Sula and La Pimienta; this line is in bad repair, but is being continued to La Brea on the Pacific coast. Forty miles of private railway is used for transport of bananas, from La Ceiba to the north coast. In 1911 there were 1,000 post-offices; the internal correspondence amounted to 542,365 letters, &c.; the foreign correspondence 558,582 letters, &c. In 1911 there were 1 telegraph line and 3,133 miles of telegraph line. The telephone, with 1 line and 1 stations, is in use in the capital and in other towns.

Money, Weights, and Measures.

The silver dollar, or *dollar*, of 100 cents, weighs 16 grammes, 160 grains. The silver money consists of 50, 25, 20, 10, and 5 cent pieces. There is a 1-cent copper coin. Gold coins of the value of 20, 10, 5, and 1 dollar circulate as national money. The monetary unit is the silver peso (1908) worth 1.85 *sd.*, the gold dollar being worth 1.85 *sd.* February 16, 1910, the Republic of Honduras was opened having

closed two years, owing to the fact that most of the silver in bars was exported to other countries. In August, 1910, the Government coined some silver, but chiefly copper coins, to replace the amount which disappeared from circulation. It has gathered about 84,000 copper coins and expects to coin ones to the amount of 1,000,000. By decree No. 1 in the official publication 'La Gaceta' of March 4, 1910, 1 cent pieces were to be coined in addition to the 1 cent piece. These were to weigh 1 gram, tolerance being 5 centigrams, the diameter 15 millimetres, and 100 coins to each kilo or 22 pounds. The 1 cent piece was to weigh 2.12½ grams, or one half of their former weight, tolerance being 5 centigrams, diameter 15 millimetres, and 470 coins to each kilo. This was later changed, so that the actual weight of the 2 cent piece is 3½ grams and of the 1 cent piece 1.9 gram.

There is no bank in the Republic, the 'Banco de Honduras', Honduras, having a greater variety of commercial products and a circulating medium of metallic, suffers less than several of the Central American States from fluctuations of exchange.

The metric system of weights and measures has been legal since April 1, 1897, but the old Spanish system is still in general use.

The <i>tirobá</i> { for <i>caña</i>	= 3½ imperial gallons
" <i>caña</i>	= 2½ " "
" <i>Square Vara</i>	= 1.90 " " = 1 yard
" <i>Manzana</i>	= 1½ " "
" <i>Panega</i>	= 1½ imperial bushel

ITALY.

(REGNO D'ITALIA.)

Reigning King.

Vittorio Emanuele III., born November 11, 1869, the only son of King Umberto I. of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901; Princess *Mafalda*, born November 19, 1902; Prince *Umberto*, Nicola Tommaso Giovanni Maria, Prince of Piedmont and heir Apparent, born Sept. 15, 1904; Princess *Giovanna*, born November 15, 1907.

Wife of the King

Queen *Margherita*, born November 20, 1851, the only daughter of late Prince Ferdinando of Savoy, Duke of Genoa, married, April 22, 1868, to Umberto of Savoy, Prince of Piedmont (King of Italy, 1878), widow July 29, 1900.

Cousins of the King.

Prince *Emanuele Feliberto*, of Savoy, Duke of Aosta, born January 17, 1869, married, June 25, 1897, to Princess *Alicia*, d'Orleans, daughter of the late Comte de Paris; offspring, Prince *Amedeo Umberto*, Duke of Apulia, born October 21, 1898, and Prince *Amedeo*, Duke of Spoleto, born March 8, 1900; Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1879; Prince *Luigi Amedeo*, of Savoy-Aosta, Duke of the Abruzzi, born January 20, 1873; Prince *Umberto Maria* of Savoy-Aosta, Count of Salaparuta, born June 22, 1889—children of the late Prince Amedeo of Savoy, Duke of Aosta, the first three from his union with Maria Vittoria, Princess of Forze Cisterne, who died November 4, 1870; the last from his union with the Princess Maria of Naples.

Most genealogists trace the origin of the reigning house to a German Count Borthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Lemano. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amedeus, in 1283, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the island of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, the Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favor of his son, the late King Vittorio Emanuele II., who, by the Peace of Zurich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation of the Papal States was voted by plebiscite in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including Benevento and Pontecorvo, part of the Papal States), and on November 4, the Duchy of Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Verona was annexed to Italy. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), after the withdrawal of the French garrison, was annexed to the Kingdom by plebiscite on October 2.

The civil list has been settled at 16,050,000 lire.¹ From this amount the children of the late Prince Amedeo, of Aosta, receive jointly allowance of 400,000 lire; Prince Tommaso, Duke of Genoa, an allowance of 400,000 lire; and Queen Margherita, an allowance of 1,000,000 lire.

The greater part of the private domains of the reigning family given up to the State in 1848.

Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera dei Deputati.' The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, nominated by the King for life; a condition of the nomination being that the person should either fill a high office, have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or, finally, should pay taxes to the amount of 3,000 lire, or 120*l*. In 1912 there were 369 senators exclusive of members of the royal family. The electoral law of June 30, 1912, made the suffrage almost universal for men, only denying the franchise to those younger than 30 who have neither performed their military service nor learnt to read and write. The number of deputies is 508, or 1 to every 71,000 of the population (census 1911). In 1911 the number of enrolled electors was 3,227,183 (9 per 100 inhabitants without distinction of sex or age) exclusive of the electors temporarily disfranchised on account of military service. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts, and these again into several sections. No deputy can be returned to Parliament unless he has obtained a number of votes greater than one-tenth of the total number of inscribed electors, and then half the votes given. A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as persons ordained for the priesthood and filling clerical charges, receiving pay from the State. Officers in the army and navy, ministers, under-secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must not be more than forty, not including the ministers and the under-secretaries of State. Deputies are elected for 240*l*. annually, of which 160*l*. will be direct payment, and the remainder will be represented by a current account with the post office, defraying travelling and postal expenses.

Lower House, elected 1909: Constitutionalists, 420; Radicals, 54; Republicans, 19; and Socialists, 37.

The duration of the Parliament is 5 years, and it must be renewed annually; but the King has power to dissolve the lower Chamber at any time, being obliged only to call new elections, and to convoke a new meeting of the

¹ The amount of the civil list is, in fact, 15,050,000 lire, because the King repays to the State annually the allowance of Queen Margherita by law of December 6, 1909.

months. Each of the Chambers has the right of introducing bills, the same as the Government, but all money bills must originate in the House of Deputies. The ministers have the right to attend the debates of both the upper and the lower House but they have no vote unless they are members. No sitting is valid unless an absolute majority of the members are present.

The executive power is exercised, under the King, by a ministry divided into 12 departments. The ministry, constituted March 29, 1911, is as follows:—

President of the Council and Minister of the Interior—Signor *Giolitti*.

Minister of Foreign Affairs—The Marquis di *San Giuliano*.

Minister for the Colonies—Signor *Bertolini*.

Minister of Justice and of Ecclesiastical Affairs—Signor *Finocchiaro Aprile*.

Minister of the Treasury—Signor *Tedesco*.

Minister of Finance—Signor *Failla*.

Minister of War—General Paolo *Spingardi*, senator.

Minister of Marine—Conte Admiral *Pasquale Leonardi Cattolua*, senator.

Minister of Public Instruction—Signor *Credaro*.

Minister of Public Works—Signor *Sacchi*.

Minister of Agriculture, Industry, and Commerce—Signor *Nitti*.

Minister of Posts and Telegraphs—Signor *Calissano*.

The Ministry for the Colonies was established by a law of July 6, 1912.

LOCAL GOVERNMENT

The administrative divisions of Italy are provinces, territories (secondari), districts, and communes. There are 69 provinces, of which 60 are divided into territories (secondari) and 9 (the province of Mantua and the 5 provinces of Venetia) into districts. There are 275 territories and 71 districts. The districts have been *de facto* suppressed, though still nominally existing as administrative divisions. The territories and districts are divided into communes.

In 1913 (January 1) there were 8,326 communes. The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of May 21, 1908, each commune has a communal council, a municipal council, and a syndic. Both the communal council and the municipal council vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is Government official, he is elected by the communal council from among its members, by secret vote. Each province has a provincial council and a provincial commission, the numbers varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councillors are elected for 3 years, one-half being renewed every 1½ years. The communal council meets twice a year, the provincial council once a year, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having no official or pecuniary interest in the commune. The citizens,

resident ■ the province, twenty-one ■ of age, able to read and write, be on the Parliamentary electoral list, or pay ■ direct annual contribution to the commune, of any nature, or comply with other conditions of ■ very simple character

In 1911 the number of enrolled *administrative* electors ■ 4,011,038 (11·2 per cent. of population)

Area and Population.

The following figures show the increase of the population of the present territory of the Kingdom of Italy from 1816 onwards in round numbers:—

Year	Population	■ per cent. per annum	Year	Population	Increase per cent. per ■
1816	18,383,000	—	1882	28,460,000	0·610
1848	23,618,000	0·747	1901	32,475,000	■ 788
1862	25,000,000	0·450	1911	34,671,877	0·668
1872	26,601,000	0·720			

In the following table areas of provinces marked with ■ asterisk are definitely ascertained by the Government Survey Department; the others are estimated partly by the Military Geographical Institute, partly by the General Statistical Department:—

¹ Italian survey department determined area to 110,559 miles, the difference, 4 miles, is owing to uncertainty as to the area of the provinces.

The resident population (i.e. having habitual residence in Italy, including persons temporarily absent) June 10, 1911, numbered 35,845,048.

The number of foreigners in Italy in 1911 was 61,606; 11,616 were Austrians, 10,757 Swiss, 6,958 French, 8,768 English, 10,745 Germans, 1,508 Russians,

2,907 Americans (United States), Greeks, 1,400 Spaniards, and the rest mainly Turks, Belgians, Swedes and Norwegians, Dutch, Egyptians, Argentines, Brazilians.

The population of Italy is in general perfectly homogeneous. According to statistics of 1901, the exceptions are about 80,200 of French origin, 11,400 of Teutonic origin, 20,000 of Albanian origin; 31,200 of Greek origin; 9,800 of Spanish (Catalan) origin, 30,000 Slavs.

The population over 15 years of age in 1901 was 21,318,495, of these 7,584,846 were unmarried, 11,686,716 were married, and 2,097,434 were widowers or widows. Of the whole population, 18,689,103 or 57.15 per cent were unmarried, 11,686,716 or 36.0 per cent were married, and 2,097,434 or 6.1 per cent were widowers or widows.

Population according to occupation in 1901, exclusive of children under 9 years —

Nature of occupation	Male	Female	Total

¹ Including 77,000 killed — earthquake of December 28, 1908.

Emigrants.—Total number in 1911, 533,844, of whom 271,065 went to other European countries or those bordering the Mediterranean, and 262,779 to countries overseas.

The number of Italians who returned to Italy was:—In 1910, 161,000 (of whom 93,000 from the United States); in 1911, 212,000 (of whom 140,000 from the United States).

The number of Italians abroad officially estimated in 1910 at about 5,558,000. In 1901 a Commission, under the Ministry of Foreign Affairs, established for the direction of the Government service relating to emigration. There is now regular inspection, and a medical officer watches over the emigrants while at

PRINCIPAL TOWNS.

The numbers of inhabitants at the different centres do not in Italian statistics afford a sufficient basis for distinguishing between the urban and rural population. In Northern Italy the population is scattered over the country and there are few centres. In Southern Italy and in the islands the country people live in the towns, coming and going to cultivate their own plots of land; consequently there are many populous centres where, numbers alone were considered, the population would be regarded as urban, though it is, in truth, almost exclusively rural. The following statement gives the classification of according to resident population in 1911:—

Communes with population :	Number	Population	1,600
over 100,000		3,946,574	
from 50,001 to 100,000		1,981,928	
„ 30,001 „ 50,000		1,925,566	
„ 20,001 „ 30,000		2,366,435	
„ 15,001 „ 20,000		1,862,751	
others		24,075,829	
Total	8,323	35,950,077	1,000·0

population of capitals of provinces follows on June 10, 1911:—

Religion.¹

The Roman Catholic Church is, nominally, the ruling State religion of Italy; but the power of the Church and clergy is subordinated to the civil government, and there is freedom of worship to the adherents of all recognised religions.

The returns of 1901 are as follows:—

Profession	Total	per cent
Roman Catholic	31,539,863	97·12
Evangelical Protestant	65,595	0·20
Greek Church	2,472	0·01
Israelite	35,617	0·11
Other professions	338	—
Not professing any religion	36,092	0·11
Not known	795,276	2·45
Total	32,475,253	100·00

Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont, about 10,000 to the other evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Under the Roman Pontiff, the Catholic episcopal hierarchy in Italy consists of 11 archbishoprics and 111 bishoprics, besides the 6 cardinal bishoprics

¹ See Rome, See and Church of.

Rome Of these prelacies, 74 are immediately subject to the Apostolic See, 13 being archbishoprics. Every archbishop ■ bishop ■ appointed by the Pope, ■ the advice of a committee of Cardinals, but the royal *crequatur* ■ necessary for his installation. In 1901, the number of parishes ■ 20,707, the secular clergy numbered 68,844, the regulars (monks, lay-brothers, nuns, &c.), 48,043, sacristans, &c., 12,129, persons employed ■ the Pontifical and Episcopal Courts, &c., 418. There ■ in 1901, ■ Evangelical pastors and ministers, and ■ Jewish Rabbis.

The suppression of the religious corporations began in 1855, and ■ completed by the law of June 19, 1873, which extended the measure to the city and province of Rome. The method followed ■ simply the abolition of the legal status of religious corporations, ■ that they could not hold property. Thus mortmain land ■ set free for agriculture and for buying and selling, while the State profited by relief from burdens and by direct taxation of the land thus freed from mortmain. Dispossessed monks and ■ received life pensions, houses which had been used for schools or for hospitals, &c., were, with institutions, made over to the communes, in Rome, the hospitals, &c., were assigned to the various charitable institutions, everywhere the churches of the corporations necessary for public worship ■ preserved, ■ were monumental, artistic, and other corporation buildings. Of the monastic edifices some were occupied by the State, others assigned to communes or provinces. The corporations of Lombardy were privileged by the treaty of Zurich, and their lands and houses were left to the disposal of their individual members. All other immovable corporation property w ■ sold, but the equivalent revenue (after certain deductions, including a 30 per cent tax) ■ inscribed in the public debt book. The administration of the revenue from the proceeds of land destined for charity or instruction now belongs to the communes, that from monastic parish church property in Rome, to the parish churches, that from property of foreign religious orders in Rome (400,000 lire) to the Holy See, while the remainder is administered by ■ institutes which pay the pensions and other dues, and provide (1) for beneficent work and for worship in Rome, and (2) for worship ■ the rest of Italy.

Instruction.

The State regulates public instruction, and maintains, either entirely ■ in conjunction with the ■ and provinces, public schools of every grade. Every teacher must have the qualifications required by law.

Schools ■ Italy may be classified under four heads, according ■ they provide: (1) elementary instruction, (2) secondary instruction—classical, (3) secondary instruction—technical, (4) higher education.

(1) Schools providing elementary instruction ■ of two grades. Religious instruction is given ■ those whose parents request it. Only ■ lower-grade instruction is compulsory. Every commune must have at least ■ lower-grade school for boys and one for girls, and ■ school with only ■ master should have ■ than seventy pupils. Higher-grade elementary schools are required in ■ having normal and secondary schools, and in those with ■ 4,000 inhabitants. In ■ grades the instruction is free. ■ age-limit of 6 to ■ for communes where there is ■ higher elementary school, but where there ■ such higher school, children are required ■ ■ they have completed ■ course of instruction, the compulsory age being thus raised ■ ■ years. This ■ provides that illiterate persons shall ■ under various disabilities.

(3) Secondary instruction—technical This is supplied by the technical schools, technical institutes and institutes for the merchant marine

(4) Higher education is supplied by the universities, by other higher institutes, and by special higher schools

In the last 10 years there has been an increase of 156 per cent in school attendance.

Year	Over 11 Years		Over 20 Years	
	Male	Female	Male	Female
1862	81 1	93	81	81 5
1872	61 9	75 7	81	77 4
1882	54 6	69 3	53 9	72 9
1901	44 5	54 4	43 9	60 4

According to the census of 1901 the smallest percentage of illiterates above ■■ years ■■ in Piedmont, 17.7, and the largest in Calabria, 78.7. Since then there has been much improvement, and now there are circondari (arrondissements), e.g. Demotroscola Pollenza, and Varallo in the province of Novara, and others in the provinces of Turin, Como, Cuneo, &c., where all young people twenty years of age can read and write.

1911	486,488	363,277	70,936	2,225

In 1911 (January 1) there were 45,328 males and 3,925 female prisoners. At that date there were 180 central and arrondissement prisons, 11 penal establishments, 41 reformatories, and 8 colonies for persons under disciplinary restraint. There were, besides, 1,302 cantonal prisons.

Paunderism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Opere pie,' regulated by the law of July 17, 1890. The general results of an inquiry in 1900 were:— Leaving out of account institutions intended for lending, or for the encouragement of saving (that is, monti di pietà, monti frumentari, casse di pietà agraria), there were 27,078 opere pie, with a gross capital of about 2,206,000,000 francs. Their net income amounted to 52,569,000 lire. Added to this net income were casual legacies, contributions from private benefactors, subsidies from the State (for hospitals), &c., of which receipts were spent annually, and thus the total at the disposal of the opere pie in 1900 (last available data) amounted to 120,785,000 lire.

Finance

Revenue and Expenditure.

Direct taxes — those — lands, on houses, and on incomes derived from movable capital and labour. The — lands, — to about 96 million lire. That — houses is at the rate of 12·5 per cent. (with three-tenths additional) of the amount taxable, which — two-thirds of the real annual value in the case of factories, and three-fourths in the case of dwelling houses. The tax on incomes from movable wealth — raised to — per cent. of the amount taxable. The — taxable in — of — varies from — whole income to fifteen-fortieths according — various conditions. — and provinces — — and buildings. — grants to — one-tenth of — proceeds — on incomes — compensation — other communal — State by various laws.

The principal indirect taxes are :—the customs duties, octroi, taxes on manufactures, and various monopolies, lotto.

In the financial year 1910-11 the revenue from State property was — Railways, 89,260,938 lire, ecclesiastical, 573,994 lire, from fixed capital, 8,398,874 lire, from the Cavour Canal, 3,901,103 lire, various, 4,784,208 lire, total, 56,914,117

Defence

I FRONTIER

The extent of the land frontier of Italy is as follows — French frontier 300 miles, Swiss 418, Austro-Hungarian 484, frontier of San Marino 24, in all (exclusive of [redacted] Marino) 1202 miles. [redacted] line of the peninsula [redacted] 2,052 miles, of Sicily, 830, of Sardinia, 830, of Elba and the small islands, 648, the total length of [redacted] thus [redacted] miles

On the Continental frontier of Italy the principal passes of the Alps are defended by fortifications. The basin of the Po is also studded with fortified places, the chief strong places in the [redacted] are [redacted] following — Casale, Piacenza, Verona, Mantua (these two belong to the old Austrian Quadrilateral), Venice, Alexandria. On the coasts and islands are the following fortified places — Vado, Genoa, Spezia, Monte Argentario, Gaeta, works in the Straits of Messina, Taranto. To the north of Sardinia a group of fortified islands form the naval station of Maddalena. Rome is protected by a circle of forts

II ARMY

Service in the army (or navy) is compulsory and universal. The [redacted] period is [redacted] years, beginning at the [redacted] of twenty and the young [redacted] of the year are divided into 3 categories, the first being posted [redacted] permanent army; the second also to the permanent army but with 'unlimited leave'; and [redacted] third, that is those exempted from active service, to the

DEFENCE

territorial militia. The second category men form what is called the 'complementary force'.

The term of service in the ranks of the permanent army is now 12 years for all. After 12 months through the ranks, the men are placed on 'unlimited leave,' i.e., they are transferred to the reserve, in which they remain until they have completed a total of 8 years' service. Then the soldier passes to the mobile militia, the term of service in which is 4 years. After completing his service in the mobile militia he is transferred to the territorial militia, in which he remains 7 years; thus finishing his military service at the age of 39.

The second category recruits are regarded as belonging to the permanent army for the first 12 years of their service. During this period they undergo from 12 to 6 months' training which may be spread over several years. They then pass to the mobile militia and afterwards to the territorial militia, the periods of service in each being the same as those of the first category soldiers. The 12 months' allotted to the third category, who are posted at once to the territorial militia, are for 12 days' training.

In Italy each regiment receives recruits from all parts of the country, and the troops change their stations by brigades every four years. On mobilisation regiments would be filled up by reservists from the districts in which they are quartered at the time. Relief is arranged that at least half the reservists shall have previously served in the unit which they would join on mobilisation.

The field army consists of 12 army corps and 3 cavalry divisions. The army corps consist of 2 divisions, except the IXth army corps, in the Roman district, which has an additional division. There are two brigades of infantry each consisting of two regiments of three battalions, and a regiment of field artillery (5 batteries) to each division, which has a war strength of 14,156 officers and men, 1,329 horses, and 100 guns. There is a regiment of field artillery (6 batteries of 120 mm. guns), a cavalry regiment, and a regiment of Bersaglieri, to each army corps. Cavalry divisions each consist of 3 brigades of 3 regiments, and of 1 horse artillery batteries.

A regiment of Bersaglieri (light infantry) consists of 3 battalions of infantry and 1 battalion of cyclists, the cyclists being intended to supplement the cavalry in the field. The Alpini are frontier troops, specially organised to defend the mountain passes leading into Italy; they consist of 3 regiments (26 battalions) of Alpine infantry, and 2 regiments of 36 mountain artillery battalions. There are, furthermore, 1 regiment of horse artillery of 8 batteries, 3 regiments of heavy artillery of 10 batteries each, and 10 regiments of fortress artillery. The fortress artillery is organised in 6 regiments: 2 consist of pioneers, 1 of pontoon troops, 1 of telegraph troops, 1 of sappers and miners, and 1 of railway troops.

The Carabinieri are a force of military police. They are recruited by selection from the army, and they remain in the ranks of the force until they have completed 8 years' service. They then serve in the militia of the Carabinieri for 12 years, after which they are transferred to the territorial militia for the remainder of their service, and are reckoned as a part of the militia.

The strength of the field army (12 army corps and independent cavalry) is about 400,000 combatants. The nominal strength of the mobile militia is 326,000, but the numbers put into the field would perhaps exceed 200,000. The 'complementary' troops should be 1,000,000. The strength of the line and mobile militia in the territorial militia is strong numerically, but only about 1,000,000 number, viz.: 1,000,000.

first category ■■■ who have passed through the army and mobile militia, could be made ■■■ of should its ■■■■ ever be required

The ■■■ of the Italian infantry ■ the Mannlicher Carcano rifle, ■ magazine weapon of 6.5 mm calibre. The territorial militia has the old Vetterli. The field artillery is being rearmed with Krupp guns, calibre 7.5 cm, model 1906.

The following table gives the *peace* strength of the Italian army in 1911 —

	Officers	Men	Horses ■ Mules
Administration, staff military schools, etc.	1,548	2,061	2,510
Infantry, ■■ battalions, and ■■ district headquarters	7,627	159,297	6,211
Cavalry, 1 ■■ squadrons, and ■■ depôts	1,006	27,976	25,443
Artillery, 263 batteries 110 companies, 51 depôts, etc.	2,359	48,961	23,090
Engineers, 80 companies, and 10 companies engineer train	630	11,105	1,300
Medical 12 companies	769	3,712	81
Commissionariat, 12 companies	452	3,978	420
Carabinieri, 12 legions	704	30,067	5,374
Total	15,095	287,157	64,429

In consequence of the despatch of an expeditionary force to Tripoli and Cyrenaica, the Italian army has been increased by Royal Decree of December 7, 1911 (converted afterwards into the law of June 27, 1912) as follows — *Infantry* ■■ battalions of infantry of the line of 4 companies each, 3 battalions of bersaglieri of 3 companies each. *Cavalry* 5 squadrons. *Artillery* 2 groups of field artillery of ■■ batteries each, ■■ groups of mountain artillery of ■■ batteries each, ■■ groups of fortress artillery of 3 companies each. *Engineers* 2 battalions of ■■ companies each.

The cadres have been increased of the following number of officers, 20 for the carabinieri, 342 for infantry, 21 for cavalry, 112 for artillery, 20 for engineers. The ■■■ law has provided for the constitution of 1 Flying Corps (1 battalion of ■■ companies—*Battaglione Aviatori*).

The military budget of Italy for 1912 ■ amounted to 16,966,471*l*, including 3,214,000*l* extraordinary expenditure. In 1908, extra credit of no less than 8,920,000*l* ■■ granted, to be spread ■■ 9 years. This amount ■■ to be spent ■■ the rearmament of the artillery, guns for permanent works, fortifications, railways, barracks, mobilisation stores, and ■■.

The Italians have a special African corps in Erythraea, consisting of 3 companies of white infantry and ■■ native battalions, also 1 squadron of native cavalry, ■■ local company of artillery (Italians), and a native mountain battery. Its total strength ■■ about 4,600 of all ranks, of whom about 3,800 ■■ natives.

In Italian Somaliland there is a native corps of ■■ infantry companies and 1 artillery company, with ■■■■ officers, and a body of military police. Total ■■■■ strength about 3,000 of all ■■■■.

DEFENCE

111

III. NAVY

The Italian navy estimates for financial years ending June 30 were:—

1911-12	7,602,488	1909-10	6,685,440
1910-11	6,950,988	1908-09	6,335,880

The naval administration, under the Minister of Marine, is thus organised: An assistant secretary; a vice-admiral as Chief of the Staff, a Superior Board composed of two vice-admirals, the lieutenant-general of the *Genio Navale* (naval architect), the major-general of engineers' corps, a captain as secretary, and a civil member, a general surgeon as the head of the sanitary service; a colonel of the *Genio Militare* (military architect) at the head of a section having charge of the engineering works of the naval stations; a general paymaster directing the sections of account. A rear-admiral is chief of a special department administering matters concerning the *personnel* (officers), another vice-admiral the *personnel* (non), a major-general of the *Genio Navale* of that dealing with naval construction, and a vice-admiral of that devoted to ordnance and equipment. A civil officer administers the department of the merchant marine, which is under the direction of the assistant secretary for the navy. For purposes of local naval administration and defence the Italian littoral is divided into three departments: 1, Spezia; 2, Naples; 3, Venice. The vessels are apportioned, for administrative purposes, between the three departments. There are torpedo stations all round the Italian coasts, the head stations being at Genoa, Spezia, Maddalena, Gaeta, Messina, Taranto, Brindisi, Ancona, and Venice. Summary of the Italian navy:—

Completed at end of

	1914	1914
" Dreadnoughts	14	11
Pre-Dreadnoughts	10	10
Armoured cruisers	11	13
Protected cruisers	10	10
Torpedo gunboats	85	(7)
Destroyers	111	111
Torpedo boats	19	32
Submarines		

Some ships of small fighting value are excluded from the above table.

The tables which follow of the Italian armour-clad fleet and first class cruisers are arranged chronologically, after the order of other similar tables in this book, though it should be remembered that in Italian official classification the usual line between battleships and armoured cruisers does not exist.

BATTLE FLEET.

The personnel consists of 1,927 officers (comprising 1 admiral, 25 vice admirals, 216 captains and commanders, 418 lieutenants, 287 sub lieutenants and midshipmen, 108 engineer constructors, 312 engineers, 210 sanitary officers, 100 commissariat officers, 157 officers of the *Corpo Reale Equipaggi*); and 27,080 (sailors, gunners, mechanics, &c.) Both naval and military officers are attached indifferently to the naval service.

Production and Industry.

1. AGRICULTURE

The systems of cultivation in Italy may be reduced to three—1 The system of peasant proprietorship (*coltivazione per proprio o a mano propria*), 2 That of partnership (*colonia parziaria*), 3 That of rent (*affitto*). Peasant proprietorship is most common in Piedmont and Liguria, but is found in many other parts of Italy. The system of partnership—*colonia parziaria*, especially in the form of *mezzadria*, consists in a form of partnership between the proprietor and the cultivator. This system is general in Tuscany, the Marches, Umbria. It is almost unknown in the Basilicata, little practised in Apulia, Calabria, and Sardina, and has been entirely abandoned in the two advanced centres of cultivation in the south, Calabria and Basilicata. Various modifications of the system exist in different parts of Italy. The system of rent (*affitto*) is common in Lombardy and Venetia.

Large farms (*la grande cultura*) are common in the neighbourhood of Vercelli, Pavia, Milan, Cremona, Chioggia, Ferrara, Gossato, Rome, Caserta, &c.

Apulia, the Basilicata, Calabria, and at Girgenti and Trapani in Sicily. In Italy generally the land is much subdivided.

In the census of February 10, 1901, there ■■■ 6,411,001 males and 3,200,002 females of ■ years of age and upwards described ■ engaged in agriculture.

The area of Italy comprises 28,668,222 hectares (1 hectare = 2·47 acres). Of this area, 2,296,615 hectares (8 per cent.) is sterile and 26,371,607 hectares (92 per cent.) productive. In the following table 1 quintal = 3·5 bushels.

	Area 1911	Produce		
		Total		
		1910	1911	1900
	Hectares	Quintals	Quintals	Quintals
Wheat . . .	4,751,000	41,750,000	52,362,000	47,108,000
Maize . . .	7,045,040	25,830,000	23,700,000	2,500,800
Rice . . .	145,040	4,880,000	4,792,000	—
Rye . . .	122,000	1,382,000	1,846,000	1,874,000
Barley . . .	248,000	2,065,000	2,860,000	1,800,000
Oats . . .	514,000	4,148,000	5,947,800	4,075,000
Wines . . .	4,477,000	20,298,000	42,654,000	—
Olives . . .	2,345,000	1,386,000	2,422,000	—

In 1911 Italy exported 10,052 and imported 154,222 cattle; exported 17,068 and imported 1,128 sheep; exported 264 and imported 1,002 goats; exported 21,765 and imported 1,845 swine.

Silk culture, though flourishing most extensively in Piedmont and Lombardy, is carried ■ all over Italy. The average annual production of silk cocoons in the five years, 1906-10, is estimated at 52,563,000 kilogrammes, and of silk, at 5,654,000 kilogrammes (in 1878, 1,293,000 kilos.). In 1912 the estimated silk ■■ crop was 47,470,000 kilogrammes, as against 41,951,000 kilogrammes in 1911.

In the year 1898-99 there were only ■ sugar factories, with ■ output of 5,972 metric tons; in 1910-11 there were 35, their output being 173,154 tons.

In 1903 the silk industries employed 191,000 work-people (in 1891, 172,000); woollen industries, 38,000 (in 1894, 30,000; cotton industries, 140,000 (in 1900, 135,000); hemp, linen, &c., 26,000 (in 1876, 13,000). Domestic textile industries in 1903 employed 292,000 looms (in 1876, 206,000). The value of the output of industrial chemical products in 1911 ■■ 154,000,000 lire (in 1898, 26,184,000 lire). The motive p■■ of all sorts employed ■■ January 1, 1904, amounted to 3,000,000 horse-power in 1892, to 1,000,000 horse-power).

II. FORESTRY.

The forestry department ■■ re-organised by a law of June 2, 1910, in accordance with which ■ Director-General of Forests ■■ appointed, together with advisory committees, ■■ general and the other technical, and a royal forests corps.

The forestarea (exclusive of chestnut plantations) is about 4,000,000 hectares. ■■ yield from the forests ■ valued ■■ follows :—

	1909	Cubic metres	■
Timber . . .	■	1,000,000	37,350,000
Firewood . . .	■	4,040,000	48,080,000
		Quintals	
Charcoal . . .	■	3,004,000	26,400,000
Total			124,132,000 (3,066,260.)

This total is exclusive of secondary produce valued at about 32 millions of lire annually. The forest produce thus amounts at 32 millions of lire (8,240,000*l.*). From 1867 to December 31, 1910, 34,139 hectares were replanted by or with assistance from the Government.

III. MINES AND MINERALS.

Production in metric tons (1 metric ton = 2,204 lbs., = 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1911 :—

Ores, &c.	Productive mines	Metric tons	Lire	Workers
Iron	31	378,786	6,767,519	2,055
Iron manganese	1	6,842	66,838	—
Manganese	9	3,515	110,120	—

Sulphur	35½	2,692,766	31,097,836	19,298
Asphaltic and bituminous substances	18	182,681	3,065,027	1,861
Boric acid	1	2,648	1,006,240	442
Totals (including graphite, petroleum and other minerals)	—	—	82,484,891	47,001 ¹

¹ 2,501 workers in non-productive mines. Of total 47,001 of workers, 1,871 were female.

The quarries of Italy employed in 1911, 70,767 persons (1,182 females), the output of building and decorative stone being valued at 41,355,969 lire (marble, 24,076,076 lire). The total output was valued at 61,048,208 lire in 1911.

In 1911 there were 99,364 persons employed at lime and brick kilns, whose output was of the value of 173,595,764 lire.

IV. FISHERIES.

On December 31, 1910, 10,000 number of vessels were employed in fishing 27,422, with an aggregate tonnage of 75,572. These included 10,000 of 10,000 engaged in coral fishing. There were 121,076 fishermen, of whom 6,230 were engaged in deep-sea or foreign fishing. The value of fish caught in 1911 (excluding foreign fishing) was 22,407,000 *l.*; the value obtained from tunny-fishing was 3,485,000 lire and from coral-fishing 486,000 lire, the quantity being estimated at 50,350 *kg.*

Japan	25,030	26,378	1,163	2,489

For the determination of Customs' values, &c., in Italy there is a permanent central commission, comprising Italian members, representatives of commercial corporations. The values recorded are those of the goods at the frontier, exclusive of import or export duties. For imports and exports the parties interested declare the value of the goods, their quantity, the country of origin or destination. For imports there is recorded the gross weight of the goods subject to a duty of 1 franc per quintal (82. 1½, per cwt.) less; the net legal weight (i.e. with deduction of an official tare) in the goods subject to duty of 20 francs per quintal (82. 1½ to 100 francs per cwt.); the net weight in the goods taxed at over 10 francs per quintal (106. 1½ per cwt.) For exports the gross weight is usually given. Inaccurate declarations are punishable by law and are prejudicial to the Treasury.

The trade of Italy is regarded either as general or special. The general trade comprises imports and exports abroad, whether for consumption within the Kingdom or for transit, and exports to foreign countries, whether national, or fishing or transit. The special trade is restricted to imports for consumption, and include 50 kinds of national manufactures. National merchandise consists of manufactures of the Kingdom, while foreign imports on special duties have value of the through the Kingdom whether directly or indirectly having been temporarily at 22,407,00

and from customs. This provides "the most favoured nation" treatment in the relations of kilogrammes. The Convention between Italy and the Kingdom, and Italy is a party to the Convention.

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade returns) in the 2 years

Imports into U.K.	1910	1911	Exports to Italy	1910	1911
	£	£		£	£
Fresh fruit	507,852	640,893	Coal	5,847,887	5,633,438

Internal Communications.

I. RAILWAYS.

Length of State railways 8,252 miles (June 30, 1912); all the railway lines 10,800 miles.

In 1910-11 the total receipts ■■■■ 534,361,188 lire; in 1911-12, 575,218,000 lire (provisional).

II. POSTS AND TELEGRAPHS.

In the year 1911 there were 10,238 post offices. The postal traffic ■■■■ as follows :-

	Internal.	External and Transit	Total
Letters	1,000	1,000	1,000
Post cards	268, ■■■■	41,524	800,140
Newspapers, &c.	147,367	10,887	158,284
Post Office orders, &c.	846,448	22,021	867,464
	21,410	476	21,886
Total	1,072,836	74,887	1,147,723

On June 30, 1910, the telegraph ■■■■ had a length of 82,328 miles, and the wires, 187,424. There ■■■■ 7,676 telegraph offices, of which 5,747 were ■■■■ offices and 1,929 railway offices. There were, in the year, 12,115,048 ■■■■ sent inland; 2,418,878 international telegrams; 2,618,879 ■■■■; 116,725 in transit; total, 17,469,930.

The telephone service in 1910 ■■■■ 46,293 stations. There were ■■■■ urban ■■■■ with 6,698 miles of line and 104,762 miles of wire; ■■■■ inter-urban systems with 14,687 miles of ■■■■ and 29,376 miles of wire. Total number of conversations in the year, 4,404,082. In 1907 the telephone service passed ■■■■ direct working of ■■■■

Money and ■■■■

■■■■ notes in ■■■■ lire :-

	1907	1908	1909	■■■■	1911
State notes	487,512,410	495,971,000	482,034,715	442,119,195	■■■■
Bank notes	1,851,641,080	1,892,167,890	1,981,000,450	1,926,947,850	2,198,881,850

The total coinage from 1862 to the end of 1911 was: gold, 428,516,970 lire; silver, 589,484,819 lire; nickel, 37,247,600 lire; bronze, 83,908,949 lire; total, 1,139,153,338 lire, exclusive of re-coinage.

The nominal value of the money coined (including recoinage):—

	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1907	—	10,962,724	—	4,600	10,967,324
1908	—	6,677,258	2,683,000	116,689	9,477,047
1909	—	5,474,800	3,858,000	170,456	9,503,256
1910	—	6,962,012	4,377,400	47,785	11,387,197
1911	1,600,000	3,300,620	4,784,200	282,543	9,967,363
	1,000,000	91,446,514	13,880,600	602,075	106,929,189

By law of July 22, 1894, gold and silver (5-franc pieces '900 fine) were temporarily withdrawn from circulation, being represented by paper. On August 31, 1912, the actual currency consisted of 495,875,805 lire of State notes, 2,148,477,800 lire of bank notes, and about 100,000,000 lire of copper and nickel coin.

There is one national bank in Italy. According to the law of August 10, 1893, there are only three banks of issue: the Banca d'Italia, the Banco di Napoli, and the Banco di Sicilia. Assets and liabilities of those banks on December 31, 1911:—

	Assets		Liabilities
	Lire		Lire
Cash and Reserve ¹	1,590,646,966	Capital	802,000,000
Bills	994,806,020	Notes in circulation	4,193,381,850
Anticipations	101,931,027	Accounts current, &c.	355,688,036
Credits	144,509,767	Titles and valuables deposited	2,760,008,024
Deposits	2,750,063,024	Various	487,056,761
Various securities	508,231,887		
Total	6,068,219,681	Total	6,068,219,681

¹ Reserve in gold, in silver, and in equivalent bonds (1,560,062,576): Gold, 1,254,068,968 lire; bills in exchange on foreign countries, foreign bank notes, treasury bonds &c., 178,214,898 lire; silver ('900 fine), 120,806,220 lire; fractional silver, 4,973,909 lire.

On March 3, 1912, a bill was passed making the business of the Banca d'Italia a monopoly.

On January 30, 1911, there were 11 co-operative credit societies and popular banks, 1,140 rural banks, 1,000 ordinary credit companies, and 5 agrarian credit institutions, and (January, 1912) 11 credit foncier companies, of which 1 was in liquidation, with 674,722,825 lire of 'cartelle fondiarie' in circulation, and with 607,409,177 lire of 'mutui con ammortamento.'

The following gives statistics of the savings banks of Italy of 1911:—

		Depositors	Total Deposits	Deposits during year	Deposits during year
			Lire	Lire	Lire
Post-office savings-banks	3,906	5,777,906	1,872,712,111	934,510,166	880,102,398
Ordinary " "	125	2,307,408	2,462,686,218	1,125,680,473	1,048,512,537

On December 31, 1910, the savings deposited with the co-operative credit societies amounted to 785,987,427, and ordinary credit companies to 411,290,911 lire.

On August 12, 1912, a Law came into operation establishing life assurance monopoly. The existing insurance companies were allowed to continue their operations for 5 years under certain conditions. The activities in connection with Insurance will be guided by the National Insurance Institute.

Money, Weights, Measures.

The money, weights, and measures of Italy are the same as those of France, the names only being altered to the Italian form.

The *Lira* of 100 *Centesimi*; intrinsic value, 25·22½s. to 1£ sterling.

The coin in circulation consists of gold 10-lire and 20-lire pieces; of silver 50 cent, 1-lire, 2-lire, and 5-lire pieces; nickel 1 cent pieces, and bronze 1, 2, 5 and 10 cent pieces. Nickel coin is being substituted for bronze to a large amount. Bank notes of 50, 100, and 1,000 lire are in circulation; also small notes, issued by the State, for 5, 10, and 25 lire.

Diplomatic Representatives.

1. OF ITALY IN GREAT BRITAIN.

Ambassador.—Marquis G. Imperiali.

Councillor.—Count Gaetano Manzoni.

First Secretary.—Count Carlo Freschi.

Second Secretary.—Baron Mario de Kessia.

Third Secretary.—Acanio Colonna and Paolo de Parente.

Military Attaché.—Lt.-Colonel Ugo Bagnani.

Naval Attaché.—Capitaine de Corvette Count Lovatelli, R.I.N.

Archivist.—Ugo Catani.

There are Consular representatives at London (Consul—Marquis Alessandro Faa di Bruno), Dublin (C.), Glasgow, Liverpool (C.G.), &c.

2. OF GREAT BRITAIN IN ITALY.

Ambassador.—Rt. Hon. Sir Rennell Rodd, G.C.V.O., K.C.M.G., appointed December 1, 1908.

Councillor.—H. G. Dering, M.V.O.

Secretaries.—G. Mounsey, R. H. Hoare, the Hon. C. Lister, and F. G. Osborne.

Naval Attaché.—Commander A. C. Stewart, R.N.

Military Attaché.—Col. E. J. Granet, C.B.

Consul-General.—Major W. P. Chapman (at Turin).

There are Consular representatives at Brindisi, Cagliari, Florence, Genoa (C.G.), Leghorn (V.C.), Messina (V.C.), Milan, Naples, Palermo, Spezia (V.C.), and other towns.

San Marino

San Marino in the State of Italy is the independent Republic of San Marino, which is the oldest State in Europe. Its legislative power is vested in the Great Council of 60 members elected by popular vote, a third of whom are renewable every three years, and two of whom are appointed every six months as Regents (Capitani reggenti). The Regents exercise executive power. A Council consists of 12 members, and is divided into 3 Congresses: *Congresso Economico*, *Congresso dei Legali*, *Congresso degli Studi*, *Congresso militare*. The frontier is 12 miles in length, and the population (April, 1912)

10,791. The annual revenue and expenditure amount to 382,109, and 444,835 lire respectively. There is no public debt. The military force contains 88 officers and 1,111 men. The chief exports are wine, cattle and stone. A treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1911. The Republic has extradition treaties with England, Belgium, Holland, and United States. San Marino has bronze and silver currency coined in Italy: 210,000 lire in silver and 119,000 lire in bronze.

FOREIGN DEPENDENCIES

Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N.) to Cape Dumeirah on the strait of Bab-el-Mandeb (12° 30' N.). The length of coast is about 670 miles. The area is about 45,800 square miles, and the population, which is to a great extent nomadic, is estimated at 450,000. In 1908 there were 274,944 natives and 2,930 Europeans (inclusive of the military forces), 2,271 of whom were Italians; Massawah having 2,275 inhabitants, of whom 1,111 are European (exclusive of the garrison), and 1,164 Asiatics. Asmara is the seat of government. The Italian possessions on the Red Sea are constituted as the Colony of Eritrea, with an autonomous administration and the management of its own finance. Military force, 127 officers, and 4,484 men (3,740 natives and 744 Italian).

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies.

Governor.—Marquis Giuseppe Salvago Raggi, January, 1907.

For the financial year 1911-12 the revenue and expenditure of the Colony of Eritrea were estimated at: Colonial revenue, 3,062,186 lire; State contribution, 6,350,000 lire; total revenue, 9,412,186 lire; expenditure, civil administration, 5,418,986 lire; military, 3,993,200 lire; total expenditure, 9,412,186 lire.

The tropical climate and the general scarcity of water during the summer months necessitate works for irrigation before crops can be raised with success. Pasture is abundant, but the pastoral population is essentially nomadic. Camels, oxen, sheep, goats, are common, and the produce, consisting of meat, hides, butter, supplies articles of local trade. Pearl-fishing is carried on at Massawah and the Dahlak archipelago to the annual value of from 250,000 lire for pearls and 800,000 lire for mother-of-pearl. A very promising trade is being carried out in palm nuts. The exportation of these nuts in 1910 amounted to one million lire. There are gold mines worked about 100 miles from Asmara, with hopeful results.

At Massawah the imports by land and sea, the exports, and the tonnage entered were as follows:—

	1903	1904	1905
Imports Lire	9,185,316	17,335,730	16,872,680
Exports "	2,832,300	6,845,026	7,277,965
Transit "	2,806,000	3,153,380	3,857,551
Tonnage Tons	156,860	171,165	171,165

There is a 74-mile railway from Massawah to Asmara (end of 1912), and now the line is being extended to Keren (58 miles) and Agordat

(75 km.). There are 11 post-offices. There is a telegraph line of 319 miles from Massawah to Assab, 62 miles from Massawah to Perim. Other lines bring the length up to about 1,000 miles. There are 2 telephone lines. A powerful wireless telegraph station has been opened at Massawah. It is connected with the radiotelegraphic system of Italian Somaliland and with Italy (Coltano). There is, thus, through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and those of the Latin Union, but in actual circulation are still some Maria Theresa dollars. The Italian mint has issued coin amounting to 10,879,995 lire, under the denominations of Eritrean dollars (= 5 lire), and $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$ dollar pieces.

Italian Somaliland.

The Colony and Protectorates of Italian Somaliland have an area of 139,480 sq. miles and a population of about 400,000. They extend along the east coast of Africa from British Somaliland to the Gulf of the Juba and comprise the Protectorates of Northhorn Somaliland, viz., the Sultanate of the Mijertins (Oman Mahamud) from Bender Ziade, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabbel on the Indian Ocean (8° 18' N. lat.); the territory of the Nogal from Cape Gabbel to Cape Garad (6° 47' N. lat.); the Sultanate of Obbia (Jusuf Ali) from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the Gulf near the wells of Fah (about 4° 30' N. lat.); and the Colony formerly called "Benadir" but officially known as the "Somalia Italiana," which extends from 4° 30' N. lat. to the mouth of the Juba, and comprises the towns of Merag, Itala, Warsheik, Mogadisho (pop. 10,000), Merka (7,000), Brava (5,000), and Jumbo all on the coast, and Bardera and Lugh inland on the Juba. The colony is administered by a civil governor who resides at Mogadisho; in the Protectorates the Governor is represented by a Civil Commissioner, who up to the present date has been the Italian Consul-General at Aden. A royal decree of December 8, 1910, provides for the minting of silver coins of 1 rupee, $\frac{1}{2}$ and $\frac{1}{4}$ rupee for Italian Somaliland, of the value of 15 rupees to 12 sterling. The principal occupation of the people is cattle-rearing. But the Mijertins rear chiefly camels and sheep. Imports (1910-11), 4,239,058 lire; exports, 1,690,652. Imports are yarn, timber, petroleum, rice, cottons; exports, butter, timber, hides, durra. Animal produce is exported to Zanzibar, whence it is shipped to Europe and America. Military force, 70 officers and 3,500 men. The inland boundaries of Italian Somaliland and Benadir are determined under the treaty of May 16, 1908, between Italy and Abyssinia, by a line (not yet demarcated) from Dolo on the Juba to the confluence of the Juba with the Daus, thence to the Wabi Shebelle, and finally to the Anglo-Abyssinian frontier fixed by protocol of May 14 and June 4, 1897.

Governor.—Senator Nobile Giacomo de Martino (1910).

The budget of Italian Somaliland for the year 1911-12 is as follows: revenue proper of the colony, 622,000 lire; State contribution, 2,979,000 lire; total, 142,040. civil expenditure, 1,558,000 lire; military, 2,043,000 lire.

There are 11 wireless telegraph stations are working in the Colony connecting the principal coastal and inland towns. A big wireless station has just been built at Mogadisho, which communicates with Italy, via Massawah.

There are in the Colony 3 principal post offices (Mogadisho, Merka and Jumbo) but postal service is carried out at every village.

—The [redacted] of Tientain, under the agreement with China of June 7, 1902, [redacted] bank of the Peiho [redacted] has an area of about 18 sq miles with a native population of about 17,000. It contains a village and [redacted] pits.

Tripoli and Cyrenaica.

(LIBIA ITALIANA)

Tripoli fell under Turkish domination in the sixteenth century and, though, in 1714, the Arab population secured [redacted] of independence, the country [redacted] in [redacted] proclaimed a Turkish *vilayet*. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter invaded Tripoli and established [redacted] army there. On November 5, 1911, a decree [redacted] issued annexing Tripoli, and [redacted] February 28, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy [redacted] signed, by which the Sovereignty of Italy in Tripoli [redacted] established. This has now been recognized by the Great Powers. Italy accepted a clause, identical with that contained in the Austro-Hungarian treaty regarding Bosnia Herzegovina, dealing with the exercise of religious authority by the Caliph.

Tripoli will be administered under the Colonial Ministry.

The entire area of the territory is estimated at about 406,000 square miles. According to a census taken on August 3, 1911, there were 528,176 natives, of whom 29,761 were in Tripoli town. The population is mostly Berber, but Jews are [redacted]. The civil European population numbers 5,000 [redacted] 6,000, mostly Maltese and Italians, practically there [redacted] Turkish settlers. Arabic is generally spoken, but Italian is the official language. Until recently the province contained the headquarters (Jerbouh) of the Mohammedan sect of the Senussiyeh. The principal towns [redacted] the coast, Tripoli, the capital of the *vilayet*, with 29,761 inhabitants, Benghazi with 35,000, Derna and Khoms; inland are the [redacted] halting places Ghadames, Murzuk, and Ghat.

Tripolitania [redacted] four zones, the first of which, along the [redacted] is covered with palm, olive, lemon, and fruit trees. The second [redacted] formed by the highlands of Gebel and Tarhuna, [redacted] former has olive groves and palm and fig trees, while cereals and [redacted] also grown. The country, however, is rather barren. The Tarhuna land is rich in [redacted] grass. The rest of the second zone, which includes the hills of Mesallata and Boudara, [redacted] well [redacted] valleys, is most fertile, [redacted] olive [redacted] abundant. The third [redacted] consists chiefly of [redacted] and is rich in palms [redacted] (of which Gadames is the most important) [redacted] distance apart. The [redacted] [redacted] covered with palms, figs, vines, and almonds.

In Cyrenaica, olives and cypresses predominate. Pasturage [redacted] abundant and cattle could be bred on a vast scale. Bananas are grown at Derna. Barley [redacted] chief [redacted] of the people.

Cultivation in Tripolitania does not amount to much, though cotton, tobacco, castor beans, saffron, indigo, and henna are grown. Seventeen thousand tons of asparto were exported from the region in 1911.

There is a considerable caravan trade between Benghazi and [redacted] and [redacted] Tripoli and Central Sudan when [redacted] [redacted] raiders. An important [redacted] of [redacted] is ostrich [redacted] [redacted] overland from Central Africa, and exported to Paris and London from Tripoli to the value of 10,000*l.* annually, and 6,000*l.* [redacted] Benghazi. [redacted] money [redacted] been withdrawn [redacted] a new monetary system is being [redacted].

Imports in 1911 amounted to 430,000*l.* (440,168*l.* in 1910), and exports to 180,000*l.* (183,703*l.* in 1910). Sponge fishing ■■■ started in 1885. In the season ending September 30, 1911, the value of ■■■■ from the waters of Tripoli amounted to 920,000 francs.

There ■■■ plan before the Italian Parliament providing for ■■ sailings a week to and from Syracusa; weekly sailings between Palermo and Tripoli; and ■■ line to and from Venice, besides the regular service from Genoa.

In 1902, the tonnage cleared at Tripoli amounted ■■ 270,800; in 1909, 358,929; in 1910, 365,796; and in 1911, 360,000.

The principal ■■■■ of communication inland are the ■■■■ which follow long frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Murzuk (Fesnan) and Gabes (Tunis).

There is a British Consul at Benghazi, and a Vice-Consul ■■ Khoms.

Imports in 1911 amounted ■ 430,000f. (440,168f. in 1910), and exports to 190,000f. (183,703f. ■ 1910). Sponge fishing ■ started in 1885. In the season ending September 30, 1911, the value of sponges from the waters of Tripoli amounted ■ 920,000 francs.

There is a plan before the Italian Parliament providing for 3 sailings a week to and from Syracuse; weekly sailings between Palermo and Tripoli; and a line to and from Venice, besides the regular service from Genoa.

In 1902, the tonnage cleared at Tripoli amounted to 270,000; in 1909, 352,922; in 1910, 365,796; and in 1911, 360,000.

The principal lines of communication inland are the caravans which follow long frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Misrata (Fekkan) and Gabes (Tunis).

There is a British Consul at Benghazi, and a Vice-Consul at Khoms.

Financial and other Trade of Nations concerning Italy.

JAPAN.

(NIPPON.)

Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 A.D., and that the dynasty founded by him still reigns. It was revived in the year 1868, when the ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shōgun (the *de facto* sovereign), who had held the ruling power in several families, since the twelfth century; and in 1871 the feudal system (*Hōken Seiji*) was entirely suppressed. The Emperor bears title of Tennō; but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

Emperor of Japan.—Yoshihito (Harunomia), born at Kyoto, August 31, 1879; succeeded his father, Mutsuhito, July 30, 1912; married, May 10, 1900, to Princess Sadako, born June 25, 1884, daughter of Prince Kujō.

Children of the Mikado.—I., Prince Hirohito, born April 29, 1901 (Crown Prince). II., Prince Yasuhito, born June 25, 1902. III., Prince Nobuhito, born January 3, 1905.

Sisters of the Mikado.—I., Princess Masako, born Sept. 30, 1888, married, April 30, 1908, to Prince Tsunehisa. II., Princess Fusako, born Jan. 28, 1890, married, April 29, 1909, to Prince Narihisa. III., Princess Nobuko, born August 7, 1891, married May 6, 1910, to Prince Yasuhiko. IV., Princess Toshiko, born May 11, 1896.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves on the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who is consulted by the Emperor on important matters of state. The Emperor declares war, makes peace, and concludes treaties. The Emperor exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to make the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. The Houses may respectively initiate projects of law, make representations to the Government as to laws or upon any other subject, and may present petitions to the Emperor.

The House of Peers (369 members) is composed of (1) members of the Imperial family of all ages; (2) princes and marquises of the age of 25 upwards (15 princes and 28 marquises); (3) counts, viscounts, and barons of the age of 25 and upwards, and who have been elected by the members of their respective orders, never to exceed one-fifth each (100

counts, 375 viscounts, [redacted] barons), (4) persons above the [redacted] of [redacted] years, who have been nominated members by the Emperor for meritorious [redacted] to the [redacted] for erudition, (5) persons who [redacted] have been elected in each Fu and [redacted] among and by the 15 [redacted] inhabitants thereof, above the age of 30 years, paying therein the highest amount of direct national taxes on land, industry, [redacted] trade, and have been nominated by the Emperor. The [redacted] of membership under (3) and (5) [redacted] years, under (1), (2), and (4) for life. The number of members under (4) and (5) must not exceed the number of other members.

The members of the House of Representatives number 379, a fixed number being returned from each electoral district. The proportion of the number of members to the population is one to about 136,522. Voting is by secret single ballot. Electors [redacted] (1) male Japanese subjects of not less than full 25 years of age, (2) permanent and actual residents in the electoral district for not less than a year, (3) and paying land tax to the amount of not less than 10 yen [redacted] a year for more than [redacted] year, or direct taxes other than land tax to the amount of not less than 10 yen in a year for [redacted] than two years or of land [redacted] together with other direct national taxes to the amount of not less than [redacted] yen [redacted] a year for [redacted] than two years. In general, male Japanese subjects of not less than 30 years of age [redacted] eligible to the House of Representatives, without any qualification arising from payment of taxes. Disqualified for membership are the Imperial Household officials, priests, students, teachers of elementary schools, government contractors, election officials. The President and Vice President of the House of Peers are nominated by the Emperor from among the members, and President and Vice President of the House of Representatives [redacted] nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses [redacted] annual salary of 5,000 yen, Vice Presidents, 3,000 yen, elected and nominated members of the House of Peers and members of the House of Representatives, 2,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually has control over the [redacted].

House of Representatives, May, 1912. Constitutional Party (Sayukwai) 217, Popular Party (Kokuminto) [redacted], (Central Party (Chuoto), 82, Independents (Mushozoku), 37.

The Cabinet consists of the following members, (February 20, 1913) —

Prime Minister — Admiral Gombei Yamamoto

Foreign Affairs — Baron Nobuaki [redacted]

War — Baron Kikoshi

Marine — Baron Saito

Minister of Finance — Baron Korekijyo Takahashi

Agriculture and Commerce — Mr Tatsuo Yamamoto

Justice — Mr Masahisa Matsuda

Interior [redacted] *Railways* — Mr Kei Hara

[redacted] — Mr Sajima Motoda

Communications — Mr Gigin Okuda

The Agreement [redacted] United Kingdom and Japan, signed August 12, 1905 (renewed July 12, 1911) [redacted] for [redacted] maintenance of peace in Eastern [redacted] India, [redacted] preservation of the independence and integrity of China, [redacted] principle of equal opportunities [redacted] industry [redacted] China, [redacted] of [redacted] rights [redacted] defence of [redacted] special [redacted] Britain [redacted] Japan [redacted] Eastern Asia and [redacted]. It provides for frank inter-communication [redacted] the two Governments [redacted] their rights [redacted] are threatened, and for mutual [redacted] in [redacted] of unprovoked [redacted] or aggressive action on the part of any other power. Great Britain recognises the right of Japan [redacted] and protect Korea, the principle of equal opportunities [redacted] Korea for the

commerce, industry of all nations, and Japan. The Agreement for ten years (second period 1911-1921), but it is only terminate the of period if denounced beforehand by the other of signatory Powers if ten years have expired denunciation the Agreement year notice by either Power is required for termination, if, at the date for expiration, either Power is war, the alliance is to continue till the restoration of

Local Government.

For local administration Japan (except Hokkaido, Yezo, Chosen, formerly Korea, Chao panen, Karafuto or Japanese Sakhalin, and Taiwan, Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi') and counties ('Gun'), the counties are again subdivided into towns ('Chō') and villages ('Son'). Okinawa Prefecture and islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the In each prefecture there is a governor ('chiji') a prefectural assembly ('Fu kwai' or 'Ken kwai'), and a prefectural council ('Fu Sanji kwai' or 'Ken sanji kwai'), of which the governor is president in each county a sheriff, a county assembly, and a county council, of which the sheriff is the president, each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president, and in each town or village a chief magistrate and a town or village assembly. Prefectural, county, municipal, town and village assemblies give decision mainly upon financial matters. The prefectural and county councils give decision upon matters delegated by the prefectural and county assemblies respectively, and upon matters of pressing necessity when the respective assemblies are not in actual session.

The qualifications of the prefectural electors are (1) citizenship and residence in the prefecture, (2) payment of the direct national tax to the amount of not less than 3 yen for year in the prefecture. Persons eligible for election must pay direct national tax to the amount of not less than 10 yen. Citizenship is shared by all male Japanese subjects not less than 25 years of age, who for two years (1) reside in the municipality, or town, or village, (2) share its burden, and (3) pay land tax or not less than 2 yen direct national tax annually in it. The governor and sheriff are appointed by Government; the mayor is that one of three candidates elected by the municipal assembly who has obtained the Emperor's approval, and chief magistrate of town or village who has been elected by the town or village assembly and has obtained the governor's approval.

Hokkaido has a governor and a special organisation. Chosen has a Governor General. The peninsula is administered in 13 Do provinces, these being subdivided into Tund Yun or districts. Taiwan (Formosa) also has a governor general, who is invested with very extensive powers. The island is divided into local divisions (Chō), each of which has a chief magistrate. Karafuto is divided into 5 local divisions (Chō).

Area and Population.

The Empire consists of the five principal islands of Honshu (mainland), Kiu-shiu, Shikoku, Hokkaido (Yezo), and Taiwan (Formosa), besides the Chishima (Kuriles), Sado, Okinawa, Iki, Tsushima, Liankiu, Ogasawarayama (Bonin), Hōkotō (Pescadores) islands, the peninsula Chosen, and the southern half of island of Karafuto (Sakhalin). Total area about 175,540 square miles, of which the Honshu occupies 87,426 square miles. Taiwan (Formosa) and the Pescadores were ceded by China in accordance with the treaty

of Shimonomaki in 1895, and Japanese territory ceded by Russia by the Treaty of Portsmouth, N.H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan. Administratively there exists a division into 47 prefectures. There is also a division into 637 rural districts, 1,135 towns, and 11,142 villages (1910).

Number of Japanese proper (i.e. excluding natives of Formosa and the Pescadores) residing in Japan or abroad :—

Year	Population (Dec. 31)	Annual Increase per cent.	Year	Population (Dec. 31)	Annual Increase per cent.
1909	50,295,279	1.17	1911	51,591,342	1.23
1910	50,939,137	1.16	1912	52,200,679	1.27

Number of Japanese at home and abroad (1908), as follows :—

	Sq. m.	Population	Pop. per sq. m.		Sq. m.	Population	Pop. per sq. m.
Central Honshu	56,609	10,004,475		Shikoku	7,061	2,383,310	
Northern "	30,304	7,480,433	246	Kyushu	16,840	7,726,984	
Western "	20,681	10,929,574		Hokkaido	36,299	1,137,465	31
Total Honshu	67,485	27,414,381	425	Grand tot.	147,655	40,938,798	336

There were 26,380,220 males and 25,820,465 females in 1912.

On December 31, 1908, the population was divided as follows :—Imperial family, 67 ; kwazoku, or nobles, 5,642 ; shizoku, or knights, 2,218,628 ; common people, 47,382,262 (including Ainu in Hokkaido, 18,017). In 1910 21,889 Japanese emigrated, and of these 2,478 went to China, 8,771 to Russia, 1,053 to Australia, 1,921 to Hawaii. In 1910, 3,022 Japanese migrated to the U.S., and in 1911, 4,520. On December 31, 1910, the number of foreigners in Japan (exclusive of Formosa) was 15,154, of whom 8,462 were Chinese, 2,471 English, 1,665 American, 809 German, 547 French, 216 Portuguese, 137 Russian, 116 Swiss.

Births, deaths, and marriages of Japanese at home and abroad :—

Year	Marriages	Births	Deaths	
1905	351,260	1,599,131	1,044,855	554,276
1906	353,274	1,399,203	961,550	437,653
1907	433,527	1,621,973	1,024,286	597,687
1908	461,940	1,672,827	1,038,110	634,717
1909	438,771	1,705,877	1,098,797	606,080

In ■■■ still-births (not included in the above) numbered 161,596 ■ 8.9 ■ cent.), ■■■ illegitimate, 147,558 (or 9.2 ■ cent.).

Shimonoseki was formerly called Akamagasaki.

Religion (excluding Formosa).

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 12 sects; (2) Buddhism, with 12 sects and 33 creeds. There is no State religion, and ■■■ State support. In 1909—Shinto priests, 76,149; students, 154. Buddhist temples, 71,330; bonzo, 121,553; students, 9,788. There were, besides, 1,966 licensed preachers and 1,219 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate ■■■ archbishop and three suffragan bishops. There are shrines dedicated to the eminent ■■■ of the Imperial House, and to meritorious subjects; these ■■■ independent of any religious sect, and ■■■ of them ■■■ supported by ■■■ local authorities. In 1909 the shrines numbered 147,441, and the ritualists, 14,821.

Instruction.

Elementary education is compulsory. The number of children of school age (6-14) ■■■ March 31, 1910, was 6,479,004. The following ■■■ the educational statistics for 1910:—

Institutes	Number	Teaching ■■■	Pupils
Elementary schools . . .	36,115	144,674	6,479,004
Middle " . . .	306	5,544	117,434
High girls' " . . .	■	2,732	51,440
Normal " . . .	76	1,406	28,422
Special & ■■■ ■■■ ■■■	5,682	7,319	805,028
Various " . . .	3,128	9,553	■
Universities . . .	■	640	7,206

The four Universities are Tokyo Imperial University, Kyoto Imperial University, Tohoku Imperial University, and Kynshin Imperial University. The first consists of a University Hall, Colleges of Law, Medicine, Literature, Science, Engineering, and Agriculture; the second, a University Hall, Colleges of Law, Medicine, Literature, and Science and Engineering; the third, of Colleges of Agriculture and Science; the fourth, of a College of Engineering. They are supported by Government. At Tokyo University in 1910-11 there were 363 professors and teachers (inclusive of 15 foreigners), and 5,098 students. At Kyoto University there were 191 professors and teachers (inclusive of 11 foreigners), and 1,375 students. At Tohoku University there were 86 professors and teachers (inclusive of 11 foreigners), and 793 students. The bulk of other schools are also supported by Government as well as by local rates.

In 1910 there were 281 libraries in Japan, with 2,271,935 volumes. In 1910, 34,123 books of various kinds, and 2,768 periodicals, monthly, weekly, daily, were published.

In Formosa, there is a special educational system.

Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan (exclusive of Formosa); namely, sub-district courts, district courts, courts of appeal, and court of cassation. In the court of cassation seven judges preside; in the courts of appeal, five judges; in the district courts, three judges; in each case, one of them being the chief judge. In the subdistrict courts, a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

A few judges of high rank are directly appointed by the Emperor, and others are appointed by him on nomination by the Minister of Justice. The following are the criminal statistics for five years:—

	1905	1906	1907	1908	1909
Lesser crimes	8,261	8,300	8,092	—1	—1
Greater crimes	64,302	67,243	66,010	—	—
Total	67,563	71,243	69,102	70,490	67,404

In 1909 there were 111 prisons, 97 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1909:—Men, 53,471; women, 3,110; total, 56,581.

For the trial of cases connected with the military and naval services there are courts-martial.

Pauperism.

In 1909 legislation settled the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen; that funds below that limit are to be made up by the Treasury; the amount of relief exceeds 1 per cent. of the funds at the beginning of the year; one-third of the amount thus granted is to be supplied from the Treasury.

¹ The distinction between serious and lesser crimes was made in the revised code of 1907.

The relief statistics for 1909-10 expenditure as follows (in yen, exclusive of Formosa) : Shelter, 1,348, food, 38,747; clothing, 2,072; medicine, 153, provisional dwellings, 25,361, expenditure for providing work, 14,026; miscellaneous, 522, total, 82,229 Total 1908-9, 435,598 yen

In 1909 the Central Government relieved 3,753 persons to the amount of 82,979 yen (excluding Formosa) At the end of 1909, 1,736 foundlings (excluding Formosa) being maintained, and the expense in that year 53,446 yen. There are, besides, several workhouses established by local corporations and private persons

Finance.

The revenue of the towns and villages [] 1911-12 [] 107,561,595 yen (79,058,474 [] from rates), and the expenditure [] 107,488,465 yen. The total local [] the end of 1911 [] 184,666,785 yen.

Defence.

I. ARMY.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. All those physically capable of bearing [] [] divided into two classes, the 'fit,' and the 'absolutely fit.' The numbers necessary for the first line (or active army), called *Genshi*, [] taken solely from the 'absolutely fit.' Service in the ranks is for 2 years in the infantry, 3 in all other arms; then for [] (or 4) years and [] months in the [] (*Yobi*). One year volunteers are admitted. Reservists are called out twice for training during their reserve service, for 60 days on each occasion. Having completed 7 y[] and [] months in the first line, including its reserve, the [] transferred to the second line, called *Kobi*. Service in the *Kobi* is for 10 years, with two trainings of 60 days each in the whole period. At the end of their *Kobi* service the men are in the 38th year of their age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of [] years.

The reserve for making good the waste of war, or *supplementary reserve* is called *Hoju*. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed [] "fit" [] [] required to make up a certain fixed number. They all [] in the *Hoju* for 7 years and [] months, during which they have a first training of [] days, and two subsequent trainings of 60 days each. After completion of this period of their service they [] passed to the *Kobi*, in which they serve for ten years, like the [] who have passed through the first line. Like them also they are finally passed to the *Kokumin* for [] years and [] months, to complete their [] service.

The *Kokumin* is divided into two 'bans.' The first ban comprises all the men who have passed, [] shown above, through the first line and landwehr, [] through the supplementary [] and landwehr, and who therefore have only 2 years and [] months to spend in the *Kokumin*. The second ban [] levy [] of all those capable of bearing arms. It includes (1) those who though 'fit' are not required for the *Hoju*; (2) those who for various reasons have been exempted from military service; and (3) the young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can [] drawn on in [] of national emergency.

The partially trained [] who have been passed [] *Kobi* from [] *Hoju* are not included in the fighting units of the Second Line. They supply [] large number of [] required for [] transport service on mobilisation, and [] the expansion of other departmental corps.

The [] army of Japan consists of [] divisions, including [] guard,

2 independent cavalry brigades, 3 independent brigades of artillery (each of 12 batteries of 6 guns), 3 independent divisions of mountain guns, and 4 regiments of heavy artillery, each of 6 guns.

Two infantry regiments form a brigade, and 3 brigades (12 battalions) a division. But to each division on mobilisation is attached a Kobi brigade, making 3 brigades, or 12 battalions in all. The artillery consists of a regiment of field artillery (6 batteries of 6 guns) supplemented by heavy mountain guns as required (also probably by 2 batteries of Kobi artillery). A regiment of cavalry of 3 squadrons, with 4 machine guns, and a battalion of engineers, complete the division. Four infantry, 1 artillery, ammunition columns, 6 field hospitals, 1 supply column, and 1 remount depot, accompany each division in the field. The war strength of a division, excluding the Kobi brigade, is reckoned at 18,700 officers and men, 4,800 horses, 36 guns, and 1,674 vehicles.

The strength of an independent brigade of cavalry is 2 regiments, each of 4 squadrons and a battery of 8 machine guns, total about 1,650 men and 1,680 horses. The strength of an independent artillery brigade of 12 batteries is about 2,500 men and 1,000 horses. Divisions are grouped directly into armies, 2 to 3 divisions forming an army of from 80,000 to 130,000 men. The total strength of the field army at the present time may be taken at about 600,000 combatants including Kobi troops detailed for the lines of communication. The war effectiveness of the new divisions will not be complete before 1916.

The active army consists at present of 80 regiments (240 battalions) of infantry, 27 regiments of cavalry (89 squadrons), 150 field batteries, 1 mountain battery, 28 battalions of garrison artillery, and 19 battalions of engineers each of 3 companies.

The Kobi comprises 228 battalions, 57 squadrons, 114 field batteries, 12 battalions of garrison artillery, and 19 battalions of engineers.

The Japanese Islands are divided into military districts corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country, the other divisions of the Guard division recruited from the large district of the 1st division. Abroad there are the separate division of Formosa, and the small garrisons of Saghalien and Ten-shima, also 25,000 to 30,000 in Korea and Manchuria.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools and the Members of the Military Council.

The Japanese infantry is the unproved Arisaka rifle, calibre, 6.5 mm (256), a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction. The field gun is a 7.5 cm shielded Krupp of 7.5 cm calibre, which fires a shrapnel of 14 lb. The mountain artillery is a gun of the same calibre firing a lighter shell. There is a certain number of field howitzer batteries, armed with 8" and 5.9" howitzers, firing shells of about 44 lb and 80 lb respectively. A gun for heavy batteries is being introduced.

No official peace strength of the Japanese army is published, but the apparent amount is 225,000 or 230,000 of all ranks.

The military budget for 1912-13 amounts to about 2,660,000, including extraordinary expenditure.

II. NAVY.

The Navy of Japan is divided into five maritime districts having their headquarters at Yokosuka, Kure, Sasubo, Maizuru, and Chinkai (the last not established yet).

The personnel of the navy in 1910 included 1 Admiral of the Fleet, 7 Admirals, 11 Vice-Admirals, 39 Rear Admirals, 104 Captains, 111 Commanders, 276 Lt.-Commanders, 111 Lieutenants, 111 Sub-Lieutenants 1st class, 277 Sub-Lieutenants 2nd class, 236 Midshipmen, 697 Engineers, 111 Medical Officers, 111 Pay Officers, 74 Constructors, 41 Ordnance Officers, 11 Hydrographic Engineers, 1,533 Warrant Officers, and 43,790 men on the active service.

Japan now builds and equips her Navy warships. Armour factories are installed at Kure. The *Kongo* is building at Harrow, England.

A statement of the Japanese fleet similar to that given for other navies is—

	Completed at end of		
	1912	1913	1914
"Dreadnoughts"	1	2	1
"Pre-Dreadnoughts"	16	16	1
Armoured Cruisers	13	13	19
Protected Cruisers	17	20	1
Torpedo Gunboats, Scouts, etc.	1	6	1
Destroyers	61	7	1
Torpedo Boats	50	7	1
Submarines	12	7	1

Note.—The Pre-Dreadnoughts include several captured Russian ships.

The following table includes all the battleships built and building, armoured cruisers and principal protected cruisers. Ships in italics will not be completed at the end of present year.

Pyrites	5,730,683	21,246,126		

1 120 mommé = 1 ■ avoidupois

2 1 kwan = 5 26 li

3 kin = 100 lb av.

4 koku = 39 7 gal

In the province of Echigo the petroleum industry is being developed. At Wakamatsu there is a large Government foundry turning out pig iron, Siemens' steel, and rails and plates. At Nagasaki are important shipbuilding works with the newest machinery under the supervision of skilled European workmen.

In 1910 there were 92 cotton mills employing 17,744 men and 74,475 women; with 1,896,601 spindles and an output of yarn of 56,396,939 kwan. In the same year 35,288 ■ and 726,041 women, with 68,593 machine looms and 683,696 hand looms turned out woven piece goods valued at: silk, 108,610,048 yen; mixed silk and cotton, 24,629,652 yen; cotton, 121,539,890 yen; hemp, 3,642,020 yen, besides sa-hos and other articles. Other manufactures in 1910 were Japanese paper worth 19,781,920 yen; European paper, 16,405,637 yen; matches, 12,610,503 yen; earthenware, 13,269,996 yen; lacquered ware, 7,865,780 yen; matting, 10,099,352 yen; leather, 7,624,717 yen; oil, 11,123,214 yen.

In 1910 the ■ products amounted to the value of 78,266,886 yen; the manufactured products to the value of 48,786,518 yen.

Money, Weights, and Measures

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0.75 grammes of pure gold, and is called the yen = 100 *chū*, which, however, is not coined. The pieces coined are as follows—Gold (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 *sen* pieces), nickel coin (5 *sen* piece), and brass (1 *sen* and 5 *rin* pieces). The *rin* is the hundredth part of a yen, and the *sen* is the tenth part of a yen. The gold coins are 900 fine and the silver coins 800 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The 1 yen silver coin formerly issued is withdrawn. The old silver 5 *sen* piece and copper 2, 1, 1 *sen* pieces, &c., are used as formerly.

The <i>Ken</i> = 1000 <i>momme</i>	= 1 lb avoirdupois
<i>Kwan</i> = 1,000 "	= 267 lbs "
<i>Sun</i>	= 1.193 inch
<i>Shaku</i> (10 <i>sun</i>)	= 11.93 inches
<i>Ken</i> = 3 <i>shaku</i>	= 35.8 feet
<i>Chō</i> = 60 <i>ken</i>	= 1.1 mile, 1.1 chains
<i>Ri</i> = 36 <i>chō</i>	= 3.4 miles
<i>Ri</i> sq	= 9552 sq miles
<i>Chō</i> , land measure	= 2.45 acres
<i>Koku</i> , liquid	= 39.7038 gallons
" dry	= 1 bushel
<i>To</i> , liquid	= 3.9703 gallons
" dry	= 1.9851 peck

Besides, the system of weights and measures based on the metric system is acknowledged as legal in the following ratios:

metre	= 3.3 <i>shaku</i>
gram	= 0.26667 <i>momme</i> ($\frac{1}{3}$ <i>momme</i>)

Diplomatic Representatives.

1 OF JAPAN IN GREAT BRITAIN

Imbassador—Katsumosuki Inouye
Counsellor—Choro Koike
Second Secretaries—Isaburo Yoshida and Kenchi Yamazaki
Third Secretary—Koki Hinota
Attache—Setsuna Sawada
Military—Colonel Saburo Inagaki
Naval Attache—Captain Abo, I J
Chancellors—Sairo Masbeko and Kuniyaku Kishi
Consul-General in London—Takahashi Nakamura
 There are Consuls at Glasgow, Liverpool, and Middlesbrough.

2 OF GREAT BRITAIN IN JAPAN.

Consul-General—Sir William Conyngham Greene, K C B., appointed October, 1912
Counsellor—H. M. Rumbold, M V O
Secretaries—D. Crackanthorpe, N. Henderson and Edmund St J. Monson.

Naval Attaché.—Captain Sir D. Brownrigg, Bart., R.N.

Military Attaché.—Lieut.-Col. John A. C. Somerville.

Japanese Secretary.—E. M. Hobart-Hamjden.

Commercial Attaché.—E. T. F. Crowe, C.M.G.

There are Consular Representatives at Dairen (Dalny), Hakodate, Kobe, Nagasaki, Shimonoseki, and Yokohama, and at Tainan and Tamsui in the Island of Formosa.

KOREA.

(CH'AO HAIEN, ■■ CHOSEN, OR DAI HAN.)

Government.—THE ex-Emperor, whose ■■■ is Yi and ■■■ Chok, ■■■ born March 25, 1874, and succeeded his father, Yi Hiung, on his abdication, July 20, 1907. He is reckoned ■ the thirty-first in succession since the founding of the dynasty in 1392; but four of the so-called Kings were Crown Princes who never ascended the throne.

By the treaty of Shimonoseki, May, 1895, China renounced her claim on Korea, and under Japanese influence many reforms were introduced. On February 23, 1904, an agreement was signed at Seoul on behalf of Japan and Korea, the Japanese Government undertaking to ensure the safety of the Korean Imperial House and guaranteeing the independence and territorial integrity of the country, while the Korean Government, placing full confidence in the Japanese Government, agreed to adopt Japanese advice with respect ■ administrative improvements.

Under the Russo-Japanese treaty of peace of September 5, 1905, Russia acknowledged Japan's paramount interests in Korea, and engaged not to obstruct nor interfere with the measures of guidance, protection, and control which Japan may take in Korea. The Anglo-Japanese agreement of August 12, 1905, contains similar recognition on the part of Great Britain. On November 17, 1905, there ■ signed between Korea and Japan an agreement placing in the hands of the Japanese Government the control and direction of the foreign relations of Korea. By this agreement it was provided, *inter alia*, that a Japanese Resident-General should be stationed in Seoul, and the first Resident-General (Marquis Ito) took up his appointment ■ March 2, 1906. On July 31, 1907, ■ further agreement was concluded with Japan, by the terms of which ■ administrative ■ and all high official appointments ■ made subject to the approval of the Resident General, and Japanese subjects ■ made eligible for ■ positions in Korea. A new Convention ■ concluded on July 12, 1909, whereby the Government of Korea delegated to the Government of Japan the administration of justice and prisons in Korea. By ■ further treaty concluded between Japan and Korea ■ August 23, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor ■ deprived of all political power, and ■ accorded the title of Prince Yi, and his father (the former ex-Emperor) that of Prince Yi, Senior. ■ title of the ■-ry was changed to "Chosen," ■ the office of Japanese Governor-General established. Henceforth Korea became ■ integral part of ■ Japanese Empire. Members of ■ Korean Imperial ■ the late Korean Cabinet have ■ Japanese patents of nobility conferred ■ them.

First Governor-General.—His Excellency General Count Terauchi.

The Japanese Residents at the treaty-ports have been replaced by Prefects, through whom official matters concerning foreign subjects are transacted.

Area and Population.—Estimated area, about 86,000 square miles; population in 1912 18,461,299 (7,129,777 males and 6,331,522 females). The capital, Seoul, has 278,958 inhabitants; Ping-Yang, about 146,000. The foreign population (excluding Japanese troops) is about 110,000, consisting (1912) of about 210,689 Japanese, 11,837 Chinese, 1,000 Americans, 183 British, 100 French, and 49 Germans. In 1903 1,000 Koreans left for Hawaii, and in 1905 some 500 Korean emigrants sailed for Mexico. The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

Religion and Instruction.—The worship of ancestors is observed with much punctiliousness in China, but, otherwise, religion holds a low place in the land. In the country there are Buddhist monasteries, which, however, are looked upon with scant respect. The knowledge of Chinese classics and of Confucian doctrine, formerly essential to the education of the upper classes, is giving way under Japanese influence to a more practical system of instruction. There is a large number of Christian converts. In 1890 an English Church mission was established, with a bishop and 20 other members. A hospital in Chemulpo is attached to the mission with an English doctor and trained nurses. The American missionaries have two hospitals in Seoul, where the Japanese have also established a large Government hospital. The total number of hospitals in the country is about 150, while the Red Cross Society has a numerous membership among both Japanese and Koreans. There are over 200 Protestant missionaries (British and American), and 60 Roman Catholic, also a Russian (Greek church) mission in Seoul. The mission schools have, however, been made subject to strict superintendence and control.

In Seoul there is a Government school for English with 1 English teacher and 10 pupils. There are, besides, numerous Christian Mission schools for boys and girls throughout the country. All these schools are subject to the control of the Education Department. Technical and industrial schools are rapidly springing up. A model farm and agricultural school has been established within fifty miles of the capital.

In Seoul there are two daily Korean newspapers, and several Japanese, besides others published at Chemulpo. There is a Government-owned daily newspaper in English, published at Seoul. The press is entirely in the hands of the Japanese, and a strict censorship is exercised.

Finance.—The finances of Korea form a special account in the Budget of Japan. The estimated for 1912-13 was: ordinary, 26,732,332 yen (2,728,926*l.*), and extraordinary, 26,159,877 yen (2,624,550*l.*); making a total of 52,892,209 yen (5,353,476*l.*). The estimated expenditure ordinary, 30,232,490 yen (3,040,296*l.*), and extraordinary, 22,659,719 yen (2,313,180*l.*); a total of 52,892,209 yen (5,353,476*l.*). The main of revenue is from Public Undertakings. The extraordinary revenue consists (1) of 12,596,540 yen to be raised by a loan from the Government of Chosen, and (2) 12,350,000 yen, which is really a contribution by the Home Government to make good the deficiency.

Production.—Korea is entirely an agricultural country, the cultivated area is about 5,600,000 acres, but the methods of cultivation are of a backward and primitive type, and the means of communication few and difficult, though improvement is fast being made in this respect. The chief crops are rice, wheat, beans, and grain of all kinds, besides tobacco and cotton. The area under cotton in 1911 was 125,000 acres, and the output for that year estimated at 33,940,000 lbs. Rice, beans, hides, and ginseng are exported in large quantities. Whale fishing is carried on on the coast. Live stock is raised as a by-product of agriculture. The cattle are well known for their hardiness and quality.

Gold mining is carried on and promises to be successful. There are four foreign owned gold mines in active operation, and others in process of development. Copper, iron, and coal are abundant in Korea, but the development of these is impeded by defective means of communication. An anthracite coal mine in the north of Korea is in operation, and considerable extension of the workings are in contemplation. Graphite and mica are also found in considerable quantities.

Commerce.—As the result of annexation, the Treaties of Korea with foreign countries virtually ceased to exist, though as a matter of fact, neither the German nor the American governments have as yet unreservedly admitted the cessation of consular jurisdiction over their subjects in Korea. The tariff imposed by these treaties is maintained for a period of 10 years from the date of annexation.

The open ports are Chemsulpo, Fusan, Wonsan, Chinnampo, Mokpo, Kunsan, Sougchin, Ping Yang (inland city), Wiju, Yong-Am Po, (1908) Chungjin and Shin Wiju. By a Residency General Ordinance published August 29, 1910, Masampo was declared a closed port from January 1, 1911, while Shin Wiju (on Yalu River) was opened to trade.

Trade (merchandise only) at the open ports —

	1908	1909	1910	1911	1912
	Yen	Yen	Yen	Yen	Yen
Imports	41,025,523	36,648,770	39,782,756	54,087,684	66,846,980
Exports (excluding gold)	14,113,310	16,246,888	19,915,843	18,856,955	20,901,670

The imports in 1911 included cotton goods, 1,816 yen, cotton yarn 2,123,827 yen, machinery, 1,245,833 yen, silk goods, 983,483 yen, tobacco and cigarettes, 894,942 yen, timber, 1,346,971 yen, kerosene oil, 1,436,153 yen, grass cloth, 1,402,740 yen, sugar, 1,207,908 yen, paper, 995,292 yen, coal, 1,348,909 yen. The principal exports were rice, 5,283,772 yen, beans, 4,630,078 yen, cowhides, 1,068,851 yen, cattle, 703,581 yen. Gold was exported to the value of 11,044,296 yen. Of the imports in 1911 the value of 34,058,434 yen was from Japan, of the exports the value of 18,840,551 yen was to Japan. From China the imports amounted to 5,442,443 yen, to China the exports amounted to 3,009,012 yen. From Great Britain and the United States respectively the imports amounted to 7,923,505 yen and to 260,908 yen.

Shipping and Communication.—The foreign going shipping entered the open ports numbered in 1911, 3,012, with a tonnage of 8,581,498. The foreign coming shipping numbered 5,997 with a tonnage of 8,485,977 tons. Japanese; 28, 85,608 tons British, and 3 of 1,704 tons German.

Transport in the interior is by porters, pack-horses and oxen, and by improvements in road making are being effected. There are about 1,400 miles of road. There is a railway from Seoul to Fusan (275 miles). The Seoul Chemulpo railway (24 miles) is a branch of the line. Another branch running from near Fusan to Wiju is open, and a third branch will run from Taiden to Mokpo. The Seoul Wiju line is 310 miles in length. The construction of a railway from Seoul to Gensan (or Wonsan, a port on the East Coast) has been commenced and about 60 miles is already open to traffic. It is expected that the line will be finished by 1914. The Yalu Bridge was completed in the autumn of 1911. The Korean system is connected with the Siberian and Chinese lines, a through express train of the latest type running thrice weekly from Fusan to Chang chow, Seoul, Ping Yang, Antung, and Mukden. From Chang chow a Russian train connects at Harbin with the Trans-Siberian. All these railways belong to the Japanese Government. Total length of line, 767 miles (1911-1912).

A street electric railway at Seoul has been extended in three directions to points three miles outside the city. Number of post offices (1912) 465. There are 1,414 miles of telegraph line open, and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced at Seoul, Chemulpo, and several other towns.

Money.—Regulations for banking were framed in 1906, and in 1908 there were in Korea 11 ordinary banks organised by Koreans, and 11 organised by Japanese. At the same time there were 9 agricultural and industrial banks fostered by Government subsidies.

A central bank the Bank of Korea, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai ichi Ginko) as the Government Treasury. Notes of this bank are gradually replacing those of the First Bank of Japan, now current in the country.

The coinage consists of gold pieces of 10 and 20 yen, silver of 10, 20, and 50 sen, nickel of 5 sen, and bronze of 1 and 2 rin. There are also in circulation notes of the Dai ichi Ginko (First Bank) of 1, 5, and 10 yen. The old nickel has been practically wholly withdrawn from circulation, and the cash currency is now used only for petty transactions. Under certain regulations, bills of exchange and cheques may pass as the currency. In the important commercial towns there are authorised 'associations' of merchants for the transaction of business relating to bills.

FORMOSA (TAIWAN)

THE Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which ——— ratified on May 8, 1895, and Japan took formal possession on June 2 of the ——— year. Japanese civil government in the island began on March 31, 1896.

The Island has ——— area of 13,458 square miles, with a population (1912) of 3,443,679 (1,806,048 males and 1,637,631 females). The chief towns are Tainan City (53,794 inhabitants), Tamsui, and Kelung. At Kelung the old fortifications have been restored and improved.

Many improvements have been effected by the Japanese administration. An educational ——— has been established for Japanese and natives, for whom there ——— 189 elementary schools with 892 teachers and 39,012 pupils. There ——— also normal schools, a medical school, and a school for teaching the Japanese language to natives, and native languages to Japanese.

The receipts of the Japanese administration ——— from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

	1908-09	1909-10	1910-11	1911-12	1912 —
	Yen	Yen	Yen	Yen	Yen
Revenue	37,005,764	40,409,107	39,889,212	43,651,651	45,325,508
Expenditure	30,666,455	30,189,383	39,529,338	43,651,651	45,325,508

——— agricultural products of Formosa are rice, tea, sugar, ——— potatoes, ramie, jute, turmeric; while camphor ——— worked in the ——— under a government monopoly. There ——— active fisheries. ——— industries comprise flour-milling, ——— tobacco, oil, spirits, iron-work, glass, bricks, soap, and many other manufactures.

The mining industry ——— as follows (1911): mines ——— gold, 9; for gold-copper, 1; for gold dust, 27; for copper, 2; for ———, 1; ——— coal, 270; ——— petroleum, 39; ——— sulphur, 16. The mining industry employed (1911) 5,647 workers.

——— Formosa ——— largely with Japan, the ——— foreign

countries with which there is traffic being China and the United States. In 1911 the imports amounted to 5,440,412*l*. (3,444,168*l*. from Japan); exports, 6,603,147*l*. (5,258,139*l*. from Japan). The chief exports in 1911 were tea, 818,558*l*.; camphor, 353,536*l*.

Roads have been and are being constructed throughout the Island. There are 290 miles of railway open and over 125 miles of light railway. In 1911 there were 135 post offices, through which passed 28,493,762 packets and 367,055 parcels. The telegraph service has 117 offices; length of line 1,000 miles; of wire, 3,000 miles; messages (1912), 1,273,311. Telephone line, 790 miles; wire, 4,030 miles; calls (1912), 3,704,104.

At the end of 1911 the post office savings' bank had 100,819 depositors with 191,886*l*. to their credit.

The coinage current in the Island is that of Japan.

The *Shan* consist of about 12 islands, with a total area of about 50 square miles.

Japanese *Karafuto* (or *Karafuto*) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 12,500 sq. miles, and, in 1912, a population of 43,273 (23,783 males and 19,490 females). The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold.

The revenue and expenditure for 1912-13 are estimated to balance at 2,200,345 yen, two-thirds of that amount being advanced by the Japanese government.

The leased Territory of *Kwantung*, the southern part of the *Liaotung* Peninsula, has an area of about 1,256 sq. miles, and a population (December 31, 1911) of 488,089, of whom 446,714 are Chinese and 41,259 Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at *Dairen* (or *Tairen*, formerly called *Dalny*), where there is an elementary school with 800 pupils; also an American Presbyterian Mission with a church and an hospital.

The estimates for 1912-13 balanced at 5,216,887 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry. The chief manufactured product is salt, which is abundant in the Territory. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, *Dairen* being the Customs port, with out-stations at *Kinchow*, *Pulantien*, *Pitzewo*, and *Port Arthur*. The port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan. Imports (1911), 42,274,723 yen; exports, 47,416,047 yen. *Dairen* has a fine harbour, ice-free all the year, and protected by a breakwater 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the *Manchuria* Railway Company. The railway connects *Port Arthur* and *Dairen* with *Mukden*, *Kharbin*, and the *Eastern Chinese* Railway System.

Gold and silver coin and the notes of the *Yokohama* specie bank are current.

LIBERIA

History and Government.—The Liberian Republic had its origin in the efforts of several colonisation societies of Europe and America to make permanent provision for freed American slaves. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The State was first recognised by Great Britain, and ultimately by other Powers. The Constitution of the Republic is the model of that of the United States, with trifling exceptions. The executive is vested in a President, a Vice-President, and a Council of Ministers, and the legislative power in a parliament of two houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for two years. An Amendment to the Constitution was carried in May, 1907, extending these terms to four and six years respectively. The President must be thirty-five years of age, and have real property to the value of \$120,000. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

President of Liberia.—Hon. Daniel Howard ; assumed office January, 1912.

Vice-President.—Hon. S. O. Harmon.

The President is assisted in his executive function by the Secretary of State, the Secretary of the Treasury, the Secretary of the Interior, the Attorney-General, the Postmaster-General, and the Secretary for War and Navy.

Area and Population.—Liberia has about 360 miles of coast line, extending from the British colony of Sierra Leone on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 100 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1893 and 1907-10. Under the latter agreement Liberia loses about 2,000 square miles of territory which she is unable effectively to administer. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kauré Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 40,000 square miles. Of this a strip of land about 20 miles broad along parts of the coast is administered by the Government. The total population is estimated at 1,500,000 to 2,100,000, all of the African race. The Americo-Liberians have not full control or influence over the natives in the interior, where there are several powerful aboriginal chiefs. The indigenous natives belong in the main to three principal stocks : (1) the Mandingos (Muhammadan), (2) the Gola, (3) the Kpwezi and (4) the Kru negroes. The Kru are their preponderant and are absolute masters, mostly Pagan, a few Christian. The number of American Liberians is estimated at about 12,000. About 50,000 of the coast negroes

(including the Liberians proper) be considered civilised. All such English their language in daily life, and are Christian in religion. There is a negro colony of about 500, and there are about Europeans, including 80 Englishmen. The region is divided into counties, Bassa, Sino, and Maryland, each under a Government superintendent, and Montserrado, subdivided into districts, each under a superintendent. Monrovia, the capital, has, including Kru town, an estimated population of 8,000. It is a port of entry, the others being Cape Mount, Grand Bassa, River-Cess (Grand Cestos), Sino (Greenville), Nana-Kru, Sestros, Cape Palmas, and Half Cavalla; also Liberian Jene, on the Sierra Leone frontier. Other towns are Robertsport, Royesville, Marshall, Arthington, Careyburg, Millsburg, Whiteplains, Boporo (native), and Rocktown.

The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, Methodist). There are several American missions at work and one French Roman Catholic. The government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In 1910 the government had 113 elementary schools with 122 teachers and 4,100 pupils. There are mission schools and about 3,000 pupils. The mission schools give industrial training. The Methodists have a college at Monrovia; the Protestant Episcopalians a high school at Cape Palmas and 3 other important schools. The government has a college with 12 professors and 120 students. A criminal code was enacted in 1900; the customs laws were codified in 1907.

For defence every citizen from 16 to years of age capable of bearing arms is liable to serve. The organized militia, volunteers, and police number about 400. There is one gunboat, the *Lark*, and one unarmoured Government steamer, the *President Benson*.

Finance.—The revenue and expenditure (in American dollars):—

		1903	1904	1905	1906	1908	1909	1911-12
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	\$10,100	\$53,104	\$61,238	\$96,662	—	\$45,209	\$78,800	\$71,336
Expenditure	\$18,110	\$38,481	\$11,200	\$26,300	\$40,088	\$50,000	—	\$70,000

The is derived mainly from customs duties (\$72,632. in 1908, \$1,878. in 1909, \$5,439. in 1910, \$5,000. in 1911 and \$36,822 dollars in 1912); there is a tax on rubber exported (6d. per lb.), and a tax is imposed on natives emigrating. The expenditure is chiefly the cost of the general administration. A debt of 100,000. at 7 per cent. was contracted in 1871; of this the unpaid interest amounted in 1910 to \$185,097. On March 31, 1899, an agreement was concluded for the reduction of the rate of interest, the amortisation of principal, and the payment of arrears of interest, duties on rubber and other articles being assigned as security for service of the debt. In January a loan of £100,000 was obtained through the Liberian Development Company to be employed partly in paying Customs' creditors and resuming a gold currency at Customs, and partly on road making internal developments. In this loan assumed by the Liberian Government. It is secured on the Customs. There is also amounting (Jan. 1, 1911) to about \$87,040 dollars, making a (together with debts) of 1,827,418 dollars.

In 1910 the United States Government intimated its willingness to Liberia by taking entire charge of the finances, military organisation, agriculture, and boundary questions of the country. The negotiations reached a satisfactory conclusion, and in January, 1911, a scheme was agreed to. In October, 1911, the United States, Great Britain, France, and Germany finally approved the details of the scheme. This involves the raising of an international loan of 500,000*l.*, secured by the Customs, rubber tax, and native head-tax, which shall be administered by an American controller and British, French, and German sub-controllers, the American controller also acting as financial adviser to the Government. It is also provided that for the security of the revenue a frontier police force sufficient for the maintenance of peace in Liberia shall be established, and that the United States shall designate trained military officers to organise the force.

Production, Commerce.—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked; the soil is productive, but cultivation is neglected; cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, is largely exported. Palm oil and palm kernels are exported. Kola nuts, chillies, beni seed and annatto seed are produced for local consumption. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. The rubber industry is in the hands of the Liberian Rubber Corporation which holds a concession for the exploitation of this product over 8,000 square miles of Government forests in addition to a considerable plantation area. Iron is worked by the natives. Gold in small quantities, copper, zinc, monazite, corundum, lead, bitumen or lignite, and diamonds have been found at different times found in the interior, but not as yet in payable form or abundance. Ten diamonds of good quality and Brazilian character were exported in 1909 by the Chartered Company, together with a small quantity of gold. About 144 small diamonds were obtained in 1910. A charter has been granted to the Liberian Development Chartered Company (Limited), for prospecting and working minerals, for banking, for acquiring land in the country, for agricultural and other undertakings, and for the construction of roads, railways, and telegraphs.

The conditions under which trade is carried on are unfavourable, but are now improving. Business houses are permitted in the interior under special conditions. The chief imports are rice, Manchester goods, gin, tobacco, building timber, galvanised roofing iron, ready-made clothing, and dried preserved fish, but the total import trade of the country is comparatively unimportant and does not probably amount to 250,000*l.* in any year. The imports of leaf tobacco for 1910 amounted to 894,686 lbs., valued at 12,310*l.* Of the total import, Germany furnished 278,221 lbs., the United Kingdom 75,875 lbs., Holland 26,177 lbs., and the United States 14,613 lbs. The chief ports of entry are Cape Palmas with 110,567 lbs., Grand Cape Mount with 81,896 lbs., and Monrovia with 81,614 lbs. The chief exports are rubber, palm oil, palm kernels, piassava fibre, coffee, ivory, ginger, camwood, annatto. In 1907 the imports amounted to 504,444 dollars; the exports 796,500; in 1908, imports, 965,626 dollars; exports, 899,569 dollars; in 1909, imports, 1,065,200 dollars, and exports, 970,500 dollars. The trade is chiefly with Great Britain, Germany, and the United States.

According to the 'Annual Statement of Trade' issued by the Board of

trade, the value of the trade between the United Kingdom and Liberia ■■■ follows in five years —

—		1907	1908	1909	1910	1911
Imports into U.K. from		£	£	£	£	£
Liberia		76 21	73 64	63 50	66,440	69 220
Exports ■ U.K. produces to						
Liberia		1 107	61 277	57 620	67 346	88 68

The chief articles of import from Liberia to Great Britain in 1910 were palm oil of the value of 11 743/ , palm kernels, 7,340/ , coffee, 648/ rubber, 15 820/ , papyrus fibre 27,399/ The British exports to Liberia consisted mainly of cotton manufactures, of the value of 21 607/ ■■■■ 2,674/ , wood, 1,116/

Monrovia is visited regularly by 7 lines of steamers, British, German, French, and Spanish. In 1911, 443 vessels visited Monrovia with ■■ tonnage of 972 737 tons. Of these 176 vessels of 381,618 tons were British, 235 vessels of 543,419 tons German. The total number of ships entered and cleared at all the ports of Liberia ■■ 1911 ■■ 1,056 of 2 077,000 tons. There are no railways or vehicular means of transport in the country except ox carts and a motor road of about 20 miles recently constructed. The river St. Paul is navigable for 25 miles from the sea northwards (including creeks for ■■ miles) and various Liberians maintain four steam launch lines ■■ steamers thereon. The Liberian Government has recently acquired a river steamer, besides the gun vessel already mentioned. Direct cable communication with Europe ■■ (established by German cable via Freetown ■■ March 21, 1910, and with New York, by the South American Cable Co., which opened its station at Monrovia on February 14, 1912).

Money, Weights, and Measures —The money chiefly used is British gold and silver, but there ■■ Liberian coinage in silver and copper. Accounts ■■ kept generally in American dollars and cents. The Liberian ■■ ■■ as follows —Silver, 50-, ■■, and 10 cent pieces, copper, ■■ and 1 cent pieces.

Weights and ■■ are the ■■ as Great Britain and the United States.

Diplomatic ■■ Consular Representatives.

LIECHTENSTEIN.

The Principality of Liechtenstein, lying between the Austrian crownland of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, ■ a sovereign state consisting of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 ■ into the possession of the house of Liechtenstein and, by diploma of January 28, 1719, granted by the Emperor Karl VI., the two lordships were constituted as the Principality of Liechtenstein. After the break-up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation; from 1815 to 1866 it formed part of the German Confederation, since the break-up of which it has joined no similar union.

The Reigning Prince is John II., born October 5, 1840; succeeded his father, November 12, 1858. The reigning family originated in the twelfth century, and traces its descent through five barons who in 1608 became princes of Liechtenstein. The ■ by is hereditary in the male line. The constitution provides for a Diet of 15 members appointed for four years (8 by the Prince, and 12 by indirect vote). The capital and seat of Government is Vaduz (pop. 1,206). But the appeal court sits in Vienna, and the court of control (financial) at Butschowitz in Moravia; here too ■ kept the accounts of the Prince's private property. The directorate of the Prince's private forests is at Olmutz; but the affairs of the reigning house and its private property are managed by the Chancellery at Vienna. The Principality is by treaties connected in many ■ with the Austro-Hungarian monarchy. Since 1852 it has belonged to the Austrian Customs Union. The annual payments in fact amount to over 100,000 crowns. The postal, telegraph, and telephone affairs of the principality ■ managed by the Austrian authorities, according to ■ agreement ■ made in 1911.

Area, ■ square miles; population, of German ■ and nearly all Catholic, 1909, 2,854 (4,814 males and 5,040 females). In 1911 the revenue amounted to 767,707 crowns; expenditure, 781,296 crowns. There ■ public debt. The Prince has estates in Austria and elsewhere yielding 100,000% sterling per annum. The inhabitants of Liechtenstein since 1867 have not been ■ military service. The population is in great part agricultural, the chief products of ■ country being corn, wine, fruit, and timber. ■ rearing of cattle for which ■ fine Alpine pastures ■ well suited is highly developed. The industries of the Principality, especially the textile industries, are not unimportant

LUXEMBURG.

Reigning Grand-duchess.—**Marie-Adelaide**, born June 14, 1894, succeeded the death of her father, the late Grand Duke Wilhelm, February 26, 1912. Sisters.—**Princess Charlotte**, born January 23, 1896; **Princess Hilda**, born February 15, 1897; **Princess Antoinette**, born October 7, 1899; **Princess Elisabeth**, born March 7, 1901; **Princess Sophie**, born February 14, 1902.

The Grand Duchy of Luxembourg was included from 1815 to the dissolved Germanic Confederation. By the Treaty of London, 1867, it is declared neutral territory, and its integrity and independence guaranteed.

There is a Chamber of Deputies in the Grand Duchy of 60 members, elected directly by the cantons for six years, the half renewed every three years. Luxembourg has 2,598 square miles, and a population (Dec. 1, 1910) of 259,891 (131,101 males and 125,790 females). The population is Catholic, save 4,007 Protestants, 1,270 Jews, and 303 belonging to other sects. The chief town, Luxembourg, has 20,848 (1910) inhabitants. Estimated revenue and expenditure (including extraordinary for the last five years) in francs:—

	1909	1910	1911	1912	1913
Revenue	17,819,110	18,201,174	18,497,700	18,196,187	18,201,788
Expenditure	15,561,614	16,050,761	16,920,000	16,667,885	16,456,064

The debt consisting of loans, mainly for the construction of railways, was, in 1892, converted into a single loan of 12,000,000 francs at $3\frac{1}{2}$ per cent. The annuities amount to 498,145 francs. The Savings Bank of the Grand Duchy, on Dec. 31, 1911, had 71,224 depositors with 61,104,712 francs to their credit (inclusive of interest). In 1910, the output of iron amounted to 1,642,519 metric tons. For commercial purposes Luxembourg is included in the German Zollverein. There were 100 miles of railway in 1911, and 438 miles of telegraph line with 1,281 miles of wire, and 316 telegraph offices in 1910. There were also (1911) 82 telephone systems with 760 lines of line and 1,000 miles of wire. In 1911 there were 124 post-offices, through which there passed 11,760,000 letters, 7,166,000 post cards, and 6,596,000 samples, &c.

British Envoy and Minister.—Hon. Sir A. Johnstone G. C. V. O.

British Consul.—Norbert de Gallan.

MEXICO.

(REPÚBLICA MEXICANA.)

Constitution and Government.

MEXICO was annexed to the Spanish Crown by conquest in 1521, and for three centuries continued to be governed by Spain. In 1810 the rule of the Spanish Viceroy had become so tyrannical that it caused an outbreak headed by the patriot priest Hidalgo, who on September 16, 1810, declared the Independence of Mexico. In 1821 General Augustin Iturbide declared himself Emperor of Mexico, but in 1824 he had to flee, and the Republic was established. Several Presidents ruled the destinies of the country with more or less severity until 1864, when the throne of Mexico was offered to Archduke Ferdinand Maximilian of Austria. He was shot in 1867, and Juarez, who had been President in the northern part of the country, took the reins of government. He was followed by Lerdo de Tejada, who in 1876 fled, and General Porfirio Diaz made his entry into Mexico City. He has ruled the country with the exception of four years (1880-4, General Manuel Gonzalez) until May, 1911, when he presented his resignation to Congress. Señor F. de la Barra acted as President *ad interim* until the elections had taken place. Señor Francisco I. Madero assumed office as President on November 6, 1911, and ruled until February, 1913, when a *coup d'état* took place, resulting in the President's murder (February 23, 1913) and his replacement by General Victoriano Huerta.

The present Constitution of Mexico bears date February 5, 1857, with subsequent modifications down to May 1903. By its terms Mexico is declared a federative republic, divided into States—19 at the outset, but at present 27 in number, with 11 territories and the Federal District—each of which has a right to manage its own local affairs, while the whole is bound together in a body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives (233 members) and a Senate, and the executive in a President. Representatives are elected for two years by the suffrage of all respectable male adults, at the rate of one member for 40,000 inhabitants. The qualifications requisite are, to be twenty-five years of age, and a resident in the State. The Senate consists of fifty-six members, two for each State, of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of 3,000 dollars a year. The President is elected by electors popularly chosen in a general election, holds office for six years, and, according to amendment of the Constitution in 1887, may be elected for consecutive terms. The election of the Vice-President takes place in the same manner as the election of the President. The Vice-President is *ex officio* President of the Senate, with a voice in the discussions but without vote. Failing the President through absence or otherwise, the Vice-President discharges the functions of the President. Failing both, Congress may call for new elections to be held once. Congress has to meet annually from April 1 to May 31, and from September 16 to December 15, and a permanent committee of both Houses sits during the recess.

Provisional President of the Republic.—General Victoriano Huerta; proclaimed himself February 18, 1913.

The administration is carried on, under the direction of the President and a Council, by eight Secretaries of State, heads of the Departments of — 1 Foreign Affairs, 2 Interior, 3 Justice, 4 Public Instruction and Fine Arts, 5 Fomento, Colonisation and Industry, 6 Communications and Public Works, 7 Finance and Public Credit, 8 War and Marine

LOCAL GOVERNMENT

Each separate State has its own internal constitution, government, and laws, but inter-State customs duties are not permitted, though State taxes are levied. Each State has its governor, legislature and judicial officers popularly elected under rules similar to those of the Federation, and the civil and criminal code in force in the Federal District prevails only in the Federal District and territories (Iscru, Lower California, and Quintana Roo). All the other States of the Mexican Union have their own special codes based, more or less, on those of the Federal District but at the same time they must publish and enforce laws issued by the Federal Government.

Area and Population.

Since 1900 the territory of Quintana Roo has been joined on the S. W. coast of Yucatan.

States and Territories	Area in square miles	Census Population 1910	Census Population 1900	Population per square mile 1910

In 1900 there were 6,716,007 males and 6,829,455 females. 19 per cent are of pure, or nearly pure, white race, 43 per cent of mixed race, and 38 per cent of Indian race. Distinctions of race are abolished by the Constitution of 1924. The foreign population in 1900 numbered 57,507: Spanish, 16,258; United States, 15,265; Guatemalan, 5,804; French, 3,976; British, 2,645; Cuban, 2,721; German, 2,567; Italian, 2,564; Chinese, 2,884.

The chief cities, 1910 are — Mexico (capital), 470 659; Puebla, 101,214; Guadalajara, 118,799; San Luis Potosi, 82,946; Leon, 63,263; Monterey, 81,006; Pachuca, 38,620; Zacatecas, 25,905; Guanajuato, 35,147; Mérida, 61,999; Queretaro, 35,011; Morelia, 39,116; Oaxaca, 37,469; Orizaba, 32,894; Aguascalientes, 44,800; Saltillo, 35,063; Durango, 34,085; Chihuahua, 39,061; Vera Cruz, 29,164; Toluca, 31,247; Celaya, 25,565.

In 1910 11, 79,484 immigrants entered Mexico.

Religion, Instruction, and Justice.

The prevailing religion is the Roman Catholic, but the Church is independent of the State, and there is toleration of all other religions. The ecclesiastical body does not acquire landed property. There are 7 archbishops and 23 suffragan bishops. In 1900, 13,533,013 Roman Catholics; 51,795 Protestants; 3,811 of other faiths, 18,640 of no professed faith.

Education is free and compulsory. In 1900 elementary schools supported by the Federation and States (exclusive of infant schools) 6,098, by municipalities, 2,985; total, 9,083 schools, of which 4,876 for boys, 2,458 for girls, 1,749 mixed, 575,972 enrolled pupils (352,333 boys and 223,639 girls). For secondary instruction the Federal and State Governments had 11 schools (27 for boys, 3 for girls, 1 mixed) with 4,231 pupils (3,793 boys and 438 girls). For professional education there were 68 institutions and colleges (11 for men, 17 for women, and 1 mixed); they had (1905) 9,327 enrolled pupils (5,258 men and 4,069 women). Expenditure on schools 9,836,923 dollars. The private, clerical, and association schools numbered

2,499 with 152,917 pupils (81,947 boys and 70,970 girls) In 1912 the system of primary education ■ ■ be extended ■ ■ to reach the native population

In 1928 there were 1,000 the National Library, with 180,000 volumes, and 138 other public libraries. There were 100 in that year 100 museums for scientific and educational purposes, and 11 meteorological observatories. The number of periodicals published was 459, of which 439 were in Spanish, 10 in English, 5 in Spanish and English, 2 in Italian, 1 in French.

The judicial power, which is entirely distinct from and independent of the Executive, consists of the Supreme Court, with 15 judges chosen for a period of six years, three Circuit Courts, with 3 judges, and District Courts, with 32 judges.

The Ordinary, Civil, Criminal, and Correctional Courts — controlled by the Department of Justice and Public Instruction

Federal Finance.

The ordinary receipts and expenditure for five years have been —

	RECEIPTS	EXPENDITURE
	Dollars	Dollars
1907-08	111 771,867	93 177,441
1908-09	98,775,511	92,967,893
1909-10	106,328,481	95,028,650
1910-11	111 142,401	100,918,923
1911-12	103,567,000	101,602,401

The following are the budget estimates of revenue and expenditure for the year 1912-13 (1 dollar = about 2s. 0½d) —

EXPENSES	Dollars	EXPENDITURE	Dollars

Total	101 277 500		345 344
	(10 925 704)		(10 124 504)

The estimated [redacted] for 1913-14 [redacted] 129,088,257 dollars, and the expenditure 128,894,980 dollars.

On December 31, 1911, the outstanding gold debt amounted to 80,117,636/2, including the City of Mexico loan, silver debt, 136,726,367 dollars; floating debt, 482,574 dollars. Estimated debt charge in 1912-13 was 25,804,615 dollars.

value of property in Mexico is given as follows:—Urban, 295,922,248 dollars; rural, 511,782,480 dollars; Federal District 280,868,241 dollars, total, 1,088,572,969 dollars, the fiscal value being as one-third less than the actual value.

Defence.

The Mexican army is recruited by voluntary enlistment (for terms of 3, 4, or 5 years), supplemented by a conscription which falls entirely on the poorest classes.

The army in time of peace consists of 12 battalions of infantry, 1 regiment of cavalry, 1 regiment of horse artillery, 12 regiments of field artillery and 1 of mountain guns (all of 4 batteries), 12 battalions of garrison artillery, 1 of engineers and some units of train, &c. On mobilisation each company battalion (including the engineers) forms a regiment of 12 battalions. The 12 battery regiments of artillery are raised to 8 batteries, and the cavalry regiments to 12 squadrons. There are also about 2,000 gun darmers. The war strength is supposed to be 84,000 of all ranks, but it is doubtful if it would amount at present to more than 50,000.

The total peace strength of the Mexican forces in 1912 was 107 generals, 6,236 officers and 49,332 men. The military budget of Mexico for the year 1910-11 amounted to 2,178,000.

The infantry is armed with the Mauser magazine rifle, model 1901, and the cavalry carry the Mauser carbine, but the reserves have only the Remington rifle of 1893. The field and horse artillery are equipped with Q F guns on the Schneider tract system.

The Navy consists of five gunboats *Bravo*, *Morales*, *Tampico*, *Veracruz*, and *Zaragoza*. There are also a couple of armed transports.

Production and Industry.

Cultivated lands, 30,027,560 acres, pastoral lands 120,444,200 acres, forest lands, 48,933,200 acres. Agriculture is in a very primitive condition. Agricultural products are maize, cotton, henequen, wheat, coffee beans; cotton is grown in the Laguna districts on the Nayar river, and is dependent on irrigation which is being extended. There is a large output of sugar and molasses, valued at about 2,600,000 annually (crop for 1911-12 estimated at 160,000 tons) and the production of spirits in 1910 was 8,338,000 gallons. There are 1,674 alcohol distilleries. There are many colonies, or agricultural settlements, established either by the Government or by companies or persons authorised by the Government.

On June 30, 1902, there were in Mexico 5,142,457 head of cattle, 359,217 horses, 334,435 mules, 287,991 asses, 3,424,430 sheep, 4,206,011 goats, and 616,139 pigs, the whole being valued at 120,523,158 dollars, or about 12,052,316.

Mining is carried on in 11 of the 31 States and Territories, nearly all the mines yielding silver either alone or in combination with other metals.

Mineral products exported in 1908, 1909, and 1910 —

	1908	1910	1911
Gold, kilogrammes	20,000	21,970	4,790
Silver, kilogrammes	1,191,249	2,254,105	1,684,884
Copper and nickel, metric tons	117,484	204,413	161,584
Lead and ore	122,907	125,896	124,581

Fluorine	1,690	2,723	2,656
Marble	973	1,106	786
Salt	5,365	4,479	2,225
Asphalt	5,082	3,691	6,172
Sulphur	3,352	3,221	4,382

Value of mineral output for 1911-12: Gold, 48,686,965 dollars; silver, 89,664,665 dollars; value of all minerals, 209,781,343 dollars.

The output of coal is estimated at 700,000 tons annually. Opals are mined in Querétaro; output not stated.

There is a Mint at the Capital, and Assay offices (Federal).

Important metallurgical works are carried on at San Luis Potosi, Monterey, Durango and Aguascalientes.

On June 30, 1911, there were 145 (26 not working) cotton factories, employing 82,147 workmen; spindles, 725,297; looms, 24,436; stamping machines, 39. The consumption of cotton in 1910-11 was 34,568,212 kilos; the output of yarn, 2,706,973 kilos, and of cotton piece goods and prints, 15,090,669 pieces. There were 10 tobacco factories, the annual output of which was: 493,348,581 packets of cigarettes, 40,492,084 cheeroots, 35,275,713 cigars, and 76,099 kilos of tobacco. There were 1,543 distilleries giving an output of 37,127,173 litres of spirits of various sorts.

Shipping and Communications

Mercantile marine, 1911, 92 steamers of 16,648 net tons, and 50 sailing vessels of 8,712 net tons. In 1909-10 in the foreign trade there entered 3,160 vessels (steam and sail) of 8,031,296 tons and cleared 2,854 vessels (steam and sail) of 7,275,348 tons. The most important ports are Veracruz and Tampico both on the Gulf of Mexico.

On September 16, 1912, there were 15,904 miles of railway open. The main trunk lines are merged in a corporation ("The National Lines of Mexico") controlled by government. About 6,000 had a gauge of 4 ft 8½ in., and the remainder a gauge of 3 ft or less. Lines under construction 1,116 miles.

On June 30, 1911, the Federal telegraph lines were 46,437 miles. There were other lines belonging to individual States and private persons. There were on June 30, 1911, 526 Federal offices, including 1 wireless telegraph office. 4,531,683 messages were sent on Federal lines from July 1, 1910 to June 30, 1911. The Federal telephone had a length of 919 miles.

In 1911 there were 2,858 post offices. The post, inland and international, carried in 1910-11 200,000,000 letters, postcards and packets. Post office receipts 1910-11 4,724,000 pesos, expenditure, 9,854,618 pesos.

Money and Credit.

Nominal value of the coinage of Mexican mint —

	Silver	Gold	Copper or bronze	Nickel	Total
1907-8	755,790	1,694,530	—	—	2 450
1908-9	—	179,170	—	—	070
1909-10	—	01,000	850	20	810
1910-11	292,760	—	19,450	30,731	342,941

There were on June 30, 1910, in Mexico 11 banks with note issue and 8 without note issue. The most important are the Banco Nacional with a capital of 32,000,000 dollars, the Banco of London and Mexico, with capital of 21,500,000 dollars, the Banco Central, capital 30,000,000 dollars, the Mexican Bank of Commerce and Industry, capital 10,000,000 dollars; the Banco Internacional e Hipotecario, capital 5,000,000 dollars, the Banco Crédito Territorial, capital 5,000,000 dollars; and the Banco Peninsular, capital 16,500,000 dollars. The 4 of these banks have unitedly received a concession as the 'Caja de Prestamos para obras de irrigacion y Fomento de la Agricultura.'

Money, Weights, and Measures

By the monetary law of December 9, 1904, and the Presidential Decree of March 25, 1905, the monetary unit is the silver peso or dollar, the legal value of which has been fixed at 75 grammes of pure gold. There are 10 peso and 1 peso gold coins, 800 fine and 900 copper, weighing respectively 3.33½ and 4.166½ grammes. The silver peso weighs 27.073 grammes, 900 fine and 0.793 copper, and thus contains 24.438 grammes of fine silver. The peso is divided into 100 centavos, 50, 20, and 10-centavo pieces of silver, 800 fine and 200 copper. Bronze coins are 2- and 1-centavo pieces, 95 parts copper, 4 tin, and 1 zinc. There are 5-centavo nickel coins. The value of the gold peso or dollar is 24.58 pence.

Gold coins and 1 peso silver coins are legal tender to any amount. Fractional coin is legal tender for amounts up to 20 pesos, nickel and bronze coins up to 1 peso. The right of coinage belongs exclusively to the Executive of the Union, consequently the right of private persons to tender gold and silver bullion to the mints for the purpose of being coined is abrogated. The bank notes of the National Bank, the Bank of London and Mexico, and the State banks are current throughout the Republic at their full nominal values, thus serving the purpose of gold, which is practically never in circulation.

The weights and measures of the metric system were introduced in 1884 and their use is enforced by law of June 19, 1895, though the old Spanish measures are still occasionally referred to. The old weights and measures were—

<i>Weight</i>	1 libra = 0.46 kilogramme = 1.014 lb avoirdupois
	1 arroba = 25 libras = 25.357 lbs avoirdupois
<i>For gold and silver</i>	1 marco = ½ libra = 4,608 granos
	1 ochava = 6 tomines
	1 tomin = 12 granos
	20 granos = 1 French gramme
<i>Length</i>	1 vara = 0.837 metre = 2 ft 8 ¹ / ₁₆ English in.
	1 ligua comun = 6,666 ² / ₃

Diplomatic and Consular Representatives.

1. OF MEXICO IN GREAT BRITAIN

Envoy and Minister—Senor Don Miguel Covarrubias

First Secretary—Senor Don Cayetano Romero

Second Secretary—Senor Don Julio W. Baz

There are Consular representatives at Barrow in Furness, Birmingham, Belfast, Bristol, Cardiff, Dover, Dublin, Falmouth, Glasgow, Great Grimsby, Liverpool, Manchester, Marseilles, Newcastle, Southampton.

2. OF GREAT BRITAIN IN MEXICO

Envoy and Minister—Francis W. Stronge

Secretary—Thomas H. Hohler

Consul General—C. E. W. Stringer

Vice Consul—S. P. Smith

There are Consuls at Progreso, Salina Cruz, Tampico, Vera Cruz, Manzanillo, and Colima, and Vice Consuls at Acapulco, Chihuahua, Ensenada de Todos Santos, Frontera, Guadalajara, Guaymas and Rosalia, Laguna de Términos, La Paz, Mazatlan, Monterey, Tuxtla Gutierrez, Oaxaca, Saltillo, Soconusco, Tuxpan, Payo Obispo, San Luis Potosí.

MONACO.

Albert, born November 13, 1848, succeeded his father, Prince Charles III., September 10, 1889, married (1) to Lady Mary Douglas Hamilton, September 21, 1869, ¹ (2) to Alice Duchess-Dowager de Richelieu. Son by first wife, Prince Louis, born July 12, 1870.

Monaco is a small Principality on the Mediterranean, surrounded since 1861 by the French Department of Alpes Maritimes except the side towards the sea. From 1295 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Rocebruna revolted, and declared themselves free towns, in 1861 Charles III ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

The Prince is an absolute ruler, there having been no elective representation within the Principality. But on January 7, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *within de facto*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. The territory of the Principality is divided into three communes, administered by municipal bodies, in the election of which the Prince is entitled to take part.

In 1819 the Government adopted a code founded upon the French code, and a Court of First Instance, as well as a Juge de Paix Court. The Principality has its own coinage (it issues only 100 franc pieces) which is current since 1876. As all the States of the Latin Union, it also issues its own separate postage stamps.

The area is eight square miles. Population, 19,121. Towns Monaco, 2,410, La Condamine, 6,218. Monte Carlo, 3,794.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained. The value of the produce of the Principality is not stated. Imports are coal and wine, olive oil, oranges, citrons, and perfumes are exported. The industries and trade are unimportant, and the revenue is mainly derived from the gaming tables. The annual grant for the Prince was £70,000 in 1917 it will be 80,000, in 1927 90,000, and in 1937 100,000.

MONTENEGRO.

(CERNAGORA—KARA-DAGH.)

Reigning King.—**Nicholas I.**, Petrović Njegoš, born October 25, 1841; educated at Trieste and Paris; proclaimed Prince of Montenegro, ■■■■■ of his uncle, Danilo I., August 14, 1860. Assumed title of King, in virtue of a resolution passed unanimously by the National Skupština, Aug. 28, 1910, on the occasion of the 50th anniversary of his accession. Married, November 8, 1860, to *Milena Petrovna Vucolić*, born May 4, 1847, daughter of Peter Vukotić, senator, and Vice-President of the Council of State. Offspring of the union ■■■■■ three sons, *Danilo Alexander*, heir-apparent, born June 29, 1871; married July 27, 1899, to Princess Jutta (Militsa) daughter of the Grand-Duke of Mecklenburg Strelitz; *Mirko*, born April 17, 1879, married July 12, 1902, to Natalie Constantinovich, daughter of Colonel Constantinovich, great uncle of the late King Alexander of Serbia; offspring, Prince Michael born September 14, 1908; *Paul*, born May 16, 1910; *Peter*, born October 10, 1889; and six daughters, *Militsa*, born July 26, 1866, married, August 7, 1889, to the Russian Grand Duke Peter Nikolaievitch; *Stana*, born January 4, 1868, married August 28, 1889, to George, Duke of Leuchtenberg, and after the dissolution of that marriage, married in 1907 to the Russian Grand Duke Nicolas Nicolaievitch; *Helena*, born January 8, 1873, married October 24, 1896, to Victor Emanuel, now King of Italy; *Anna*, born August 18, 1874, married May 18, 1897, to Prince Francis Joseph of Battenberg; *Xenia*, born April 22, 1881; *Vera*, born February 22, 1887. In December, 1900, the Prince assumed the style of Royal Highness.

The supreme power has been retained in the family of Petrović Njegoš, descending collaterally, since the time of Danilo Petrović, who, being proclaimed Vladika, or prince-bishop, of Montenegro in 1697, liberated the country from the Turks, and, having established himself ■■■■■ both spiritual and temporal ruler, entered into a religious and political alliance with Russia. His ■■■■■ retained the theocratic power till the death of Peter Petrović II. (October 31, 1851), last Vladika of Montenegro, a ruler of great wisdom, ■■■■■ well as a widely celebrated poet. ■■■■■ succeeded by his nephew, Danilo I., who abandoned the title of Vladika, together with the spiritual functions attached to it, and substituted that of Gospodar, ■■■■■ Prince. At the same time Danilo I., to throw ■■■■■ a remnant of nominal dependency upon Turkey, acknowledged by his predecessors, obtained the recognition of his new title from Russia. In 1878 the independence of Montenegro ■■■■■ formally recognised by Turkey and the other Signatory Powers of the Treaty of Berlin. In ■■■■■ the limitations which the Treaty of Berlin had placed on Montenegro's complete sovereignty ■■■■■ removed, except the prohibition to erect fortifications ■■■■■ Antivari or along ■■■■■ Boyana. On October 23, 1909, Antivari ■■■■■ opened ■■■■■ a free port.

The following is the complete ■■■■■ of the Petrović dynasty, with their dates:—

Vladikas ■■■■■ Prince-Bishops.

Danilo	1696-1735	Peter I. (St. Peter)	1732-1830
Sava ■■■■■ Vassili	1735-1782	■■■■■ II. (Vladika Rado)	1830-1851
Danilo I. (Kniaz and Gospodar)			1851-1860
Nicholas I. (reigning King, nephew of the last)			

to read and write. There is a theological seminary and a gymnasium or college for boys at Cetinje, and a girls' high school with resident pupils maintained at the charge of the Empress of Russia.

Justice, Crime, Pauperism.—A Penal Code based on the Serbian Code came into force in 1906; a Civil Code has been in existence for some time.

There are district courts in five of the principal towns. In the rural districts there are courts of first instance which the heads of the districts preside. The local Kmeti have only authority to settle trivial disputes and generally as peace-makers. There are appeal Courts in the five principal towns. The 'Veliki Sud,' or supreme court at Cetinje, has jurisdiction, both appellate and concurrent, over the whole principality, and from its decision in civil matters there is no appeal. In criminal cases the Prince may pardon. Petitions against judges for undue delay may be lodged with the Minister of Justice. There is no judicial statistics, but crime in general is rare.

There is a regular provision for poor relief. The Government, however, annually undertakes a certain number of public works, such as roads, bridges, &c., at which the indigent are invited to labour. Russian charity has also done much.

Finance.—The estimated revenue and expenditure in 1912 balanced at 4,021,000 perpers, the chief items of revenue being land tax, customs and monopolies. Of the expenditure the chief branches are the civil list, 240,000 perpers; justice, 316,040 perpers; interior posts and telegraphs, 635,736 perpers; ministry for foreign affairs, 168,860 perpers; ministry of finance and public works, 626,160 perpers; ministry of war, 260,000 perpers; ministry of worship and instruction, 612,840 perpers. Public debt 1912, 390,000.

Defence.—The establishment of a parliamentary régime in 1906 was followed in 1910 by the first written law for the administration and instruction of the army.

The military forces of Montenegro are organised on a militia basis. According to the Law of 1910, every Montenegrin subject is liable to military service from the 18th to the 62nd year of his age, i.e., for a total period of 44 years. This period is divided into: 2 years in the recruits' class, 11 years in the active army and 10 years in the reserve. During their term of service in the active army men are divided into two classes. To the first class are allotted those who are considered fit for active service in any capacity, while to the second are posted men who are only suited for the less arduous duties in the field, such as the transport, supply and medical services.

During the two years recruit service, the recruit is called up for two courses of recruits' training, limited by law to twelve months, but in practice each annual course only three months in the artillery, two months in the infantry and other services.

Men in the active army are liable to be called up annually for a period of training not exceeding ten days and may be called up in addition for any extensive manoeuvres or for experimental mobilisation, subject, however, to the proviso that no man shall be called upon to perform more than 45 days' service in any year. Men belonging to the reserve are required to attend a muster parade once a year, but they may be called up for manoeuvres or for experimental mobilisation. Men who, through physical unfitness, or for any other reason, are unable to perform their military service pay a special military tax, the amount of which varies according to their condition.

The army consists in time of peace of four divisions, three of which have three brigades, while the fourth has only two. The brigades vary in strength from three to eight battalions, the total number of battalions being 59, of which three are composed of Moslems. The cavalry is not existent in the Montenegrin army.

The infantry is armed with Russian "three line" rifles of the 1898 pattern; the artillery with various guns of not very recent model.

Sufficient time has not yet elapsed since the promulgation of the new Law for all the provisions of that Law to be brought into full effect, and the army must therefore be regarded as still in a period of transition.

The war strength of the Montenegrin army is variously estimated at from 30,000 to 50,000 men.

Production and Industry.—Agriculture is of the most primitive kind. The cultivated land is mostly the property of the cultivators, the Croatian system of domestic serfdom being generally prevalent. In some districts, however, the land is split up into diminutive peasant-holdings, while in a few the metayer system is met with, but large estates nowhere exist. The principal crops grown are maize, tobacco, oats, potatoes, barley, and buckwheat. The exclusive right of manufacture, sell, and export tobacco is, since November 14, 1903, in the hands of an Italian syndicate. The vine is cultivated successfully in the Tchermitchka Nahie, and the district of Podgoritz, and the olive about Antivari and Dulcigno. The uncultivable area consists, in the east, of mountain pasturage and forests of beech, oak, &c. which, owing to the want of roads, are valueless, and, in the west, of bare limestone sparsely sprinkled with brushwood and stunted scrub. There are no sea-fisheries. Live stock of all kinds are reared: there are 500,000 sheep and goats; 60,000 cattle; 8,000 swine; 3,000 horses. There is some fishery in the Lake of Scutari.

Commerce.—Montenegro has a maximum and minimum tariff. The exports for 1910 were valued at about 99,650*l.*; the imports at about 340,277*l.* The principal exports are sumach, flice powder (*Pyrethrum roseum*), smoked sardines (*sardines*), smoked mutton, cattle, sheep, goats, cheese, wool, hides, skins, and furs, honey, beeswax, wood for walking-sticks, &c.; olive oil, wine, tobacco. The imports are salt from Turkey, Government monopoly yielding over 11,000*l.* a year; petroleum from Russia; maize, cottons, hardware, sugar, coffee, rice. According to statistics supplied, merchandise to the value of 182,000*l.* was imported from Austria-Hungary in 1910; 55,000*l.* from Turkey; 52,000*l.* from Italy, and 15,000*l.* from Great Britain.

Communications.—There are excellent carriage roads from Cattaro to Cetinje, from Cetinje by Rieka, in Lake Scutari, to Podgoritz, and Nikšić; also from Podgoritz to Plavitz (the Scutari-Lake Port of Podgoritz); and from Antivari to Vii Pazar in Lake Scutari, from Vii Pazar to Rieka, from Podgoritz to Kolaschine, and from Antivari to Dulcigno. A road from Kolaschine to the Turkish frontier near Barana has been made. Other roads are contemplated or are begun from the Austrian frontier near Rusanov to Grahovo and Nikšić; from Cetinje via Crvo to Danilograd, &c. There are public diligences between Cattaro and Cetinje, between Cetinje, Podgoritz, and Nikšić; and between Antivari and Vii Pazar. There are bridle roads in the principality. Three lake steamers belonging to the Société Monténégue d'Antivari ply between Rieka, Vii Pazar, Plavitz, and Scutari. A narrow-gauge railway (the Monte-

negrin railway) is open from Antivari to Vir Pažar. There are 528 miles of telegraph line in the country, with telegraph and radio-telegraphic stations. Montenegro forms part of the Postal Union; it has 21 post offices.

Money.—Montenegro has a small coinage of gold, silver, nickel and bronze. The perper and para are nominally equal in value to the Austrian krone and heller. The coins in circulation in 1910, struck at the Vienna mint except the five and one perper pieces struck in France, were: gold, hundred perper, 80,000 twenty perper and 40,000 ten perper pieces; silver, 60,000 five perper, 300,000 two perper, and 500,000 perper pieces. French and English gold and Austrian paper and silver circulate freely. There are four banks, the Bank of Montenegro at Cetinje, the Banks of Podgoritzna and Nikšić at those places, and the National Bank of Montenegro at Antivari with a branch at Cetinje.

MOROCCO

(MAGHREB-EL ARAB — EL GHARB)

Reigning Sultan.

Mulai Yusef, son of Mulai Hassan, was proclaimed Sultan on August 18 1912, on the abdication of his brother, Sultan Mulai Abd el Hafid, who received a lump sum of 400,000 francs and an annual pension of 350,000 francs.

The present Sultan of Morocco—known to his subjects under the title of 'Emir al Mumenin,' or Prince of True Believers—is the seventeenth of the dynasty of the Alides, founded by Mulai Ahmed, and the thirty sixth lineal descendant of Ali, uncle and son-in-law of the Prophet. His five predecessors were—

Sultan	Reign	Sultan	Reign
Mulai-Abdelrahman	1822-1859	Mulai Abd el Aziz	1894-1908
Sidi-Mulai-Mohamed	1859-1873	Mulai-Abd el Hafid	1908-1912
Mulai Hassan	1873-1894		

The Sherifian umbrella is hereditary in the family of the Filali Sheriffs of Tahilt. Each Sultan is supposed, prior to death, to indicate the member of the Sherifian family who, according to his conscientious belief, will best replace him. This succession is, however, elective, and all members of the Sherifian family are eligible. Generally the late Sultan's nominee is elected by public acclamation at noon on the Friday after the Sultan's death, as the nominee has probably possession of imperial treasure, and is supported by the bodyguard, from among whom the large majority of court officials are selected.

Government.

The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan is chief of the State, as well as head of the religion. As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mahomet, by the interpreters of the Koran, the class of 'Ulema,' or the 'Sheik-ul-Islam.' The Sultan has his ministers, whom he consults if he deems it prudent to do so, otherwise they are merely the executive of his unrestricted will. They are the Grand Vizier, the Ministers for Foreign Affairs, Home Affairs, and War, Chief Chamberlain, Chief Treasurer, Chief Administrator of the Empire.

By the Anglo-French Convention of April, 1904, Great Britain recognised Morocco as it appertains to France to assist in the administrative, economic, financial, and military reforms in Morocco, but reserves the rights which by treaties or usage she now enjoys. The general agreement was accepted also by Spain in a Franco-Spanish convention. Germany, however, expressed her dissent with certain arrangements, and a conference of delegates representing Morocco, the European Powers interested, and the United

States of America, held at Algaciras for the settlement of disputed matters, from January to April 7, 1906, when an agreement, embodied in a General Act, signed by the delegates. The Sultan signed the agreement June 18, and ratifications of the Agreement were deposited at Madrid by the other Powers, December 31, 1906 (For particulars of the Treaty see STRAFMAN'S YEAR BOOK for 1912.)

In 1906 disturbances occurred in the neighbourhood of Melilla arising from an attack by Rifians on Spaniards working on a railroad being laid from that town to some mines a few miles distant. Spain sent a large force and fighting ensued, ending in the subjugation of the tribes and the cession by Spain of a considerable tract of country extending eastwards to Cabo de Agua and southwards to Scluan.

After remaining quiet for some months the tribes near Melilla again attacked the Spaniards in the summer of 1911. In June, the Spanish Government despatched vessels of war to Larache and landed a force, which marched to Alcazar to protect the Spaniards at that place. Further contingents of Spanish troops continued to arrive, and occupied all the district between Larache, Alcazar, and Azila.

In July 1911 the German Government sent a courier to Agadu, informing the Sultan and the European powers that their object was to protect German interests in that place. Negotiations were thereupon entered into between France and Germany, and after lasting about three months eventually terminated in the signature of two Agreements (Nov. 4, 1911) under which Germany renounces all political interests in Morocco and practically agrees to the establishment of a French protectorate receiving in exchange ample guarantees for absolute equality in economic and commercial matters and the cession of a considerable tract of country in the French Congo (See map, STRAFMAN'S YEAR BOOK for 1912.)

In April, 1912, a treaty was signed at Fez by which the Sultan formally accepted the French Protectorate. This has been recognised by Germany and England.

France is represented in Morocco by a Resident General (an office created April 28, 1912), who exercises civil and military powers, under the sovereignty of the Sultan, in the interest of the French Protectorate, and with due regard for the treaty rights of other powers. The Resident General is assisted by a Deputy Resident and a Secretary General. The new Resident General is under the direct control of the Foreign Office, where a Special Moroccan Department has been created.

The negotiations between France and Spain as to their respective rights in Morocco ended in the Franco-Spanish Treaty of Madrid, signed November 27, 1912. In this France acknowledges the right of Spain to exercise a protectorate in the Spanish zone, the extent of which is clearly defined (See map in this issue). The zone will be administered, under the control of a Spanish High Commissioner, by a Calipha (whose headquarters shall be at Tetuan) chosen by the Sultan from a list of two candidates presented by the Spanish Government. It was further agreed that Tangier and its district should be excluded from the Spanish zone, and become a special international zone, some 140 square miles in extent.

A protocol attached to the Treaty provides for the rapid planning, construction, and exploration of the railway from Tangier to Fez, the first to be built in the Empire. The capital of the company shall be 60 per cent French and 40 per cent Spanish. The line will consist of two sections, corresponding (1) to the International zone of Tangier, and (2) to the Spanish Northern zone, and (3) to the Spanish Southern zone.

The following are the treaties concerning Morocco 1880 to 1912—(1) Treaty between Spain and Morocco April 28 1880, (2) Supplementary Treaty to October 20, 1881, (3) Treaty of Commerce Spain November 20 1861 (4) Convention of signed by European Powers, on June 3 1880 relative to the exercise of protection (5) Treaty of Marakech, between Spain and Morocco (6) Additional Convention to last, February 24, 1895, (7) Franco-Spanish Agreement relative to Spanish possessions and June 27 (8) Franco-Spanish Treaty of April 9 1901, (9) Franco-Spanish Agreement October 3, 1906 (10) Franco-Spanish Agreement of September 1 1906 (11) of Algieria April 1906 (12) Franco-Spanish Agreement of 1907, (13) Franco-German Treaty of February 1901, (14) Moroccan Agreement of 21, (15) Hispano-Moroccan Agreement November 16 1910, (16) Franco-Moroccan Agreement of November 4 1911, (17) French Protectorate Treaty with Morocco, March 20 1911, (18) Franco-Spanish Treaty of November 27, 1911

French Resident General—General Lyautey, appointed April 28, 1912

Area and Population.

According to the most recent investigation, the area is about 219,000 English square miles. Population generally considered to be about 5,000,000. A French officer, Captain Larras who has been in the country since 1898, estimates the numbers at from 4,840,000 to 4,580,000. To the Atlantic coast region, farther to Mogador, he assigns 2,200,000, to the Atlas Rif country, 1,500,000, to the Muluya valley 200,000, to the Sus valley, 200,000, while in the region from the southern slopes of the Atlas stretching into the Sahara, he estimates the numbers thus: Wad Draa, 100,000 to 250,000, Wad Ziz with Tafilt, 120,000 to 200,000, Wad Gu (with Fing), 20,000 to 30,000. The population consists of Berbers, Tuaregs, Shillah Berbers, Beduin and Mud Arabs, and a considerable number of Jews and Negroes.

An agreement (July 20 1901) makes the valley of the Wad Gu the boundary between France and Algeria and to the east of this only those who acknowledge French authority will be permitted to dwell. A French and Moroccan Commission is entrusted with the formation of police arrangements in the region. The number of Christians does not exceed 10,000 (7,000 in Tangier). Fez, the capital, has a population of about 140,000, and Tangier about 65,000. Morocco city is the southern capital. The Sultan and his subjects are of the Malakite sect of Sunnite Mohammedans.

Finance, Defence.

(Customs revenue estimated at 440,000). The Moroccan debt consists of French and German loans (1904-06) amounting to 3,040,000, war expenditure, indemnities, &c., 2,980,000, and advances and loans, 2,200,000, total, 8,200,000. The French loans amounting to 2,480,000 should be repaid in half yearly instalments up to 1911. In 1910 a 5 per cent loan of 101,124,000 francs was obtained from the Moorish State Bank.

The Sherrefian army is to be organised as follows, under command of a French general—

Service is compulsory, substitution being allowed, the term of service will be generally 1 year. There is to be a Sherrefian guard of 2 battalions, 2 squadrons and 1 mountain battery, to form a permanent garrison of Fez. The army consists of 2 battalions, 5 squadrons, 1 mountain batteries, 1 engineers battalion, 1 departmental troops. Companies, squadrons, batteries will be commanded by French officers, with a proportion of French N.C.O.'s. Obligatory service is only to be gradually imposed upon the tribes.

Industry and Commerce.

The interior of Morocco, although generally open to travellers, is not permanently occupiable — yet — account of lack of security to both life and property. Immigration is confined principally to the so-called French zone of influence along the coast, centring especially in and about Casablanca. Morocco, therefore, is still in the rudimentary stages of both economic and commercial development. Only foreign capital seems available for the development of trade, agriculture, the mooted irrigation projects, railroads, etc. In the coastal zone some progress is being made, but the vast rich interior remains unexploited, with a large section actually unexplored.

In addition to its undoubted agricultural resources, rich mineral deposits of copper, iron, lead, antimony, sulphur, silver, gold, and petroleum are also said to exist in various parts of the Sultanate. The hostility of the interior tribes prevents any extensive European mining enterprises, but several companies have been organized in anticipation of early results.

The natural industries of Morocco have become almost extinct. Formerly richly-woven silks, woollens, and embroideries were extensively produced; but the slipper, jillabe, and carpet industries are now all that remain, although there is a constantly decreasing quantity of tiles and pottery still manufactured in the interior.

Imports and exports for 1910 and 1911:—

Ports	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
Tangier	406,570	513,078	371,461	366,873
Tetuan	49,225	66,283	30,829	28,482
Larache	896,800	410,843	117,811	131,818
Fes	227,193	262,303	46,493	51,088
Casablanca . . .	583,821	686,559	339,630	790,068
Mazagan	249,045	305,133	282,109	464,247
Safi	279,396	357,412	187,153	550,482
Mogador	267,411	324,061	277,401	354,893
Total by Ports	2,468,454	3,116,000	1,578,417	2,737,810
" Mehlia	1,206,730	1,688,367	114,031	—
" Algiers	424,840	664,480	176,890	616,200
Grand total	4,100,024	5,468,847	2,869,338	3,400,010

In 1910 and 1911 the commerce was distributed as follows:—

From or to	Imports		Exports	
	1910	1911	1910	1911
	£	£	£	£
United Kingdom	1,143,382	1,512,785	422,478	791,771
France	1,747,243	2,228,058	924,080	1,369,379
Germany	302,667	370,818	390,459	397,174
Spain	738,823	773,884	415,089	421,511
Italy	20,790	28,641	28,468	100,738
Belgium	118,320	148,163	4,174	29,951
United States	17,990	28,782	38,240	339
Austria-Hungary	68,246	124,005	3,844	3,744
Other countries	44,760	26,495	84,960	75,056
Total	4,100,024	5,468,847	2,869,338	3,400,010

The chief imports and exports in 1911 were:—

Imports	1911	Exports	1911
Cottons	1,081,480	Wool and skins	818,881
Sugar	1,007,060	Wool	285,645
Tea	245,520	Oxen	878,487
Machinery, hardware	202,845	Eggs	282,017
Flour and semolina	161,600	Shippers	57,907
Candles	131,214	Almonds	232,124
Tobacco	6,771	Barley	178,006
Wines, spirits, beer, &c.	300,687	Olive oil	8,531
Groceries and provisions	200,047	Beans	144,774

Postal services, under the control of the British, French, German and Spanish Governments. There is a daily service of couriers from Tangier to Fez and Alcazar, to Tetuan, and to the coast towns Larache, Rabat, Dar-al-Baida (Casablanca), Marragan, Safi and Mogador. There are also couriers between Larache and Alcazar, between Marragan and Marakech, between Fez and Mequinez. There are telegraphic submarine

cables from Tangier to Cadiz (Eastern Telegraph Co.), Tanis (Spanish Government), and Oran (French Government), also wireless telegraphic stations belonging to the Moorish Government at Tangier, Rabat, Casablanca, Fez and Mogador. The wireless telegraph station at Rabat is to be transferred to Safi, and land telegraph wires will connect Rabat with Casablanca and Mazagan with Casablanca. Only two towns have a telephone service—Tangier and Casablanca.

Money, Weights, and Measures

The *Blanket* = *Musoon* = 6 *Floors*. Approximate English value = 0.96 at par.
 The *Ounce* or *Okia* = 1 *Blanket* " " " " "
 The *Mikhal* = 10 *Ounces* " " " " " = 8.64

Spanish dollars and pesetas, as well as Moorish money minted for the Government in France, Germany and England, are current. The silver coinage comprises dollars, $\frac{1}{2}$ and $\frac{1}{4}$ dollars, and dirhems and $\frac{1}{2}$ dirhems (1 dollar = 10 dirhems). But the values fluctuate, and the market values are sometimes only one-third of those adopted by the Government for custom-house purposes. At Tangier European goods are paid for in Spanish coin or French coin, French coin is much used at Casablanca (Dar el Baida), and other parts of Morocco. Moorish coin is almost exclusively used.

The *Kintar*, used for the produce of the country sold by weight, contains 100 *Kotals*, and is generally equal to about 168 lbs., but varies in different districts.

The *Kintar* by which is sold the articles of weight of importation is 100 *Kotals*, equal to 112 lb. English.

The *Drah*, 1 *tomina*, about 22 English inches.

Grain is sold by *tomina*.

The Tangier *Mudd*, 1 *tomina*, equal to $1\frac{1}{4}$ English bushel.

Oil is sold, wholesale, by the *kula*, that of Tangier actually weighs 100 *kotals*, 47 lb. English, and is equal to about $5\frac{1}{2}$ British imperial gallons.

Diplomatic and Consular Representatives.

OF GREAT BRITAIN IN MOROCCO.

Envoy Extraordinary and Minister Plenipotentiary — Viscount

Consul General, with local rank of 1st Secretary — H. M. White, C.M.G.

2nd Secretary — H. W. Kennard

Vice Consul — H. M. Johnstone

There is also a Consul at Dar-el-Baida and Fez, Vice-Consuls at Dar el Baida, Larache, Mazagan, Rabat, Safi, Tetuan, Mogador, and Muxakali, and Consular Agent at Alcazar and Azila.

and other Works of Reference concerning Morocco

NEPÁL.

An independent Kingdom in the Himalayas, between 26° 25' and 30° 17' N. lat., and between 80° 6' and 88° 14' of E. long.; its greatest length 150 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Highness Mahárájadhírāja **Bikram** Jang Bahádúr Shah Bahádúr Shamsheer Jang, who born on June 30, 1906, and succeeded his father on December 11, 1911. The government of Nepal is a military oligarchy. All power is in the hands of the Prime Minister, to whom is permanently delegated by the Mahárájadhírāja Surendra Bikram under pressure of the Bharadara nobles of the State in 1867. The present Prime Minister is Maharájá Sir Chaudrá Shamsheer Jang, Bahádúr Rana, G.O.B., G.C.S.I., G.C.V.O., D.C.L., who was appointed June 26, 1901. He holds the rank of Major General in the British army.

The Gurkhas, a Rájput race originally from Udaipur in Rajputana, who had settled in the province of Gurkha in Nepal, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. About 1790 a Gurkha army invaded Tibet; and to avenge this affront the Chinese Emperor, Kuen Lung, in 1791, sent an army into Nepal, which compelled the Gurkhas to submit to the terms of peace, by which the Nepal Durbar agreed to restore the booty taken from the Tibetans, and to send a deputation to Peking with a petition and presents for the Emperor of China once in five years. A commercial treaty between India and Nepal was signed in 1792, and a British Resident was sent to reside at Katmandu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace concluded and the Treaty of Segowlic signed December 2, 1815. Since then the relations of the British with Nepal have been friendly. In 1854 hostilities broke between the Nepalese and Tibetans, and in 1855 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves (a) to pay an annual tribute of Rs. 10,000 to Nepal, (b) to encourage trade between the two countries, and (c) to receive a Representative of Nepal at Lhasa.

In accordance with the treaty of Segowlic, a British Resident, with a small escort of Indian sepoy, lives at the capital; but he does not interfere in the internal affairs of the State.

Area about 54,000 square miles; population estimated at about 5,000,000. The estimated gross is 15,000,000 Rupees. The races of Nepal, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurungs, Newars, and Bhutias.

Capital, Katmandu; population about 50,000.

of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants. The people in general prosperous. Charitable hospitals have been built at Katmandu, Bhatgaon, Birganj, Palpa and Bhimpbedi, and a dispensary at Doti.

There is standing army of about 30,000, organised in battalions armed with Martini-Henry. An irregular force, nearly as numerous, is armed with old and Enfield. The artillery about 250 guns, two batteries being light pieces, fairly modern, but the rest

smooth bore muzzle loading guns Facilities given for the recruitment of Gurkas for the Indian army

The trade of Nepal with British India during three years ending March 31, 1912, has been as follows (including treasure) —

From to Nepal	1909-10	1910-11	1911-12
	Rs	Rs	Rs
Imports into India .	3,28,85,162	3,72,40,486	4,54,14,125
Exports from India	1,61,37,675	1,71,82,847	2,26,06,660

The principal articles of export are cattle, hides and skins, opium and other drugs, gums, and dyes, jute, wheat, pulse, and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, cotton, twist and yarn, silk, cotton and woollen piece goods

The silver mohur is valued at 6 annas and 8 pies of British Indian currency Copper pice, of which 50 to a silver mohar, are also coined The Indian rupee passes current throughout Nepal

British Resident — Lt Colonel H L Showers, C S I, C I E

NETHERLANDS (THE).

(KONINKRIJK ■■■ NEDERLANDEN.)

Reigning Sovereign.

Wilhelmina ■■■ **Pauline Maria**, born August 31, 1880, daughter of the late King Willem III., and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck; succeeded to the throne ■■■ the death of her father, November 23, 1890; came of ■■■ August 31, 1898, and ■■■ crowned September ■ of that year; married to Prince Henry of Mecklenburg-Schwerin, February 7, 1901. Offspring: Princess Juliana Louise Emma Marie Wilhelmina, born April 30, ■■■.

The royal family of the Netherlands, known ■■■ the House of Orange, descends from ■■■ German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France; and a third matrimonial union, that of Prince Willem III. of Orange with ■■■ daughter of King James II., led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the ■■■ of 'stadtholders,' or governors. The dignity ■■■ formally declared to be hereditary in 1747, in Willem IV.; but his successor, Willem V., had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the fate of the old United Provinces, released from French incorporation, ■■■ under discussion at the Congress of Vienna. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, ■■■ ordered by the Congress to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadtholder, Willem V., as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at the Hague on the 16th of March, 1815, and recognised ■■■ sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were ■■■ readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to ■■■ Willem II., who, ■■■ a reign of nine years, ■■■ it to ■■■ heir, Willem III. ■■■ king reigned 41 ■■■ and died in 1890; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

■■■ Sovereign ■■■ ■■■ civil list of 600,000 guilders. There is ■■■ ■■■ large revenue from domains, and in addition an all-■■■■ of 50,000 guilds ■■■ for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in ■■■ prosecution of ■■■ enterprises tending to raise the ■■■ of the Netherlands.

GOVERNMENT AND CONSTITUTION.

I. CENTRAL GOVERNMENT.

The first Constitution of the [] after its reconstruction as a kingdom [] given in 1815, and was revised in 1848 and in 1887. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture: in default of male heirs, the female line ascends to the throne. In default of a legal heir, the [] to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the [] occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in [] cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States from among the most highly assessed inhabitants of the eleven provinces, [] from among some high and important functionaries, mentioned by law. Members of the First Chamber not residing in the Hague, where the Parliament meets, [] allowed 10 guilders (16s. 8d.) a day during the Session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly.

First chamber: 18 Catholics, 10 Anti Revolutionists, 1 Protestant Party, 8 old Liberals, 15 Liberal Union.

Second chamber: 4 old Liberals, 21 Liberal Union, 26 Catholics, 21 Anti-Revolutionists, 12 Protestant Party, 9 Democrats, 7 Socialists.

According to the electoral reform act, passed in 1896, voters are all male Dutch citizens not under 25 years of age, in possession of certain outward and positive signs of capacity and well-being. The chief sign is the fact of payment of one or more direct State taxes (for the land tax [] amount of 1 florin is sufficient). Besides these, the Reform Act admits [] electors all those who [] prove that they [] householders, and have paid rent of houses or lodgings during a fixed term, [] that they [] [] tenants of boats of not less than 24 tons capacity, [] that they have been during a fixed term in employment with [] annual wage [] salary of [] least 22½ 18s. 4d., or [] [] certificate of State interest of at least 100 florins, [] a savings bank deposit of at least [] florins, [] the legal qualifications for any profession or employment. The mode of voting adopted is based upon the *coulis* system. Voting [] not compulsory. The electoral body numbered January 1, 1912, 891,279 voters, i.e. 63·4 per cent of the number of male citizens of [] years and older.

The members of the Second Chamber receive [] annual allowance of 2,000 guilders (166½), besides travelling []. They are elected for [] years, and retire in [] body, whereas the First Chamber is elected for 9 years, and every 3 [] one-third retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new bills; the functions of the Upper Chamber being restricted to approving or rejecting them, without the power of inserting amendments. The meetings of both Chambers [] public, though each of them, by the decision of the majority, may form itself into a private committee. The minister

may attend at the meetings of the Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is a necessity for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States General by two thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The members of the Ministry are —

1 The Minister of the Interior — Dr Th. Heermans, appointed February 11, 1908

2 The Minister of Foreign Affairs — Mr Dr R. de Maessene, appointed February 12, 1908

3 The Minister of Finance — Dr M. J. C. Kolkman, appointed February 12, 1908

4 The Minister of Justice — Van't Hoff

5 The Minister of the Colonies — J. H. de Waal Malffijt, appointed August 16, 1909

6 The Minister of Defence — H. Collyer, appointed Jan. 1, 1911

7 The Minister of Public Works (Waterstaat) — Dr L. W. Pegout, appointed January 21, 1909

8 The Minister of Agriculture, Commerce and Industry — A. S. Talma, appointed February 12, 1908

The Ministries of War and Marine are united in that of Defence since May, 1912

Each of the above Ministers has an annual salary of 12,000 guilders, or 1,000 £

There is a Council — 'Raad van State' — of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters

II LOCAL GOVERNMENT

The territory is divided into 11 provinces and 1,128 communes. Each province has its own representative body, 'the Provincial States'. The members are elected for 6 years, directly from among the male Dutch inhabitants of the province who are 25 years of age, one half of the number being subject to election or renewal every 3 years. Except that they must be inhabitants of the province, the electors, as well as the mode of voting, are the same as for the Second Chamber. The number of members varies according to the population of the province, from 12 for Holland (South) to 6 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to impose taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States have the right of control over the provincial authorities. They also elect the members of the First Chamber of the States-General. They meet twice a year as a rule in public. A permanent committee composed of 6 of their members called the 'Deputed States,' is charged with the executive power in the province and the daily administration of it. A committee has also to see that the provincial law is executed in the province. Both the Deputed States and the Provincial States are presided over by a Commissioner of the Sovereign, who is the former assembly has a deciding vote, but the Deputed States named only a deliberative vote. He is the chief magistrate of the province. Only the members of the Deputed States receive an allowance.

The communes form each a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for six

years directly, by the voters as for the Provincial States, provided they inhabit the commune; one third of the Council retiring every two years. All the male Dutch inhabitants 21 years of age are eligible, the members varying from 7 to 45, according to the population. The Council has the right of making and enforcing by-laws concerning the communal welfare. The Council may impose taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2-6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor, as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Population at various census periods

1880	2,111,467	1890	2,792,300	1900	3,517,177
1940	3,074,870	1950	4,114,115		

Area and the population, according to the census of December 31 1909, and the communal population lists for December 31, 1911 —

Provinces	Area English square miles	Population		
		Dec 31, 1911	Dec 31, 1910	Per square mile 1911
North Brabant (holders)	1,940	1,389,407	1,374,177	826
Holland	1,214	1,448,807	1,416,007	1,289
North Holland	1,070	1,185,421	1,122,996	1,084
Zeeland	1,400	243,007	234,191	172
Utrecht	534	211,030	202,131	244

Limburg	650	248,467	240,053	
Total	12,419	6,022,402	5,941,155	475

The rate of increase in each year has been:—

In 1880	0.6	In 1900	1.47	In 1905	1.36
" 1890	1.18	" 1901	1.49	" 1911	1.29

the total population in 1911 there were 2,983,897 males and 3,039,055 females

Year	Population of the principal Towns	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec 31, 1889	1,411,684	91.2	3,099,831	68.7
" 1899	2,002,083	94.9	3,387,482	61.05
" 1911	2,446,270	40.32	3,576,162	88

with a population of more than 20,000

The [] of Dec. 1909 gives in a population of 5,859,175 -

		Per cent	Females	Per cent
Unmarried	1,806,888	30.8	1,770,938	30.2
[]	990,991	17.4	991,171	16.9
Widowers [] widows	90,269	1.5	186,736	3.2
Divorced and separated	5,000	0.09	8,184	0.14

The Dutch [] the Flemish belong to the Low-German branch [] the Germanic race

At the [] of 1909 there [] 69,975 persons of foreign birth living [] the Netherlands, 37,532 of them being Germans, 18,336 Belgians, 2,102 English, and 12,005 from other countries. 3,783,775 persons were born in the [] where they lived, 1,249,741 in some other [] in the province; 764,201 in other provinces of the realm; and 15,081 in the Dutch colonies.

II. MOVEMENT OF THE POPULATION

Years	Total Living Births	Illegitimate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
Average						
1884-89	149,516	4,773	91,615	30,901	57,804	7,741
1890-94	152,152	4,855	93,419	32,761	59,047	7,404
1904-09	159,061	4,567	90,387	38,093	72,679	7,421
1900-04	168,204	3,058	87,804	49,919	80,401	7,353
1905-09	171,370	3,162	87,709	41,994	83,849	7,092
1910	178,694	3,514	79,084	43,740	88,910	1,947
1911	186,527	3,927	80,752	43,201	79,745	6,615

The emigration has been as follows, mostly to North America. Average to different lands: 1892-6, 2,991; 1897-1901, 1,362; 1902-06, 2,510; 1907, 4,398; 1908, 3,030; 1909, 2,939; 1910, 3,220; 1911, 2,638.

Of the last number 1,426 were males, 604 females, and [] children

The total number of emigrants, Dutch and foreigners, sailed from Dutch ports was, in 1911, 43,838

III. PRINCIPAL TOWNS

On December 31, 1911. —

Amsterdam	40,000	Dordrecht	47,804	Deventer	26,221

Religion.

[] liberty of conscience [] complete social equality [] granted to the members of [] religious confessions. The royal family and the majority of [] inhabitants belong to [] Reformed Church. The [] Budget contained fixed allowances for the different churches; for Protestant Churches, about 1,876,000 guilders; for Roman Catholics, about 588,000; and for Jews, about 14,000.

The number of adherents of the [redacted] churches in the various provinces, according to the [redacted] of [redacted] and 1902, was [redacted] follows:—

Provinces	Dutch Reformed	Other Protestant	R. Cath. Church	Janseuists	Jews	Other or no creeds
N. [redacted]	51,061	16,331	571,576	21	1,784	1,316
Gelders	539,809	52,170	226,070	[redacted]	5,171	15,901
South Holland	749,370	195,800	334,064	2,230	18,733	40,647
North [redacted]	442,425	172,371	307,199	5,425	64,426	115,947
Zealand	125,837	81,098	58,974	14	881	14,101
Utrecht	147,704	38,191	92,478	1,039	1,390	8,812
Friesland	192,685	93,645	25,273	6	1,234	40,659
Overijssel	212,730	46,424	102,130	14	4,401	17,182
Groningen	197,655	72,128	30,305	33	2,680	32,208
[redacted]	125,128	28,039	10,674	[redacted]	2,180	7,290
Limburg	8,672	2,059	322,156	1	960	955
1899	2,471,021	598,111	1,790,161	8,734	103,068	182,102
1902	2,588,361	746,186	2,058,021	10,093	106,300	258,138

The government of the Reformed Church is Presbyterian. At the end of 1911 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,360 parishes. Their clergy numbered about 1,636. Ten other Protestant bodies had about 250 churches and about [redacted] clergymen. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, 1,127 churches, and about 2,400 clergy. [redacted] The Janseuists had 1 archbishop, 2 bishops, 27 churches, and 28 clergymen. The Jews had about 169 parishes.

Instruction.

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction is obligatory; the school age is from 6 to 13.

In 1806, and more expressly in 1848, secular instruction [redacted] separated from religious [redacted] sectarian instruction. By the Act of 1887 public instruction is diminished and a greater share in the education of the youths left to private instruction, which [redacted] largely supported by the State. The cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for [redacted] per cent. to the costs of founding [redacted] purchasing schools. The Act is supplemented by Act of 1901 and [redacted]

The following table is taken from the Government returns for 1910-11:

Institutions	Number	Teaching [redacted]	Pupils or Students
[redacted] (public) ¹	4	± 008	4,128 ²
[redacted] University	1	± 70	1,235
[redacted] schools	30	[redacted]	2,818
[redacted] for [redacted] working people	404	2,973	35,854
[redacted] schools	11	[redacted]	852
Middle [redacted] schools	[redacted]	1,567	14,941
Public	2,303	18,373	568,047
Private	2,060	11,873	353,547
[redacted]:			
Public	168	—	80,155
Private	1,080	—	105,470

¹ Leiden, Utrecht, Groningen, [redacted] ² Under [redacted] [redacted] students.

Besides the schools named in the table, there is a great number of special schools. Since 1880 there is a private university, with 11 students in 1910-11, and since 1908 a government school to train functionaries of the colonial service for superior posts.

In 1910 the State spent on instruction 2,493,166 $\frac{1}{2}$; the Communes, 1,482,666 $\frac{1}{2}$.

Of the conscripts called out in 1911, 0.8 per cent. could neither read nor write, the percentage being highest in Drenthe, 3.6. In 1875 the total percentage was 12.3. Of the total number of children from 6 to 15 years (school age) on 15 January, 1911, 4.92 per cent. received elementary instruction.

Justice and Crime.

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 11 district tribunals, and by 106 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the serious cases are tried by the district tribunals, formed by a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 1 and the High Court of 3 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

The number of persons convicted was:—

	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1906	128,137	18,969	11,834	1,178
1907	186,036	14,823	11,478	1,186
1908	146,079	15,962	12,230	1,187
1909	139,808	14,779	12,382	1,189
1910	143,107	15,842	12,400	1,389

The number of inmates in the 28 prisons during 1910 was 10,124 males and 588 females; in the houses of detention, 27,029 males and 1,577 females (persons convicted). There are also 5 State-work-establishments specially for drunkards, beggars and vagabonds. The number of inmates was, during the year 1910, 3,973 males and 90 females. Children under 16 years, placed in the 11 State reformatories, numbered in 1910 11 boys and 70 girls. In 1904 an act was passed, establishing several (6) disciplinary schools for the education of children, gravely neglected by their parents. There are both State and communal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (maréchaussée) numbers about 20 officers and 1,000 men. There are about 980 appointed and paid by the Government—field-constables, divided into 11 brigades. Besides each commune has its own field-constables and police force.

Pauperism.

The relief of the poor is largely effected by the religious societies and organised private charity. The State does not interfere, except when relief is to be obtained from private charity; in that case the pauper must be supported by the commune where he is living. There is no poor law in the Netherlands. Mendicity and vagabondage are treated as crimes, and person so convicted can be placed in a State-work establishment. Workhouses for the poor are found in very few communes.

The number of poor relieved, temporarily = continuously, during the year 1881, 826; in asylums, 41,438; insane in hospitals, 10,152.

Finance.

The revenue and expenditure in five years were (12 guilders = £1):—

REVENUE.

Year	Ordinary	Extraord. (loans, &c.)	Total
	Guilders	Guilders	Guilders
1907	163,011,000	519,683	364,530,683
1908	152,492,195	998,736	153,490,931
1909	148,179,055	2,123,000	150,302,055
1910	196,630,497	1,461,827	198,092,324
1911	203,312,672	1,019,451	204,332,123

EXPENDITURE.

Year	Defence	Debt	Public Works	General	Total
	Guilders	Guilders	Guilders	Guilders	Guilders
1907	62,556,836	86,067,367	16,694,786	90,489,521	155,818,510
1908	40,301,520	86,003,151	13,650,431	95,089,242	135,044,344
1909	40,737,505	10,358,229	13,009,567	104,068,816	168,173,117
1910	47,571,732	86,574,067	13,002,779	100,712,514	247,861,092
1911	49,860,705	36,510,622	13,644,026	119,134,410	219,150,463

Budget estimates for the years 1912 and 1913, were as follows:

Branches of Expenditure	1912	1913	Sources of Revenue	1912	1913
	Guilders	Guilders		Guilders	Guilders
Civil list	641,000	641,000	Direct taxes.—		
Legislative body and Royal cabinet	768,008	768,611	Land tax	15,070,000	15,880,000
Department of Foreign Affairs	1,304,646	1,876,666	Personal	12,185,000	12,646,000
Department of Justice	10,968,524	11,292,070	Tax on capital	10,160,000	10,890,000
Department of Interior	87,187,811	38,821,441	Tax on incomes from trades, professions, &c.	10,078,000	10,007,000
Department of Marine	20,864,610	20,120,704	Excise duties	60,680,000	60,260,000
Department of Finance	29,080,714	30,070,858	Indirect taxes	29,600,000	30,986,000
Department of War	30,299,056	22,368,973	Import duties	18,824,750	14,825,500
Department of Public Works	29,711,844	41,068,288	Tax on gold & silver	470,500	500,500
Department of Agriculture, etc.	10,876,419	11,092,064	Domains	1,852,000	1,471,000
Department of Colonies	2,712,867	4,668,585	Post office	16,688,000	17,635,000
Indigenous	50,000	50,000	Telegraph service	4,578,000	5,237,000
			State lottery	654,500	654,500
			Pilot dues	3,300,000	3,450,000
			Dues on mines	5,500	20,000
			State railways	4,188,140	4,188,140
			Part paid by the East India in the interest and sinking fund of public debt	2,800,000	2,800,000
			Share in the profits of the Bank of the Netherlands		2,405,000
			Receipts	12,890,825	15,907,510
Total expenditure	222,017,602	221,210,000	Total revenue	202,068,215	206,581,450
	(18,501,468) (18,501,468)			(16,880,018) (17,400,257)	

The amount of the chief taxes per ■■■ of the population was, in 1911, 26.21 guilders (2l. 3s. 8d.)

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There ■ a separate budget for the great colonial possessions in the ■■■ India, voted as such by the States-General. The financial estimates for the year 1913 are distributed between the colonies and the mother country in the following proportions:—

Expenditure on ■■■ colonies	Guilders
Home Government expenditure	237,881,821
	47,125,680

■■■ expenditure

Revenues in the mother country	32,218,650
" " colonies	232,000,656
Total revenue	254,219,306

In the budget for 1913 the national debt is given as follows:—

	Nominal Capital	Annual Interest
Funded Debt	Guilders	Guilders
2½ per cent debt	587,704,400	11,692,610
3 " " debt of 1896, 1898, 1899 and 1903	510,636,160	15,501,085
4½ " " debt of 1910	61,017,900	1,817,620
Total	1,159,358,460	22,011,321
Floating debt	—	400,000
Annuities	—	65,100
Sinking fund	—	1,128,000
Total debt	1,159,358,460	22,011,321
	(96,314,871 l.)	(8,166,860 l.)

For 1912 the interest of the funded debt ■■ 32,214,450 guilders, and the sinking fund 5,381,000 guilders.

During the years 1850-1912, 359,775,427 guilders have been devoted to the redemption of the public debt. The total debt (1912) amounts to 1,168,237,708 gld. or 16l. 4s. per head, and the annual charge ■ 32,214,454 ■ 8s. 11d. per head.

The rateable annual value of buildings ■■ given at 187,172,851 guilders in 1911, and of land, 97,301,505 guilders.

The various provinces and communes have their ■■ separate budgets; the provincial expenditure for 1909 ■■ 10,642,566 guilders; the ■■ 11,417,927 guilders; the communal expenses in ■■ amounted to 175,609,000 guilders, whereof 41,877,000 guilders for debt. The communal ■■ were, in the ■■ year, 181,553,000 guilders.

Defence.

I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on ■■ by Germany. On the former side the country ■ quite level, on the latter ■■ hilly; ■■ land frontier is open ■■ round. The frontiers ■■ by ■■ fortresses. The scheme of defence adopted in 1874 contemplates concentration of the defensive ■■ ■■ restricted area, known ■■ "Holland Fortress." This comprises ■■ provinces of North ■■ South Holland, ■■ parts of Zeeland ■■ Utrecht. Two-thirds of ■■ area is

surrounded by the ■■■■. On the ■■■■ side, to the ■■■■ and South, ■■■■ lines ■■■■ ■■■■ less permanent works, which ■■■■ be rendered very difficult of attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to ■■■■ Zuydersee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam ■■■■ Rotterdam ship canals ■■■■ defended by powerful forts. The citadel of the whole ■■■■ Amsterdam, which ■■■■ well fortified ■■■■ also inundations would almost preclude a successful attack. The coast defences are in good order and ■■■■ to be further strengthened, but the defences on the land ■■■■ have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress ■■■■ the works ■■■■ the Western Schelde. These have hitherto been unimportant, but it ■■■■ now proposed to augment them by entirely ■■■■ works at Flushing, apparently with the idea of closing the Schelde, which has long been regarded ■■■■ practically ■■■■ neutral river.

II. ARMY

According to an Act of 1912, ■■■■ the army is partly voluntary and partly compulsory, the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen is liable to personal service ■■■■ the army (or navy) from the age of 19. Actual service in the ranks ■■■■ determined by lot, but substitution is not permitted. The maximum strength of the annual contingent is fixed at 23,000 (including 600 for the sea service).

The engagement of voluntarily enlisted ■■■■ is for 10 years, of which only 2 or 3 years (according to the ■■■■ of the service) are with the colours, but many do engage to become ■■■■ commissioned officers. The conscripted militiamen belong to the active army for 6 years for the unmounted corps, and 8 years for the mounted corps (see ■■■■ 5 years). The full training time is 8½ months in the infantry, engineers, and garrison artillery (under certain circumstances 6½ months), and ■■■■ months in the cavalry, horse and field artillery. A certain proportion of the full course ■■■■ of the infantry and garrison artillery (between 3,800 and 4,500 men, designed by lot) are retained for an additional 4½ months. The full course men are called up ■■■■ two batches, half in January (March), half ■■■■ October.

With regard to further training, men belonging to mounted corps are liable to be called out once in their army service for ■■■■ weeks, the others once for ■■■■ and the second time for 3 weeks.

After having fulfilled their active service the militiamen pass to the 'landweer' for ■■■■ years, they can be called out twice ■■■■ then 7 years, but for ■■■■ days only on each ■■■■ of mounted corps and ■■■■ the navy are excused from landweer service.

The landweer forces ■■■■ organised ■■■■ units corresponding to those of the first line, except that there ■■■■ no mounted troops. Cadres ■■■■ maintained ■■■■ time of peace for the landweer formations.

The field army consists of ■■■■ divisions and ■■■■ independent cavalry brigade. A division contains ■■■■ regiments (15 battalions), ■■■■ artillery regiment (6 batteries, 76 guns), a squadron of hussars, ■■■■ company of cyclists, 8 machine guns, and a company of engineers. The total strength of ■■■■ division ■■■■ the field, with staff, would ■■■■ about 19,000 officers ■■■■ ■■■■ cavalry brigade ■■■■ regiments, each of ■■■■ squadrons and two batteries ■■■■ artillery. There ■■■■ ■■■■ fortress artillery companies. The landweer troops, with ■■■■ fortress artillery of the active army, would ■■■■ the fortresses.

The peace strength of the [redacted] army, that is the permanent [redacted] all the [redacted] of the [redacted] line, [redacted] in 1912 [redacted] 1,658 officers, and 22,586 non-commissioned officers and men. The total strength of the [redacted] army is approximately 125,000 men, with [redacted] guns. Military expenditure budgeted in 1912, 2,522,918; Colonial military budget, 8,088,888. It is proposed to spend about two millions sterling on the [redacted] defences, including armament. [redacted] reorganisation of the army is pending.

The Netherlands infantry is [redacted] with the Mannlicher magazine rifle, model [redacted]. Cavalry and engineers carry the Mannlicher [redacted]. The [redacted] artillery, including the horse batteries, has lately been re armed with a shielded Q [redacted] Krupp gun of 7.5 cm.

III. NAVY.

The Navy is maintained for a double purpose—viz the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of this division of it known as the Indian Marine.

Following is a list of the fighting ships of the Dutch Navy

Name	Displacement Tons	Armour water line	Max Armour on gun	Principal Armament	Torpedo Tubes	Indicated Horse power	Normal Speed Knots	Completed
BATTLESHIPS								
Piet Hein	3,520	6	10½	33 in., 16 in.	2	4,800	16	95
Evertsen								
Kortenaar								
Hertog Hendrik								
Koningin Regentes	5,000	6	10	29.6 in., 4.6 in.	2	7,000	17	95

Tromp								
Heemskerk								
Zeven Provinciën	1,500	4	—	21.1 in., 4.6 in.	—	7,500	16	—
New ship	7,000	8	6	41.1 in.	3	10,000	—	1912
CRUISERS								
Holland	3,900	deck	—	26 in.; 4.7 in.	2	(10,500 to 12,000)	20	95
Friesland								
Zeeland								
Gelderland								
Nordbrabant	4,020	deck	—	—	2	—	—	—

[redacted] are also a small [redacted] monitor, *Reinier Claeszen*, a number of gun boats, 47 torpedo boats, and 6 submarines. Light destroyers [redacted] and [redacted] in 1911-12. Four destroyers building, [redacted] 3 gunboats.

The new programme contemplated four large battleships, besides lesser [redacted]

The navy was officered in 1911 by [redacted] admirals, [redacted] rear-admirals ('schouten-bijnacht'), 29 captains, [redacted] commanders, and about [redacted] lieutenants and midshipmen, besides engineers, surgeons, &c., and about 8,500 [redacted]. The [redacted] infantry consists of about 40 officers, and about 2,600 non-commissioned [redacted] privates. Both seamen [redacted] recruited by enlistment, conscription being allowed, but not actually in force.

Production and Industry

I. AGRICULTURE.

The surface of the Netherlands divided in 1911 as follows (in hectares, 1 hectare=2.47 acres) —Uncultivated land (heath), 533,807, water and morass, 123,853, dykes and roads, 53,050; untaxed land, 78,064, building land, houses, &c., 47,756. Total, 836,530 ha. Cultivated land arable land, 872,171, pasture, 1,213,073 gardens and orchards, 78,097; forest, 260,928. Total, 2,424,264 ha.

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland, small estates in North Brabant, Guelders, Limburg, and Overijssel.

The number of estates in 1910 —5 hectares and less, 109,605, from 5 to 10 hectares, 41,439, from 10 to 20 hectares, 40,821, from 20 to 50 hectares, 23,797, from 50 to 100 hectares, 3,278, above 100 hectares, 216, 99 per cent of all estates being held by farmers, and 50.8 per cent by the State. In 1899 the percentage was 43.6 and 56.4.

The area under the principal crops, in acres, is as follows —

Products	1910	1911	1912	Products	1910	1911	1912
	Acres	Acres	Acres		Acres	Acres	Acres
Winter wheat	120 79	133 48	133 06	Potatoes	152	170	171
Summer wheat	1 167	10 112	1 140	Flax	1 570	39 27	37 15

Fruits	1,100,000	4,168	1,646,000	2,546,000

II MINING AND MANUFACTURES

A few coal mines are found in the province of Limburg; most of them belong to the State. The quantity of coal extracted in 1911 was 1,476,580 metric tons, valued at 9,438,000 gl; clear revenue of the State mines, 218,437 gl.

There are official returns of all the manufacturing industries. According to the last reports there were in 1911: 434 distilleries, 11 sugar refineries, 17 beet sugar refineries, 34 salt works, 437 breweries and 69 vinegar manufacturing factories.

III. FISHERIES

In 1910, 5,370 vessels of all kinds were engaged in the fisheries, with numbering about 20,461. The produce of the herring fishery in the North Sea was valued at 11,042,693 guilders in 1911. The quantity of oysters produced in 1911 amounted to 3,256,691 kilos.

Commerce.

The Netherlands is a free trading country. A few duties are levied but they have only a fiscal, not a protectionist character.

Treaties of commerce and navigation between the Netherlands and Great Britain (some of them having special reference to the colonies) were signed in 1824, 1837, 1851, 1856, and 1899, providing, amongst other matters, the 'most favoured nation' treatment, terminable on a year's notice.

No official returns are kept of the value of the general trade, but only of the weight of the goods. In 1872 the total imports amounted to 6,451 million kilogrammes, and the exports at 2,956 millions; while in 1911 the former was 50,865 million kilogrammes, and the latter 33,372 millions, exclusive of goods in transit.

The following are the estimates of the imports for home consumption and the exports of home produce for five years:—

Year	Imports	Exports	Transit trade
	Guilders	Guilders	Kilogrammes
1907	2,692,000,000	2,212,000,000	9,605,000,000
1908	2,824,000,000	2,181,000,000	9,278,000,000
1909	3,137,000,000	2,455,000,000	10,773,000,000
1910	3,260,000,000	2,632,900,000	12,684,000,000
1911	3,333,000,000	2,732,000,000	13,694,000,000

The values of the leading articles of import and export in the first two years (in thousands of guilders, 12 guilders = £) —

	Imports		Exports	
	1910	1911	1910	1911

			Russia	1.4	0

In the Netherlands the statistics give sometimes the real, sometimes the official, value of goods. Goods liable to an ad valorem import duty are valued at the real value, the importer has to pay the duty according to the current prices of the day, in case of disagreement, the fiscal authorities acquire the goods at the value of 10, 11, or 12 per cent. To other goods the official value, unchanged since 1862, is applied. Every declaration of imports and exports is, in principle, verified. Returns are only those relating to goods subject to duty are returned. Returns are out in net weight (with deduction of an official tare) in number or value according to the nature of each case. When goods are imported or exported by river or by sea, they are generally regarded as the country of destination, thus imports really from France are attributed to Belgium. When transport is by sea, generally the real country of origin is given, thus Spanish wines are set down as from Spain, unless they have been imported first into some other country, in which case they are then the country of origin.

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years :—

Imports into U.K. from Netherlands			Exports of produce and manufactures of U.K. to Netherlands	1910	1911
Peas	115,912	156,480	Cottons	1,117,068	1,170,562
Rice	45,946	461,709	Cotton yarn	1,788,981	1,978,784
	259,770	282,605	Coal	1,161,268	1,054,127
	280,085	194,797	Iron	1,251,130	1,414,149
Cheese	567	525,097	Machinery	479,225	589,770
Butter	813,116	589,479	Ships, &c.	231,957	266,819
Margarine	278,2	2,329,66			
Paper	1,016,811	1,044,040			
	2,043,724	2,068,534			
Hides	151,130	112,917			
Oil seed	721,216	123,521			
Condensed milk		1,058			

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years :—

	1908	1909	1910	1911	1912
Imports from Netherlands to U.K.	11,119	11,530	15,527	18,166	21,440
Exports to Netherlands from U.K.	11,417	11,716	12,195	13,117	14,807

Shipping and Navigation.

The number of vessels belonging to the mercantile navy at the end of 1911 :—

Sailing vessels 428, of 42,480 English tons, steamers 347, of 524,274 English tons.

The following table gives the number and tonnage (in English measurement) of vessels which entered and cleared the ports of the Netherlands :—

Year	Entered		In		Total	
	With Cargo		In		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1907	13,692	13,408	712	656,124	14,404	13,819,806
1908	12,968	13,671,450	413			114,968
1909	13,243	16,899,086	1,191	582,080	14,434	17,928,146
1910	13,766	15,427,926	1,115		11,564	14,070,818
1911	13,849	14,781,978	1,786	718,496	15,635	15,000,474
Year	Cleared		In		Total	
	With Cargo		In		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1907	8,928	7,183,014	5,577	1,059,845	14,505	12,842,403
1908	8,805	7,148,306	4,966	5,706,396	13,771	12,939,702
1909	9,849	7,629,784	5,028	6,062,458	14,877	13,890,212
1910	10,000	9,876,064	5,282	6,371,114	15,282	16,228,068
1911		9,391,044	5,313	6,314,398	15,313	15,405,872

Of the total number in 1911, 4,523 Dutch vessels entered with a tonnage of 4,082,328 and 11,105 foreign vessels with a tonnage of 11,416,500, 4,702 Dutch vessels cleared, with a tonnage of 4,127,994, and 11,208 foreign vessels with a tonnage of 11,277,378.

The vessels with cargoes which entered at the chief ports are as follows:—

Port	Entered					
	1910			1911		
	Number	Tons	per cent	Number	Tons	per cent
Rotterdam	7,713	4,914,426	11.4	401	10,251,808	71.9
Amsterdam	1,963	1,901,514	14.6	1,997	1,942,752	13.9
Flushing	793	716,056	7.7	791	794,792	6.1
	Cleared					
	1910			1911		
	Number	Tons	per cent	Number	Tons	per cent
Rotterdam	5,867	5,909,671	59.9	854	7,653,980	65.7
Amsterdam	1,476	1,424,650	14.4	1,447	1,468,741	12.1
Flushing	501	761,605	7.2	403	769,712	6.2

A great number of Dutch vessels is engaged in the carrying trade between foreign ports. The coasting trade is of no importance.

Internal Communications.

I CANALS AND RAILWAYS

The total extent of the canals is 1879, 1,907 miles; of roads, 2,943 miles.

In 1910 the total length of the principal tramway lines was 1,477 miles, 169,345,000 passengers were carried, and 1,420,792,000 kilogrammes of goods. Their revenue amounts to 18,900,000 guilders.

In 1911 the railways had a length of 1,984 miles. The breadth of the railway gauge is 1 metre, 4 ft 11 in.

The results of the railway companies in the last five years were as follows:—

Year	Passengers carried	Goods carried (metric tons)	Revenue (guilders)	Expenditure (guilders)
1907	40,972,000	15,208,000	54,106,000	47,938,000
1908	43,006,000	15,479,000	55,940,000	49,289,000
1909	43,156,000	15,494,000	57,539,000	50,804,000
1910	46,221,000	16,051,000	60,242,000	51,711,000
1911	44,874,000	17,739,000	64,679,000	54,418,000

All railway companies are private; there is a State railway company, only because the road is owned by the State.

II POST AND TELEGRAPHY

The postal service was as follows in the years:—

	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Order.
1910					
Internal .	112,293,000	89,525,904	240,770,000	5,802,658	500,966
Foreign .	51,846,000	16,568,451	28,957,000	1,619,810	118,385
1911					
Internal .	115,083,000	90,540,632	257,608,546	6,053,689	497,742
Foreign .	50,205,000	17,039,307	27,788,609	1,702,987	121,182

The average number of letters and post-cards per inhabitant was 45.8 in 1911.

The receipts of the Post Office in 1911 were 16,685,000 guilders, the expenditure 14,013,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Dec. 31, 1911, was 4,729 miles, the length of wires 23,534 miles. The number of State offices was, on December 31, 1911, 1,072. The number of paid messages by State lines in 1911 was 8,404,000. The receipts of the State amounted in the same year to 2,582,000 guilders, and the ordinary expenses to 4,365,000 guilders.

In 1911 the interurban telephone system had 1,909 miles of line and 45,654 miles of wire, and is administered by the State; 4,901,342 interurban and 633,578 international conversations were held. The receipts were in the same year for interurban and international intercourse 2,074,000 guilders; the total expenses 1,768,000 guilders.

Money and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard; but a bill which passed the States-General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

The total circulation, except the metal stock of the Bank, is valued as follows in thousands of guilders:—

Jan. 1	Silver, &c.	Gold	Paper money	Total	Gold, or covered by gold at the Bank was in
1907	66,529	17,551	274,448	358,628	66,427
1908	120,852	47,807	282,468	451,127	91,790
1909	108,587	47,807	287,918	444,312	101,052
1910	104,225	47,807	280,553	432,585	120,980
1911	87,162	47,807	283,270	418,239	124,771

Value of money minted during the following years (in thousands of guilders):—

	Gold	Silver	Copper Nickel	For the Colonies		Total number of pieces
1881-90	4,080	1,433	840	2,660	8,955	111,768,000
1891-1900	4,540	12,285	470	7,496	24,791	340,574,090
1901-10	990	34,990	1,305	15,035	52,097	404,679,000
1911	—	3,700	25	2,255	5,980	47,980,000
1910	—	3,445	—	3,000	6,445	29,130,000
1911	7,750	2,800	25	2,000	12,575	27,375,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right was granted in 1669 for 20 years, in 1888 prolonged for 20 years, and prolonged again for the same term in 1903, with some alterations in the conditions; e.g. all the paper money is to be issued by the Bank. The Bank does the same business as other banks only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Year	Notes in Circulation	Total Exchanges March 31	Amount of Gold in July	Stock of Silver in July
	1,000 guilders	1,000 guilders	1,000 guilders	1,000 guilders
1908	265,947,760	658,854,720	92,500	50,500
1909	273,578,470	680,060,202	121,420	42,270
1910	280,552,730	706,277,050	109,770	27,080
1911	283,270,075	752,832,075	139,690	22,240
1912	298,964,980	783,720,425	145,070	11,880

The capital amounts to 20,000,000 guilders, the reserve fund to 5,500,000 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. It receives 3½ per cent. of the clear gains; the remainder is divided between the State and the Bank in proportion of 2 : 1.

There are many savings-banks, all private. Besides these there is a State postal savings-bank, established in 1881. The following table gives some particulars of both :—

Year	Number of Savings Banks	Amount deposited (in 1,000 guilders)	Amount withdrawn (in 1,000 guilders)	Total Deposits at end of year (in 1,000 guilders)	Number of Depositors at end of year	Amount per Depositor (in 1,000 guilders)
1907

The fund of the private savings banks amounted to 15,878,000 guilders, of the State P. S. B. 848,314 guilders in 1911.

Money, Weights, and Measures.

MONEY.

The standard coin is the 10-florin piece weighing 6.720 grammes, .900 fine, and thus containing 6.048 grammes of gold. The unit of the silver coinage is the gulden or florin, weighing 6.800 grammes, .835 fine and containing 5.655 grammes of silver.

The legal tender, the florin, issued before 1875.

The principal coins :—

The *guilder*, *guilder*, = *form* of 100 cents = 1 sh 8d | or 12 g = £1

The *ryksdaalder* = 2½ guilders

The gold piece of ten guilders and of five guilders

½ guilder, 1 guilder (*kwartje*), ½ guilder (*dubbeltje*)

Cent coins ■ of metal, 5 cents, of bronze, 1 cent, ½ cent, and ¼ cents

WEIGHTS AND MEASURES

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands

Diplomatic and Consular Representatives

1 OF THE NETHERLANDS IN GREAT BRITAIN

Envoy and Minister — Baron Dr. A. W. P. G. Gericke ■ Heerwynen (on leave)

Councillor of Legation — Jonkheer A. ■ der Goea (Charge d'affaires)

Chancellor — H. N. Brouwer

Agricultural Commissioner — Dr. J. J. L. van Ryn

Consul-General ■ London — H. ■ ■ Maas, appointed 1897

Netherlands Consular representatives ■ at the following places ■ the United Kingdom —

Aberdeen	Cowes	Hull	Newcastle
Alloa	Dartmouth	Inverigordon	Newport
Belfast	Dover	Jersey	Plymouth
Blyth	Dublin	Leith	Portsmouth
Borrowstones	Dundee	Leith	(Southampton)
Birmingham	Falmouth	Lerwick	Ramsgate
Bradford	Glasgow	Limerick	Sally Isles
Bristol	Gloucester	Liverpool	Sheffield
Burntisland	Goole	London	Stockton
Cardiff	Grimsby	Londonderry	Sunderland
Carlisle	Grangemouth	Lowestoft	Swansea
Charlestown	Queenssey	Manchester	Weymouth.
Chatham.	Hartlepool	Nethil	Yarmouth
Cork	Harwich	Middlebrough	

2 OF GREAT BRITAIN IN THE NETHERLANDS

Envoy and Minister — Hon. Sir Alan Johnstone G. C. V. O., accredited December, 1910

Secretary — Count C. ■ Bentinck

Naval Attaché — Captain H. D. ■ Watson

Military Attaché — Lieut. Col. Hon. ■ T. M. Bridges

British Consul at Amsterdam — W. A. Churchill

British Consular representatives are placed ■ the following places in the Netherlands —

Amsterdam (C.)	The Hague	Rotterdam (C.)
Brouwershaven	Harlingen	Terneuzen
Dordrecht	Helder	Tiel
Flushing	Hellvoetsluis.	Utrecht
Groningen	Maasvluis	Ymuiden

COLONIAL

The colonial possessions of the Netherlands, situated ■ East Indies and the West Indies, embrace an area of about 783,000 English square miles. The total population, according ■ the ■ returns, ■ approximately, 38,000,000, ■ about ■ times as large as that of the mother-country.

EAST INDIES

The Dutch possessions in Asia, forming the territory of Dutch East India (Nederlandsch Oost Indië), are situated between 6° N and 11° S latitude, and between 95° and 141° E longitude.

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Dutch possessions were governed by the mother country.

Government and Constitution

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government, (2) Vassal lands, (3) Confederated lands.

With regard to administration, the Dutch possessions in the Indies are divided into residencies, divisions, regencies, districts, and *deossas* (villages). They are also very often divided into (1) Java and Madura, (2) the Outposts—Sumatra, Borneo, Riau Lingga Archipelago, Banca, Billiton, Celebes, Molucca Archipelago, the small Sund Islands, and a part of New Guinea.

Java, the most important of the colonial possessions of the Netherlands, was formerly administered, politically and socially on a system established by General Johannes Graaf Van den Bosch in 1832 and known as the 'culture system'. It is based in principle on the officially superintended labour of the natives, directed so as to produce not only a sufficiency of food for themselves, but a large quantity of colonial produce best suited for the European market. At present the labour of the natives is only required for the produce of coffee which is sold by the Government partly in the colonies, but mostly in the Netherlands.

The whole of Java—including the neighbouring island of Madura—is divided into seventeen residencies, each governed by a Resident, assisted by several Assistant Residents and a number of subordinate officials called *Contrôleurs*. The Resident and his assistants exercise almost absolute control over the province in their charge, not, however, directly, but by means of a vast hierarchy of native officials. The native officials receive either salaries or percentages on the amount of the taxes gathered from the natives. In the 'Outposts' the 'culture system' has not been introduced, except in the province of Sumatra, west coast, and in the Residency of Menado (island of Celebes), where also the labour of the natives is required for the produce of coffee. These Outposts are administered by functionaries with the titles of 'Governor', 'Resident', 'Assistant Resident', 'Contrôleur'.

The superior administration and executive authority in Dutch India rests in the hands of a Governor-General. He is assisted by a Council of five members, partly of a legislative, partly of an advisory character. The members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen.

Governor-General—A. W. van Idenburg, appointed August 20, 1901.

The Governor-General represents not only the executive power of government, but he has a right of passing laws and regulations for the administration of the colony, so far as this power is reserved to the legislature of the mother country. However, he is bound to adhere to the constitutional principles on which the Dutch Indies are governed, and which are laid down in the 'Regulations for the Government of Netherlands India,' passed by the King and States-General of the mother country in 1854, and altered in 1860.

Area and Population.

	Area : English square miles	Population 31 Dec. 1906

¹ Tolerably accurate.² Approximately.³ Mere conjecture.⁴ New Guinea belongs to the residency of Ternate, Molucca Islands.⁵ Approximate total. The population of several unexplored countries is not included. In the official reports population is given every five years.

The total number of Europeans and persons assimilated to them was, in 1905, 80,910; of these 38,812 males and 34,982 females were Dutch, of whom 32,026 males and 32,288 females were born in the East Indies; of the remainder, 1,406 were German, 1,170 French, 312 English, 197 Swiss, 312 Belgians; the remainder being mostly Austrians and Armenians. Of the remaining population about 583,000 were Chinese, 29,000 Arabs, and 23,000 other Orientals, and about 37,000,000 natives.

Marriages, births, and deaths among Europeans and persons assimilated to them :—

	Marriages		
1905 { Java and Madura	753	2,131	1,363
Outposts	141	594	843

The population of the four principal of Java —

1905 ¹	Europeans				Other Orientals	
Batavia	8,777	99,320	28,150	2,058	246	188,551
Samarang	5,162	76,413	13,636		787	98,600
Sourabaya	8,063	124,478	14,843	2,482	387	150,198
Soerakarta	1,572	109,524	6,532	337		118,378

¹ V. later statistics given.

The whole population of Java is legally divided into Europeans and persons assimilated with them, and natives and persons assimilated with these. The former are generally living under the law of the inhabitants of the mother country, while the jurisdiction of the latter the Indian customs and institutions are considered. The Governor General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Religion

Entire liberty is granted to all religious confessions. The Reformed Church counted in 1911, 41 ministers and 26 assistants, the Roman Catholic 28 curates and 13 priests, not salaried out of the public funds. The number of Christians among the natives and foreign Orientals was —

In Java and Madura in 1873 5,673, and in 1905 ± 26,000
the Outposts „ „ 148,672 „ „ ± 434,000

In 1910, about 250 missionaries of various societies were at work.

Instruction

For the education of Europeans and persons assimilated with them there were in 1910 10 public middle class schools with 2,537 pupils and 208 teachers. The cost to the Government in 1910 was 1,155,912 guilders.

In 1910 there were for Europeans 178 mixed public elementary schools, and for girls only, with private schools, a total of 211. The public schools had a teaching staff of 832, and an attendance of 24,514 pupils (6,988 natives), and the 34 private schools a teaching staff of 221, and an attendance of 5,001 pupils. The cost of the public elementary schools was, in 1910, 8,202,700 guilders. There are two normal schools for Europeans.

The following statement relates to schools for natives —

In 1910 Dutch India had 8 normal schools, with 42 teachers and 538 pupils. The elementary schools for natives were, for Java and Madura, in 1910, 111 Government schools with 126,550 pupils, and 111 private schools with 58,668 pupils. In the Outposts in 1909, 111 Government schools with 64,231 pupils, and 1,486 private schools with 83,871 pupils. Besides, there are 7 schools for sons of native chiefs with 541 pupils, and 1 trades schools with 277 pupils.

In 1911 the Government spent 5,393,417 guilders for the education of natives.

Justice

The administration of justice for Europeans is entrusted to European judges, while for the natives their own have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at

Batavia, Samarang, Soerabaya, Padang, and Makassar—Resident and Regent courts, courts of circuit, district courts, courts of priests

The contributes about 150,000 guilders yearly to Protestant and Catholic orphan houses

Finance.

The local is derived from land, taxes on houses and estates, from licences, customs duties, personal imposts, and a number of indirect taxes, from the Government monopolies of salt and opium, railways, and from the sale of Government products

¹ Opium and salt.

² Coffee, cinchona, tin, coal, rubber, etc

The budget estimates for 1913 :—

	Guilders	
Home government expenditure	47,125,689	
Expenditure in the Colonies	237,331,325	
		284,457,014
Revenues in the mother country	32,218,550	
„ „ Colonies	222,600,653	
		254,819,203
Deficit		29,637,806

The of revenue stated as follows (in guilders):

Receipts the Netherlands from sales of Government coffee, 1,323,623, cinchona, 237,600, rubber, 1,242,500, tin, 25,834,427; railways, 316,000; share of the State the profits of the Bilton Company, 1,000,000, various, 1,714,400. Receipts in from sales of opium 29,828,300; import, export, and excise duties, 33,261,000; land revenues, 22,178,500; of coffee, 865,600; salt, 14,320,000; forests, 7,408,000; railways, 31,254,000, trades, 6,200,000; coal, 4,602,000; income-tax, 8,200,000; from other sources, 11,111,111.

Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army consists of about one-third Europeans to two-thirds Natives, and comprises 29 battalions of infantry and 1 depot battalions, 4 squadrons, 1 field batteries, 1 mountain batteries, 1 fortress companies of artillery, and 5 engineer companies. In most battalions there are 3 companies of Natives and 1 of Europeans. In the Native companies, the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European gunners and Native drivers. The Europeans are recruited by volunteers from the home army. The strength of the colonial army in 1912 was 1,315 Europeans and 31,898 men, of whom 10,133 were Europeans. There is also a small colonial force of both Europeans and natives.

The expenditure for defence in 1912 amounted to 4,563,854*l.*, of which about 1,000,000*l.* was disbursed in Holland.

Production and Industry.

The greater part of the soil of Java is claimed as Government property, and it is principally in the residences in the western part of Java that there are private estates, chiefly owned by Europeans and by Chinese. The bulk of the people are agricultural labourers. Formerly the Government and private landowners could enforce one day's gratuitous work out of seven, or more, from all the labourers on their estates; in 1910 the greater part of these enforced services for the Government was abolished, in return for the payment of 1*g* guilders per head yearly.

Area in Java and Madura cultivated by natives, 1910, 8,226,587 acres. The various cultures are as follows, in acres, in 1910: Rice, 5,729,962; Maize, Arachis, Cotton, and various plants, 5,624,396; Sugar-cane, 374,248; Tobacco, 378,681; Indigo, 31,395; Total, 12,133,682.

Owing to the 'agrarian law' (1870), which has afforded opportunity to private energy for obtaining waste lands on hereditary lease (emphyteusis) for seventy-five years, private agriculture has greatly increased, not only in Java but in the Outposts. In 1910 were ceded as lands in Java by the Government to Dutch Companies and Europeans, 1,096,320 acres; to Chinese, 58,455 acres; to natives, 962 acres—total, 1,155,737 acres. In 1910, the lands, the property of Europeans, to an extent of about 2,425,860 acres, of Chinese, about 306,160 acres, and of other foreign Orientals, about 21,969 acres.

In 1910 the number of sugar estates was 187. The yield of sugar in 1910 was as follows, in lbs.: Lands hired from natives, 2,126,877,600; Lands on Emphyteusis from Government and native princes, 402,928,533; Private properties, 49,082,666; Total, 2,578,838,799.

The production of coffee in Dutch India was, in lbs.:

Year	Government Lands	Free Cultivation by natives	Lands on Emphyteusis and on Lease	Private Lands	Total
1909	10,978,455	15,451,329	30,294,708	5,180,571	61,865,063
1910	4,338,938	15,037,600	24,638,666	6,223,466	50,288,666
1911	4,275,600	10,655,200	26,430,666	6,807,788	47,669,199

The production of cinchona, in kilogrammes, in Java as follows —

Year	Government		Lands on Emphyteusis		Private	
	Plantations	Production	Plantations	Production	Plantations	Production
1905	7	920,087	50	6,675,966	6	484,118
1906	7	883,905	57	6,901,234	6	564,414
1910	7	920,568	54	5,064,515	6	476,400

The production of tobacco, in kilogrammes, was as follows:—

Year	In Java		In Sumatra (Deli, etc.)	
	Plantations	Production	Plantations	Production
1908	130	30,514,487	116	23,341,833
1909	155	26,433,908	115	21,821,851
1910	164	33,974,768	116	19,480,771

The production of tea in Java, in kilogrammes, was as follows: 1905, 11,224,026; 1906, 11,961,710; 1907, 11,494,686; 1908, 15,140,694; 1909, 12,726,778; 1910, 15,056,088.

The production of cacao in Java was (in kilogrammes): 1906, 413,502; 1907, 1,437,560; 1908, 1,582,149; 1909, 2,060,611; 1910, 1,433,899; 1910, 1,180,549.

The tin mines of Basm are worked by the Government; those of Bilton and Rionw by private enterprise. Their total yield was, in tons: 1905-06, 12,508; 1906-07, 15,420; 1907-08, 15,507; 1908-09, 16,382; 1909-10, 20,072; 1910-11, 20,884.

The yield of the principal coal mines in Java, Sumatra, Borneo was, in tons: 1905, 227,106; 1906, 356,158; 1907, 416,244; 1908, 427,752; 1909, 408,672; 1910, 442,947.

The production of the principal mineral oil enterprises was in thousands of litres: 1907, 1,328,892; 1908, 1,209,114; 1909, 1,410,086; 1910, 1,491,882.

Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff of 6 per cent. on certain goods; on certain articles there is a small export duty, including tobacco.

Imports and exports in guilders (12 guilders = £1) —

Year	Imports				Exports			
	Government		Total	Merchandise	Private		Grand Total	
	Merchandise	Spices			Merchandise	Spices		
1905	7,634,706	7,000,000	14,634,706	221,341,572	11,904,421	232,645,993	354,270,702	
1906	7,607,849	5,850,000	13,457,849	243,544,983	20,489,927	264,044,910	280,561,530	
1907	6,718,507	6,600,000	13,318,507	260,287,611	9,190,140	269,477,751	281,086,253	
1910	10,014,468	2,640,000	12,654,468	315,331,650	17,308,063	332,639,713	345,294,172	
1907	17,007,511	—	17,007,511	346,676,503	674,131	347,350,634	364,558,140	
1908	16,850,649	—	16,850,649	452,823,511	1,034,023	453,857,534	470,774,111	
1909	16,754,094	—	16,754,094	437,291,511	837,291	438,128,802	455,094,174	
1910	20,461,209	—	20,461,209	422,064,962	1,051,111	423,116,073	452,507,891	

The principal exports are sugar, coffee, tea, rice, indigo, cinchona, tobacco,

copiah, and tin. With the exception of rice, about one half of which goes to Borneo and China, nearly four fifths of these exports go to the Netherlands.

Shipping Communications

Year		Entered		Whereof, from England	
		Number	Tons	Number	Tons
1910	Steamers	6,486	4,164,102	—	1,556,892
	Sailing vessels	—	50,976	8	9,912

At the end of 1910 the total length of railways (State and private) was about 1,586 miles (1,386 in Java and — in Sumatra), the gross receipts (1910) 26,453,000 guilders, working expenses, 15,688,000 guilders, — of passengers, 92,049,786.

There are about 849 post offices, internal letters carried in 1910, 19,686,654, while there — 14,587,558 newspapers, &c., for the interior, 2,916,118 letters were carried for foreign postal intercourse.

Telegraph lines in 1910, 10,635 miles, 564 offices, messages, 1,250,504.

Money Credit

The 'Java Bank,' established in 1828, has a capital of 6,000,000 guilders, and a reserve of about 1,800,000 guilders. The Government has a control over the administration. Two fifths of the amount of the notes assigned, and credits must be covered by specie or bullion. In March, 1911, the value of the notes in circulation was 90,892,000 guilders, and of the bank operations 68,868,000. There are some other Dutch banks, besides branches of British banks.

In the savings banks, including the Postal savings bank, there were in 1910, 89,600 depositors, with a deposited amount of 14,082,450 guilders.

Money, Weights, and Measures

WEIGHTS MEASURES

The <i>Amsterdamsch Pond</i>	= 1 lb avoirdupois
„ <i>Pikol</i>	= 133½ „ „
„ <i>Oatty</i>	= 1½ „ „
„ <i>Tjongkal</i>	= 4 yards

The only legal coins, as well as the weights and measures, of Dutch India are those of the Netherlands.

Consular Representatives

The Dutch possessions in the West Indies are (a) *Surinam*, — *Dutch Guiana*, (b) — colony *Curaçao*.

Surinam or Guiana.

Dutch Guiana = Surinam is situated on the north coast of S America between 2 and 6° N latitude, and 53° 50' and 58° 20' longitude, and bounded the north by the Atlantic Ocean, east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantyn, which separates it from British Guiana, and on the south by inaccessible forests and to the Turinchumee Mountains

At the peace of Breda, 1667, between England and the United Netherlands, Surinam was assigned to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice the power of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Beiluce, Demerara, Essequibo, and the Cape of Good Hope.

The superior administration and executive authority is in the hands of a governor (W. D. H. Boon van Asbeck), assisted by a council consisting of the governor as president, a vice president and three members, all nominated by the Queen. The Colonial States form the representative body of the colony. The members are chosen for 6 years by electors in proportion of 1 in 200 electors.

Dutch Guiana is divided into sixteen districts and numerous communes.

Area, 46,060 English square miles; population (January 1, 1911) 86,248, exclusive of the negroes living in the forests. Capital, Paramaribo, 85,846 inhabitants.

There is entire religious liberty. At the end of 1911 there were Reformed and Lutheran, 9,520; Moravian Brethren, 26,238; Roman Catholic, 17,329; Jews, 933; Mohammedans, 10,584; Hindus, 17,018, &c.

There were, in 1910, 25 public schools with 2,889 pupils, and private schools with 6,016 pupils. There are Moravian and Roman Catholic normal schools and a central school.

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts and two circuit courts.

The relations of Government to pauperism are limited to subventions to orphan houses and other religious or philanthropical institutions.

The local revenue is derived from import, export, and duties, taxes on houses and estates, personal imposts, and indirect taxes.

	Expenditure	Local Revenue	Subvention
1908	5,081,000	4,130,000	951,000
1909	5,148,000	4,380,000	818,000
1910	6,738,174	5,815,588	922,586
1911	7,308,191	5,489,141	819,050
1912	6,992,637	6,105,000	888,000

The estimates for 1913 are: Expenditure, 7,312,315 gl. Revenue, 6,474,962 gl. Subvention, 887,353 gl.

The Dutch forces in the West Indies consist of a civic guard of infantry, the latter containing, in 1910, 14 and 274 non-commissioned officers and men. There are a few guard ships, with some vessels of the royal navy.

In 1910 sugar was produced to the amount of 12,015,100 kilogrammes; cacao, 1,683,000 kilogrammes, bananas, 462,200 bunches; coffee, 1,683,000

kilogrammes; rice, 1,993,700 kilogrammes; maize, 1,323,300 kilogrammes; rum, 797,800 litres; and molasses, 164,100 litres.

In 1910 the export of gold, mostly alluvial, was 1,055,528 grammes, valued at 1,446,073 guilders. Several companies have been started for crushing operations.

In 1910 there entered 240 vessels of 210,998 tons, and cleared 111 ships of 215,391 tons. Imports and exports:—

Year	Imports	Exports
1907	1 901 605 guilders	5 886 667 guilders
1908	7 036 647	6 031,369
1909	7 215 492	6 569,470
1910	7 424 005	8 517,447

The communication between several districts of the colony is carried on by vessels and small steamers.

British Consul at Paramaribo and Cayenne—G. Hewitt

Vice Consul at Nickerie—Ch. Spence

Curaçao.

The colony of Curaçao consists of the following islands:—

	Square Miles	Population Dec 31, 1910
Curaçao	110	12,595
Bonaire	4	1,361
Aruba	19	9,417
St. Martin	17	2,871
St. Eustache	7	1,825
Saba	5	1,048
	401	54

1 Only the southern part belongs to the Netherlands; the northern to France.

There is a Governor, assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The different islands, except Curaçao, are under officials called 'gezaghelopers,' nominated by the Sovereign. In 1910 there were 45,578 Roman Catholics, 6,489 Protestants, 670 Jews. Schools in 1910 about 100 with about 5,621 pupils.

The revenue is derived from import, export, and excise duties, taxes on land, and some indirect taxes. In the Budget for 1913 the revenue is estimated at 677,752 guilders, and the expenditure at 1,017,901 guilders; the difference is supplied by the mother-country.

The militia (Schutterij) of the Isle of Curaçao consisted at the end of 1910 of 20 officers and 100 men; the garrison of 10 officers and 178 men. A vessel of the royal navy is always cruising and visiting the different islands. In Aruba gold and phosphate of lime are being worked under concession.

The imports of Curaçao in 1910 were valued at 3,762,310 guilders; the exports of Curaçao and the other islands at 1,716,886 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime.

There entered 240 ports of call in the islands in 1910, 3,478 vessels of 912,612 English tons.

British Consul at Curaçao—J. Janssen.

MISCELLANEOUS

(REPÚBLICA DE NICARAGUA.)

Constitution and Government.

THE Constitution of the Republic of Nicaragua is that which came into operation on March 1, 1912. Previous constitution was that of March 30, 1905. It vests the legislative power in a Congress of one House consisting of 36 members elected for 6 years by universal suffrage. The executive power is with a President appointed for 6 years.

President.—Senor Alofio Diaz (Inaugurated May 11, 1911. Term of office expires December 31, 1916.)

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments of Foreign Affairs and Public Instruction; Finance; Interior, Justice, and Police; War, and Marine; Public Works.

The Republic is divided into 13 departments and 11 comarcas, each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve forms a department named Zelaya. The Indians in this region long under the protection of Great Britain; but under the treaty of April 19, 1905 (ratified August 24, 1906), the treaty of 1860 was abrogated, and Great Britain agreed to recognise the absolute sovereignty of Nicaragua over the territory.

The judicial power is vested in a supreme Court of Justice, three chambers of second instance, and judges of inferior tribunals.

The active army consists of 4,000 men; in war it may rise to 40,000. Military service is obligatory between 17 and 55 years of age. The period of active service is a year. The marine consists of 10 small steamboats, of which 4 are on the lakes, 2 on the Atlantic, and 4 on the Pacific coast.

For Central American Arbitration Treaty under Costa Rica.

Area and Population.

Area estimated at 49,200 English square miles, and an estimated population (1910) 600,000, giving about 12.2 inhabitants per square mile. The movement of population during the year 1908 is given as follows: Births, 23,828; deaths, 9,598; marriages, 1,261 (that is, 2,522 persons were married). The great bulk of the population consists of aboriginal 'Indians,' mulattoes, negroes, and mixed races, and the number of Europeans and their descendants is very small (about 1,200) but is on the increase. There are within the Republic 10 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital of the Republic and seat of government is the city of Managua, situated on the southern border of the great lake of the same name, with 34,872 inhabitants. Leon, formerly the capital, has a population of 62,569; Granada, 17,092; Matagalpa, 15,749; Masaya, 13,028; Jinotega, 13,899; Chinandega, 10,542; Esteli, 8,281; Matapa, 8,279; Somoto, 8,182; Boaco, 10,581; Jinotega, 9,317; Bluefields, 4,706. Other towns are Corinto, and Juan Sur.

Religion ■■■ Instruction.

The prevailing form of religion ■■■ Catholic. The Bishop of Leon, whose diocese is the whole Republic, is a suffragan of the Archbishop of Guatemala. There ■■■ about ■■■ elementary schools, ten colleges and two universities (*facultades*). Also two schools of telegraphy, at Managua and Granada.

A national Industrial, Commercial, and scientific Museum has been established at Managua.

Finance.

Revenue and expenditure in paper pesos :—

	1907	1908	1909	1910	1911
	Pesos	Pesos	Pesos	Pesos	Pesos
Revenue . . .	13,145,800	19,119,503	12,894,277	15,182,873	24,001,000
Expenditure . .	10,286,519	12,503,502	18,639,306	34,673,127 ¹	24,000,000

¹ Ordinary expenditure, 12,053,848 pesos; extraordinary, on account of revolution of 1909, 22,520,277 pesos.

A six per cent. loan for 1,250,000*l.* was issued in 1909 for the construction of railways, &c., and for conversion purposes. There is a French debt of 1905 of 12,500,000 francs at 5 per cent. The internal debt amounted to 59,417,197 pesos in March, 1912.

On June 6, 1911, a convention was signed at Washington between the United States and Nicaragua by which it is intended to establish the latter on a sound financial basis by raising a loan to refund the existing foreign debt.

Industry and Commerce.

The agricultural, timber and mining industries are the principal sources of national wealth. The ■■■ of cultivation in Nicaragua has extended in recent years and would probably extend still further but for the scarcity of labour. The chief product is coffee, of which the exports for 1910 amounted to 12,028 tons. The coffee estates (largely in American and German hands) lie in the western districts. Bananas ■■■ grown in large quantities in the Bluefields region and ■■■ all shipped to New Orleans. Cocoa of good quality is grown chiefly in the south of the Pacific coast region, the greater part of the produce is consumed in the country. Sugar is widely cultivated; there ■■■ several large and many small sugar factories; the export of sugar in 1910 ■■■ tons. The sale of native spirits was ■■■ government monopoly, abolished in June, 1910. Tobacco is grown in several districts; the best is produced in Omotepe, ■■■ volcanic island in Lake Nicaragua. The leaf is good but ■■■ well-cured; it is not exported. The fiscal ■■■ on tobacco, domestic and foreign, are leased to a syndicate which ■■■ an annual rent of 500,000 pesos. Rubber ■■■ collected in the mountain forests, and there ■■■ young rubber plantations ■■■ the Atlantic and Pacific coasts. The forests contain, besides mahogany and cedar which ■■■ largely exported, many valuable timber trees, dye-woods, gums, and medicinal plants. They ■■■ worked both from the Atlantic and Pacific, but statistics of ■■■ timber cut ■■■ incomplete.

■■■ are 1,200,000 cattle in Nicaragua.

■■■ are several gold mines, worked by American and British companies, one having also silver. The gold export from the Atlantic ■■■ amounted in 1910 ■■■ 1,000,000 dollars. ■■■ mines towards the ■■■ in Mico,

Tunkey, Cuicuma and Pizpiz districts are showing increased activity. Copper, coal, oil, and precious stones are also found.

The foreign trade of Nicaragua is as follows in 5 years:—

	1905	1906	1907	1908	1909
Imports	Gold pesos 3,407,204	Gold pesos 3,406,830	pesos 2,958,676	Gold pesos 2,583,257	pesos 2,856,806
Exports	3,541,815	1,231,018	3,017,984	3,987,428	4,545,076

The customs receipts (1911-1912) were 1,010,885 dollars.

The principal exports in 1910 were coffee (576,198%), mahogany (11,859%), gold (104,637%), rubber, bananas (22,090%), hides (49,922%). Of the imports, about half came from the United States, and the remainder mostly from Great Britain, Germany, and France. Of the exports, about a third go to the United States, and the rest chiefly to Great Britain, Germany, and France.

A treaty of commerce between Great Britain and Nicaragua, signed at Managua in July 1905, and ratified at London on August 14, 1906, provides mutually for the most favoured nation treatment, except that Nicaragua may accord certain advantages to other Central American States.

Total trade between Nicaragua and United Kingdom (in thousands of pounds sterling) for 5 years:—

	1907	1908	1909	1910	1911
Imports from Nicaragua to U.K.	£ 81	£ 110	£ 100	£ 128	£ 56
Exports to Nicaragua from U.K.	£ 125	£ 164	£ 174	£ 127	£ 378

Shipping and Communications.

Most of the trade of Nicaragua passes through Corinto. The tonnage is mostly that of the steamers of shipping companies (2 American and 2 German) which regularly visit the port. Greytown is now a free port.

There are few good roads in the country, but contracts have recently been made for roads and transport from Momotombo to Matagalpa, 11 miles, and for 3 roads leading respectively from Matagalpa, from New Segovia, and from the Pis Pis mines in the Cape Gracias district to the head of steamboat navigation on the Cuco Wanks river, about 160 miles from its mouth. For the repairing and making of roads a tax varying from 1 peso (about 22d.) to 10 pesos is imposed on all male inhabitants over 15 years of age. The national railroad of Nicaragua is the only line in the republic, having a total length of 171 miles, in connection with which there are 12 ply on the Lakes. The line runs from Corinto to Leon, Managua, Granada, and Diriamba, with branches to El Viejo and Momotombo. Various other railways have been contracted for. There are 20 miles of private railway on the Atlantic coast on the Rio Grande, and on the west side of Lake Nicaragua, 3 private steam tramways aggregating 3 miles in length. There are steamers running on the San Juan river and on the lakes now belong to the Government, as well as steamers for trade on the Atlantic and Pacific coasts. The national railways have been leased to a company for 15 years and the company for 25 years from January 1, 1912.

There are 135 post offices. In 1912 the correspondence by post comprised 3,351,481 postal packets sent out and 5,087,794 received, telegrams received numbered 577,698, and transmitted 615,256, conversations by telephone numbered 47,557. There are 3,637 miles of telegraph wire, and 130 offices, also 1,000 miles of telephone wire and 100 telephone stations.

The Government has contracted for the installation of wireless telegraph stations at Managua, Granada, San Carlos, San Juan del Norte and Castillo.

Money, Weights, and Measures

The National Bank of Nicaragua, with a capital of over 2,000,000 dollars, was established in Managua in 1912.

In 1912 a new monetary unit was introduced, the gold *cordoba*, containing 1.672 of gold nine tenths fine and divided into 100 equal parts. Other gold coins are 10, 5 and 2½ cordobas.

The silver coins are the silver *cordoba* containing 16 grammes of silver nine tenths fine, the half and quarter cordoba, 10 cents, a coin containing 2½ grammes of silver eight tenths fine, 5 cents, a coin three quarters of copper and one of nickel 1 cent, ninety five parts of copper and 5 of zinc, 1 cent in same proportion.

Since January 7, 1893, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives

1 OF NICARAGUA IN GREAT BRITAIN

Envoy and Minister —

Consul General — Don Felipe F. Martinez

There are Consular Representatives at Manchester, Liverpool, Glasgow, Cardiff.

2 OF GREAT BRITAIN IN NICARAGUA

Minister and Consul General — Sir Lionel F. G. Carden, K.C.M.G.

Consul at Bluefields — Dr. Joseph Johnstone

Consul at Managua — H. C. Venables

There are Vice Consuls at Managua and Matagalpa.

NORWAY.

(NORGE.)

Reigning King.

■■■■ VII., born August 3, 1872; the second son, Carl, of Frederik, King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the ■■■■ through his grandfather, the late King Christian of Denmark, November 20, 1905; landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII., King of Great Britain and Ireland.

Son — Prince *Olav*, Crown Prince, born July 2, 1903.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose ■■■■ to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark ■■■■ their King. The foreign powers refused to recognise this election, and on August 14 ■■■■ convention ■■■■ made proclaiming the independence of Norway in union with Sweden. This was followed on November ■■■■ by the election of Karl XIII. ■■■■ King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union ■■■■ signed, October 26, 1905. The throne of Norway was offered to ■■■■ prince of the reigning house of Sweden, but declined, and, after a *plebiscite*, Prince Carl of Denmark ■■■■ formally elected King. In October, 1907, ■■■■ treaty guaranteeing the integrity of Norwegian territory ■■■■ signed at Kristiania by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Haakonson	1204	■■■■ of Pommern	■■■■
■■■■ Haakonson	1217	Kristofer af Bayern	1442
Magnus Lagabøter	■■■■	■■■■ Knutsen	1440
■■■■ Magnusson	■■■■	■■■■ Sovereigns ■■■■ in Denmark	1450-1814
■■■■ V. Magnusson	1299	Kristian ■■■■	■■■■
Magnus Erikson	1319	■■■■ Sovereigns at ■■■■	■■■■
■■■■ VI. Magnusson	1355		1814-1905
Olav Haakonson	■■■■	Haakon VII.	1906
Margræte	1388		

The King has a civil list of 700,000 kroner, ■■■■ 38,5467.

Constitution and Government.

The Constitution of Norway, ■■■■ ■■■■ Grundlov, bears ■■■■ May 17, 1814, with several modifications passed ■■■■ various times. It ■■■■ legislative power of the realm in the Storting, the representative ■■■■ sovereign people. The royal veto may be exercised twice; but ■■■■ bill ■■■■ three Stortings formed by separate and subsequent elections, ■■■■

be the law of the land without the assent of the sovereign. The King has the command of the land and sea forces and makes all appointments, but, except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *jura*, and not by any writ from the King or the executive. They begin the first weekday after January 10 each year, and must the sanction of the King to sit longer than two months. Every Norwegian citizen of twenty-five years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause, for instance, actual receiving of parish relief. Women are under the same conditions since 1907 entitled to vote if they (or the husband, when the couple have the property in common) have paid tax on the annual income of *kroner* in the towns, *kroner* in the country districts, including 'fæderstede' (some of the smaller towns). The mode of election is direct. Every third year the people choose their representatives, the total number being 123 (forty-one from towns, and eighty-two from rural districts). The country is divided into districts, each electing one representative. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Council of State can be elected representatives of any district of the Kingdom without regard to their residence. At the election in 1909 the number of electors was 785,859, or 38.23 per cent of total population, while 487,193 votes, or 62 per cent of the whole number, were recorded.

Storting (1912) Liberals 24, Conservatives 75, Socialists 24, Independents.

The Storting, when assembled, divides itself into two houses, the 'Lagting' and the 'Odelsting'. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each house separately. The inspection of public accounts and the revision of the Government, and impeachment before the Riksråd, belong exclusively to the Odelsting. All other matters are settled by both houses in common sitting. The Storting elects five delegates, whose duty it is to examine the public accounts. All laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two houses assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The majority required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Højesteret*) form a high court of justice (the *Riksråd*) for the impeachment and trial of Ministers, members of the Højesteret, and members of the Storting. Every member of the Storting has a salary of three thousand kroner per annum, besides travelling expenses.

The executive is represented by the King, who exercises his authority through the Council of State, composed of one Minister of State and at least four Councillors. Ministers and Councillors of State are entitled to be present at the Storting and to take part in the discussions, when public, but without a vote. The following are the members of the Council of State, appointed January 29, 1911:

MINISTER OF STATE.

President of the Council.—Gunnar Knudsen

COUNCILLORS OF STATE.

Ministry for Foreign Affairs.—M. Ihlen.

Ministry for Worship and Instruction.—M. Braggjesaa.

Ministry for Justice.—M. Abrahamsen.

Ministry for Commerce, Navigation, and Industry.—M. Casibery.

Ministry for Agriculture.—The President of the Council.

Ministry for Labour.—M. Uthyr.

Ministry for Finance.—M. Omholt.

Ministry for Defence.—General Keulhaa.

II. LOCAL GOVERNMENT.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (Amtmand), viz., the town of Kristiania and Bergen, and 18 'Amter' (counties). There are 41 towns, 11 'Ladesteder,' and 111 rural communes (Hærreder), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (Formand), elected by and from among the representatives, who are four times the number of the 'Formand.' The representatives elect conjointly every third year from among the 'Formand' a chairman and a deputy chairman. All the chairmen of the rural communes of an Amt form with the Amtmand the 'Amtsting' (county diet), which meets yearly to settle the budget of the Amt. The towns and the parishes form 61 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Amtet	Area - English square miles	Population Dec. 3, 1900	Population Dec. 1, 1910	Pop. per square mile 1910

AREA AND POPULATION

1101

In 1910 there were 1,155,673 males, and 1,236,109 females.
Conjugal condition of the present population, 1910 —

	Unmarried	Married	Widowed	Divorced	Not stated
Males	713,104	364,885	41,769	798	2,604
Females	755,238	382,397	94,429	1,371	1,195

In 1910, 1,702,564 were domiciled in rural districts, and 689,228 in towns. Of the population in 1910 2,296,019 were born in Norway, 38,798 in Sweden, 1,820 in Finland, 3 in Germany. In 1910 the number of Inq was 18,590, and of Fins, 7,172.

In 1910 the population above the age of 15 was divided according to occupation as follows (provisional figures) —

Occupation	December 1 1910				Corresponding figures for 1900			
	Norway	Rural districts	Towns	Kingdom	Norway	Rural districts	Towns	Kingdom
1 Agriculture, &c	307,112	303,010	4,102	311,214	309,016	301,499	7,517	316,515

II. MOVEMENT IN POPULATION

1. Births, Deaths, and Marriages

	Marriages	(excl. still-born)	Stillborn	Illegitimate, living	(excl. still-born)	
1907	18,983	60,723	1,429	4,106	32,739	
1908	14,153	60,896	1,428	4,174	33,181	27,685
1909	14,060	61,407	1,499	4,106	31,608	29,804
1910	14,566	61,461	1,429	4,040	31,899	29,605
1911	14,800	61,490	1,600	4,070	31,300	30,100

2. Emigration.

Place of Destination	1905	1906	1907	1908	1909	1910	1911
United States	19,838	20,449	20,015	7,850	15,287	17,961	11,122
North America	1,286	1,476	1,490	—	880	1,518	1,804
Non-European countries	—	42	80	37	—	86	51
Total	21,069	21,967	22,135	8,497	16,167	19,512	12,477

III. PRINCIPAL TOWNS.

At the census taken December 1, 1910, the number of towns with a population of above 100,000 was one, above 20,000 four, above 10,000 ten, above 5,000 seven. The population of the principal towns, December 1, 1910, was:—

Kristiania	241,846	Kristiansand	15,291	Alesund	13,678
Bergen	76,867	Fredrikstad	15,697	Skien	11,856
Tromsø	41,836	Kristiansund	14,201	Sarpsborg	10,742
Stavanger	37,361	Haugesund	12,467	Arendal	10,815
Drammen	24,896	Fredrikshald	11,992	Larvik	10,106

Religion and Instruction.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 6 *Stifter* (bishoprics), 84 *Provstier* (provostships, or archdeaconries), 498 *Parochier* (clerical districts). In 1910 there were 62,553 dissenters, including 2,046 Roman Catholics, 10,986 Methodists, 7,659 Baptists, 714 Mormons, 143 Quakers. The Roman Catholics are under a Vicar Apostolic resident in Kristiania.

Education is compulsory, the school age being from six and a half in towns and in the country to fourteen. In 1909 (the latest date for which there are statistics) there were in the country 5,941 public elementary schools with 279,823 pupils, and in towns 2,978 classes with 94,609 pupils; the amount expended on both being 13,669,857 kroner, of which 4,557,498 kroner were granted by the State, the remainder being provided locally. There were 14 public, 50 communal, and 17 private, with 17,861 pupils, in 1909-10. Most of the secondary schools are mixed, 12 for girls alone, all private. Besides these, 98 communal and private schools have 3,786 pupils. There were in 1909, 6 public normal schools and 4 private, with 1,046 students. Kristiania has a University, attended in 1911 by 1,550 students. In the financial year 1910-11 it had its own income, 112,374 kroner, and a State subsidy of 1,207,852 kroner.

There are 10 schools for abnormal children, deaf, blind, and feeble-minded. There are 9 reformatory schools for neglected children; two receive only children who require rigorous treatment; the others, children against whom there have been no charges. In the stricter reformatories children may be kept from the age of 12 to 21 years; in the lenient, from their 18th year of age. The number of children in reformatories on September 30, 1911, was 111 boys and 11 girls. There

are, besides, 2 communal compulsory schools, established mainly for children neglecting the ordinary school.

Justice Crime.

For civil justice Norway is divided into 104 districts, each with 1 inferior court. There are 3 superior courts, having each one chief justice and two other justices, and 1 supreme court for the whole kingdom (Hoiesteret), consisting of 1 president and at least 2 other justices. There is a court of mediation (Færligelskomsmission) in each town and Herred (district), consisting of two 1 chosen by the electors, before which, 1 a rule, civil 1 must first be brought.

According 1 the law of criminal procedure of July 1, 1867, all criminal 1 (not military, or coming under the Rigeret—the court for impeachments) shall be tried either by jury (Lagmandret), 1 Meddomeret. The Lagmandret consists of three judges and 10 jurors. The Kingdom 1 divided into 1 jury districts (Lagdommer), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The Meddomeret consists of the judge and is held in the district of the inferior court, and 1 assistant judges (not professional) summoned for each 1. The Lagmandret takes cognizance of the higher classes of offences. The Meddomeret is for the trial of other offences, and is also 1 court of first instance.

There are four convict prisons; inmates, June 30, 1912, 385 males and 40 females. There are 148 local prisons, in which were detained, June 30, 1912, 111 males and 84 females.

Pauperism.

The relief of the poor is mostly provided for by local taxation by the State. The number of persons receiving relief amounted to 79,690 in 1910.

Finance.

Revenue and expenditure in thousands of kroner (18 kroner = 17.):—

2 Including 100,000,000 placed in the Norwegian State, an easily negotiable first mortgage bond.

The taxation for communal purposes amounted for the rural communes to 21,183,876 kroner, and for the towns to 24,663,348 kroner in 1910

Defence.

The most important fortresses of Norway are Oscarsborg and the fortresses Agdenes, Bergen, Tonsberg and Kristiansand, the other fortresses, Karljohansvaern, Akershus in Kristiania, Bergenhus in Bergen, Munkholmen Trondhjem, and Vardohus, of little importance

ARMY.

The Army of Norway is a national militia. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 23, and for the first 12 years belong to the line; then for 3 years to the landvaern. Afterwards they pass to the landstorm, in which they remain until they have attained 55 years of age. The initial training is carried out in recruits schools, it lasts for 49 days only in the infantry and garrison artillery, 62 days in the mountain batteries, 72 in the engineers, 92 in the field artillery, and 102 in the cavalry. As their courses are finished the men are pressed to the units to which they will permanently belong, and with them go through a further training of 24 days. Subsequent training consists of 24 days in the second, third and seventh years of service.

The line is now organised in 6 brigades of all arms, besides which there is the garrison artillery. There are 11 battalions of infantry, 5 companies of cyclists (skurs), 11 regiments of cavalry, 27 four gun field batteries, 3 batteries of mountain artillery and 1 regiment of engineers. The brigades are of unequal strength, according to the importance of the district in which they are recruited. In event of war, each brigade would mobilise 2 or 3 regiments of infantry (of 3 battalions), 3 or 4 squadrons of cavalry, a battalion of field artillery (of 1 or 5 batteries), 1 supply company, 1 telegraph company, a medical company and a company of train. Each regimental (3 battalions) district also forms one battalion of landvaern of 6 companies, and the other would form landvaern units in the same proportion. The total strength of the line, on a war footing, is 80,000 of all ranks, which would be increased by means of the landvaern to 110,000.

The Norwegian infantry is armed with the Mauser-Jorgensen rifle of 6.5 mm. The field artillery has Ehrhardt Q F guns of 7.5 mm.

The military budget for 1912-13 is 854,000.

NAVY

The principal vessels of the Norwegian navy are —

Laid down	Name	Displacement	Armour		Principal Armament	H P	Max Speed
			Belt	Gun's			
1896	Marfagrd (Tordenakild)	2,000	■	<	2 8in , 6 4 7in	4,500	17
1899	Norge (Eidsvold)	4,200	7	8	3 8in , 6 6in	5,200	17

There are also 2 coast service monitors, 3 gunboats, 3 destroyers,

torpedo boats, and one submarine. Building: 2 coast defence battleships, 1 destroyer, 1 torpedo boat, and 4 submarines.

The navy numbers about 130 officers on active service and about 150 in the reserve, and about 1,000 petty officers and [redacted] on permanent engagement. All seafaring men between the ages of twenty-two and forty-one are enrolled [redacted] the lists of the active fleet, and [redacted] liable to the maritime conscription. The conscripts (about 1,000) have to [redacted] through a training of at least 2 months.

Production [redacted] Industry

I. AGRICULTURE.

Of the total area, 75 per cent. is unproductive, 21.5 per cent. forest, and [redacted] per cent. under cultivation. On September 30, 1907, there [redacted] 188,866 real estates separately registered, and the number of farms was 246,634. The 246,634 farms [redacted] classified as follows according to their cultivated area.—

Without cultivated area (not including gardens).	20,839
Up to 2 hectares „	142,980
2 01-10 „ „	65,904
10 01-50 „ „	16,590
Above 50 „ „	371

246,634

The 33,657 farms without cultivated area are most of them special estates of gardens, and not cultivated meadow land.

The average annual produce [redacted] hectolitres per hectare for 1906-1910 was: wheat, 22.4; rye, 24.9; barley, 29.4; mixed corn, 35.5; oats, 35.6; peas, 21.6; potatoes 230.1 hectolitres.

The products of the harvests for 3 years were as follows:—

	1911	1912
Wheat, qrs	35,403	32,414
Barley, „	151,308	108,850
Oats, „	1,270,426	1,069,447
Rye, „	106,534	114,877
Mixed Corn, qms	76,734	50,000
Potatoes bushels	21,705,469	21,816,496
Hay, tons	2,716,202	2,466,512

On September 30, 1907, there [redacted]:—Horses, 172,468; cattle, 1,094,101; sheep, 1,393,488; goats, 296,442; swine, 318,556; reindeer, 142,623.

The value of cereals imported (including flour) [redacted] 66,649,400 kroner in 1911; the principal article being rye. The imports of animal products amounted to 13,141,000, and their exports to 103,978,800 kroner.

II. FORESTRY.

The total [redacted] covered with forests is estimated [redacted] 26,685 square miles, of which [redacted] per cent. is under pine [redacted] forests occupy about 3,044 square miles, administered by a forest [redacted] under the supervision of the Ministry of Agriculture. The value of unwrought [redacted] partly wrought timber exported from Norway [redacted] 1911 [redacted] 34,183,200 kroner, and [redacted] wrought [redacted] (mostly wood pulp) 43,870,400 kroner.

III. MINES AND MINERALS.

The total value of mineral products in 1910 was 11,220,000 kroner (5,572,000 in 1900); of furnace products, 2,470,000 kroner (1,942,000 in 1900). The chief mineral products are silver, 430,000 kroner in 1910 (330,000 in 1900); copper ore, 1,841,000 kroner; pyrites, 6,945,000 kroner; iron ore, 1,025,000 kroner; apatite, 85,000 kroner; felspar 561,000 kroner (115,000 in 1900). Of the smelting products in 1910, silver ■■■ valued at 460,000 kroner; copper, 1,755,000 kroner. At the end of 1910 there existed about 60 mining establishments employing 6,246 workpeople, and ■ smelting furnaces with 278 workpeople.

IV. FISHERIES.

The number of persons in 1910 engaged in cod fishery ■■ 88,144; in summer-herring fishery, 27,024; and in mackerel fishery, 5,400.

The value of the fisheries in kroner in 1910 ■■ cod, 19,208,100; herring, 12,624,700; mackerel, 2,864,500; salmon and sea trout, 1,018,900; other fisheries, 9,908,700; lobsters, 928,200; oysters, 10,200; total, 46,558,300.

Other fisheries ■■ the cod and herring fisheries ■■ the coast of Iceland, and the whale, walrus, seal, and shark fisheries which in 1910 produced a total of about 18,700,900 kroner.

Commerce.

Total imports and exports in the last five years:—

	1907	1908	1909	1910	1911
Imports (foreign).	Kroner 361,642,900	Kroner 354,919,000	Kroner 343,749,900	Kroner 402,092,100 ¹	Kroner 408,095,000 ¹
Exports (Norwegian).	219,971,800	211,247,900	284,040,000	267,850,500	288,664,100
„ (foreign).	9,064,100	7,610,400	8,808,700	14,787,900 ¹	9,868,700 ¹

¹ Direct transit excluded.

Trade with different countries in 1911, including indirect as well ■ direct, trade and also direct transit goods:—

Internal Communications.

The length of State Railways in Norway is 1,635 miles, companies 282 miles; total 1,917 miles. 1,177 miles have a gauge of 4 ft. 8½ in.; 654 miles, 3 ft. 6 in.; 18 miles, 3 ft. 3½ in.; 60 miles, 5 ft. Total receipts in 1911 ending June 30, 1911: State railways, 21,274,825 kroner; companies, 4,384,646 kroner. Total expenses: State railways, 15,886,943 kroner; companies, 3,181,504 kroner. Goods carried: State railways, 4,864,570 tons (of 1,000 kilogs.); companies, 1,461,827. Passengers carried: State railways, 12,745,648; companies, 2,097,781. The State railways have been partly by subscription in districts interested and partly at the expense of the Government. The receipts, expenses and passengers refer to the year July 1, 1910, to June 30, 1911.

The following are the postal statistics:—

	1907	1908	1909	1910	1911
Letters	75,497,800	60,784,400	63,357,800	72,704,456	71,040,583
Post cards	15,881,400	15,111,800	15,808,500	17,040,110	17,708,769
Letters with declaration of value	8,628,000	4,304,000	4,285,000	4,552,000	4,918,720
Registered letters	1,801,700	1,620,000	1,638,800	1,702,084	1,848,971
Journals	50,150,700	84,569,600	91,828,300	91,747,475	100,237,206
Other printed matter	31,034,500	10,790,900	11,348,500	13,745,849	14,891,109
Samples and parcels	1,729,100	1,944,300	2,159,500	2,336,104	2,518,607

Length of telegraph and telephone lines and wires, June 30, 1912; 13,222 miles of line, 104,995 miles of wires. Number of paid messages on the State lines, 3,616,251. Number of telephone conversations on trunk lines, 4,989,912. State telegraph offices, 1,805; receipts, 6,615,809 kroner; expenses, 4,702,049 kroner.

The Government's first land wireless telegraphy stations were the two built in Lofoten in 1905 and 1906. In 1907 the navy, after equipping its ships with wireless apparatus, had two stations, the Thømsø and the Flokkerø, and operated them until a couple of years when they were transferred to the Telegraph Board. In the autumn of 1910 the Varø station at Lofoten was opened, and there are now (1913) five coast stations in operation besides three large stations.

Money and Credit.

On June 30, 1911, the Norwegian coins in circulation (the coinage after the monetary reform deducting the coins melted down) were: Gold coin, 22,040,000 kroner; silver coin, 13,808,000 kroner; bronze coin, 1,055,000 kroner; total, 36,998,000 kroner.

There exists no Government paper money.

The value of income and property assessed for taxes in 1911 was:—

	Income.	Property.
The towns	302.1 millions of kroner	965.0 millions of kroner
The rural districts	307.1 „ „	1,728.4 „ „
The whole kingdom	609.2	2,693.4

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for 1911 show the following figures:—Assets at the end of the year—bullion, 60,385,623 kroner; outstanding capital, mortgaged estates, foreign bills, &c., 76,944,992 kroner; total, 137,335,615 kroner. Liabilities—notes in circulation, 92,878,497 kroner; amount of notes allowed, 95,385,623 kroner; deposits, cheques, unclaimed dividends, unsettled losses, &c., 18,358,701 kroner (of which deposits amounted to 9,348,060 kroner); dividends payable for the year, 1,900,000 kroner, 10 per cent.; total, 108,899,657; balance, 28,435,958.

The 'Kongeriget Norges Hypothekbank' was established in 1852 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounts to 26,500,000 kroner in 1911. The bank has a reserve fund amounting in 1911 to 1,100,000 kroner, and in the same year a depreciable fund of 1,000,000 kroner. At the end of 1911 the amount of bonds issued was 180,314,120 kroner. The total mortgage amounted to 193,125,654 kroner.

There were, at the end of 1911, ■ private joint-stock banks reported, with ■ collective subscribed capital of 94,442,000 kroner and ■ paid-up capital of 50,483,000. The ■ funds amounted to 37,887,000. The deposits and withdrawals in the course of ■ year amounted to 1,207,323,000 kroner and 1,176,222,000 kroner respectively. Deposits at the end of the year 480,814,000 kroner, of which 21,584,000 kroner deposits on demand, and 459,230,000 kroner on other accounts.

All savings-banks must be chartered by royal permission. Their operations are regulated, to ■ considerable extent, by the law, and controlled by the Ministry of Finance. In 1911 their number ■ ; depositors 1,030,620, with 539,322,381 kroner to their credit at the end of the year. In 1910 their number ■ 487 ; depositors 1,001,310, with 507,039,020 kroner to their credit at the end of the year.

Money, Weights, and Measures.

By ■ treaty signed October 16, 1875, Norway adopted the ■ monetary system as Sweden and Denmark. The Norwegian Krone, of 100 ore, is of the value of 1s. 1½d., ■ about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8·960572 grammes, ·900 fine containing 8·0845 grammes of fine gold, and the silver krone weighs 7·6 grammes, ·800 fine, containing ■ grammes of fine silver. The standard of value is gold. National Bank notes for 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is bound to exchange them for gold on presentation.

The metric system of weights and ■ is obligatory.

Diplomatic Representatives.

1. OF NORWAY IN GREAT BRITAIN.

Envoy and Minister in London.—Paul Benjamin Vogt.

Secretary of Legation.—O. Skybak.

Consul-General in London.—W. Eckell.

Vice-Consul.—H. L. Braekstad.

There are Consular representatives at Amlie, Barrow, Berwick, Birmingham, Blyth, Boston, Bradford, Bristol, Cardiff, Dartmouth, Douglas, Dover, Falmouth, Fleetwood, Goole, Grimsby, Hartlepool, Harwich, Hull, Ipswich, Jersey, King's Lynn, Leeds, Liverpool, Lowestoft, Manchester, Middlesbrough, Newhaven, Newport, Nottingham, Plymouth, Portsmouth, Sheffield, Shoreham, Southampton, Sunderland, Swansea, Weymouth, Great Yarmouth, Newcastle-on-Tyne, South Shields, Edinburgh—Leith, Aberdeen, Alloa, Ardrossan, Ayr, Boness, Burntisland, Dundee, Glasgow, Grangemouth, Greenock, Kirkwall, Lerwick, Methil, Peterhead, Stornoway, Troon, Wick, Dublin, Belfast, Cork, Limerick, Londonderry.

■ OF GREAT BRITAIN IN NORWAY.

Envoy and Minister.—Mansfeldt de Cardonnel Findlay, C.B., C.M.G.

Secretary.—Hon. F. O. Lindley.

Naval Attaché.—Captain Montague W. W. P. Consett.

Military Attaché.—Lieutenant-Colonel G. T. M. Bridges, D.S.O.

Commercial Attaché.—Sir Francis Oppenheimer.

Consul at Kristiania.—Edward F. Gray.

There ■ Consular representatives ■ Arendal, Bergen, Bodø, Kristiania, Drammen, Flekkefjord, Fredrikshald, Fredrikstad, Hammerfest, Haugesund, Kragero, Kristiansand, Kristiansund, Larvik, Mandal, Molde, Moss, Namsos, Porsgrund, Risør, Skien, Stavanger, Svolvær, Tromsø, Trondhjem, Tonsberg, Vadsø, Vardo.

OMAN.

AN independent State in South-eastern Arabia extending along a line—S. E. and S. W.—of almost 1,000 miles from the Gulf of Ormuz and inland to the deserts. Area, 82,000 square miles; population, estimated 500,000, chiefly Arabs. The capital, Maskat and the adjacent town of Matra have together about 24,000 inhabitants. Maskat occupied by the Portuguese from the middle of the seventeenth century. After various vicissitudes it recovered in the eighteenth century by Ahmed bin Sa'eed, of Yemenite origin, who elected Imam in 1741, and whose family have since ruled. The present Sultan is Seyyid Faysal bin Turki, second of the late Seyyid Turki bin Sa'eed bin Sultan, who succeeded his father June 4, 1888, and formally recognised by the British Government. In the beginning of last century the power of the Imam of Oman extended over a large of Arabia, the islands in the Persian Gulf, a strip of the Persian coast, and a long strip of the African coast south of Cape Gnarisful, including Socotra and Zanzibar. On the death of Sultan Sa'eed in 1856, his son proclaimed himself Sultan in Zanzibar and another in Maskat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two Sultanates. Subsequent troubles curtailed the area of the state in Asia. The island of Kishm or Tawilah, near the entrance of the Persian Gulf, formerly belonging to the Imam of Oman, is now under Persian government and is ruled by a Sheikh, but the port of Basidu at the western extremity of the island is British. Further south on the Persian coast of the Gulf of Oman is the Port of Jask formerly belonging to Oman, but British. The closest relations have for years existed between the Government of India and Oman and a British Consul and Political Agent resides at Maskat.

The revenue of the Sultan amounts to about 300,000 dollars. The population is poor; inland the Sultan's authority is merely nominal and there is little security for life and property. In some coast regions there is the possibility of considerable agricultural development. As to the mineral resources of the country little is known.

Commerce is mostly by sea, statistics being given only for the port of Muskat, but large caravans under protection carry traffic with the interior.

Total exports 1911-12, Rs. 43,55,806; chiefly dates Rs. 17,48,016; fruit, Rs. 77,774; fish, Rs. 14,083; limes, Rs. 87,990; pearls, Rs. 44,960; mother-of-pearl Rs. 54,800; cotton goods, Rs. 1,37,930; hides and skins, Rs. 36,105. Total imports for 1911-12 Rs. 60,12,800; chiefly rice, Rs. 11,24,698; coffee, Rs. 2,54,496; sugar, Rs. 1,56,536; piece goods, Rs. 7,17,910; silk and silk goods, Rs. 39,050; twist and yarn, Rs. 2,15,550; wheat and other grain, Rs. 54,691; arms and ammunition, Rs. 17,91,829.

Total imports from United Kingdom Rs. 9,61,218; India, Rs. 31,55,176; Persia, Rs. 84,106; America, Rs. 1,07,435; France, Rs. 13,788; Turkey in Asia, Rs. 21,440; Belgium, Rs. 9,27,450; Germany, Rs. 4,67,474. Trade mainly in the hands of Indians, and the imports and exports mostly from and to India. Imports subject 10 per cent. *valorem* duty. There are no export duties; imports for re-export by the importer within 6 months not subject to transit duty.¹

¹ Some of the above figures of imports and exports include trade carried on by sailing vessels.

The number of vessels that cleared at the port of Maskat in 1911-12 excluding the native craft, was 255 of 359,660 tons, of which 111 of 319,589 tons were British. The Arabs of Sur, and the el Hadd, maintain a large coasting trade, and also traffic with native craft with India, and the African coast and islands.

There is a mail weekly from and to Bombay, and Maskat is connected by cable with the Indo-European telegraph system.

The medium of exchange is the Maria Theresa dollar. On the coast, but not in the interior, the rupee circulates (rupee exchange 100 dollars equal to Rs. 136/2/0 to Rs. 142/12/0 in 1911-12). There is one Omani copper coin, which fluctuates in value. The mahmûdi of *gad* (1 dollar = 11½ mahmûdieh) is only money of account. The weights in use are the Maskat *man* which contains 17 tolas and is equal to one-third of a Delhi *man*; 24 *kias* = 1 Maskat *man*; 10 Maskat *mans* = 1 *frasila*; 1 Maskat *man* = 1 *bar*. There is also a bazaar equal in weight to 136 dollars.

Political Agent and H.B.M.'s Consul.—Major S. G. Knox, C.I.E.

PANAMA.

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 4, 1903, and the *de facto* Government on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. The Constitution, adopted February 18, 1904, for a period of 90 days, provides for a Chamber of Deputies of 100 members (one for every 10,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected for 4 years, and not eligible for the succeeding term.

President of the Republic.—Dr. Belisario Porras (October 1, 1912).

There are three Vice-Presidents, and a Cabinet of five Ministers. The Republic is divided into 7 provinces, each under a Governor.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama grants in perpetuity the Canal Zone (Canal Zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For subsidiary canals other territory is ceded and, for the defence of the Canal, the coastline of the zone and the islands in Panama Bay are also ceded. The cities of Panama and Colon remain under the authority of the State, but complete jurisdiction is granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars on the ratification of the treaty, and will pay 250,000 dollars yearly, beginning after nine years. The treaty was ratified on February 23, 1904, and in July, 1904, the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. According to this agreement the city of Panama is, for all practical purposes, left without a seaport for foreign commerce, the anchorage of vessels at Flamenco Island and the wharf at Balboa, called 'Port Ancon,' as far as ocean-going vessels are concerned, both lie within the territory of the zone. Moreover, a similar port has been opened on the Atlantic entrance to the Canal, called Cristobal.

A treaty for the demarcation of the boundary line between Panama and Costa Rica was signed on behalf of the respective Governments on March 17, 1910, and has been ratified by the congresses of both countries. By this treaty the question of what is the true boundary line will be submitted to the arbitration of the Chief Justice of the Supreme Court of the United States.

Area and Population.—Extreme length is about 150 miles; breadth between 37 and 110 miles; total area is 32,380 square miles; population according to the census of 1912 (including the Canal Zone), 426,928. Population of the Canal Zone, 62,810 or 12.9 per square mile. The inhabitants are of a mixed race, comprising Spanish, Indian, and Negro elements, with a small number of temporary immigrants from the United States and European countries. Chinese subjects are estimated at 3,500. There are 54,488 British subjects in the Republic, including 30,859 in the Canal Zone, chiefly from West India. There are 7 provinces. The capital, Panama, founded in 1518, on the Pacific coast, (1912) 37,505 inhabitants, Colon or Aspiwall on the Atlantic coast, 17,748. Smaller ports on the Pacific are Agas Dulce, Pedregal, Montijo, and Puerto Mudis; on the Atlantic, Bocas del Toro and Puerto Armuelles.

Education.—The Government maintains public schools throughout the provinces, and 19,362 (excluding 1,721 children enrolled

the Canal Zone public schools) received free instruction in 1910, from 315 teachers. A University (Instituto Nacional) has been opened in fine large buildings constructed at a cost of about 300,000, and the principal teachers are foreigners. In addition there are about a dozen private institutions and 47 young men and young women being educated in Europe and the United States at the cost of the Panama Government.

Finance.—All the revenue collected on importations into the Republic belongs to the Panama Government, but the United States has the right to import supplies of all descriptions required for canal construction and for the maintenance of their employees free of all taxes.

The national revenue from all sources for the year 1911 was 672,957, and the expenditure 670,839. The budget estimates for 1911-12 were 1,440,000. The Republic has 1,260,000 and 150,000 capital in the National Bank total, 1,410,000, with an interior debt of about 60,000. It has an army and navy to support.

Production.—The soil of Panama is of great fertility. Of the whole about five eighths are uncultivated, and of the remainder only a small part is properly cultivated. Immigration is encouraged, and land is offered to small farmers on favorable terms. The most important product is the banana. The United Fruit Company (a United States company) has large plantations and exports annually, from Bocas del Toro, about 2½ million bunches of bananas worth about 125,000. Crotchouc (about 180 tons annually) is collected by the Indians of the Cordillera, and is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier. In the province of Ocú (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital. Here about 75,000 cocoa trees, 50,000 coffee bushes, and 25,000 crotchouc trees have been planted and are now beginning to yield returns. Other products of the soil of Panama are coconuts, mahogany and other woods, copaiba, sarsaparilla and ipacouanha. Sugar and tobacco growing are assuming importance. Cattle rearing is carried on successfully, and hides form an important article of export. In 1905 the live stock was estimated at 65,000 head of cattle, 17,000 horses, 1,500 mules, 28,000 pigs, and 3,000 goats.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama, and at Corba Island to the west. Turtle-shell is also exported to a considerable amount. It is claimed that Panama possesses nearly every common mineral except coal, and recently a number of mining concessions have been granted.

Commerce, Shipping, Communications.—The imports of the Republic in 1911 amounted to 1,858,625, of which the value of 1,020,848 came from the United States (exclusive of canal materials), 458,080 from Great Britain, 223,247 from Germany, 77,816 from France, 36,538 from Italy, 28,209 from Belgium, 29,396 from Spain, 35,454 from China and Japan, and 53,988 from Spanish America. The exports for 1911 amounted to 572,685.

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. In 1911 there entered the ports of the Republic and the Canal Zone 1,504,332 tons, and cleared 3,866,428 tons. In 1909 the British vessels entered 304, and tonnage 672,797 tons, German, 143 vessels and 558,868 tons, United States, 151 vessels and 587 tons, Belgian, 77 ships and 226,788 tons; and French, 11 ships and 174,509 tons. Of the tonnage entered, 1,504,332 tons entered Colon and Cristobal.

A railway, 47 miles, connects the ports of Colon and Panama. It

belongs to the Panama Railroad Company (United States Government). Its construction cost \$7,500,000 dollars. In the Province of Bocas del Toro the United Fruit Company (American) has about 140 miles of track with branches, which is used to transport bananas and passengers to the port of Almirante in the Chiriqui lagoon. At present the line extends into Costa Rica for a distance of about 30 miles. This line is being extended towards Port Limon (Costa Rica) and its terminal is distant from that port 80 miles. A national line from Panama City to David, in the province of Chiriqui, 271 miles in length, has been surveyed and work will probably be commenced next year. There are telegraph cables from Panama to North American and South American ports, and from Colon to the United States and Europe. Roads are being constructed throughout the country. There are 96 post offices and 37 telegraph offices.

The monetary unit is the gold *Balboa* weighing 1.672 gramme 900 fine, to which the United States gold dollar is legally equivalent. Silver are the peso (of 5 grammes fine), and the half, fifth, tenth and twentieth peso pieces and nickel coins of 2½ cents. There is no paper money. Two silver pesos of Panama currency are taken as equivalent to one U.S. gold dollar. Altogether four millions of silver dollars of the new currency have been coined and placed in circulation.

Part of the 10,000,000 dollars (currency) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States.

Panama Canal—Progress is being made with the canal across the Isthmus under the treaty between the United States and Panama signed November 18, 1903. This treaty is closely associated with the independence of the Panama Republic and its general terms are given above under the head of "Government."

The (Hay-Pauncefote) treaty between Great Britain and the United States signed November 18, and ratified by the United States Senate December 16, 1901, provides for its use on equal terms by vessels of all nations. In the summer of 1912 the United States Congress passed the Panama Canal Act whereby privileges were given to certain classes of American shipping using the canal. The British Government lodged a protest against some of the provisions which it regarded as involving violation of the Hay-Pauncefote treaty. The British Government asked that the controversy be referred to the Hague Tribunal, but by March, 1913, a definite decision had been reached in the matter.

The number of employees of the Canal Commission and the Panama Railway Company in September 1913 was 11,000. It has been officially announced that the canal will be opened in the autumn of 1914. The original date was January 1, 1914. In 1913 Colonel Goethals was appointed Civil Governor of the Canal Zone to hold office from April 1, 1914.

Diplomatic and Consular Representatives.

1. OF PANAMA and GREAT BRITAIN

Minister — London — Vacant

First Secretary — Vacant

Consul — Carlos Zachrisson

General Consul — Liverpool — Fabio Arocemena

2. OF GREAT BRITAIN and PANAMA

British Minister Resident and Consul General at Panama — Sir Claude C. Mallet, C.M.G.

Vice-Consul — Constantino Graham

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Dr. Francia's reign was followed by an interregnum, which lasted till 1842, when a National Congress, meeting at the capital Asunción, elected Don Mariano Roque Alonso and Don Carlos Antonio López, joint consuls of the Republic. Another Congress voted, March 13, 1844, a new Constitution, and, March 14, elected Don Carlos Antonio López sole President; he was continued by another election, March 14, 1857. At the death of Don Carlos, September 10, 1862, his son, Don Francisco Solano López, born 1827, succeeded to the supreme power. President López, in 1864, began a dispute with the Government of Brazil, the consequences of which was the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, López was defeated and killed in the battle of Cerro Corá, March 1, 1870.

A new Constitution was proclaimed on November 25, 1870. The legislative authority was vested in a Congress of two Houses, a Senate and a Chamber of Deputies, the executive being vested in a President, elected for a term of

■ four years, with ■ non-active Vice-President, who ■ also President of the Senate. The Senate and Chamber of Deputies ■ elected directly by the people, the former in the ratio of one representative ■ 12,000 inhabitants, and the latter one ■ 6,000 inhabitants, though in ■ case of the sparsely populated divisions a greater ratio is permitted. The Constitution provides for this proportion, but in practice ■ original number of 18 Senators and 26 Deputies ■ still adhered to. The Senators and Deputies receive each 2,000 dollars per month (320l. per annum).

President of ■ Republic.—Eduardo Schaerer, elected for ■ years from August 15, 1912.

Vice-President.—Dr. Pedro Bobadilla.

The President exercises his functions through ■ cabinet of responsible ministers, five in number, presiding ■ the departments of the Interior, of Finance; of Worship, Justice and Public Instruction; of War, and of Foreign Affairs. The President receives ■ salary of 10,000 dollars per month (16,000l. per annum), and each of the ministers 4,000 dollars per month (640l. per annum; but the total administrative expenses are stated not to exceed 700,000l.

The country is divided into ■ districts, which ■ governed by chiefs, who ■ the civil authorities, and by justices of the peace, assisted by municipal councils.

Area ■ Population.

The approximate ■ of Paraguay ■ 171,770 square miles, including the Paraguayan Chaco, which is estimated ■ 106,922 square miles. There is an unsettled boundary dispute with Bolivia. In 1911 the population was estimated at 700,000, not including 100,000 Indians. The population is a mixture of Spanish, Guaraní Indian, and Negro races. Of foreigners in Paraguay, in 1910, there ■ 20,000, including 9,300 Argentines, 10,000 Italians, 1,400 Brazilians, 1,100 Spanish, 2,500 German, 800 French, 600 Uruguayan, ■ English. In 1911 the population of the capital, Asunción, founded 1536, ■ 80,000; other towns are Villa Rica, 26,000; Concepcion, 15,000; ■ Pedro, 8,700; Luque 15,000, Carapegua 15,000, Paraguari 10,000, Villa del Pilar, 10,000. In 1908 there ■ 1,774 immigrants, 1909, 830, ■ 1910, 578, and in 1911, ■ Nearly three-fourths of the territory ■ national property, but in recent years most of it has been transferred ■ private ownership, much of it in very large tracts.

Religion, Instruction, and Justice.

The Roman Catholic Church is the established religion of the State, but ■ exercise of other religions ■ permitted. Asunción, Suffragan to ■ Aires, is ■ only Paraguayan Episcopal See. The law of civil marriage ■ introduced in 1877. Education ■ free and compulsory, but schools are not everywhere available. In 1911 there ■ ■ schools with some 50,000 pupils. Private schools are subsidised by the Council of Education. There are ■ few private ■ schools for boys and girls. ■ Asunción there is ■ agricultural ■ with a model farm doing good work (temporarily closed in 1912; to ■ reopened ■ ■ or 1914). At ■ there is a ■ College, ■ 16 professors ■ ■ students. ■ ■ July, 1908, the State ■ pupils ■ Europe ■ the United ■ ■ contributions ■ ■ taxes, there ■ ■ special

Government fund for education consisting of a proportion of the proceeds of land sales, customs dues, &c.

A High Court of Justice, and various inferior tribunals, with local magistrates, exercise judicial functions. The High Court is composed of 3 justices, appointed by the president with the consent of the Senate, for a term of 4 years. There are also 2 courts of appeal.

Finance.

The revenue is derived from customs, internal consumption, stamps and other dues. The estimated revenue and expenditure for four years are given as follows (gold dollar = 4s.; paper dollar = about 3½d.):—

	Revenue		Expenditure	
	Gold pesos	Paper pesos	Gold pesos	Paper pesos
1907	2,312,894	6,829,000	561,963	28,577,110
1908	1,771,680	6,291,026	567,636	28,527,887
1910	496,000	2,636,000	710,552	27,094,948
1911 ¹	2,788,000	9,190,500	999,411	32,687,228
1912 ¹				

¹ Estimate.

On March 31, 1912, the outstanding external debt amounted to 821,017½. and the internal debt, 1,383,753½. (including 65,000,000 dollars of paper currency in circulation). The external debt to the Argentine and Brazil (the portion due to Uruguay was condoned) exists only as a political weapon in the hands of those countries, and is by some considered an effective guarantee of the independence of Paraguay.

Defence.

The small army of Paraguay is drilled and trained on the German model. Owing to recent and present changes it is impossible to say of what the army consists. Formerly it had 2 battalions of infantry, 6 squadrons of cavalry, 5 field batteries, and a coast defence battery. Total about 100 officers and 2,500 men. There is also a National Guard which would be called out for the defence of the country in time of war.

The navy consists at present of a flotilla of small merchant vessels armed with modern guns. The largest is about 1,000 tons.

Production and Industry.

Excellent grazing land is abundant in Paraguay, especially in the Chaco region, which is now being taken up by cattle-raisers. The estimated number of horned cattle in 1912 was about 3,000,000; horses 182,790, mules and asses 7,626, pigs 214,060, goats 32,334, pigs 23,900. The saladero industry is encouraged by Government; hides, jerked beef, and other animal products are exported. The growing of yerba mate, a Paraguay tea, is now in the hands of capitalists and companies, though some colonists still grow it. Tobacco is grown in large quantities and exported (59,424 cwt. weighing 127,785 tons in 1911) for consumption in Europe, mainly to Hamburg and Bremen. The principal industries are cattle-breeding and timber-cutting. Fruit-growing (especially oranges) is considerable. But agriculture is

primitive and hardly as yet remunerative. The immense [redacted] contain valuable timber, both hard and soft, which [redacted] a market in neighbouring countries and in Europe. [redacted] Australia Colony, with [redacted] colonists (chiefly British subjects), makes [redacted] income from cattle and horses which live [redacted] the grazing lands. The colony [redacted] miles from any river or railway, and has [redacted] market for the maize, cassava, beans, [redacted] potatoes, sugar-cane, bananas, oranges, and peaches which [redacted] grown. Still, the enterprise makes progress, having [redacted] saw-mill, five stores, [redacted] grain distillery, and two rum stills. There is another (smaller) English Colony, "C[redacted]"

Commerce.

The following is the value of the imports and exports in gold dollar, (5 dollars = £1):—

		1908	1909	1910	1911
	£				
Imports . . .	1,572,255	814,591	757,590	1,196,799	1,368,699
Exports . . .	647,232	773,419	1,027,328	970,289	965,782

Import duties in 1909, 597,656l.; in 1910, 340,387l.; in 1911, 878,357l.

The chief imports [redacted] textiles, provisions, hardware, spirits, drugs, and haberdashery. The chief exports are hides, yerba, oranges, tobacco, timber, and quebracho extract. Of the imports in 1911, textiles [redacted] the most important, 342,533l.; then foodstuffs, 80,524l. The British imports are considerable, but the exports to Great Britain are of little account.

The British trade passes to some extent through the territories of Brazil and the Argentine Republic. There are no direct imports into the United Kingdom from Paraguay; the [redacted] exports (mostly cottons and iron-work) direct to Paraguay amounted to 147,391l. in 1911 (according to the Board of Trade statistics). The "most favoured nation treaty" of 1884 between Great Britain and Paraguay [redacted] in force.

Communications.

In 1910 [redacted] vessels, chiefly Argentine and Brazilian, with 48,207 tons, entered [redacted] the port of Asuncion, and [redacted] with a tonnage of 57,614 cleared. The steamers [redacted] mostly 'liners' regularly visiting the port. Paraguay is served by sundry steamship companies, the most important of which is that of Nicholas Mihanovich, Ltd., of Buenos Aires.

There is a railway from Asuncion to Encarnacion, on the Rio Albo Paraná, a distance [redacted] miles. The change of gauge on the Paraguay Central Railway from 5½ ft. to the standard [redacted] ft. 8½ ins., [redacted] effected in [redacted] and the line [redacted] opened in July, 1911. A through train [redacted] Asuncion to Buenos Aires has recently (early 1913) been opened. Opposite Encarnacion [redacted] Posadas, to which an Argentine line is extended, and the [redacted] lines [redacted] connected by a ferry. The country roads are in general mere bullock tracks, and transport [redacted] and costly. [redacted] is a [redacted] telegraph at [redacted] of [redacted] railway; the national telegraph connects [redacted] with Corrientes in [redacted] Argentine Republic, [redacted] thus [redacted] world; there are altogether 1,960 miles of telegraph [redacted] telegraph [redacted] telephones is in operation at Asuncion. Paraguay

joined the postal union in 1881; in 1871 the number of post offices was 385. In 1909-1910 total number of pieces of mail matter handled 5,456,776, and the number of packages received by parcel post 10,518; number of telegraph messages, 191,571.

Money and Credit.

The banks in Paraguay are the Bank of the Republic, opened in June, 1890 (capital, 6,000,000 dollars gold); the Agricultural Bank, with a capital of 14,531,238 currency dollars advanced by Government; the Territorial Bank; the Mercantile Bank, with a capital of 20,000,000 dollars paper. A Conversion Fund has been accumulating for four years, and is deposited at the Bank of the Republic. The deposit was (Dec. 31, 1912) 996,355 dollars gold (190,2717.).

There is no gold and silver current and paper is the only circulating medium with the exception of a few small nickel coins. The average rate of exchange in 1912 has been 75 dollars to 12. The exchange fluctuates greatly and consequently transactions are frequently made in dollars gold at the nominal fixed rate of 5.04 dollars to the 12. for gold coin and 4 dollars per 12. for cheques or drafts.

Money, Weights, and Measures.

MONEY.—The *Peso*, or *Dollar* = 100 *Centavos*. Nominal value, 4s.

The *Quintal* = 101.40 lbs. avoirdupois.

„ *Arroba* = 25.35 „

„ *Fanega* = 1½ imperial bushel.

„ *Sino* (land measure) . . = 69½ Engl. sq. yards.

„ *Legua cuadrada* . . . = 12½ Engl. sq. miles.

The weights and measures of the metric system are also in general use.

Diplomatic and Consular Representatives.

1. OF PARAGUAY in GREAT BRITAIN.

Consul-General in Great Britain.—Alfred James. Appointed 1897.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, and Southampton.

2. OF GREAT BRITAIN in PARAGUAY.

Envoy and Minister.—Sir R. T. Tower, K.C.M.G., C.V.O. (residing in Buenos Aires).

Consul in Asuncion (Local rank of Secretary of Legation in Charge of Affairs in absence of Minister).—Francis A. Oliver.

PERSIA.

(IRAN.)

Reigning

Sultan Shah, born January 20, (27th 1315), succeeded his father, Muhammad Ali (who abdicated) July 16, 1909, under regency of Ali Reza Khan, Azud el Mulk, chief of the Kajar tribe. Azud el Mulk, the Regent, died September 22, 1910, and on the 11th of the same month the National Council elected Abu'l Kassim Khan, Nasser el Mulk, who then in Europe, his Regent arrived in Teheran February 8, 1911, and definitely assumed the functions of Regent by taking the oath before the National Council March 4.

Brothers of the Shah.—I. Izzat es Saltaneh. II. Muhammad Hassan Mirza, Valiahd (heir apparent), born February 19, (9th Shaban 1316). III. Muhammad Mehdi Mirza. IV. Mahmud Mirza.

Uncles of the Shah.—I. Malik Mansur Mirza, Shua Saltaneh, born 1880. II. Abu'l Fath Mirza, Salar ed Dowleh, born 1881. III. Abu'l Fazl Mirza, Azud es-Sultan, born 1883. IV. Husain Kuli Mirza, born 1894. V. Nâsred din Mirza, born 1896.

The Royal Family is very there thousands of princes and princesses, but the last official year-book only mentioned about a hundred.

The Shah of Persia—by his official title, 'Shâhshâh' (a corruption of Shâh), or King of Kings—was until 1906 absolute ruler within his dominions, and master of the lives and goods of all his subjects. The whole of the country being at their disposal, recent sovereigns of Persia able to a large private fortune, but that of the present occupant of the throne is reported to amount to barely two millions sterling, most of it represented by diamonds, the largest, the Deryâ i Nûr, of 186 carats, and the Tâj i Mâh, of 146 carats, and other precious stones, forming the jewels.

The present sovereign of Persia is the seventh of the dynasty of the Kajars, which took possession of the crown after a civil war extending fifteen years, from 1779 to 1791. The date of accession of each of the sovereigns of the dynasty was as follows:—

- | | |
|--|--|
| 1. Agha Muhammed 1794 | 5. Muzaffar-ed-din, son of Nâsred-din 1896 |
| 2. Ali, nephew of Agha Muhammed 1797 | 6. Muhammed Ali, son of Muzaffar-ed-din 1907 |
| 3. Muhammed, grandson of Fath Ali 1835 | 7. Sultan Ahmed, son of Muhammed Ali 1909 |
| 4. Nâsred-din, son of Muhammed 1848 | |

According to the Constitution the Shah must belong to the and his must be eldest son, or male heir in succession, whose mother was a Kajar princess.

Government.

The form of government in Persia is to the year 1906, the important features, similar to that of Turkey. The Shâh, the limit imposed by the religion, was an absolute ruler, generally regarded by the people as the vice-regent of the Prophet. In 1906, however, the Persian people demanded representative institutions, and in January,

1906, the Government announced that the Shâh had given the rescript of August 5, 1906, decided that the National Council consist of and be elected by members of the reigning dynasty (princes and kajârs), clergy, chiefs, nobles, landowners, merchants, and tradesmen. An ordinance of September 10, 1906, fixed the number of members (80 for Teheran and for the provinces), and early in October elections were held. On October 7, the National Council (or as many of its members could be got together) met, chose a president, and welcomed by the Shâh, whose speech read before it. A further rescript dated December 30, 1906, signed by Muzaffar-ed-din, and countersigned by the Vali-Ahd, and by the Grand Vizier, deal with the decree of August 5, 1906, and the powers and duties of the National Council, besides making provision for the regulation of its general procedure by the National Council itself. The number of members limited to 156, but could be raised to 200; members were to be elected for years; would meet annually October (14th Mizan), and have immunity from prosecution, except with the knowledge of the National Council. The publicity of their proceedings (except under conditions accepted by the National Council) secured. Ministers (or their delegates) could appear and speak in the National Council, and would be responsible to that body which had special control of financial affairs and internal administration. Its sanction would be required for all territorial changes, for alienation of State property, for the granting of concessions, for the contracting of loans, for the construction of roads and railways, and for the ratification of all treaties, except such in the interest of the State require secrecy.

There to be a Senate of members, 30 to be appointed by the Shâh, and 30 to be elected on behalf of the National Council, 15 of each class being from Teheran, and from the provinces. Provision made as procedure in case of difference of opinion between the National Council and the Senate. But no Senate was actually ever elected.

By a rescript of February 11, Muhammad Ali Shah confirmed that of December 30 which he had signed as heir apparent; on October 8, 1907, he signed the final Constitution, and on November 12 before the House took the prescribed oath.

The National Council not completed until the end of 1907; the first Parliament dissolved June 23, 1908, the Parliament building partly demolished and sacked by military, and decrees issued announcing the abolition of the National Council. Insurrections broke out in many places, but only in June 1909, when Nationalist forces marching upon Teheran, the re-confirmed the Constitution of 1906 and (July 1) signed a revised ordinance concerning elections. The nationalists entered Teheran July 18, when the Shah fled to the legation and abdicated (July 16). A provisional government then formed and a council of nationalists constituted advise the Cabinet. The Vali-Ahd proclaimed Shah; Azud el Mulk Regent. Under the revised electoral law the number of members of the Majlis is (15 Teheran). Elections began in August. Three months later (November 15, 1909) the Parliament was opened by the Shah, but only members were present. On December 24th, 1911, the Nasr-el-Mulk issued a Rescript declaring Session ended, but no mention made of elections in the future. H. left Persia for Europe June 11, 1912, nominally short leave of absence. In August, 1912, a Committee of former Deputies formed to consider question of new elections. The Majlis, as they were unable to the which elections be the question of forming a Majlis has

more █ dropped (November, 1912). The executive government █ carried on under a Cabinet composed of eight members (January 16, 1913):—

Premier.—Ala-es-Sultaneh.

Minister for Foreign Affairs.—Vosukh-ed-Dowleh.

Minister of Interior.—Fin-ed-Dowleh.

Minister of Education.—Mushir-ed-Dowleh.

Minister of Posts and Telegraphs.—Murteshah-ed Dowleh.

Minister of Justice.—Momtaz-ed-Dowleh.

Minister of War.—Mustaufil Mamalik.

Minister of Finance.—Kavamo Sultaneh.

The country is divided into thirty-three provinces, which are governed by governors-general, who █ directly responsible to the central Government, and █ nominate the lieutenant-governors of the districts █ prized in their █ governments-general. Some of the governments-general are very small, and do not bear subdivision into districts, &c. ; others █ very large, and comprise several provinces. Governors-general and lieutenant-governors are generally called Hâkim, the former █ often have the title of Wâli, Fermân Fermâ, &c. A lieutenant-governor is sometimes called Nâib el-Hukûmah ; █ of █ small district is a Zâbit. Every town has a mayor or chief magistrate called Kalântar, or Darogha, or Beglerbegi. Every quarter of █ town or parish, and every village, has █ chief who is called Kedkhodâ. These officers, whose chief duty is the collection of the revenue, are generally appointed by the lieutenant-governors, but sometimes elected by the citizens. Most of the governors have a vizir or █ pîshkâr, █ of experience, to whom are entrusted the accounts and the details of the government. The chiefs of nomad tribes are called Ilkhânî, Ilbegi, Wâli, Serdâr, Sheikh, Tushmâl ; they are responsible for the collection of the █ the governors of the province in which their tribe resides.

A law of May, 1907, provides for the election of rural and town councils. In these elections practically all subjects have a right to vote, and the councils will be in direct communication with the National Council.

August 31, 1907, Great Britain and Russia agreed between themselves to limit █ spheres of █ respective interests in Persia to the Persian provinces adjoining the █ frontier on the █ hand, and █ frontier on █ other. █ respect the integrity and independence of Persia, but, █ time, contemplate █ necessity of financial con█ in conformity with the principles █ the agreement. The approximate █ population, and customs revenue of each of the three spheres █ given as follows :—

—	Area sq. miles	Population	Net Revenue Customs
British sphere	137,000	600,000	\$ 50,000
Russian sp█	305,000	6,000,000	805,000
Neutral sph█	188,000	1,910 █	180,000

Area and Population.

According to the latest and most trustworthy estimates, the country—extending for about 700 miles from north █ south, and for █ from █ west—contains █ area of 623,000 square miles. A █ portion █ █ absolute desert, and the population █ everywhere so scanty █ to exceed, on █ average, fifteen inhabitants █ square mile,

The population now is estimated at about 9½ millions.

The number of Europeans residing in Persia does not exceed 1,200. There are just ■■■ British subjects resident in Persia (exclusive of British Indians).

The principal cities of Persia are—Teheran, with 280,000; Tabriz, with 200,000; Ispahân, with 80,000; ■■■ and Karmân, with 60,000; Yezd, with 45,000; Bârfurûsh and Shîrâz, with 50,000; Hamadân, Kazvin, Kom, Kashân, Resht, each with 30,000 to 40,000 inhabitants. Of the nomads 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Balûchis and Gipsies, 234,000 Lurs.

Religion.

Of the population about 8½ millions are Mahometans of the Shî'ah sect, and 850,000 of the Sunnî sect; 10,000 ■■■ Parsis (Guebres), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians.

The Mahometans of the sect called Shî'ah differ to ■■■ extent in religious doctrine, and ■■■ in historical belief, from the Moslems of the Turkish Empire, who ■■■ called Sunnî. The Persian priesthood (ulemâ) ■■■ very powerful, and works steadily against all progress coming from Europe. Any person capable of reading the Koran and interpreting its laws may ■■■ ■■■ priest (mullâ). As soon as such a priest becomes known for his just interpretation of the divine law, and for his knowledge of the traditions and articles of faith, he is called a mujtahid, or chief priest. There ■■■ many mujtahids in Persia, sometimes several in ■■■ town; there are, however, only four or five whose decisions are accepted ■■■ final. The highest authority, the chief priest of all, is the mujtahid¹ who resides ■■■ Kerbela, ■■■ Baghdâd, and some consider him the vicerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Sheikh-ul-Islâm, chief judge, and the Imâm-i-Jum'ah, chief of the great mosque (Masjed-i-Jâm'ah) of ■■■ city, are appointed by Government. Under the Imâm-i-Jum'ah ■■■ the pish namâs or khatib (leader of public prayers and reader of the Khutbeh, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavallî (guardian of the mosque); this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have ■■■ endowments (wakf), and out of the proceeds of these ■■■ provided the funds for the salaries of the priests attached to them. The shrines of ■■■ favourite saints ■■■ so richly endowed as to be able ■■■ keep ■■■ immense ■■■ of priests, servants, and hangers-on.

The Gregorian National Armenians form two dioceses, each under a bishop. One bishop resides at Tabriz, the other at Ispahân. There ■■■ also a few thousand Roman Catholic Armenians in Persia who have a bishop ■■■ their ■■■ rite ■■■ Ispahân, the bishop of the Latin rite residing at Urumiah. There ■■■ a wide tolerance exercised towards Armenians and Nestorians, Jews, and ■■■ in cities where Europeans reside; in other places, however, they occasionally ■■■ oppression from Mussulmans belonging to the lower classes.

Instruction.

In recent years the educational question has played a prominent part in Persia. Many schools of various degrees, entirely ■■■ European lines, have been established; the Ministry of Education has undergone radical reforms;

¹ ■■■ last holder ■■■ officiated on ■■■ May 28, 1895; ■■■ has yet been ■■■ and four or five ■■■ functionaries ■■■ affairs, each one striving ■■■ gain supremacy. The one who was ■■■ the point of acquiring ■■■ ■■■ November, 1911.

the Educational Council recently created is doing very useful work ; female education has been greatly advanced. It is said that there are now 100 schools in Persia with an aggregate of 10,000 pupils of both sexes.

There are many colleges (medresah), supported by public funds, in which students are instructed in religion, Persian and Arabic literature, as well as in a certain amount of scientific knowledge, and many schools for children, and private tutors are very common, being employed by families who have the means. A polytechnic school with a number of European professors, opened in Teheran in 1849, has done much towards introducing the knowledge of Western languages and science into Persia, and four French professors recently engaged for work at the college. There are also military colleges at Teheran and Tabriz. A German school, with an annual subsidy of 2,400*l.* from the Persian Government and 1,000*l.* from Germany, was opened in 1907. Private subscriptions raised in Germany paid for the erection of a fine building with class-rooms for 700 pupils, and suitable quarters for five German teachers and their families. There are also twelve Persian teachers. It has about 100 pupils. There is also a French school supported by the Alliance Française. But the bulk of the population is taught only the Korân. A 'political college,' Medresah-i Siâsi, now having 80 pupils, was opened in 1900, and prepares candidates for service in the Foreign Office, which pays 75,000 krane per annum for its maintenance.

It has been decided to send Government students to various European countries ; the students are chosen from the ablest Persian young men, who must be advanced in their studies in Persia, and have to pass a competitive examination so as to be accepted as Government students. Each one learns a profession designated by the Government, and an official is sent with them to look after them and watch their progress and make reports. Thirty Government students have already arrived in France, and there are several in England. These students are the Government 550 tomans each per annum and are looked after by the 'Union Franco-Persan' in Paris.

Justice.

Justice is administered by the governors and their representatives, and by the Sheikh-ul-Islâm and the priesthood. The former administer justice according to the Urf, the unwritten or customary law ; the latter according to the Shar', the written or divine law.

The dispensation of justice is always summary. In May, 1888, the Shah published a proclamation stating that henceforth no subject would be punished except by operation of law, and all subjects had full liberty of person and property. But another proclamation published in June annulled the first as far as regards liberty of property.

Finance.

In May, 1911, Mr. Morgan Shuster, accompanied by several American assistants, who had been loaned to Persia by the United States Government to reorganise the financial administration of the country, arrived in Teheran and took up his duties as *Treasurer-General*. He resigned this position and left Persia on January 8, 1912. In June, 1912, the Belgian Administrator General of Customs, M. Mornard, was appointed to fill the vacant post, and was given a five years' contract as *Treasurer-General*. Every important centre has a Belgian controller of finances, while the most important towns have a native.

The revenue of Persia has been affected by fluctuations in the value of silver. The revenue for 1910-11 was 140,000,000 *krane*.

equivalent to 2,600,000*l* at the current exchange. Of this by far the largest item is the *malvat*, proceeds of crown lands and land tax, which is 1 million 100,000*l*. The net receipts for passports are 2,873,687 krāns.

The expenditure in November, 1903, has been greatly reduced, and the Customs tariff, which is in force February 14, 1903, together with the improved system of administration and control, having increased the revenue by a considerable amount, estimated at 150,000*l* to 200,000*l* per annum, it was thought the expenditure would not exceed the receipts, but disorders and revolution have upset all arrangements, and expenditure still exceeds income. The Foreign Office costs about 2,600,000 krāns, but of other expenditures there is no data.

More than half of the revenue consists of payments in cash or kind raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by tax-assessors (*mumayyir*) appointed by the Government. Almost the entire burthen of taxation lies upon the labouring classes. The amount collected from Christians, Jews, and Parsis is very small. The other half of the revenue is from customs, posts, telegraphs, fisheries, mines, and other sources.

Approximate Gross Customs Receipts during year 1911-12 compared with years 1909-10 and 1910-11 —

	1909-10	1910-11	1911-12
	<i>£</i>	<i>£</i>	<i>£</i>
Azerbaigan (Tabriz)	128,37	141,416	142,69
Caspian ports —			
Astara	17,091	46,1	91,848
Gulien (Enzeli)	13,22	148,14	22,954
Masanderah (Meshedra)	36,53	34,177	44,232
Astrabad (Bender, etc.)	91,01	1,000	24,549
Khorassan (Meshed)	10,794	14,449	76,27
Southern ports			
Bushire	82,292	65,729	91,000
Bunder Abbas	15,407	39,146	37,568
Arabistan	40,900	61,497	64,864
Post (Tehran)	114,200	114,810	11,711
Post (Tehran)	20,013	43,223	24,45
Total	723,752	713,211	461,048

The debt of Persia amounts to about 6½ millions, made up thus: To Russian Government, 3,300,000*l*; to British Government, 320,000*l*; to Russian Bank, 1,160,000*l*; to English Bank, 690,000*l*. Another loan, 1,250,000*l* at 5 per cent, floated in London, July, 1911, issued at 95½. In 1912 further loans of 250,000*l* granted by England and Russia (half the total amount each), which are payable from the customs receipts of the South and North respectively. This is exclusive of compensation claimed by Russian, British, and French subjects for losses sustained, which amounts approximately to 340,000*l* (November, 1912).

ARMY

The Persian army is of Oriental type, and is irregularly recruited. European mercenaries of various nationalities have been employed from time to time, but have not done much. Certain units are supposed

to furnish battalions, and each of the provinces several battalions. The tribal system prevails, the tribe furnishes 1, or sometimes 2 battalions, usually under their own chiefs. Christians and Jews pay a tax, and cannot be called on to serve. The *asak*, or regular troops, consist, according to official lists, of 79 battalions of infantry, 23 batteries of artillery, and a battalion of pioneers, but whether these units actually exist is uncertain. The strength of battalions is, nominally, from 400 to 800, and the batteries have from 4 to 8 guns. The total strength of the regular troops does not, it is believed, exceed 60,000 men, of whom only about half are present with the colours, though the official lists indicate a much larger number. The irregular troops amount to about 50,000 distinct and tribal horse, and an uncertain number of footmen, all badly, or indifferently, armed, and of little value.

There is also in the capital the "Cossack Brigade," consisting of 3 squadrons, 1 small battalion of infantry and a horse battery of 4 (Krupp) guns. The total strength does not exceed 2,000 of all ranks. The brigade is Persian, organized and trained by Russian officers.

In July, 1912, Russia obtained the formal consent of the Persian Government to the formation of a similar Cossack Brigade at Tabriz under Russian officers. The consent of the Persian Government was given on a condition for the withdrawal of Russian troops in Azerbaijan.

In 1905 the *Asak* was reformed into 12 divisions under *sardars* (generals) directly responsible to the Shah. The strength of the divisions varied from 5,000 to 10,000 men.

During his stay in Persia Mr. Shuster formed the nucleus of a *gendarmerie* force, to assist in the recovery of taxes. This force was subsequently taken over by a body of Swedish officers under Colonel Hjalmarsen, lent to the Persian Government by the Swedish Government. There were at present (November, 1912) 19 Swedish officers in Persia and about 2,500 men.

NAVY

The navy consists of eight vessels, all doing service for the customs department, two built at Bremerhaven in 1884—the *Percepole*, a steamship, 600 tons, 450 h p, armed with four 3 inch Krupp guns, the *Susa*, the *Karun*, 30 h p, an old Belgian steam yacht, the *Muzaffar*, purchased in 1902, armed with two Hotchkiss guns, five launches of 12 h p, built at the Royal Indian Marine Dockyard, Bombay. Each has a French machine gun and cost 60,000 rupees (4,000 £).

Production and Industry.

Great quantities of wheat, barley, rice, fruits, gums, drugs, wool, cotton, &c., Persia produces much.

In 1908-09 the value of silk exports was 279,167 £. In 1910 it fell to 358,256 £ while in 1910-11 it has fallen to 352,021 £, rising again in 1911-12 to 380,875 £. The opium industry was steadily increasing, and the export of the drug valued at 450,014 £ in 1911-12. In 1909-10 exports valued at 851,907 £, and in 1910-11 263,399 £. The production of gums, chiefly tragacanth, is increasing. The export of tobacco is decreasing. Raw cotton exported to the value of 847,559 £ in 1908-09, in 1909-10, to 1,400,272 £, in 1910-11, to 1,407,608 £, and 1,479,278 £ in 1911-12. Wool exported to the value of 180,219 £ in 1909-10, 1910-11, 209,670 £, in 1911-12 230,469 £. The wool of Khorassan is the best, and much of it reaches Bradford via Batum. Persian carpets, of which there are many kinds, all made by hand. The export of carpets amounted to 968,818 £,

in 1909-10, 902,767½ in 1910-11, and 977,429½ in 1911-12. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman.

The mineral deposits of Persia are considerable, but great distances from shipping ports, want of good roads, and many parts scarcity of fuel and water, have prevented any development on a large scale. Mines of lead and copper exist in nearly all the provinces, and have been worked from ancient times, but there are many considerable deposits yet untouched. Some of the lead ores are argentiferous, but the precious metal is not extracted. Tin ore has been found in Azerbaijan, antimony, nickel, cobalt, in the desert region near Yazd, zinc near Tehrân, manganese and borax near Kermân, and there are numerous deposits of rich iron ore in several places, iron ochre is obtained from islands in the Persian Gulf, principally Hormuz, and coal of good quality near Tehrân, great quantities of the latter in South Eastern Persia are not worked. Salt pits are abundant. A naphtha-bearing zone extends along the western frontier from Kurdistan to the Persian Gulf, and traces of the oil have also been discovered in Northern Persia. Near Resht, a concession for working the former was granted to a British subject in June, 1901, and boring operations undertaken in 1902 and 1903 having proved the existence of oil, large works have been erected and pipes being laid from the wells to Muhamiah, the nearest Persian Gulf port. The turquoise has been mined near Nishâpur from an early age. The total revenues to the Government under the head of royalties and rents from mines are less than 16,000½ per annum.

Commerce.

The principal centres of commerce are Tabriz, Teheran, Hamadan, and Ispahân, the principal ports, Bender Abbas, Lingah, and Bushire on the Persian Gulf, and Astara, Enzeh, Meshed, Sar, and Bender Gox on the Caspian. On March 21, 1899, the Government abolished the farm system in Azerbaijan and Kermânshah, and one year later in all other provinces, establishing at the same time a uniform duty of 5 per cent *ad valorem* on imports and exports. However, the districts of Muhamiah (with imports and exports valued at about 300,000½ per annum), of the Kârdn River and of Kurdistan on the western frontier, that of Sistân on the eastern frontier, and some of the smaller ports on the Persian Gulf, were then not interfered with, and the greater part of the Persian Gulf pearl trade also escaped the authorities until the following year.

The commercial treaty with Great Britain made in 1857 provided for the 'most favoured nation treatment'. In October, 1901, a treaty between Persia and Russia was concluded, fixing a tariff, but this treaty expressly reserved 'the most favoured nation' treatment for the countries already enjoying it. The treaty was ratified in December, 1902, and the new tariff went into force February 14, 1903. A few days before, a treaty (ratified in May) was made with Great Britain, under which the duties levied on British imports will be the same as on Russian imports.

According to statistics published by the Minister of Customs the values of the imports and exports for the four years 1908-12 are as follows:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1908-09	7,449,681	5,524,243	1910-11	9,890,153	7,503,536
1909-10	8,248,565	7,480,619	1911-12	11,404,169	8,415,694

The following table shows (in millions of krāns) the values of chief imports into, and exports from, Persia in 1910-11 and 1911-12:—

Imports	1910-11	1911-12	Exports	1910-11	1911-12
	1000 Krāns	1000 Krāns		1000 Krāns	1000 Krāns
Cottons	129,076	178,764	Fruits	62,607	67,792
Sugar	121,506	129,010	Woolen carpets	45,188	46,871
Tea	24,132	81,043	Cotton	70,860	78,963
Gold silver	42,467	79,123	Fish	5,881	8,788
Do. coined	11,027	8,989	Rice	29,210	84,778
Petroleum	6,928	14,584	Gold and silver coined	33,085	37,045
Yarn	11,145	15,377	Gums	11,950	16,808
Flour	5,338	19,892	Opium	18,170	22,600
Woollens	14,958	8,888	Wool	10,483	11,528
Indigo and cochineal	8,426	8,067	Cocoons	16,897	17,988
Haberdasheries	6,426	8,810	Skins	15,126	15,575
Rice	3,828	3,217	Animals	7,417	9,747
Spices	4,810	3,761	Stuffs	4,624	6,754
Wool	2,378	1,804	Cottons	2,278	76,922
Animals	1,346	3,529	Hides	6,224	6,776
Matches	8,418	6,576	Silk	1,804	1,111
Silks	6,009	1,364	Wheat and barley	9,060	18,887
Tin, zinc and lead	939	2,580	Peas	4,811	3,080
Tobacco	2,079	6,475	Woollens	1,569	1,001

of silkworms	2,687	8,015	Eggs	1,290	1,682
and barley	1,404	1,391			
Alcohol, Wines and Beer	—	—			

In the years ending March 20, 1911 and 1912, the distribution of the trade of Persia mainly follows:—

Imports to	Imports		Exports	
	1910-11	1911-12	1910-11	1911-12
	£	£	£	£
Afghanistan	82,612	118,144	48,226	64,782
Germany	279,549	532,532	41,770	98,507
Austria-Hungary	216,956	180,739	978	1,604
Belgium	162,786	196,964	9,128	18,491
China	8,068	11,750	46,740	187,400
United Empire	5,848	14,096	100,804	128,185
France Colonies	2,798,303	4,414,070	748,257	1,107,407
Italy	278,476	239,788	262,020	51,812
Netherlands Colonies	58,637	43,046	79,499	207,655
Russia	30,680	29,038	182	3,177
Switzerland	4,391,184	5,865,953	5,244,528	5,686,596

Tonnage entered Bushire, Lingah, Bender Abbas, Muhamrah, and several smaller ports was: in 1910-11, 1,443,838 tons (1,151,622 British); in 1911-12, 1,667,814 tons (1,309,119 British). At Caspian ports in 1910-11, 818,421 tons, all Russian; in 1911-12, 826,965 tons, Russian.

There trade routes through Trebizond, through Rasht Meshed

to Russia, through Khorassan and [] to Afghanistan and India, and through Kermanshah to Baghdad.

Total trade between Persia and United Kingdom (in thousands of pounds) for 5 years:—

		1906	1909	1910	1911
Imports [] Persia to U.K.	£ 430	£ 430	£ 296	£ 744	£ 888
Exports to Persia from U.K.	£ 477	£ 351	£ 744	£ 888	£ 888

Money and Credit.

The [] in [] granted a concession to Baron Julius [] Reuter for [] formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank [] formed in the autumn of [] year, with the title "The Imperial Bank of Persia," and incorporated by Royal Charter granted by H.M. the late Queen, and dated September 2, 1889. The authorized capital is 4 millions sterling, which may be increased. The bank started with a capital of one million sterling, of which the greater part [] remitted to Persia at the then reigning exchange of 82-84. In consequence of the great fall in silver and the rise in the exchange, to 50 or more, the capital was reduced in December, 1894, to 650,000*l*. The bank has the exclusive right of issuing bank-notes—not exceeding 800,000*l*. without the assent of the Persian Government. The issue of notes [] the basis of the silver krān. In virtue of [] of the articles of the concession the cash [] for the first two years [] 50 per cent., and afterwards [] per cent. The bank had the exclusive right of working throughout the Empire the iron, copper, lead, mercury, coal, petroleum, manganese, borax, and asbestos mines, not already conceded. It started business in Persia in October, 1889, in April, 1890, took [] the Persian business of the New Oriental Bank Corporation (London), which had established branches and agencies in Persia in the summer of 1888, and [] branches [] Tabriz, Resht, Kazvin, Meshed, Isfahan, Yezd, Shiraz, Kerman, Hamadan, Sistan, Kermānshah, Bushire, Muhamrah, Ahvaz, Sultanabad, and Bombay; and agencies at several other towns. The mining rights were ceded to the Persian Bank Mining Rights Corporation, Limited, which [] formed in April, 1890, and went into liquidation in January, []. There is also established at Tehrān the Russian 'Banque d'Escompte,' formerly 'Banque des [] de Perse' (which is connected with the [] Bank and floated the loans of 1900 and [] Persia), and a highly paid [] permanently resides at Tehrān as Russian 'Financial Agent in Persia.' A concession for a National [] was signed, February 6, 1907. The capital [] this bank will be 15,000,000 tomans. It will have the right [] after the Imperial Bank's right [] expired. It has not yet (January, 1913) been established. In July, 1907, a concession [] granted for a German [] for a period of 30 years. The capital is fixed at 200,000*l*. It [] not yet (January, 1913) been established.

Communications.

A [] railway from [] to Shah Abdul-azim (six miles) was opened in July, 1888, [] in the hands of a Belgian [] 'Société [] fer [] tramways de Perse.' The river [] at the [] of []

Persian Gulf has been opened to foreign navigation as far as Ahwâz, and Messrs. Lynch & Co. are running a steamer on a fortnightly, with a subsidy from the British Government.

Until 1880 the only carriageable roads in Persia were Teherân-Kom and Teherân Resht, the former 91 miles, the latter about 100 miles, and on both mails and travellers were conveyed by carts. Since then good roads have been made from Tabriz to Julfa (Russian frontier), Kazvin to Hamadân, Meshed to Askabad, Kom to Sultanabad, and others. Mails and passengers are conveyed by carts on them and on other roads, but the latter, only slightly improved and being practically of a nature made them, are somewhat difficult for wheeled traffic. A concession for the construction of a cart road with the option of changing it later for a "chaussée," a macadamized road, from Kazvin to the Caspian was granted to a Russian firm in 1893, and the Russian Government having aided with capital and guarantee, construction began in 1897 and the road opened in August, 1898. The concession includes the road from Kazvin to Teherân, which has been open for wheeled traffic since 1880, and a branch from Kazvin to Hamadân. All these are in good working order now.

In 1900 Messrs. Lynch took over a concession granted to a Persian subject for a road between Ahwâz and Isfahan, with rights of levying tolls, and opened the road for traffic in the autumn of 1900. In 1903 Messrs. Lynch acquired the concessionary rights of the Imperial Bank of Persia for the roads Teherân-Kom-Isfahan, Kom-Muhamrah, and formed the "Persian Road and Transport Company," which started construction on the Kom-Isfahan section in the summer of 1904.

In virtue of another concession a Russian company has constructed a carriageable road from Julfa (Perso-Russian frontier) to Tabriz, with a view of extending it to Kazvin.

Persia has a system of telegraphs consisting of 6,312 miles of line, with 10,754 miles of wire, and 131 stations.

(a) 1,706 miles of line with 5,318 miles of wire worked by English staff, and form the 'Indo-European Telegraph Department in Persia,' a British Government department, established in virtue of a number of conventions from 1858 to 1901 between the British and Persian Governments. The last convention was for the construction and working by the British Government of a three-wire line from Kashan to British Beluchistan via Yazd, Kermân, and Bam. Telegraphic communication with India was effected in May, 1904. (b) 457 miles of line with three wires, 1,871 miles of wire between Teherân and Julfa on the Russo-Persian frontier, are worked by the Indo-European Telegraph Company, Limited, according to a concession of 1868. (c) About 3,600 miles of single wire lines belong to the Persian Government, and are worked by a Persian staff.

A regular postal service, established by an Austrian official in Persian employ, was opened January, 1877. Under it mails are regularly conveyed and from the principal cities in Persia. There is a weekly mail from Europe via Resht or Tabriz and Tiflis (letters to be marked 'Persia') and a weekly mail to India via Basmeh. There is a post office in every town. In 1900 a post office was joined to the Customs Department worked by Belgian staff. In August, 1909, posts and telegraphs were placed in charge of a Minister of Posts and Telegraphs, who is a member of the Cabinet, but as to the number of letters, postcards, parcels, &c. conveyed, the statistics are transmitted, very few statistics are obtainable. During the year 1911-12, 284,804,000 letters, postcards and newspapers, of which 8,992,800 were registered, were delivered in Persia, and there were 320,000 parcels delivered in Europe via Russia.

Money, Weights, MEASURES

The monetary unit is the krân, a silver coin, formerly weighing 28 nakhods (88 grains), then reduced to 26 nakhods (77 grains), weighing only 26 nakhods (71 grains) somewhat less. The proportion of pure silver before the new coinage (commenced 1877) 92 to 100 per cent, it was then fixed at 90, but occasionally coins with only 89½ have been turned out from the Mint. In 1874 a krân had the value of a franc, being equal to 1 l. The value of a krân is present (January, 1912) about 4½d, a 1 l. bill on London being worth 56 krâns.

The coins in circulation, with their values calculated at exchange 1 l. = 50 krâns, are —

Copper		Silver	
<i>Pal</i>	0 12d	Five <i>Shahs</i> = 10 <i>Pal</i> = ½ <i>Krân</i>	1 20d
<i>Shah</i> = 2 <i>Pal</i>	0 24d	Ten <i>Shahs</i> = ½ <i>Krân</i>	2 40d
Two <i>Shahs</i> = 4 <i>Pal</i>	0 48d	One <i>Krân</i> = 20 <i>Shahs</i>	5 00d
Four <i>Shahs</i> = (1 <i>Abbas</i>)	0 96d	Two <i>Krâns</i>	9 60d
		Five <i>Krâns</i>	24 00d

In consequence of an excess of coinage by a former mint master the copper money greatly depreciated in value since 1896 and is circulating at less than its price of copper, viz. at 83 copper shahs (weighing about ½ lb) to 1 silver krân (4½d). The Government then decided to introduce a nickel coinage instead, great quantities of five and ten centimes pieces, of same size and weight as those current in Belgium, and of the nominal value of ½ and ½ krân, were coined at Brussels and put into circulation in the Autumn of 1900, the copper coinage being withdrawn, and of these nickel pieces nearly five million krâns face value are in circulation (January, 1911).

Gold coins are ½ *Toman*, ¼ *Toman*, 1 *Toman*, 2, 5 and 10 *Tomans*, but they are not in circulation as current money, because of their ever varying value in *Krâns* (silver) and no coins of the higher values have been struck for some years. A *Toman* in silver is the equivalent of 10 *Krâns* (now worth 5d), but a gold *Toman* has a value of 22 *Krâns* (7s 4d).

Accounts are reckoned in *dinârs*, an imaginary coin, the ten thousandth part of a *toman* of ten krâns. A krân therefore = 1,000 *dinârs*, a *shâh* = 50 *dinârs*.

The unit of weight is the *miskâl* (71 grains), subdivided into 24 nakhods (2 grains) of 4 gandum (74 grain) each. Sixteen *miskâls* make a *sir*, and 1 *sir* make 1 *abbâsî*, also called *wakkeh*, *kervânkeh*. Most articles are bought and sold by a weight called *batman* or *man*. The most frequently in use are —

<i>Man-i-Tabrîz</i> = 8 <i>Abbasîs</i>	= 640 <i>Miskâls</i> = 6 lb
<i>Man-i-Noh Abbasî</i> = 9 <i>Abbasîs</i>	= 720 " = 7 30 "
<i>Man-i-Kohneh</i> (the old man)	= 1,000 " = 10 14 "
<i>Man-i-Shâh</i> = 2 <i>Tabriz</i>	= 1,280 " = 12 98 "
<i>Man-i-Roy</i> = 1 "	= 2,560 " = 25 96 "
<i>Man-i-Bender Abbasî</i>	= 840 " = 8 52 "
<i>Man-i-Hâshemî</i> = 16 <i>Mans</i> of	720 " = 116 80 "
Corn, straw, coal, etc., sold by <i>Kharvâr</i> = 100	= 649 142 "

The unit of measure is the *zar* or *gaz*; the standard several are in use. The common one is of 4 inches; another, used in Azerbaijan,

equals 44 ■ inches. A farsakh theoretically = 6,000 zar of 40·95 inches = 3·87 miles. Some calculate the farsakh ■ 6,000 zar of 44·09 inches = 4·17 miles.

The measure of surface is jerib=1,000 to 1,066 square ■ of ■ 95 inches=1,294 to 1,379 square yards.

Diplomatic Representatives.

1. OF PERSIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Mirza ■■ Khan Mushu el Mulk.

Councillor.—Mirza Abdul Ghaffar Khan.

First Secretary—Mohamed Ali Khan Ehtesham Homayoun.

Third Secretary.—Mirza Gholam Ali Khan Ardelani.

Consul-General.—H. S. Foster.

2. OF GREAT BRITAIN IN PERSIA.

Teheran: Envoy, Minister, and Consul-General.—Sir W. B. Townley, K.C.M.G. (1912).

Councillor.—C. Alban Young, M.V.O.

Secretaries—W. Garnett and Sir Coleridge A. F. Kennard, Bart.

Military Attaché.—Captain William Fordham

There ■■ Consular representatives at Teheran, Tabriz (C.), Resht, Bushire (C.G.), Bunder Abbas, Meshed (C.G.), Isfahan (C.G.), Sistan, Kerman, Muhamrah, Shirâz, Kermanshâh, Hamadân (native agency), Yezd, Ahwaz, Turbat-i-Haidari, Sultanabad.

PERU.

(REPÚBLICA DEL PERÚ.)

Constitution and Government.

The Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued a declaration of independence July 28, 1821; but it was not after a war, protracted till 1824, that the country gained actual freedom from Spanish rule. The Republic is politically divided into departments, and the departments into provinces. According to the Constitution proclaimed on November 10, 1860, the legislative power is vested in a Senate (52 members) and a House of Representatives, (116 members) the latter composed of deputies of the provinces, in the proportion of one for every 30,000 inhabitants or fraction exceeding 15,000 and the former of representatives in the proportion of four for each department which has more than eight provinces; three for each department which has less than eight provinces and two than four; two for each department which has less than five and one than one; one for a department having only one province; and one for the littoral province of Callao. Senators must have an income of 1,000 soles (100*l.*) a year or belong to a scientific profession; and deputies 500 soles (50*l.*) a year, or belong to a scientific profession. Senators and deputies are elected by direct vote. Every two years one-third of the members of each chamber, as decided by lot, retire. Congress meets annually on July 28, and for 90 days only. It may be summoned as often as necessary, but no extraordinary session may last more than 30 days.

The executive power is entrusted to a President, elected for 4 years and not re-eligible till after another 4 years. He receives 80,000 soles (8,000*l.*) a year and 18,000 soles (1,800*l.*) for travelling. There are two Vice-Presidents, who take the place of the President only in case of his incapacity, and they are elected for four years. The Vice-Presidents receive no salary as such. The President and Vice-Presidents are elected by direct vote.

President of the Republic.—Señor Guillermo Billinghurst; installed September 24, 1912 until 1916.

The President exercises his executive functions through a Cabinet of six ministers, holding office at his pleasure. The ministers are those of the Interior, War and Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 6,000 soles (600*l.*) a year. None of the President's acts has any value without the signature of a minister.

The departments are divided into provinces (96 in all), and these are subdivided into districts (801 in all). Each department is administered by a Prefect, and each province by a Sub-Prefect. Municipal councillors are elected by direct vote, and foreigners are eligible.

Area and Population.

There has been an enumeration of the population in recent years. The census of 1906 put the number of inhabitants at 2,880,881, about 18.8 per cent. white, 57.6 per cent. negroes, 19 per cent. Indian, chiefly Chinese. An estimate in 1908 gives the population for that year as 4,500,000. The population of the capital, Lima, according to the municipal

of 1908, 140,884, Callao 31,000, Arequipa 35,000 40,000, Cuzco 10,000 15,000, Iquitos district 12,000, Ayacucho 14,346, Huara 7,646, Huacho 6,288.

The Republic (including Tacna) is divided into departments and 2 provinces (Callao and Moquegua), the of which, according estimates supplied by the Lima Geographical Society, given below with the population, according to the census returns of 1876 (the latest one) and estimate for 1896. The estimate, however, to be accepted as satisfactory, grave doubts being entertained whether the population is increasing. The Peruvian Government of opinion that the population under 3,000,000; the London Stock Exchange has taken 4,000,000 as a basis for computation:—

Departments	Area : English square miles	Population		Pop. per square mile.
		1876	1896	
Piura	16,825	135,615	213,000	12.7

Total	605,722	2,660,381	4,669,000	6.6

¹ Province of Lima, pop. (1908) 172,927. ² Callao and Moquegua provinces, departments.

In 1912 a political and geographical department created— de Dios.

There are, besides, many uncivilised Indians, but their numbers are absolutely unknown. The Peruvian Government encourages immigration of properly qualified persons, but would-be settlers entirely destitute of capital mentioned as undesirable.

As a result of the with Chile, the latter country annexed the province of Tarapacá. The Chileans have also, under the treaty signed in 1883 and 1884, occupied the provinces of Tacna and Arica. A popular vote could in have decided to which country they belong, but owing to failure of negotiations for arriving at a *modus operandi*, decision deferred. In 1913, however, agreement between the two countries was accepted, and a Treaty of Commerce and Navigation signed.

As to the boundary dispute with Bolivia an arrangement has been come by negotiations between Peru. line

between them — fixed from the mouth of the Heath to that of the Yaverija. Those with Colombia and — referred to the King of Spain. The question at issue concerned the possession of — 100,000 square — of land rich in rubber, timber, and probably gold lying about the head waters of the Amazon. The King, — the evident unwillingness of Ecuador to decide the dispute by arbitration, renounced — functions — arbitrator in November, 1910. The United States then intervened, and hostilities — for the moment averted by the agreement of the disputants to accept the mediation of the United States, Argentina, and Brazil. A — arrangement has been made with Brazil — to boundary, favourable, on the whole, to Peru.

The region north of the Marañon, from the Pongo de Manseriche — claimed by Ecuador and Colombia and Peru. This region formed in the Spanish Colonial days the Comandancia de Maynas, and — allocated to the Virreynato of Santa Fé, then to the Audiencia of Quito, and for religious and ecclesiastical purposes subject to the Archbishop of Lima. It has been occupied by Peru — 1840.

Religion.

There is — Roman Catholic archbishopric (Lima, dating from 1545), 8 suffragan bishoprics and — Apostolic Prefectures. By the terms of the Constitution there exists absolute political, but not religious freedom, the charter prohibiting the public exercise of any other religion than the Roman Catholic, which is declared the religion of the State. But practically there is — certain amount of tolerance, there being Anglican churches and missionary schools in Callao, Lima, Arequipa, and Cuzco. The churches and convents — the property of the State. The State pays 16,000L. annually for the purposes of public worship, including 300L. for missions, (though this sum has not been paid since 1907). In 1897 an Act — passed enabling non-Catholics to contract civil marriages. In 1908 — Act was passed giving still greater facilities for the marriage of non-Catholics.

Instruction, Justice.

Elementary education is by law compulsory for both sexes, but the law is not enforced. It is free in the public schools that are maintained by the municipalities. In 1911, there were in Peru 2,162 primary schools with — attendance of 146,400; the number of children who ought to have attended — 407,987. There were — 2,760 teachers. There were (1912) 27 colleges in the republic, with 4,674 pupils. For elementary education (1912) 245,810L. were appropriated, and for secondary education 80,523L. High schools are maintained by the Government in the capitals of the departments, the pupils paying — moderate fee. There is in Lima — central university, called 'Universidad de San Marcos,' founded by Charles V. in 1551; it has faculties of jurisprudence, literature, medicine, political science, and theology. There are also universities at Arequipa, Cuzco, and Trujillo. Lima possesses — school of mines and civil engineering, created in 1874, with good collections and laboratories, a national agricultural school, and — school of — trades recently established. There are — in the capital and in some of the principal towns private high schools under the direction of English, German, — — — — — There are also — military and — naval school. Lima — — — public library, besides that of the university — school of mines.

Justice is administered in the Supreme Court — Lima composed — 11 judges and — fiscales, — in Superior — Minor Courts — Lima — — other judicial districts. — judges of — Supreme Court are chosen by Congress

from lists of ■■■■ presented by the Government; those of the Superior Courts ■■■■ of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

Finance.

For the collection of the dues on alcohol, opium, tobacco, and stamps, ■ contract ■ made in 1900 with a syndicate formed for the purpose (Compañía Nacional de Recaudación). The syndicate retains 60,000% for expenses of collection, and also 6 per cent. of the profits, and hands ■ the remaining ■ per cent. to the Government. The contract with the Company expired December 31, 1911. In March, 1912, negotiations ■ entered on with a new company, the contract with the old company remaining in force until its functions ■ taken ■ by the new organisation. The old company collected 1,623,433% in 1911.

In 1896 salt ■ declared to be a Government monopoly, the proceeds from which were to be devoted exclusively to the ransom of Tacna and Arica, but the money thus obtained has been, and ■ to be henceforth, used for the guarantee of loans raised by the Government. The administration of this branch of revenue has also been farmed to a company (Compañía Salinera Nacional). This company collected 131,630%.

The ■ and expenditure for 5 years (ended May 31) ■ ■ follows in soles (10 soles = 1%).

■ ■ the ■ Corporation ■ ■ September 11, ■

■ Foreign ■ of Peru is stated ■ amount to 5,868,788%, ■ ■ 2,180,000%, represents the capitalized value of annuities of 80,000%. and ■

remainder ■■■■ for wharves and docks, 80,000*l.*, and loans of ■■■■ and 1906 amounting ■■■■ 900,000*l.* ■■■■ per ■■■■ interest. The internal ■■■■ of Peru consist of a debt amounting to 2,660,645*l.* ■■■■ 1 per ■■■■ interest, ■■■■ a non-interest-bearing debt of 471,355*l.* In 1912 it ■■■■ estimated the Government owed tradesmen ■■■■ merchants in Lima approximately 2,500,000*l.*

Defence.

Military service in Peru is compulsory and universal. The terms ■■■■ years in the active army (4 ■■■■ the cavalry), 7 years (or 6) in the first reserve, ■■■■ in the second reserve, and 15 years in ■■■■ National Guard. In ■■■■ the army consists of 5 battalions, 7 squadrons, ■■■■ batteries, &c. Total establishment about 6,500 of ■■■■ ranks. The infantry ■■■■ armed with ■■■■ rifle, model of 1891, and the cavalry have the Mauser carbine. The country is divided into five military districts. Total strength of police force, 5,408 (2,413 civil guards, 1,900 mounted police, 1,095 foot police).

The Peruvian navy ■■■■ consists of ■■■■ vessels: the *Lima*, ■■■■ cruiser of 1,700 ■■■■ displacement, which has been re-boilered and is to be re-armed; the *Iquitos*, transport (used also ■■■■ training ship for boys); the *Chalaco*, ■■■■ small steamer used ■■■■ transport or dispatch boat. The cruisers, the *Almirante Grau* and the *Coronel Bolognesi*, 3,200 tons and ■■■■ knots speed, were launched at Barrow in April 1906. In 1911 the old French armoured cruiser *Dupuy de Lome* ■■■■ purchased, and renamed *Alfonso de Ugarte*. She is of 6,400 tons displacement; armament, 2 7·6 inch, ■■■■ 6·4 inch; ■■■■ inches. The horse-power is 13,000 and in 1904 when the ship ■■■■ re-boilered she made 22 knots speed.

Agriculture ■■■■ Industry.

The chief agricultural productions of Peru are cotton, coffee, and ■■■■ For the extension of cotton-growing, irrigation works ■■■■ in progress. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation ■■■■ done much useful colonising work. Coffee is also grown ■■■■ the Huanuco district. The ■■■■ to the Corporation comprises about 2,750,000 ■■■■ but the labour ■■■■ transport difficulties in the tropical forest ■■■■ serious; much ■■■■ half the ■■■■ conceded for colonisation ■■■■ yet occupied. The ■■■■ industry is carried on chiefly in the coast region. The total ■■■■ devoted to sugar cultivation is about 200,000 acres, of which about half is planted with ■■■■ In 1911 128,786 ■■■■ exported. Cocoa cultivation ■■■■ extending, about 200,000 ■■■■ having ■■■■ recently planted in the Perené region. ■■■■ extensively grown, the annual production being about 80,000 tons. There are about 20 rice mills in ■■■■ country. Tobacco, wines and spirits, wheat, olives, ramie, and maíz, are ■■■■ produced. In ■■■■ the Government created a tobacco monopoly ■■■■ manufacture, importation and sale of tobacco. Total annual output about 2,200,000 pounds. ■■■■ culture is being ■■■■ in ■■■■ region. The ■■■■ important coca growing district is in ■■■■ province of Otusco ■■■■ depart-
ment of La Libertad, where there are several coca ■■■■. Cocaine is ■■■■
factured in Lima, Otusco, and several other towns. Besides, there are in the
country dyes, ■■■■, and other medicinal plants. There is a large export
■■■■ alpaca, sheep, ■■■■ wool. Thousands of ■■■■ of healthy and
fertile land ■■■■ unsurpassed beauty on the eastern slopes ■■■■ Andes are
■■■■ for colonisation, ■■■■ ■■■■ be opened up. ■■■■
■■■■ large quantities and shipped ■■■■ the Amazon from Iquitos.

The [redacted] deposits [redacted] Huanillos, Punta Lobos, and Pabellon de Pica, which had been delivered [redacted] [redacted] Peruvian Corporation, reverted [redacted] the [redacted] Government [redacted] February 2, 1901; they contained [redacted] or 50 thousand tons of guano; but those on [redacted] island of Lobos de Afuera, and [redacted] places [redacted] coast, still remain in possession of the Corporation. In 1910 the Corporation exported 61,575 tons; in 1911, 69,587 tons.

The mineral resources of Peru comprise gold, silver, copper, lead, zinc, nickel, iron, quicksilver, cobalt, bismuth, molybdenum, vanadium borax, coal, salt, sulphur, and petroleum, besides gypsum, kaolin, ochre, and other valuable earths. Gold, silver, and copper are worked chiefly in the Cerro de Pasco region. The most active mining companies are American, but Peruvian, English, and Franco-Peruvian companies [redacted] also at work. The mineral output for 1910 amounted to the value of 3,378,212*l*. For 1910 the gold output was valued at 96,612*l*. Value of metal exports in 1911, 1,860,189*l*.

There [redacted] 1,000 looms employed in cotton factories consuming 1,600,000 kilos. of cotton and turning out about 15 million yards of cloth annually.

Commerce.

The value of the trade of Peru in 5 years (exclusive of Department of Loreto) has been [redacted] follows (10 soles = 1*l*.):—

	1907	1908	1909	1910	1911
	<i>£</i>	<i>£</i>	<i>£</i>	<i>£</i>	<i>£</i>
Imports . .	5,614,787	5,296,025	4,556,590	4,631,280	6,371,888
Exports . .	5,747,732	5,375,712	6,184,370	6,408,282	7,422,027

The values of the total exports of the principal articles from Peru in 1910 and 1911 are shown by the following table:—

Articles	1910		Articles	1910	1911
	<i>£</i>	<i>£</i>		<i>£</i>	<i>£</i>
Coca . . .	19,768	55,002	Minerals . .	6,838,661	1,087,769

Argentina . . .	11,363	8,767	3,014	—

[redacted] receipts in [redacted] amounted to 1,211,080*l*.

Under the treaty of 1825 there is reciprocal freedom of commerce and navigation between the United Kingdom and Peru.

Trade between Peru and United Kingdom in thousands of pounds
■ years :—

	1903	1909	1910	1911	1912
Imports from Peru to United Kingdom	2,990	3,043	3,688	3,150	3,298
Exports ■ Peru ■ United Kingdom	1,327	1,330	1,715	1,592	1,414

Shipping and Navigation.

At Callao there entered, in the foreign trade, in 1911, 762 vessels of 1,574,213 tons, and cleared 575 of 1,373,372 tons. The following steamship lines trade ■ Peruvian ports :—Pacific Steam Navigation Company, Compañía Sud-Americana de Vapores, Lamport and Holt Line, Gulf Line, Merchants Line (the New York and Pacific Steamship Company), Kosmos Line, Roland Line, Toyo Kisen Kaisha (the Oriental Steamship Company), ■ Chai Line, Barber and Co., Inc: Line, Hamburg-Amerika Line; Compañía Peruana de Vapores y Dique del Callao (Peruvian Steamship and Dock Company of Callao). Since 1886, foreign sailing vessels may not engage in Peruvian coasting trade; but foreign steamers, with special authorisation, may.

The merchant navy of Peru in 1911 consisted of 11 steamers of 12,673 tons, and ■ sailing vessels (over ■ tons) of 31,454 tons.

Internal Communications.

Good roads and bridges ■ required ■ over the country, and great efforts ■ being made for their construction. There is a carriage road from Alouani ■ Cusco, 90 miles.

In 1911 the total working length of the Peruvian railways ■ 1,656 miles, of which 1,120 miles was worked by the Peruvian Corporation. The Peruvian Corporation ■ and operates the Central Railway of Peru, the Southern Railway of Peru, the Guaqui-La Paz Railway, the Trujillo Railway, the ■ Railway, the Pacasmayo Railway, the Piaco and Ica Railway, the Lake Titicaca steamers, and the River Desaguadero Navigation. It also operates for the Government the section of the Chimbote-Recuay Railway from Chimbote to Tablones. On May 22, 1911, the Peruvian Corporation ■ for a term of ■ years, from June 30, 1911, the Ilo-Moquegua Railway, which ■ for about ■ miles through an agricultural district, together ■ rolling stock and the mole at Ilo, the Corporation having the option of terminating the lease ■ the end of the first twenty years. In consideration of ■ the Corporation is to spend about 10,000£. ■ the water surface ■ Ilo and ■ supply ■ inhabitants of Ilo with water ■ improved rate. The capital outlay by ■ Corporation is to bear interest at 6 per cent. per ■ and ■ be amortized from the net receipts of the mole and railway. The gauge of the railways ■ 4ft. 8½in. except that of the Chimbote and Trujillo ■ which is ■. Electric railways connect Lima with Chorrillos and with Callao. ■ Peruvian Corporation is building a breakwater ■ ■ ■

There ■ ■ telegraph offices (276 belonging to ■ State) in 1911. The length of ■ telegraph ■ in 1911 ■ 6,500 miles, and ■ wire, 7,794 miles. Miles ■ construction (1911) ■ ■ built, 1,072

miles Number of telegrams (1911) 1 678,357 Three submarine telegraph cables connect Peru and Chile, and ■■■ connects Peru and the Republics to the north A telephone system has a network of 3,000 miles Wireless telegraph lines between Iquitos and Muisca, and between Iquitos and Puerto Bermudez ■■ inaugurated July 8, ■■■ In 1912 wireless offices at Callao and Lima ■■ opened Total length of telephone ■■ (1911), 10,500 miles

In 1911 there ■■ 1,057 post offices, letters and packets transmitted, 28,621,783

Money and Credit.

A decree ■■ issued by the President of the Republic ■■ January 10, 1898, to give effect to the law of December 29, 1897, establishing a gold currency By Act of December 14, 1901, gold became the only standard The national gold coin, the *libra*, is of the ■■ standard and weight ■■ the pound sterling, which ■■ also legal tender, 10 soles = 1/ sterling Silver is legal tender up to 100 soles Peru has ■■ paper currency of any kind, and the use of cheques on deposit accounts is very restricted

In 1911 the National Mint coined 42,246 Peruvian gold pounds and 62,444 five sol pieces The value of imported bullion in 1911 was 10,200 On September 16, 1912, the Government, in order to meet ■■ increased demand for small coins, authorised the bank of the Republic to ■■ gold pieces of the value of one fifth of a Peruvian pound

In Peru the commercial banks are the Bank of Peru and London (Capital, 500,000), the Italian Bank, the International Bank of Peru, and the Banco Popular, the Caja de Depositos y Consignaciones, the Banco Aleman Transatlantico, and the Caja de Ahorros de la Beneficencia de Lima, ■■ Savings Bank with deposits amounting to over 200,000

Money, Weights, and Measures.

The gold coin ■■ the *Libra* ■■ the English sovereign The coinage of gold ■■ sol pieces (equivalent to half sovereigns) has been authorised Silver coins ■■ the *Sol* (10 soles = 1 libra), $\frac{1}{2}$ sol, $\frac{1}{4}$ sol, $\frac{1}{8}$ sol, $\frac{1}{16}$ sol Bronze coins ■■ 1 and 2 centavo pieces (100 centavos = 1 sol)

The Ounce	=	1 014 ounce avoirdupois
■ <i>Libra</i>	=	1 014 lb
■ <i>Quintal</i>	=	101 ■ lbs
■ <i>Arroba</i> { of 25 pounds	=	25 ■ „
of wine or spirits	=	6 70 imperial gallons
■ <i>Gallon</i>	=	0 74 „ gallon
■ <i>Vara</i>	=	0 927 yard
■ <i>Square Vara</i>	=	■ ■ square yard

The French metric system of weights and ■■ established by law ■■ 1860, and is coming into general use, except for the customs ■■

Diplomatic Representatives.

1 OF PERU IN GREAT BRITAIN

Envoy and Minister — Don Carlos G Candamo (resident ■■ Paris)

Chargé d'Affaires and Consul General (London) — Edward Lambcke

Secretaries — Ricardo ■■ Lambcke and Enrique G Swayne

Attachés — Pablo E Caballero and ■■ Perez Palacio

There are Consular representatives ■■ Belfast, Cardiff, Dublin, Dundee, Glasgow, Liverpool, Queenstown, Southampton, and other places

2 OF GREAT BRITAIN IN PERU

Envoy, Minister and Consul-General — Charles Louis des Graz.

Consul-General at Callao — I. J. Jerome

There are a Vice Consul at Callao, a Consul at Iquitos Vice-Consuls at Lima, Arequipa, Mollendo, Trujillo and Salaverry, Pórené and Chanchamayo districts, and a Consular Agent at Cerro de Pasco

PORTUGAL.

(REPÚBLICA DE PORTUGAL ■ ALGARVE.)

Portugal ■ ■ independent ■ ■ since the twelfth century, until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélia, daughter of Philippe Duc d'Orléans. Manoel II. succeeded ■ ■ throne ■ ■ the assassination of his father and elder brother, Prince Luiz Philip, February 1, 1908. On October 5, 1910, the republic ■ ■ proclaimed, after a short revolution, and ■ ■ provisional government established. On August 20th, 1911, a new constitution was adopted. This provides that there shall ■ ■ two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second or Upper Chamber (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at ■ ■ time every three years.

The President of the Republic is elected by both Chambers with ■ ■ mandate for four years, but he cannot be re-elected. The President must be at least ■ ■ years of age. He appoints Ministers, but these ■ ■ responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 2,600*l.*, with 1,300*l.* for allowances, or ■ ■ total of 3,900*l.* yearly. The Constitution may be revised every ten years.

The Powers formally recognised the Republic on September 11, 1911.

President of the Republic.—Dr. Manoel Arriaga (elected August 24, 1911).

The Cabinet, which ■ ■ formed ■ ■ January 2, 1913, is ■ ■ follows:—

Premier and Minister of Finance.—Dr. Afonso Costa.

Minister of the Interior.—Senhor Rodrigo Rodrigues.

Minister of Justice.—Senhor Alvaro de Castro.

Minister of War.—Major Pereira Bastos.

Minister of Marine.—Senhor Freitas Ribeiro.

Minister for Foreign Affairs.—Senhor Antonio Maricun.

Minister of Public Works.—Senhor Antonio Maria da Silva.

Minister for the Colonies.—Senhor Almeida Ribeiro.

1149

In 1911 the population consisted ■ 2,827,461 males and 3,130,524 females, ■ 110 females to every hundred males. In ■ the continental urban population ■ 1,627,476 or ■ per cent., and the rural 3,888,791 or ■ 6 per cent.

In 1911 the foreign population of Portugal numbered 41,268.

Distribution with respect to conjugal condition (15 years and upwards) in 1911 :—

	Total	Males	Females
Unmarried	3,624,960	1,764,754	1,860,206
Married	1,968,159	961,687	1,006,472
Widowed	357,434	97,515	259,919
Separated	7,432	3,505	3,927
Total	5,957,985	3,827,461	3,130,524

The chief towns with their population in 1900 were : Lisbon, 856,009; Oporto, 167,955; Braga, 24,202; Setubal, 22,074; Funchal (Madeira), 20,844; Coimbra, 18,144; Ponta Delgada (Azores), 17,620; Evora, 16,020; Covilha, 15,469; Elvas, 13,881; Tavira, 12,175; Portalegre 11,820; Faro 11,789; Angra (Azores), 10,788.

MOVEMENT ■ ■ POPULATION.

Births, deaths, and marriages (including the Azores and Madeira):—

Years	Births	Deaths	Marriages
1905	179,746	112,756	37,600
■	182,920	125,248	35,485
1907	176,417	113,254	36,357
■	177,231	116,430	34,135
1909	176,707	111,395	34,150

Of the births in 1907, 14,569, and of the deaths, 10,730 were in the islands. The total population at July 1 of that year being estimated at 5,668,954, ■ birth, death, and marriage rates ■ respectively of 31·12, 19·98 and 6·23 per 1,000 of the population. In 1907 the illegitimate births numbered 19,977, ■ 11·32 per 100 of total births.

The number of emigrants from Portugal were : 38,223 in 1909, 39,515 in 1910, and 59,661 in 1911. Portuguese emigration is chiefly to Brazil and the United ■ ■

Religion.

The ■ Catholic ■ was ■ religion ; ■ forms of worship ■ tolerated. Portugal, including the Azores and Madeira, ■ divided into three ecclesiastical provinces, with their sees severally ■ Lisbon, Braga and Evora. Archbishop ■ (Patriarch since 1716) ■ seven

suffragana, of whom only two are on the European mainland; while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

The total income of the hierarchy of the Church is calculated at amount 800,000 milreis. In 1881 the number of Protestants in Portugal was 4,491, and that of Jews 481. The Republican government has separated the Church from the State, and State payments for the maintenance and expenses of worship have ceased. The conventual establishments of Portugal were suppressed by decree of May 28, 1834, and their property confiscated for the benefit of the State. Notwithstanding, several establishments of this nature were formed in later years; they were suppressed by the provisional government, which enforced the law of 1884.

Instruction.

Education in Portugal is of three kinds—primary, secondary, higher and special. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1911 there were 7,120 elementary schools (6,320 public and 800 private); 82 secondary schools, the teachers for which are trained in the normal departments attached to the Universities of Lisbon and Coimbra. For higher education (which was re-organised in 1911) there are now 2 Universities, 1 in Lisbon, Coimbra (founded 1290), and Oporto, which have various faculties. The Technical School at Lisbon provides instruction in engineering, chemistry, etc. There are also special colleges for music, art (Lisbon and Oporto), commercial schools, a military academy in Lisbon, and a naval school.

The number of pupils at the secondary schools in the season 1910-11 was 9,749; in 1911-12, 10,621. The number of students at the Universities in 1910-11 was 2,955; in 1911-12, 2,673. The number of students at the Schools of Fine Arts in 1910-11 was 894; in 1911-12, 938; and at the Military Academy in 1911-12, 352.

Justice and Crime.

The Republic is divided for judicial purposes into comarcas; in every comarca there is a court of first instance. There are two courts of appeal (Tribunaes de Relação) in Lisbon and Oporto, and a Supreme Court in Lisbon.

The number of persons convicted of crime in the year 1905 was 18,266 (3,742 females); 1906, 18,090 (3,841 females); 1907, 17,814 (3,532 females); 1908, 18,283 (3,822 females); 1909, 18,823 (4,068 females).

Finance.

The (exclusive of loans) expenditure, ordinary and extraordinary, for six years (milreis = 4s. 6d. or $\frac{1}{2}$ of a pound sterling):—

Years	Revenue	Expenditure			Expenditure
	Milreis	Milreis		Milreis	Milreis
1906-07	69,948,000	68,265,000	1906-10	69,262,337	74,606,860
1907-08	71,039,000	77,121,000	1910-11	69,979,000	70,273,000
1908-09	70,169,000	76,276,000	1911-12	71,678,000	76,447,000

The following are the estimates for 1912-13 —

Revenue	Milreis	Expenditure	Milreis
Direct taxes	17,125,250	Debt	1,184,125
Regist. Stamps	6,158,000	Ministry of Finance	4,889,076
Indirect	22,278,750	Interior	3,067,670
Port dues	29,580	Justice	1,258
Property	4,277,928	War	10,212
Income on investments	5,968,303	Colonies	4,545,496
Revenue Earning, administration,	10,471,587	Foreign Affairs	1,9082
		Public Works	52,344
		General Treasury deposits	10,199
			600
Total ordinary	72,429,993	Total ordinary	74,337,855
Extraordinary	3,181,050	Extraordinary	110,987
Grand	75,614,448	Grand Total	79,447,822
	(17,013,349)		(17,875,047)

On September 31, 1912, the outstanding nominal debt of Portugal was as follows —

	Total outstanding	In possession of Government
	milreis	milreis
External 5 per cent	159,016,970	6,808,822
4 per cent Municipal Loan	10,677,610	288,250
4½ per cent Tobacco Loan	971,100	—
Total external	177,665,680	7,175,092
Internal 1 per cent (consolidated)	564,196,070	196,262,788
“ 7 per cent (of 1905)	2,654,040	180
“ 4 per cent	5,418,607	24,547
“ 4½ per cent	21,813,190	4,000
“ 5 per cent	4,561,190	—
Total internal	601,443,108	286,391,575
Total	769,008,788	293,566,667

floating debt — August 31, 1912, — 87,427,012 milreis

Defence.

The Army of Portugal is a militia raised by conscription. It is divided into three categories, the active army, the reserve and the territorial army. All adult males are liable to be called out from the age of 17 to 45, but, practically, conscription only begins at the age of 20. The first year is passed in the active army, 10 in the reserve, and 5 in the territorial army, which latter also includes surplus from other categories. In the active army, recruits undergo from 15 to 20 weeks' preliminary training, according to the needs of the country, afterwards there is a fortnight's training during the annual mobilisation. The country is divided into territorial districts, each supposed to produce a division. The active army consists of 10 regiments of 8 battalions, 11 cavalry regiments of 4 squadrons, 10 artillery regiments, comprising 10 batteries, 2 horn batteries, 10 mountain batteries, 10 garrison batteries, and engineer regiments. There are 2,800 officers, all told.

The [] is to consist of 35 regiments of infantry, 8 squadrons of cavalry, and [] field batteries, with other units.

The territorial army has no cadres.

The Republican Guard, and [] Guard, [] civil corps recruited from the army, the [] of which can be employed in the field in [] time. [] Republican Guard is a military police, numbering about 5,000 men, of whom about [] are mounted. The Fiscal Guard is a preventive service about 5,200 strong.

The arm of the Portuguese infantry is the Mauser-Vergusiro, a magazine weapon, calibre 6.5 []. The field artillery is being re-armed with 7.5 cm. Schneider Canet guns.

With regard to [] garrisons, [] line regiments of infantry (of [] battalions) [] permanently stationed in the Azores, and 1 [] Madeira. The latter has also a battalion of garrison artillery, and there [] in the Azores. Besides these troops, the Portuguese have a separate Colonial Army, partly European and partly Native, which garrisons their possessions on the West Coast of Africa, in Mozambique, India, &c. The force consists of about 650 officers (partly of the home army), about 2,500 European non-commissioned officers and men, and 7,000 natives, the Europeans being enlisted voluntarily, the natives compulsorily.

The military budget of Portugal for 1912-13 is 2,075,000l.

The navy of Portugal comprises:—1 old battleship, *Vasco da Gama*, (3,030 tons), [] protected cruisers, *Almirante Reis* (4,253 tons), *São Gabriel* (1,840 tons), *Adamaster* (1,757 tons), and *Republica* (1,656 tons); [] variety of old gunboats, [] old torpedo boats, [] transports, [] training ships, the former royal yacht, *6 de Outubro* (1,365 tons), 3 destroyers, 4 torpedo boats, [] submarines, 1 [] for torpedo and mine service.

The new programme contemplates 3 Dreadnoughts, 3 cruisers, 12 large destroyers, and [] submarines.

In 1910 there were [] naval officers, besides surgeons, engineers, &c., and 5,687 men.

Production and Industry.

Of the whole area of continental Portugal 26.2 per cent. is annually cultivated under cereals, pulse, pasture, &c.; 8.5 per cent. [] under vineyards; 3.9 per cent. under fruit trees; 17.3 per cent. under forest; 43.1 per cent. is waste. In Alemtejo and Estremadura and the mountainous districts of other provinces are wide tracts of waste lands, and it is asserted that many hectares, [] uncultivated, [] susceptible of cultivation.

There [] four modes of land tenure commonly in []:—Peasant proprietorship, tenant farming, métayage, and emphyteusis. In the north- [] of Portugal, peasant proprietorship and emphyteusis prevail, where land is much subdivided and the 'petite culture' practised. In [] south large properties [] tenant farming []. In the peculiar system called *aforamento* [] emphyteusis the contract [] the owner of any real property transfers the [] to another person who binds himself [] pay [] the owner a certain [] *foro* []. The landlord, retaining only the *dominium* [] the land, parts with [] rights [] holding except [] of receiving quit-rent, the right to distrain if [] quit-rent be withheld, [] the right [] eviction if [] *foro* be unpaid [] more than [] years. Subject [] these rights of the landlord, the [] is [] of the holding, which [] cultivate, improve, exchange, [] sell; but [] of [] the landlord has a right [] pre-emption, compensated by a corresponding right [].

should the quit-rent be offered for sale. This system is very old—modifications having been introduced by the civil code in 1868.

The chief cereal and animal products of the country are—In the north, wheat and oxen; in the mountainous region, rye and sheep and goats; in the central region, wheat and maize; and in the south, wheat and swine, which fatten in the vast open woods. Throughout Portugal wine is produced in large and increasing quantities. Olive oil, figs, tomatoes are largely produced, as are oranges, onions, and potatoes.

Portugal possesses considerable mineral wealth, but coal is scarce, and, for want of fuel and cheap transport, valuable mineral resources are unworked. In 1909, 4,086 persons worked underground and 3,667 (including 1,000 females) worked on the surface above ground.

The quantity and value of the mineral products in 1911 are—

Minerals	Metric Tons	Value in milreis	Minerals	Metric Tons	Value in milreis
Antimony	—	—	Gold	—	598
Arsenic	85	7,889	Lead ore	—	—
Anthracite	10,610	5,837	Silver ore	3,607	21,422
Copper pyrites	10,427	3,265	Ore for Sulphur	272,000	187,871
Copper	511	727	Tin ore	—	12,080
Copper precipitate	3,913	10,472	Uranium	874	8,053
Lead	—	—	Wolfram	102	97,484
Iron	19,141	2,154			

Common salt, gypsum, lime, and marble are exported. In 1903 there were in force 490 concessions of mines embracing an area of 75,528 acres. Of the concessions, 462 were of mines yielding metallic ores, 23 yielding coal, 1 coal and iron, 1 asphalt and phosphoric acid. In 1903 several tin mines in Bragança were transferred to a Belgian company.

The population engaged in industries of various kinds, exclusive of agriculture, in 1900 was 455,296.

Portugal has in 1910, 26,894 persons and 2,289 vessels of 39,408 tons engaged in fishing. The exports of sardines and tunny fish are considerable. The value of the fisheries in 1910 was 5,919,842 milreis, including sardines 2,948,778 milreis and tunny 322,696 milreis, besides whale fisheries in the Azores, 22,790 milreis, and cod fisheries, 440,018.

Imports for consumption and exports (exclusive of coin and bullion) for five years—

Years	Imports	Exports
	Milreis	Milreis
1907	61,453,143	30,408,964
1908	67,247,956	28,377,119
1909	64,761,864	36,970,088
1910	69,508,843	35,724,072
1911	68,128,841	34,065,250

Various classes of imports and exports (special trade):—

	Imports		Exports	
	1910	1911	1910	1911
Living animals	Milreis 3,458,010	Milreis 3,031,518	Milreis 3,534,585	Milreis 3,343,344
Textiles	30,307,116	32,493,294	7,394,259	7,140,230

Chemical products	1,458,297	1,755,324			
Wool	1,702,224	1,685,372			
“ “ & yarn	1,865,017	1,280,800			
“ “	1,493,237	1,908,552			

Wine is the most important product; the exports consisted of common wine, to the value of 5,396,952 milreis; Madeira, 601,618 milreis; port, 5,677,808 milreis; other liqueur wine, 247,100 milreis. More than a half is to Brazil and England, considerable quantities being exported also to Portuguese colonies.

Wool is the staple article of import from Portugal into the United Kingdom, its value amounting in 1911 to 865,032 £.

Total trade between Portugal and the United Kingdom in thousands of pounds for the years:—

	1908	1909	1910	1911	1912
Imports from Portugal into U. Kingdom	2,770	2,878	3,095	2,874	2,834
Exports ■ Portugal from U. Kingdom	2,134	2,320	2,776	2,802	3,040

Shipping, Navigation, and Internal Communications.

The commercial navy of Portugal on January 1, 1911, contained ■ steamers of 70,193 tons in the aggregate, and 259 sailing vessels of 43,844 tons. In 1911, 10,370 vessels of 19,154,239 tons, entered the ports of Portugal.

The length of railways ■ for traffic ■ December 31, 1911, ■ 1,780 miles, of which 665 miles belonged to the State. The railways have a gauge of 5ft. 5½in., except two lines, one of which has ■ 3ft. 3½in. gauge, and the other ■ 2ft. 11½in. gauge.

The number of post-offices at the end of 1910 ■ 4,044; the number of letters, newspapers, &c., carried in the same year was: internal, 87,437,641; international and colonial, 24,888,458. The number of telegraph offices at the end of 1910 ■ 536. There were at the ■ date 5,945 miles of line and 18,415 miles of wire. The number of telegrams in 1910 was: internal, 1,268,840; international, 623,888; transit, 2,793,789; service, 160,806; total, 4,886,823.

Money, Weights, ■ Measures.

On December 30, 1911, the situation of the Bank of Portugal was as follows:—Metallic stock, 12,700,924 milreis; note circulation, 82,421,472 milreis; deposits, 3,813,119 milreis; commercial account, 23,182,913 milreis; advances, 1,536,083 milreis; balance against Treasury, 26,590,680 milreis. The capital of the bank is 13,600,000 milreis, and the reserve fund 3,273,400 milreis.

On December 31, 1911, the Monte Pio Geral had deposits amounting to 21,830,896 milreis. The monthly average of deposits in the banks of Lisbon and Oporto in 1909 ■ 23,653,000 milreis.

The gold coinage of Portugal issued since ■ amounts to the nominal value of 7,967,002, and the silver coinage to 37,934,523.

The Decree of the Provisional Government of May 22, 1911, established a new ■ tary system, but the ■ coins ■ not yet in circulation. The unit is the gold *escudo*, of 100 *centavos*, which is equivalent to the 1-milreis gold piece. Gold coins are 2, 5, and 10-*escudo* pieces; silver coins ■ 1-*escudo*, and 50, 20, and 10-centavos pieces; there ■ bronze and nickel coins of 4, 2, 1, and ½-centavo. The gold coins and the silver *escudos* ■ ■ fine; the other silver coins are .835 fine. The English sovereign and ■ sovereign shall be legal tender for 4½ and 2½ *escudos* respectively.

On January 1st, 1912, the legal time for Portugal was in accordance ■ Greenwich meridian.

The metric system of weights and ■ the legal standard. The chief old measures ■ in use are:—

The <i>Libra</i>	of ■	= 1.012 lb. avoirdupois.
„ <i>Almude</i>	„ Oporto	= 3.7 imperial gallons.
„ <i>Alqueire</i>	„	= 5.6 „ bushel.
„ <i>Moio</i>	„	= ■ „ quarters.

Diplomatic Representatives.

1 OF PORTUGAL IN GREAT BRITAIN

Envoy and Minister — Senhor Manoel Teixeira Gomes

First Secretary — Pedro de Tovar

Commercial Attaché & Consul-General in London — Domestico Cunha

There are Consular representatives at Cardiff, Newcastle, Liverpool, and Consular agents at Cork, Dublin, Dundee, Leith, Glasgow, Hull, Southampton

2. OF GREAT BRITAIN IN PORTUGAL

Envoy and Minister — Sir Arthur Hardinge, G.C.M.G., K.C.B., appointed, September, 1911

Secretary — W. Seeds

Consul — Lt. A. Somerset-Locke, C.M.G.

Naval Attaché — Captain William A. H. Kelly, R.N.

Military Attaché — Col. W. J. Laurhorne, C.M.G., M.V.O.

There are Consular representatives at Lisbon, Belem, Faio, Setubal, Figueira, Leixoes, Oporto, &c., Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verdes)

Consul to Portuguese Possessions in West Africa south of the Gulf of Guinea — F. Dinnimond Hay, M.V.O., residing at Louisa

Consul at Lourenco Marques —

There are Consuls or Vice Consuls at Bissau (Guinea), Chinde, Inhambane, Mozambique, Tete, Quilimane, Lobito, and Sao Thomé, Consul at Maimagao (Goa), Vice Consul at Macao (China)

Dependencies.

The colonial possessions of Portugal, situated in Africa and Asia, are as follows —

Colonial Possessions	Area English sq miles	Popula- tion	Colonial Possessions	Area English sq miles	Popula- tion
Possessions in Africa			Possessions in Asia		
Cape Verde Islands			In India—Goa (1900)	1,489	475,514
(1910)	1	142,622	Damão Diu (1900)		55,365
Guinea	12,940	620,000	Indian Archipelago		
Príncipe and			(Tunor &c.)	7,330	300,000
St. Thomas Islands			China, Macao, &c.		
(1902)		42,108	(1900)	4	68,991
Angola	484,800	2,120,000			
Mozambique	213,400	2,120,000	Total, Asia	8,972	895,780
Total Africa	797,980	2,242,650	Total, Colonies	802,952	9,181,444

Portuguese India consists of **Goa**, containing the capital, Panjim, on the Malabar coast, **Damão**, on the coast about 100 miles north of Bombay; and **Diu**, a small island about 140 miles west of **Damão**. In **Goa** there are salt works employing 1,968 men, the annual production amounting to about 12,200. In **Damão** there are 11 salt works, and in **Diu** 5. In deposits of manganese were discovered near Mormugão and about

with about 20 ■■■■ already at work. The military force consists of not less than 1,082 ■■■■ (786 natives). The Moimugão railway (51 miles) connects this port with the lines of British India. The estimated revenue of Goa, &c., ■■■■ 1910-11 ■■■■ 1,165,239 milreis, expenditure 1,098,879 milreis. The trade is largely transit. In 1910 the imports by sea and land amounted to 6,704,848 rupees, the exports to 2,565 ■■■■ rupees, and the transit trade (to and from British India) ■■■■ 5,336,999 and 30,547 738 rupees respectively. Chief exports, 1910: cocoa nuts, 1,292,364 rupees, fresh fruit, 180,817 rupees, fish, fresh and salted, 170,664 rupees, spices, 168,133 rupees, cashu nuts, 144,607 rupees, salt, 113,112 rupees, copra, 105,666 rupees, manganese, 51,468 rupees. The ports were visited in 1910 by 3,524 merchant vessels of 488,298 tons (Moimugão by 1,736 vessels of 427,913 tons), besides coasting trade. There ■■■■ in Portuguese India 18 telegraph offices and 167 miles of telegraph line.

Macao, in China, situated on an island of the ■■■■ ■■■■ at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Coloane, ■■■■ province, the city being divided into two wards, ■■■■ inhabited by Chinese and the other by non-Chinese, each having its own administrator. The population, according to the census of 31 December, 1899, ■■■■ 68,991 (38,089 males and 25,902 females) of which 12,894 in Taipa and Coloane. The whites are 7,919. There are 3,780 Portuguese, 60,057 Chinese and 154 of various nationalities. Estimated revenue, 1910-11 836,450 milreis, expenditure, 686,450 milreis. The military force contains at least 488 men (164 natives). The trade, mostly transit, is in the hands of Chinese. Imports (1909) 16,632,102 Mexican dollars, of which 6,591,964 in junk; exports (1909) 15,091,565 Mexican dollars, of which 7,624,177 in junk. The port of Macao was visited ■■■■ 1909 by 1,456 merchant steamers of 997,469 tons and 6,437 junks of 6,056,710 piculs.

Portuguese Timor consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring isle of Pulo Camling. By treaty of 1859 the island was divided between Portugal and Holland, by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was ■■■■ made ■■■■ independent district. Estimated revenue, 1910-11, 200,000 milreis, expenditure 200,000 milreis. Military force not less than 323 men (212 natives). Imports (1910) 441 ■■■■ milreis, exports, 404,837 milreis. Chief exports (1910): coffee, 239,289 milreis; sandal wood, 55,965 milreis; sandal root, 57,633 milreis; copra, 37,093 milreis; wax, 21,091 milreis. The port of Dilly was visited in 1910 by 410 merchant vessels of 165,496 tons.

The Cape Verde Islands, fourteen in number, ■■■■ administered by ■■■■ Governor, whose ■■■■ is at Praia, the capital. The population according to the census of December 31, 1910, is 142,552 (65,495 males and 77,057 females), including ■■■■ foreigners, and ■■■■ distribution is as follows: whites, 4,718; coloured, 87,249; negroes, 50,585. Military force not less than ■■■■ men (168 natives). The chief products are coffee, medicinal produce, and millet. The estimated ■■■■ ■■■■ 1910-11, 448,393 milreis, expenditure, 428,533 milreis, imports (January to October, 1911), 1,648,879 milreis; exports, (January to October, 1911), 270,125 milreis. The ports of the Archipelago were visited ■■■■ 1910 by 1,967 merchant vessels of 5,926,612 tons, besides coasting trade.

Portuguese **Guinea**, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1886, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent archipelago of **Bijagoz**, with the island of **Bolama**, in which the capital, the same name, is situated. The chief commercial products are rubber, oil seeds, ivory, hides. Estimated revenue, 1910-11, 809,900 milreis, expenditure, 309,900 milreis. Military force not less than 143 (143 natives). Imports in 1908, 857,155 milreis, exports, 492,238 milreis. The chief port is **Bissau**. The ports were visited in 1909 by 114 vessels of 130,426 tons, besides coasting trade. There are 100 miles of telegraph lines.

The islands of **S. Thomé** and **Príncipe** constitute a province under a Governor. According to the census of November 12, 1900, the population was 42,103 (including 597 foreigners), 37,776 in **S. Thomé** and 4,327 in **Príncipe**, and its distribution is as follows: whites, 1,185 (1,095 males and 90 females), coloured 278 (145 males and 134 females), and negroes 40,689 (21,881 males and 18,768 females). The islands are hilly, the soil volcanic, and the vegetation rich and various. The chief commercial products are cacao, coffee, rubber and cinchona. Estimated revenue, 1910-11, 930,429 milreis, expenditure, 703,315 milreis. Military force, at least 100 (181 natives). Imports at **S. Thomé** (1911), 3,197,830 milreis, exports, 9,896,000 milreis. The ports were visited in 1909 by 231 merchant vessels of 583,605 tons. On **S. Thomé** a railway of 9 miles is open for traffic.

Angola, with a coast line of 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886, from the Congo by those fixed by the convention of May 25, 1891, from British South Africa in accordance with the convention of June 11, 1891, and from German South West Africa in accordance with that of December 30, 1886. This province is under a Governor General who resides at **Loanda**, it is divided into districts: **Congo**, **Loanda**, **Benguela**, **Mossamedes**, **Huila**, and **Lunda**. The capital is **Paulo de Loanda**, other important towns being **Cabinda**, **Ambria**, **Novo Redondo**, **Benguela**, **Mossamedes**, and **Port Alexander**. There are said to be 10 Government schools, and 7 municipal and 10 private schools, with altogether about 2,410 pupils. Various industries are worked in the country. The military force was between 2,721 (1,976 natives) and 4,731 (3,802 natives). Estimated revenue in 1910-11, 2,321,378 milreis, expenditure, 3,171,373 milreis. The chief products are coffee, rubber, wax, sugar (for rum distilleries), vegetable oils, coco nuts, ivory, oxen, and hides. Rubber supplies are becoming exhausted, cotton growing, formerly remunerative, has been neglected but is now increasing, tobacco is grown and manufactured for local consumption, petroleum and asphalt are worked by a British syndicate. The province contains large quantities of malachite and copper, iron, petroleum, and diamonds. It has also found imports, exclusive of Congo (1909), 5,874,861 milreis; exports, exclusive of Congo, 5,485,085 milreis. The imports and exports by the rivers **Okavango**, **Unhali**, and **Lacalla**, in 1909, were respectively 104,662 milreis and 121,667 milreis. The chief imports of the province are textiles, and the chief exports are coffee and rubber. Dried hides are exported in considerable quantities. The trade is largely with Portugal. In 1910 there entered the ports of **Ambria**, **Loanda**, **Benguela**, **Mossamedes**, and **Port Alexander** 479 vessels of 941,235 tons. The Portuguese National Navigation Company has most of the carrying trade to and from Europe, the steamers of 3 British and 10 German line visit ports of the Colony. The length of

railways open for traffic, is 642 miles; ■ concession of a line from Lobito Bay was granted ■ 1902, the line to be of about 1,200 miles (3ft. 6in. gauge), to link with the Central African syst■ The construction ■ proceeding. ■ miles being open for traffic. Other railways ■ inland from Loanda and Mossamedes. In 1911, there were 2,688 miles of telegraph line; 69 telegraph offices. Angola is connected by cable with East, West, and South African telegraph systems.

Mozambique is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from German East Africa, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40' S. lat. till it meets the course of the Rovuma, which it ■ to the point of its confluence with the 'Mainje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. The province comprises territories directly administered by the State, and others under the administration of the Mozambique and Nyasa Companies. The first ■ divided into ■ districts: Lourenço Marques, Inhambane, Quillimane, Tete ■ Mozambique. The districts ■ divided in *concelhos*, *circumscripções civis* and *capitanias-mores*, the last comprising the territories not yet entirely pacified and occupied. The municipal institutions ■ the *Camara Municipal*, the *Comissão Municipal*, and the *edilidade*, according to the development of the respective centres of population. Lourenço Marques is the Capital of the Province. There ■ a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and a Provincial Council with the attributions of an administrative and account tribunal. In each district there is a District Council. The existing organisation of the province is that which was established by decree of May 25, 1907, with some modifications. The ■ and Sofala region ■ administered by the Mozambique Company, which has ■ royal charter granting sovereign rights for 50 y■ from 1891. Under the Company's administration the country on the Zambezi has become settled there is convenient transport by river, and facilities are granted for securing titles and working mines. The Nyasa Company, with a royal charter, administers the region between the Rovuma, Lake Nyasa, and ■ Lorica. The military force of the Colony varies between 2,250 ■ (1,379 natives) and 3,904 ■ (2,468 natives). For 1910-11 the estimated revenue ■ 5,418,832 milreis; expenditure, 5,118,832 milreis.

■ chief products of the Colony ■ rubber, sugar, cocoa-nuts, bees-wax, and mining products. In 1908 the export of rubber from the State Territories amounted ■ 104 tons, and from the Mozambique Territories in 1910 to ■ tons. Important gold-bearing reefs have been discovered on the Upper Zambezi, and extensive coal deposits in the Tete region.

The ■ of ■ Province in 1911 was as follows :—

	Imports	Exports	Re-exports	Transit
	Milreis	Milreis	Milreis	Milreis
State territories (January to November)	6,000,394	3,211,908	3,690,964	28,945,877
Mozambique Company . . .	■,376	2,848,444	1,111,150	5,518,717
Nyasa Company	587,285	309,694	85,887	164

The principal ports are Mozambique (population, 1910, 472 Europeans, 895 Asiatics, and about 361,367 natives), Ibo, Quillimane, Chinda (population 1,690,

of whom 218 European), Beira (population, 3,420, of whom 100 white), Inhambane (population, 3,330, of whom 100 European and 100 Asiatic), Lourenço Marques, (9,849, of whom 4,691 European).

The trade registered at the following ports in 1910 (from January to November for all ports except Ibo) is given below:—

	Imports	Exports	Re-exports	Transit
	Milreis	Milreis	Milreis	
Lourenço Marques	3,093,164	1,891,804	2,617,970	29,811,368
Inhambane	491,740	330,420	877	—
Beira	344,612	842,352	851,300	127,185
Quilimane	488,696	278,911	1,190	—
Mozambique	811,383	301,103	99,533	—
Ibo	611,717	383,470	79,462	—

In 1911 the Imports at Lourenço Marques amounted to 942,554*l*, and exports to 512,056*l*; at Beira, imports 585,789*l*; exports, 540,066*l*; at Chinde, imports, 124,960*l*; exports, 84,570*l*.

The chief articles imported into the colony are cottons, iron-work, spirits, beer, and wine. The exports are mainly rubber, various ores, wax, and ivory. The ports are visited regularly by the steamers of the German East Africa line, and on the Zambezi and Save rivers there are plying 21 small steamers of, in all, 1,125 tons, and 10 barges of 3,676 tons. The Zambezi is navigable for stern-wheelers as far as Tete. The port of Lourenço Marques was visited in 1911 by 2,241 vessels of 2,241,806 tons; the port of Beira by 981 vessels of 981,783 tons.

The Delagoa Bay railway has a length of 57 miles in the colony, and is continued for 100 miles to Pretoria. The commercial relations and transit of goods by this railway between the Portuguese and British possessions are regulated by the agreement signed April 1, 1909. A new line from Lourenço Marques to the Swaziland border is under construction, 100 miles being open for traffic, including the Umbeluzi branch. The Gaza railway from Chai-Chai to Manjacaze has 82 miles open for traffic, and the line from Mutamba to Inharrim 100 miles. The Beira railway has a length of 100 miles in the colony, and is continued from the British frontier to Bulawayo. Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quilimane has telegraphic communication with Chiromo. In 1911 there were 2,959 miles of telegraph line.

The Portuguese coinage is little used; the official value of the milreis is 4*s*. 6*d*., or 4·5 milreis = the £. At Mozambique the currency is chiefly British-Indian rupees, on which an import duty of 10 per cent is levied. At Lourenço Marques English gold and silver coins are chiefly used.

ROME, SEE AND CHURCH OF.

For many ages Pius IX.'s reign, with ~~some~~ comparatively short breaks, the Popes or ~~some~~ bore temporal sway over a territory stretching across Mid-Italy from sea to sea comprising an ~~area~~ of ~~some~~ 16,000 ~~square~~ miles, ~~and~~ a population finally of ~~some~~ 3,125,000 souls. Of this dominion the whole has been incorporated piecemeal with the Italian Kingdom (viz., Romagna, Umbria, and the Marches in 1860, and the residue, including Rome itself, in 1870). Furthermore, by an Italian law dated May 13, 1871, there ~~was~~ guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire ~~or~~ 129,000*l.*, which allowance (whose ~~value~~ would in 1913 ~~be~~ to 138,675,000 lire, or 5,547,000*l.*, without interest) still remains unclaimed and unpaid.

Supreme Pontiff.—Pius ~~IX.~~ (Giuseppe Sarto), born ~~at~~ Riese, diocese of Treviso, June 2, 1835; Bishop of Mantua, November 10, 1884; Cardinal, June 12, ~~1884~~; Patriarch of Venice, June 15, 1893; elected Supreme Pontiff, ~~on~~ of Leo XIII., August 4, ~~1903~~; crowned, August 9 following.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes ~~on~~ a ticket his own ~~name~~ with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets ~~are~~ compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

Reckoning the validly chosen Roman Pontiffs ~~as~~ 256 in number,² there have been altogether 106 Popes who were Roman, ~~and~~ Italian other than Roman, and 52 Transalpine, ~~and~~ (save from Sicily or Sardinia) Transmarine. From the accession of Innocent IX., 231st in the usual list of Roman Pontiffs, to Pius X., 258th, the Popes (all Italian) have been ~~as~~ follows:—

Year of Election Family Pontiff	Year of Election	Name and Family Pontiff	Year of Election
Innocent IX. (<i>Farchinetti</i>)	1591	Innocent XIII. (<i>Conti</i>)	1721
Clement VIII. (<i>Aldobrandini</i>)	1592	Benedict XIII. (<i>Orsini</i>)	1724
Leo XI. (<i>Medici</i>)	1605	Clement XII. (<i>Corvini</i>)	1730
Paul V. (<i>Borghese</i>)	1621	Benedict XIV. (<i>Lambertini</i>)	1740
Gregory XV. (<i>Ludovisi</i>)	1621	Clement XIII. (<i>Rozzoni</i>)	1758
Urban VIII. (<i>Barberini</i>)	1623	Clement XIV. (<i>Ganganelli</i>)	1769
Innocent X. (<i>Pamfilj</i>)	1644	Pius VI. (<i>Braschi</i>)	1775
Alexander VII. (<i>Chigi</i>)	1655	Pius VII. (<i>Chiaramonti</i>)	1800
Clement IX. (<i>Rospigliosi</i>)	1667	Leo XII. (<i>della Genga</i>)	1823
Clement X. (<i>Alfieri</i>)	1670	Pius VIII. (<i>Castiglioni</i>)	1829
Innocent XI. (<i>Odescalchi</i>)	1676	Gregory XVI. (<i>Cappellari</i>)	1831
Alexander VIII. (<i>Oddoboni</i>)	1690	Pius IX. (<i>Mastai-Ferretti</i>)	1846
Innocent XII. (<i>Pignatelli</i>)	1699	Leo XIII. (<i>Piovi</i>)	1878
Clement XI. (<i>Albani</i>)	1700	Pius X. (<i>Sarto</i>)	1903

¹ The papal possessions of Avignon and the Comtat-Venaisien were joined on ~~to~~ France in 1791; Benevento and Pontecorvo, papal enclaves in the Neapolitan kingdom, ~~in~~ the way of that kingdom in 1806.

² That is, ~~as~~ but once the thirteenth elected Pope Benedict IX. and omitting the two Papes ~~of~~ the Greek Rite, ~~and~~ ~~the~~ ~~in~~ ~~the~~ Pope was Hadrian VI., reigning ~~from~~ 1522 to 1523; the last ~~to~~ be so ~~was~~ was Hadrian VI., Pope ~~from~~ 1522 ~~to~~ ~~1523~~.

The Roman Pontiff (in order a Bishop, but in jurisdiction held to be, by divine right, the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons, but hardly ever comprising the full number. In February, 1913, the Sacred College consisted of 1 Cardinal-Bishop, 1 Cardinal-Priest, and 1 Cardinal-Deacon.¹ The following list gives the names, dates, and offices of these Cardinals —

Name	Office or Dignity	Nationality	Year of Birth	Year of Death
Cardinal Bishops —				
Luigi Oreglia di Sant'Andrea	Bp. of Ostia & Velutis Dean Sacred College Camerlengo of Holy Roman Church	Italian	1834	1903
Serafino Vannutelli	Bp. of Porto and Santa Rufina Subdean of the Sacred College Great Penitentiary		1834	1907
Antonio Agnelli	Bishop of Albano Chancellor of Holy Roman Church		1817	1898
Vincenzo Vannutelli	Bishop of Palestrina Archpriest of the Lateran Basilica Prefect of the Apostolic Signatura		1840	1906
Francesco di Paola Casertta	Bishop of Gravina		1841	1910
Gastone de Sisti	Cardinal		1837	1907
Cardinal Priests —				
José Sebastião de Melo	Former Patriarch of Lisbon	Portuguese	1841	1890
James Gibbons	Archbishop of Baltimore	American	1834	1890
Mariano Rampolla del Tindaro	Archpriest of the Vatican Basilica Librarian of Holy Roman Church	Italian	1843	1897
Angelo Giuseppe Riboldi	Datary of His Holiness		1838	1898
Michael Logue	Bishop of Armagh	Irish	1838	1898
Claudio Vassary	Former Archbishop of Esztergom (Gron)	Hungarian	1838	1898
Georg Kopp	Bishop of Breslau	German	1837	1897
Andrea Ferrari	Archbishop of Milan	Italian	1830	1890
Giuseppe Gotti	Priest of the Congregation of Propaganda Fide		1834	1894
Domenico Peirata	Priest of the Congregation of the Sacraments		1830	1890

Of [redacted] Cardinals 1 [redacted] nominated by Pope Pius IX, [redacted] by Leo XIII, [redacted] by Pius X; 38 are Italian (peninsular [redacted] insular), and [redacted] not, [redacted] are British subjects. Under [redacted] present Roman Pontiff there have hitherto [redacted] Cardinals, [redacted] whom 4 were of his own creation.

Though primarily belonging [redacted] the local Roman Church, [redacted] Cardinals

drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V at seventy. Cardinals compose the Pope's Council and the Sacred Congregations, govern the Apostolic See while the See is vacant, and the deceased Pontiff's funeral. They received the distinction of red hat under Innocent IV, during the General Council of Lyons, in 1246, and the title of Eminence from Urban VIII, in 1623.

In February, 1913, besides the Pope and the College of Cardinals, the Catholic Hierarchy throughout the world comprised 1 patriarchates of the Latin and 6 of the Oriental Rite, 190 archbishops of the Latin and 20 of the Oriental Rite, and 769 bishops of the Latin and 53 of the Oriental Rite. The list (during the present pontificate increased by 10 promotions of bishop, 1 archbishop, and 1 bishop) was as follows —

I Patriarchates

Latin Rite — 1 Constantinople, 2 Alexandria, 3 Antioch, 4 Jerusalem, 5 Venice, 6 Lisbon, 7 West Indies; 8 East Indies.

Oriental Rite — 1 Antioch, of the Maronites, 2 Antioch, of the Melchites, 3 Antioch, of the Syrians, 4 Babylon, of the Chaldeans, 5 Cilicia, of the Armenians, 6 Alexandria, of the Copts.

II Archbishops

<i>Latin Rite</i> —		Under Patriarchs	
With Ecclesiastical Provinces	168	Armenian Rite	
Without Provinces	22	Græco-Melchite Rite	
<i>Oriental Rite</i> —		Syriac Rite	
With Ecclesiastical Provinces		Syro-Chaldean Rite	
Armenian Rite	1	Syro-Maronite Rite	
Græco-Rumanian Rite	1		210
Græco-Ruthenian Rite	1		

III Bishops

<i>Latin Rite</i> —		Under Patriarchs	
Immediately subject to the Holy See	86	Armenian	15
Suffragan	684	Coptic Rite	2
<i>Oriental Rite</i> —		Græco-Melchite Rite	9
Immediately subject to the Holy See		Syriac Rite	1
Græco-Ruthenian		Syro-Chaldean	1
Suffragan		Syro-Maronite Rite	2
Græco-Rumanian			822
Græco-Ruthenian			

Besides the above 1046 sees, 611 titular sees, 11 abbacies and prelaties 'nullius dioceseos,' there are 11 apostolic delegations,

The relative standing and precedence of a Roman Cardinal was a thing of gradual growth. The first bishop of York, created Cardinal in 1489, was the first Cardinal who, simply as such and without being a Legate a latere, took precedence of the Archbishop of Canterbury.

Though any clerk, whether in or out of the College of Cardinals, is eligible to the supreme pontificate, the deceased of Pope Urban VII., who died in 1590, only the first have been so. He, moreover, with but one short exception, began the unbroken series of Italian Popes.

apostolic vicariates, and ■ apostolic prefectures, most of them held by titular archbishops or bishops (until 1882 called 'in partibus infidelium') ■

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are eleven Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Index, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Studies. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota, and, lastly, offices, the Apostolic Chancery, the Apostolic Datar, the Apostolic Chamber, the Secretariate of State, etc.

The [redacted] wherewith the Holy See maintains diplomatic relations are Austria Hungary, Bavaria, Belgium, Luxemburg, Monaco, the Netherlands, Portugal, Prussia, Russia, Spain, and Switzerland, together with nearly [redacted] the American Republics, except the United States and Mexico

ROMANIA

Reigning King.

Carol I. King of Rumania, born April 20, 1839, son of the late Prince Karl of Hohenzollern-Sigmaringen; elected 'Domn,' — Lord, of Rumania, April 20 (N.S.), 1866; entered Bucharest May — (N.S), — Proclaimed King of Rumania March — (N.S), 1881. Married, November 15, 1869, to Princess Elizabeth — — — — — *Weed*, born Dec. 29, 1843.

The King has, in addition to revenues from certain Crown lands, an — — — allowance of 1,185,185 lei, = 47,400£. The heir to the crown has an annual donation of 300,000 lei (12,000£.).

The succession to the throne of Rumania, in the event of the King remaining childless, — — — settled, by Art. — of the Constitution, upon his older brother, Prince Leopold of Hohenzollern-Sigmaringen, who renounced his rights in favour of his son, Prince Wilhelm, the act having been registered by the Senate — October 1880. Prince Wilhelm, on November 22, 1888, renounced his rights to the throne in favour of his brother, Prince Ferdinand, born August 24, 1865, who, by a decree of the King, dated March 18, 1889, — — — created 'Prince of Rumania.' Prince Ferdinand — — — married, January 10, 1893, to Princess Marie, daughter of the Duke of Saxe-Coburg and Gotha; offspring of the union — — — Carol, born October 15, 1893; Elisabeth, born October 11, 1894; Marie, born January 8, 1900; Nicholas, born August 18, 19 — — ; and Ileana, born January 5, 1909.

The union of the two Principalities of Wallachia and Moldavia — — — publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present — — — being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Ioan I. A revolution which broke out in February 1866 forced Prince Alexandru Ioan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 21, 1877, which — — — confirmed by Art. — of the Congress of Berlin, signed July 18, 1878.

Constitution and Government.

The Constitution — — — in force in Rumania — — — voted by a Constituent Assembly, elected by universal suffrage, in the — — — of 1866. It has twice been modified—viz., in 1879, — — — and again in 1884. The Senate consists of — — — members, elected for 8 years, including 2 for the Universities, and 2 bishops. The heir — — — the — — — — — also a Senator. The Chamber of — — — consists of 125 members, elected for 4 years. A Senator — — — be — — — years of age, and a Deputy 25. Members of either House must be Rumanians by birth — — — naturalisation, in full enjoyment of civil and political rights, and domiciled in the country. For the Senate an assured — — — 9,400 lei (378£.) — — — required. — — — citizens of full age, paying taxes, are electors, and are divided into three Electoral Colleges. From the Chamber of Deputies, electors who are in possession of property bringing in 50£. or upwards per annum — — — vote in the first College. Those having their — — — and residence in an urban commune, and paying direct taxes to the State of 20 lei. — — — upwards annually, or being persons exercising the liberal professions, retired officers, or State pensioners, or who — — — — — through the primary course — — — education, vote in the second College. The third College — — — composed of — — — who, paying any tax, however small, — — — the State, belong to neither of the other colleges, — — — of — — — who can — — — write and have — — — — — of — — — lei (12£.) — — — rural land, — — — directly, as do — — — village priests and schoolmasters, — — — — — indirectly. — — — each

election every fifty indirect electors choose a delegate, and the delegates vote along with the direct electors of the Colleges. For the there are only two Colleges. The first consists of those electors having property yielding annually at least 807; the second, of those persons whose from property from 321 to nor annum. Both Senators and Deputies 20 lei for each day of actual attendance, besides free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of eight ministers, the President of which is Prime Minister, and may may not have a special department.

Senate (1912) Conservatives, 88, Liberals, 24

Chamber of Deputies (1912) Liberals 85, Conservatives 146, Conservative Democrats 10, Independents

Prime Minister and Ministers of Finance — M. Majerescu, Oct. 27, 1912

LOCAL GOVERNMENT

For purposes of local government Wallachia is divided into seventeen, Moldavia into thirteen, and the Dobruja into two districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. (The chief difference between the Dobruja and the other districts is that it does not elect senators or deputies. In Rumania there (1909) 372 arrondissements (phys) and 2,664 communes, 71 urban and 2,593 rural. In the rural there are 8,487 villages, and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but given by law.

Area and Population.

Departments	Area in sq miles	Population	
		Census 1 Dec 1912	Census Dec 1900
Bacau	110	212,130	191
Botosani	1,220	197,116	171,437

Total	50,720	7,248,081	5,956,890

The four historic divisions of the country were populated (1912) as follows — Moldavia, 2,145,464, Grand Wallachia (Muntania), 3,298,394, Oltenia, 1,413,897, Dobruja, 390,808

The population in 1899 consisted of 3,026,639 males and 2,980,051 females. The density varied from 88 inhabitants per square mile in Tulcea to 117 per square mile in Ilfov, the average for the whole country having been 117 per square mile. With respect to nationality the population of Rumania in 1899 was classified as follows — Rumanians, 5,489,296 (81 per cent), subjects of foreign States, 182,875 (3 per cent), foreign Jews, 1859 (0.1 per cent), Jews under Rumanian protection, 266,588 (4 per cent), others under Rumanian protection. Of foreigners, the Austro-Hungarians numbered 104,108, Turks, 22,989, Greeks, 20,057. Among Rumanians there are racial differences of which the most noteworthy are: In Central Moldavia there are thousands of Magyar descent (Changai and Szeklers), the Gypsies along the Danube, many inhabitants of Bulgarian and Serbian origin, scattered over the country are hordes of Gipsies most of whom have settled in Rumanian villages. In Dobruja the foreign element is strong, Turkish, Tatar, Bulgarian, Russian, and German. Rumanians are spread extensively in the neighbouring countries — Transylvania, Hungary, Bukovina, Bessarabia, Serbia, Bulgaria, Macedonia, their total number probably is between 10 and 12 millions.

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows in each of the last five years —

Year	Births	Deaths	Marriages	Surplus of Births over Deaths
1904	21,436	17,041	11,941	10,395
1907	24,481	17,741	9,411	9840
1908	25,000	19,413	11,411	8747
1909	25,231	16642	11,211	11017
1910	27,310	17,243	14,406	10067
1911	29,470	20,976	14,443	12,731

Not included in the births and deaths are the still born, 8,144 (2.7 per cent of the total births in 1911). The illegitimate births in 1911 were about 8 per cent of the total number. In 1904 there were 1,800 divorces, in 1905, 1,718, in 1906, 1,737, in 1907, 2,167, in 1908, 2,384, in 1909, 2,651, in 1910, 2,847, in 1911, 3,029.

The principal towns are (population 1912) — Bucharest, the capital and seat of Government, 388,109, Jassy, 75,882, Galatz, 71,719, Braila, 64,730, Floresti, 56,594, Clujova, 51,973, Botosani, 32,818; Buzan, 28,781; Constantza, 26,628, Berlad, 25,381, Focseani, 25,155.

Religion, Instruction, Justice, etc.

Of the total population of Rumania in 1900, 5,408,743 belonged to the Orthodox Church, 168,176 Catholics, Protestants, 16,598 Armenians, 269,015 were Jews, and 43,470 were Mahometans. The government of the Orthodox Church rests with two archbishops, the first of them styled Primate of Rumania, and the second the Archbishop of Moldavia. There are, besides, bishops of the National Church, and a Roman Catholic archbishop and bishop. Only the clergy of the National Orthodox

¹ In Hungary there is a Uniate metropolitan with 4 suffragans, of which one is Greek.

Church are recognised and paid by the State. In 1903 there were 6,666 churches, 168 monasteries for either sex, and 11 mosques.

Education is free and compulsory, wherever there are schools, and it is improving from year to year. In 1909, according to a special census return, 60.16 per cent of the population under 7 years of age could neither read nor write, in 1909, 43.12 per cent, and in 1910, 41 per cent, of the army recruits could neither read nor write. Following figures are statistics of public primary schools —

	Schools		Teachers		Pupils		Population (7-14 years)	
	1906	1907	1906	1907	1906	1907	1906	1907
Rural primary	4,100	5,074	6,460	7,790	157,041	140,110	813,499	827,583
Urban	1,361	1,924	1,460	1,924	78,603	80,411	110,778	110,778
Total	5,461	7,000	7,920	9,714	235,644	220,521	924,277	938,361

The secondary schools in 1906-07 were, for boys, 20 lycées, 28 gymnasia and 4 seminaries, these 47 institutions having 873 teachers and 14,016 pupils, for girls 10 high schools with 161 teachers and 1,615 pupils, 5 normal schools for men with 80 teachers and 1,136 students, and 2 for women with 34 teachers and 283 students, 47 professional schools for boys with 209 teachers and 2,235 students, and 28 for girls with 293 teachers, 12 commercial schools with 109 teachers and 1,431 pupils, 17 agricultural schools with 26 teachers and 402 pupils, 6 schools of domestic economy for girls with 17 teachers and 118 pupils, total pupils at boys' schools 19,280, at girls' schools 6,016. There are 2 universities with faculties in law, philosophy, science and medicine, and theology, at Bucarest (120 professors and 8,422 students) and Jassy (60 professors and 534 students). In 1907-8 there were 122 high schools for boys and 46 for girls.

Justice is administered by a court of cassation, 4 appeal courts, 14 tribunals, and justices of the peace. The total number of prisoners in custody during 1907 in the central prisons was 23,068, of whom 1,202 remained in prison on December 31. Assistance is given to the sick in 168 hospitals and hospices (departmental, communal, rural, and private).

Finance.

The following table shows the revenue and expenditure (estimates for 1911 years) for years ending March 31 (old style) —

	1906-07	1909-10	1910-11	1911-12	1912-13
	Lei	Lei	Lei	Lei	Lei
Revenue	411,011,000	466,322,000	471,942,000	473,301,230	505,646,980
Expenditure	408,741,000	426,648,945	441,074,942	478,791,230	505,646,980

■ Including railway budgets and ■ budgets not formerly incorporated in the State budget.

For the year 1912 13 the budget estimates (in lei = francs) —

REVENUE	Lei	EXPENDITURE	Lei
Direct taxes	41 280 000	Ministries —	
Indirect	65 100 000	War	4,498,028
Registration and Stamp	21 411	Finance	207,010 078

Commerce and Industry	1 496 000		
Total	70 647 000 (20 225 873)	Total	507 046 940 (20,226 673)

The public debt of Rumania amounted on March 31, 1912, to 62,688,164. For 1911 12 the service of the debt (interest, amortization, pensions, &c., was estimated at 519 080.

Defence

Military service in Rumania is compulsory and universal. The young men from 14 to 21 years of age receive a certain amount of preliminary training in their homes. At 21 they enter the ranks, serving for 1 year in the infantry, and 1 year in the other arms, followed by 3, or 4, years in the reserve of the first line. The men then pass to the second line, or reserve force, for 10 years, after which they are transferred to the territorial force at the age of 38, and remain in it 1 year, thus completing 21 years' service. Young men exempted from service in the ranks and those surplus to the annual contingent, are posted to a supplementary reserve, in which they will, in future, receive a certain amount of instruction.

The Rumanian field army consists of 5 army corps and 2 cavalry divisions. Army corps are composed of 2 divisions, and a brigade, and each is attached a brigade of cavalry of 1 regiment. A division consists of 1 brigade, each of 1 regiment of 1 battalion, a battalion of chasseurs (13 battalions in all), an artillery brigade of 2 regiments (12 batteries), 3 squadrons of cavalry, and a company of pioneers. A cavalry division consists of 2 brigades of 1 regiment each (24 squadrons) and 2 batteries of horse artillery. There are altogether 36 infantry regiments of 1 battalions, 1 rifle battalions, 20 cavalry regiments, 20 regiments of field artillery each of 1 batteries, 1 horse artillery batteries, 19 companies of fortress artillery, 7 engineer battalions, and 1 railway battalion. Batteries have 4 guns each. The strength of the Rumanian army of 5 army corps and 2 cavalry divisions would amount to about 220,000 men.

The second line, or reserve, troops at present consist of 11 battalions, and 9 batteries. The formation of reserve divisions is contemplated.

The peace strength of the Rumanian army in 1911 was 4,495 officers and officials, 93,644 non-communized men, and 20,839 horses.

The Rumanian infantry is armed with the Mannlicher magazine rifle, calibre 250. The cavalry carry the Mannlicher carbine. The horse and field batteries are armed with the Krupp 75 mm. (1903).

The Rumanian budget for 1911 amounted to 2,977,000. Considerable sums are being spent on the rearmament of the artillery, &c.

At Galatz on the Danube, at the mouth of the Sereth, are lines of fortifications, and at Nemolass on the [redacted] are [redacted] lines. Again at Focsani to the north-west, on the Sereth, are extensive works in 3 lines. All these fortifications are in the nature of entrenched camps, and are armed with numerous Krupp and Gruson guns. Around Bucharest are forts and many batteries.

Rumania has in the navy the *Elisabeta*, launched at Elswick in 1887, a protected cruiser of 1,320 tons displacement and 4,900 horse-power, 3½-inch [redacted] at the belt, 4 6-inch and 8 machine guns; the *Mircea*, training ship, a composite brig of [redacted] tons; 1 gunboat; 1 guard vessel; 1 despatch vessel (240 tons); 1 first class and 2 second class torpedo-boats. On October 4, 1907, twelve vessels for naval police were launched at Galatz, with eight vedettes. A floating dock has been purchased in Scotland. There are four monitors, lightly armoured, of [redacted] tons each. It has been proposed to order 4 destroyers and 12 torpedo boats. At Galatz there is an arsenal.

Production and Industry.

According to an estimate by Dr Coleaco, the distribution of the soil of Rumania with respect to agriculture in 1905 was as follows:—

	Acres		Acres
Ploughed lands	19,528,100	Forests (less clearings)	1,087,900
Fallow lands	1,297,000	Water	1,084,000
Vineyards and orchards	456,500	Other lands	1,524,700
Meadows	1,214,000		
Pastures	1,504,000	Total	22,153,000

Of the cultivable land (arable, meadow, plantation, and orchard land) the distribution with respect to ownership is as follows:—

Size of Properties	Proprietors	Area	Per cent of area
Acres	Number	Acres	
247 and under	1,017,502	8,199,647	41 per cent
Over 274 " " 123 "	30,818	1,719,000	8 per cent
" 123 " " 247	2,981	406,676	2 per cent
" 247 "	4,471	9,384,964	47 per cent
	1,055,772	19,609,791	100 per cent

In the last two years the chief agricultural crops were as follows:—

Crop	Area cultivated		Production	
	1911	1912	1911	1912
	Acres	Acres		
Wheat	4,831,410	5,113,467	93,927,760	bn 208,580
Rye	330,400	284,896	4,835,149	3,478,686
Barley	1,284,002	1,376,914	26,348,748	644,189
Oats	1,608,537	943,874	21,411,789	20,140,986
Maize	6,213,127	5,125,967	107,321,000	—
			Gallons	
Wine	214,650	215,846	21,863,000	—
			Cwt	
Plums	182,965	183,356	2,068,345	—
Tobacco	21,980	22,240	198,121	—

The forests of Rumania have an aggregate of 6,985,120 acres, of which 2,712,582 are State owned and 4,232,539 are privately owned. The principal forests are oak (712,430 acres), beech, oak, &c. (692,620 acres), beech (540,540 acres), pine and fir (311,120 acres), larch, maple, elm, willow, walnut. The export of wood in 1907 was 48,867 tons.

In December 1907 Rumania had 864,324 horses, 2,539,526 cattle, 5,655,444 sheep, 232,515 goats, and 1,709,205 swine.

Oil and petroleum are worked and the latter is exported in considerable quantities. Petroleum springs, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output reached in 1900, 250,000 tons; in 1909, 1,296,403; in 1910, 1,852,299; in 1911, 1,544,072. Of the total exported, 26.5 per cent went to the United Kingdom, 17.5 per cent to France, and 1 per cent to Germany.

The values of the imports into and exports from Rumania, exclusive of gold and silver (in sterling) are—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1904	18,710,500	18,234,000	1908	16,462,600	15,157,900
1906	18,984,600	19,154,400	1909	14,728,902	18,602,265
1907	17,220,400	22,157,100	1910	16,388,622	24,660,195

A Treaty of Commerce and Navigation providing for the most favoured nation treatment between Rumania and Great Britain was signed at Bucharest on October 31, 1905.

Imports and exports are estimated in accordance with values settled by a Commission appointed from time to time.

The import duties amounted in 1905 to 1,048,570l, in 1906 to 1,648,300l, in 1907 to 1,882,100l, in 1908 to 1,990,570l.

In 1911 the chief imports and exports are as follows (in millions of francs).—

Imports		Exports	
Merchandise	1910	Merchandise	1910
Metals manufactures	48,971,773	Cereals and products	25,192,207
Vegetable textiles manufactures	66,165,245	Petroleum	38,897,160
Ready-made clothing	30,772,788	Animal products	4,626,201
Wool	36,248,679	Vegetables	24,780,967
Iron and steel	59,219,229	Hides, &c.	2,977,684
Vegetables, seed, &c.	7,369,366	Living animals	6,851,725
Grains	14,919,473	Wool, hair, &c.	—
Fruits	12,037,870	Fruits	—
Trees, &c. manufactures	10,447,206	Mineral products	1,825,189
—	14,982,405		
Rubber, gutta, percha, &c.	7,647,790		
Chemicals	8,259,385		

In 1911 the trade was mainly as follows:—

Countries	Imports from (1909)	Imports from (1910)	Exports to (1909)	Exports to (1910)
	Lei	Lei	Lei	Lei
Austria-Hungary	85,788,933	97,980,077	115,030,019	97,284,189
Germany	124,669,062	136,287,377	28,009,898	24,281,109
Britain	57,773,825	56,771,808	94,658,206	98,506,003
France	29,677,076	26,627,410	27,502,209	874,615
Belgium	11,619,580	13,068,065	121,296,787	226,241,676
Italy	17,676,649	21,744,144	36,996,007	68,671,677
Russia	10,780,158	11,771,107	4,138,092	6,361,849
Switzerland	6,994,076	8,452,096	70,914	112,466

European Commission of the Danube, set into being in 1856, of delegates one representing each of the following powers: Austria-Hungary, France, Germany, Britain, Italy, Roumania, Russia, and Turkey. It has its seat at Galatz. November 24, 1904 it existed, or exist, for periods of 8 years. by the operations of the Commission the Danube below along branch has been deepened and corrected. The depth has been increased 3 ft to 18 ft, and of the branch minimum depth has increased 3 ft to 18 ft, while by canalisation and other works the navigation shortened 18 nautical miles. The Commission a of 80,000 a year entirely from taxes levied on shipping leaving the river.

General shipping (1911) entered, 37,958 vessels of 11,707,631 tons; cleared, 37,849 vessels of 11,739,353 tons.

In 1912 Roumania had 2,000 of railway, of which 2,287 miles belonged State. In 1911 the receipts from traffic amounted 97,345,821 lei, and the working expenses to 60,418,807 lei. has the working of all the lines, and has, besides, under general railway direction, a commercial navigation service the Danube and Sea. Within Roumania are 1,806,580 miles of roads.

In 1910-11 there were 2,979 post-offices, through which ■■■■ passed 45,021,000 letters, 25,815,000 post cards, and 81,994,000 newspapers, samples, &c. In 1910-11 there ■■■■ 4,539 miles of telegraph lines, and 12,921 miles of wire, on which 3,661,401 messages ■■■■ forwarded. The number of ■■■■ ■■■■ 3,127. In 1910-11 there ■■■■ 7 urban telephone systems with 1,004 miles of line and 8,402 miles of wire, and 5,525 interurban systems with 18,880 miles of line and ■■■■ miles of ■■■■. On the urban systems during the year there ■■■■ 12,725,226 conversations, and on the ■■■■ urban 1,288,778.

Money, Weights, ■■■■ ■■■■.

The National Bank of Romania, with capital and ■■■■ of 89,055,000 lei, had, ■■■■ December 24, 1911, ■■■■ circulation of notes and cash bonds amounting to 443,387,890 lei, cash ■■■■ hand amounting to 219,168,497 lei. Other public credit institutions ■■■■ Savings Bank, ■■■■ Deposit and Consignment Bank, ■■■■ Agricultural Loan Bank, 1,849 Popular Banks, ■■■■ Rural *Crédit Foncier*, ■■■■ Urban *Crédit Foncier* (at Bucharest and Yassi), ■■■■ Agricultural Bank, and ■■■■ *Rurala*, ■■■■ institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions.

In 1911 the following coins were in circulation—gold, to the value of 10,725,000 lei; silver coins, ■■■■ lei, to the value of 23,660,409 lei, ■■■■ lei to the value of 16,098,710 lei, 1 lei, to the value of 17,734,465 lei, 74 lei to the value of 7,745,490, total, 65,269,074 lei. There were also nickel coins in circulation to the value of 10,500,000 lei, and copper coins to the value of 995,000 lei.

The decimal system was introduced into Rumania in 1876, the unit of the monetary system being the *leu*, equivalent to the franc. The gold *leu* is the monetary unit. Silver is legal tender up to 50 lei only. Gold coins ■■■■ 20, 10, and 5 lei pieces. Nickel is coined in 5, 10, and ■■■■ centimes (bani) pieces.

The metric system ■■■■ has been introduced but Turkish weights and measures are, ■■■■ some extent, in ■■■■ by the people.

Diplomatic and Consular Representatives

■ OF ROMANIA IN GREAT BRITAIN

Envoy and Minister—M. Miabu (appointed December 18, 1912)

Secretaries—Prince Antoine Bibesco and ■■■■ Michel R. Roerisco

Chancellor—N ■■■■ Constantinesco

Attaché—Captain Matila Costescu Ghyka

Commercial Attaché—Michel G. Holban

Consul-General ■■■■ London—Alfred Stead

Vice ■■■■ —G ■■■■ Gologan

■ OF GREAT BRITAIN IN ROMANIA.

Envoy ■■■■ *Minister*—Sir G. H. Barclay, K.C.S.I., K.C.M.G., C.V.O., (1912)

Secretary—J. Vaughan, M.V.O.

Consul—Major J. G. Baldwin, O ■■■■ (at Galatz)

■■■■ *Commissioner*—Hamilton E. Browne

There ■■■■ Vice-Consuls ■■■■ Bucharest, Bristla, Constantza, and ■■■■

and other of Reference concerning Rumania.

RUSSIA.

(EMPIRE OF ALL ■■■■ RUSSIA.)

Reigning Emperor.

Nicholas II., Emperor of All the Russias, born May 6 (18), 1868, the eldest ■■■■ of the Emperor Alexander III. and of Princess Dagmar (*Maria Feodorovna*), daughter of the late King Christian IX. of Denmark; ascended the throne ■■■■ the death of his father October 20 (November 1), 1894; married, November 14 (26), 1894, to Princess Alexandra Alix (*Alexandra Feodorovna*), daughter of Ludwig IV., Grand Duke of Hesse, born May ■■■■ (June 6), 1872.

Son and Daughters of the Emperor.

Grand-duchess *Olya*, born November 3 (15), 1895.
Grand-duchess *Tatiana*, born May 29 (June 10), 1897.
Grand-duchess *Marie*, born June 14 (26), 1899.
Grand-duchess *Anastasia*, born June 5 (18), 1901.
Grand duke *Alexis* (hen apparent), born July 30 (August 12), 1904

Mother of the Emperor.

Empress *Marie* (*Dagmar*) widow of Emperor Alexander III, born November 14 (20), 1847

Brother and Sisters of the Emperor.

I. Grand-duchess *Xenia*, born March 21 (April 6), 1871, married to Grand-duke Alexander Mikhailovich
II. Grand-duke *Michael*, born November 22 (December 4), 1876.
III. Grand-duchess *Olya*, born June 1 (18), 1882, married, July 27 (August 9), 1901, to Peter Alexandrovich, Duke of Oldenburg.

Uncles and Aunts of ■■■■ Emperor.

■■■■ children of the late Grand-duke Vladimir:—1. Carl, born September 30 (October 12), 1876, married October 8 (21), 1905, to Princess Victoria Feodorovna of Saxe-Coburg and ■■■■ (divorced Grand Duchess of Hesse) Offspring *Marie*, born January 20 (February 3), 1907, and *Kira*, born April 26 (May 9), 1908. 2. Boris, born November 12 (24), 1877. ■■■■ Andreas, born May 2 (14), 1879. ■■■■ Helene, born January 17 (29), 1882, married, August 10 (22), 1902, ■■■■ Prince ■■■■ ■■■■ Greece (*see Greece*)

II. Grand-duchess *Maria*, born October 1 (17), 1843: married January 22, 1874, to ■■■■ ■■■■ Edinburgh, son ■■■■ Queen Victoria of ■■■■ Britain, who died July 30, 1900.

III. Grand-duke *Paul*, born September 21 (October 2), 1890, married (1) ■■■■ 5, (17), 1889, ■■■■ Princess Alexandra, daughter of the King ■■■■ Greece, who died September ■■■■ (24), ■■■■ (2) *morganatically*, September 27 (October 10), 1902, to Olga Valerianovna Karnovitch, Countess von Hohenhausen. Offspring of the first marriage: *Maria*, born April 6 (18), 1890; married, April 20 ■■■■ 2), 1908, ■■■■ Prince Wilhelm, Duke of Södermanland (Sweden); *Dimitri*, born September 6 (18), 1891.

The reigning family of Russia descend, in the female line, from ■■■■ Romanof, elected Tsar in 1613, after the extinction of the House of Rurik; and in the male ■■■■ from ■■■■ ■■■■ ■■■■ of Holstein-Gottorp, born ■■■■

1700, scion of a younger branch of the princely family of Oldenburg. The union of his daughter Anne with **1833** Karl Friedrich of Holstein-Gottorp formed part of the great reform projects of Peter I., intended to bring Russia into closer contact with the Western States of Europe. Peter I. **1834** succeeded by his second wife, Catherine, the daughter of a Livonian peasant, and **1835** by Peter II., the grandson of Peter, with whom the male line of the Romanofs terminated, in the year 1730. The reign of the next three sovereigns of Russia, Anne, Ivan VI., and Elizabeth, of the female line of Romanof, formed a transition period, which **1836** to **1837** end **1838** the accession **1839** Peter III., of the house of Holstein-Gottorp. All the subsequent emperors, without exception, connected themselves by marriage with German families. The wife and **1840** of Peter III., Catherine II., daughter of the Prince of Anhalt-Zerbst, general in the Prussian army, **1841** the **1842** to her only son, Paul, who became the father of two emperors, Alexander I. and Nicholas, and the grandfather of a third, Alexander II. All these sovereigns married German princesses, creating intimate family alliances, among others, with **1843** reigning **1844** of Wurttemberg, Baden, and Prussia.

The Emperor is in possession of the **1845** from the Crown domains, **1846** consisting of more than a million of square miles of cultivated land and forests, besides gold and other mines in Siberia, and producing a vast revenue, the actual amount of which is, however, unknown, **1847** no reference to the subject is made in the budgets or finance accounts, the Crown domains being considered the private property of the imperial family.

The following have been the Tsars and Emperors of Russia, from the time of election of Michael Romanof. Tsar Peter I. was the first ruler who adopted, in the year 1721, the title of Emperor.

<i>House of Romanof—Male Line.</i>			
Michael	1613	Ivan VI.	1740
Alexis	1645	Elizabeth	1741
Fedor	1676	<i>House of Romanof-Holstein.</i>	
Ivan and Peter I.	1682	Peter III.	1762
Peter I.	1689	Catherine II.	1762
Catherine I.	1725	Paul	1796
Peter II.	1727	Alexander I.	1801
		Nicholas I.	1825
		Alexander II.	1855
<i>House of Romanof—Female Line.</i>		Alexander III.	1881
Anne	1730	Nicholas II.	1894

Constitution and Government.

The Government of Russia is a constitutional hereditary monarchy but, in fact, the whole legislative, executive, and judicial power is united in **1895** Emperor, whose will alone **1896** law, and the monarch continues to **1897** the title of Autocrat. On August **1898** (19), 1905, however, **1899** elective **1900** Council (Gosudarstvennaya Duma) **1901** created, and on October 17 (30), a law was promulgated granting **1902** the population the firm foundations **1903** public liberty, based **1904** the principles of the real inviolability of the person, and of freedom of conscience, speech, assembly, and association, and establishing as **1905** unalterable rule **1906** no law shall **1907** into effect without the approval of the Duma, and **1908** the elected of the people shall be guaranteed the possibility of a real participation in the control of the legality of the acts of such authorities as **1909** appointed by the Emperor.

The Duma consists of members of 12 years and representing the governments of provinces, the greatest cities, Petersburg, Warsaw, Kiev, Lodz, Odessa, Riga (law of June 3 (16), 1907)

The election of the Deputies is indirect, made by electoral assemblies of the chief towns of governments or provinces and of the greatest cities, composed of delegates chosen by the district elective assemblies. The delegates occupying for 12 months lodgings let to them may be members of the assemblies, also salaried of State, of municipal railway administration, in the country, of determinate of land, different in different districts, of industrial than 50,000 roubles in value, electors; or peasant and manufactories with than 50 workpeople represented in the electoral assemblies by delegates, two each voted, and for each thousand workmen. Students, soldiers, governors of provinces (in provinces governed by them), police-officers (in the localities for which they act) may vote. Members of the Duma are paid 100 roubles per day during session, once a year travelling expenses and from Petersburg.

Under a Manifesto and Ukase published on March 3, 1907 (N 8), the Council of the Empire consists of an equal number of elected members and members nominated by the Emperor, and will be convoked and prorogued annually by Imperial Ukase. The elective members of the Council will be eligible for 10 years, a third of the number being elected every three years. Each assembly of Zemstvo of each government will elect one member. Six will be returned by the Synod of the Orthodox Church, six by the representatives of the Academy of Sciences and the Universities, 12 by the representatives of the houses of commerce and of industry, 18 by the representatives of the nobility, and six by the representatives of the landed proprietors of Poland, assembled in Congress at Warsaw. The representatives of the Academy of Sciences, the nobility, and the commercial and industrial communities form the election of their members. The Council of the Empire will meet at St. Petersburg. In those provinces of European Russia which have no Zemstvo, a congress of the representatives of the landed proprietors will assemble in the chief town of their province to elect one member for each province to the Council of the Empire. All members of the Council must have attained their 40th year and have an academical degree. The President and Vice-President will be appointed by the Tsar. The elective members of the Council will receive an honorarium of 100 roubles (2½ shillings) a day during the session.

The Council of the Empire and the Duma have equal legislative powers. They have the same right of initiative in legislation and of addressing questions to Ministers. Every bill before being submitted for the Imperial sanction must be passed by both the Duma and the Council of the Empire, and all such bills are rejected by one of the two legislative institutions will not be laid before the Tsar. Both the Duma and the Council have the right to annul the election of any of their members. The sittings of both the Duma and the Council of the Empire will be public. The closure of a debate may be voted by a simple majority. Neither the Council of the Empire nor the Duma is empowered to receive deputations or petitions. Ministers are eligible for the Duma and, in the capacity of elected members, qualified to vote.

Laws voted by the two legislative bodies are sent to the Imperial

sanction by the President of the Council of the Empire. The members of both institutions will have the privilege of personal immunity during the session. They will only be liable to arrest with the permission of the Duma or the Council of the Empire, as the case may be, except in cases of flagrant offences or offences committed in the exercise of their duties. The Ukases further provide that bills rejected by the Tsar cannot be brought forward again in the course of the same session, while Bills rejected by one of the legislative bodies cannot be brought forward again without the Imperial consent. The first Duma, after sitting from April 27 (May 10), 1906, was dissolved on July 9 (22), 1906. The second Duma, after sitting from February 15 (March 5), 1907, was dissolved on June 16 (30), 1907. The third Duma, after sitting from November 1 (14), 1907, arrived at the term of the legislation in 1912. The fourth Duma has been sitting since November, 1912.

Duma Right, 63, Nationalists, 124, Octobrists, 95, Progressives, 15, Constitutional Democrats, 59, Travaillistes, 10, Social Democrats, 16, Poles, 16, Independents, 16.

The administration of the Empire is still entrusted to great boards, or councils, possessing separate functions.

One of the great colleges or boards of government is the Ruling Senate or 'Pravitel'stvennyy Sina', established by Peter I in the year 1711. The functions of the Senate are partly of a deliberative and partly of an executive character. To be valid a law must be promulgated by the Senate. It is also the high court of justice for the Empire. The Senate is divided into six departments or sections, which all sit at St. Petersburg, two of them being Courts of Cassation. Each department is authorized to decide in the last resort upon certain descriptions of cases. The senators are mostly persons of high rank, or who fill high stations, but a lawyer of eminence presides over each department, who represents the emperor, and without whose signature its decisions would have no force in the plenum, or general meeting of several sections, the Minister of justice takes the chair. A special department is entrusted with disciplinary judgments against officials of the crown.

Another is the college, established by Peter I in the year 1721, the Holy Synod, and to it is committed the superintendence of the religious affairs of the Empire. It is composed of the three metropolitans (St. Petersburg, Moscow, and Kiev), the archbishop of Georgia (Caucasus), and several bishops sitting in turn. Its decisions have the emperor's name, and have no force till approved by him. The President of the Holy Synod is the Metropolitan of St. Petersburg, Vladimir. The General Procurator, Actual Privy Councillor Sabler.

A third board of government is the Committee of Ministers, reorganized by a decree of October 15 (November 1), 1905.

The fourth board of government, the most important is the decree for its reorganization issued October 19 (November 1), 1905, is the Council of Ministers. It consists of all the ministers, and of the general directors of the most important administrations.

The president of the committee is the President of the Council of Ministers, Actual Privy Councillor, Minister of Finance, Kokovtsov, appointed President, September 24, 1911.

The most important administrations are:—

1. Ministry of the Imperial Domains and Imperial Domains.—Minister General W. Fredericks, aide-de-camp of the Emperor; appointed 1911.

2. *Ministry of Foreign Affairs*.—Minister: Actual State Councillor *Sazonoff*, appointed 1910.

3. *Ministry of War*.—Minister: General *Sukhomlinoff*, appointed 1909.

4. *Ministry of the Navy*.—Minister: Vice-Admiral *Grigorovitch*, appointed 1911.

5. *Ministry of the Interior*.—Minister: Privy Councillor *Maklakoff*, appointed 1911.

■ *Ministry of Public Instruction*.—Minister: Privy Councillor *Casseo*, appointed 1910.

7. *Ministry of Finance*.—Minister: Actual Privy Councillor *Kokovtseff*, appointed Minister, 1906.

8. *Ministry of Justice*.—Minister: Privy Councillor *Shcheglovitoff*, appointed 1906.

■ *General Direction of Land Organization and Agriculture*.—General Director: Actual Privy Councillor *Krievskoin*, appointed 1908.

10. *Ministry of Ways of Communications*.—Minister: Privy Councillor *Rukhloff*, appointed 1909.

11. *Ministry of Commerce and of Industry*.—Minister: Privy Councillor *Timasheff*, appointed 1909.

12. *Department of General Control*.—Controller General: Privy Councillor *Kharitonoff*, appointed 1907.

13. *Holy Synod*.—Procurator-General: Actual State Councillor *Sablor*.

14. *General Direction of State Studs*.—General *Zdanovich*

The Emperor has two Private Cabinets, one of which is occupied with charitable affairs, and the other is devoted to public instruction of girls and to the administration of the institutions established by the late Empress Maria, mother of the Emperor Nicholas I. Besides, there is the Imperial Headquarters (*Glavnaya Kvarтира*), and a Cabinet, which is entrusted also with the reception of petitions presented to the Emperor, formerly received by a special Court of Requests (abolished in 1884). According to a law of May 19, 1888, a special Imperial Cabinet having three sections (Economy, Mines and Manufactures and Legislation) has been created, instead of the same departments in the Ministry of Imperial Household.

LOCAL GOVERNMENT.

■ Empire is divided into governments and provinces (*oblast*), subdivisions of which ■ districts or circuits (*uyezd* in the governments ■ *okrug* in the provinces). There ■ governments (49 ■ European proper, 10 in Poland, ■ in Finland, ■ Caucasus, ■ in Siberia), ■ provinces (1 in European Russia, 5 ■ Caucasus, 9 in Central Asia, 6 ■ Siberia, and ■ circuits, those of Sukhum and Zakataly in Caucasus. ■ of the governments ■ provinces ■ into general governments. At ■ head of each general government ■ a governor-general, the representative of the emperor, who ■ such has ■ supreme control and direction

of all affairs, whether civil or military. In Siberia the governors-general are each assisted by a council, which has ■ deliberative voice. A civil governor assisted by a council of regency, to which all measures must be submitted, is established in each government, and a military governor in twenty-one provinces. A vice-governor ■ appointed to ■ the place of the civil governor when the latter is absent ■ unwell. There is also, in each government, a council of control under the presidency of ■ special officer, depending directly ■ the Department of Control. Each government or province is divided into from 5 to 15 districts (815 in all Russian Empire), having each several administrative institutions. The townships (*gradonachalstvo*) of St. Petersburg, Moscow, Sebastopol, Odessa, Kerch, Nikolayev, Baku and Rostov-on-Don, ■ administered by special governors (*gradonachalnik*); Kronstadt is under ■ separate military governor.

In European Russia the government of the parish, in ■ far as the lands of the peasantry ■ concerned, and part of the local administration, is entrusted to the people. For this purpose the whole country is divided into 17,075 cantons (*volosts* among the Russian population, *gminas* in Poland, *stanitsas* in Cossack Lands, *viks* in territories peopled by natives, &c.), which ■ presided over by ■ elder (*volostnoi starshina* in the *volosts*), elected at the cantonal assemblies, which are composed of the delegates of the village communities in the proportion of one man to every ten houses. The village communities elect ■ elder (*starosta*) ■ executive officer of ■ commune, and also ■ tax-collector. All these officers ■ elected at communal assemblies ('Mir') by the peasants, and from among themselves. The communal assemblies are constituted by all the householders in the village, who discuss and decide all communal affairs. These communal assemblies ■ held as business requires. The canton assemblies decide the same class of affairs as do the communal assemblies, but concerning each its respective canton. The peasants have thus special institutions of their own, which are submitted also to special colleges 'for peasants' affairs,' instituted in each government. In Poland the 'Volost' is replaced by the 'Gmina,' the assemblies of which are constituted of all landholders—nobility included, the clergy and the police excluded—who have each but one voice, whatever the area of land possessed. The 'Gmina' has, however, less autonomy than the 'Volost,' being subject directly to the 'Chief of the District.'

The administration of the economical affairs of the district and province are, to ■ extent, in the hands of *zemstvos*, or the district and provincial assemblies (law of January 1, 1864), composed of representatives elected by the peasantry, the householders in the towns, and the landed proprietors. Their executive power is entrusted to provincial and district 'Upravas.' The president of the nobility of the district, ■ of the province, presides ■ *officio* ■ the *zemstvos* of the district, or of the province, and, in his default, the president of the local tribunal presides. Important modifications, increasing the powers of noble landowners in the affairs of the *zemstvos*, suppressing the right of peasants to elect deputies to the *zemstvo* (they present candidates out of which the governor of province name ■ deputy), reducing the numbers of representatives, and limiting their powers, ■ introduced by the law of June ■, 1894.

The towns and cities have municipal institutions of their own, organized on nearly the ■ principles ■ the ■ (law of June 18, 1870). All house-owners ■ divided into three classes, each of which represents ■ equal amount of real property, and each class elects ■ equal ■ber of representatives ■ the *Dumas*; ■ latter elect their executive the *Uprava*. The law of June 11, 1892, reduces ■ powers of the Municipal Government

and places it almost entirely under the Governors nominated by the Emperor. In 1894, municipal institutions, with ■■■■ limited powers, were introduced in several ■■■■ of Siberia, ■■■■ 1895 in Caucasia. The institutions of the *zemstvo* are in force in 34 provinces (361 districts) ■■■■ European Russia.

■■■■¹.—The Grand-duchy of Finland, ceded to the Emperor of ■■■■ by the treaty of Fredrikhamn, September 17, 1809, has preserved, by special grant of Alexander I. (renewed by his successors), the Swedish Constitution, dating from the year 1772, reformed in 1789, slightly modified in 1809 and 1822, and reformed in 1906. The decrees ■■■■ in the years 1899-1903 ■■■■ all abolished by the Imperial Ukase of November 4, 1905, which gave authority for the reform of the Legislative body. The national parliament, which formerly consisted of four estates, the nobles, the clergy, the burghers, and the peasants, now consists of ■■■■ Chamber of ■■■■ members chosen by direct and proportional election, in which all who ■■■■ entitled ■■■■ vote have ■■■■ equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached ■■■■ her 24th year. There ■■■■ 16 electoral districts with ■■■■ representation proportioned to the population, a re-arrangement being required every ■■■■ y■■■■ Each district is divided into voting circuits. The voting system, devised with ■■■■ view to proportional representation, provides for the formation of voters' associations which prepare three-name lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them. There may, within limits, be compact between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the Diet, the members of which receive 1,400 marks (56*l*.) for each session of about 90 days. The Diet lasts for 3 years unless sooner dissolved. The Grand-Duke summons and may dissolve the Diet; certain legislative measures ■■■■ brought forward by the ministers ■■■■ propositions from him, and the Government ■■■■ responsible to him ■■■■ well ■■■■ to the Diet. But the Diet can decide ■■■■ any motion not affecting fundamental laws ■■■■ the organisation of land and sea defence.

Poland.—Poland, which had a Constitution of its ■■■■ from 1815 to 1830, and a separate government till 1864, ■■■■ deprived at the latter date of the last remnant of its administrative independence. Finally, by ukase of the Emperor, dated Feb. 23, 1868, the government of Poland ■■■■ absolutely incorporated with that of Russia, and the use of Polish language in public places and for public purposes (railways, signboards, wills, &c.), ■■■■ prohibited.

■■■■ *Provinces.*—The Baltic Provinces have had ■■■■ institutions for self-government of their own. They have, however, been gradually curtailed, and the privileges of the provinces in police and school matters, chiefly vested in ■■■■ nobility, have been taken away by a law of June 21, 1888, the judicial and police rights of the landlords having been transferred ■■■■ functionaries nominated by the ■■■■ By a law of July 21, 1889, ■■■■ last vestiges ■■■■ manorial justice and of tribunals under the German-speaking nobility have been abolished, but ■■■■ Law of Justice of 1864, which is ■■■■ force in Russia, has been but partially applied to the provinces, so as to maintain ■■■■ administration of justice under the central Government. The ■■■■ language has been rendered obligatory in the official correspondence

¹ ■■■■ further ■■■■ ■■■■ Finland, see ■■■■ of ■■■■

of all parish, municipal, and provincial administration; so also in the Dorpat University, which was deprived in December 1889 of its privileges of self-government, and the gymnasia in 1890. The town of Dorpat has received the name of Yuriev, and the seat of the administration of the Baltic Educational District has been transferred to Riga. In April, 1898, new Committees for peasants' affairs were introduced, with the powers as Russian Governments

Area and Population

I PROGRESS AND PRESENT CONDITION.

The Russian Empire comprises one seventh of the land surface of the globe. Its area, without internal waters, is, according to the treaty of Portsmouth, 8,417,118 English square miles (19,155,587 7 square versts).

Until 1897 there have been but few enumerations of the population called censuses. On January 1 (February 9) 1897, a census was taken of the whole of the Empire (with the exception of the Grand Duchy of Finland). Comparing the items of the census with the figures of the 1856-59, it appears that the population of the Empire has increased by 74 per cent. The largest increase took place in the capitals (270 p.c. in St. Petersburg); South Russia (207 p.c. in Kherson, 170 p.c. in Yekaterinoslav, 137 p.c. in Taurida). The increase in other parts of the Empire appears as follows:—North West Russia, from 10 to 78 p.c.; Baltic Provinces, 25 to 58 p.c.; White Russia and Lithuania, 77 (Kovno) to 180 (Minsk) p.c.; Poland, 117 p.c.; Caucasus (without annexations) 117 p.c.; Siberia, 117 p.c.

The rapidity of growth of the population of the Empire (its acquisition being included in the figures of population) is seen from the following:—

Year	Population	Year	Population
1722	14,000,000	1835	60,000,000
1762	19,000,000	1859	74,000,000
1796	36,000,000	1897	129,209,297
1815	45,000,000	1911	167,008,400

The population of 1911 is estimated as follows by the Central Statistical Committee on the basis of the census of 1897 and the yearly increase of the population:—

European Russia	120,588,000
Poland	12,467,800
Caucasus	12,087,200
Siberia	8,719,200
Central Asian Provinces	10,107,800
Finland	3,084,400
Total Russian Empire	167,008,400

The following exhibits area and population according to the last issue of the Russian Central Committee (1912):

Governments Provinces	Area English square miles	Popula- tion on January 1, 1911	Density per sq mile	Governments and Provinces	Area English square miles	Popula- tion on January 1, 1911	Density per sq mile

1 In proportion to the ■■■■ from which the inner waters are excluded.

■ In proportion to ■■■■ total ■■■■

The proportion of ■■■■ in the population varies, in the Russian provinces, from 133 ■ per each 100 men (Yaroslavl) to 87.4 (St Petersburg)—this disproportion being due to the male population temporarily moving to the capitals ■ to the shipbuilding centres during the winter. The average proportions of ■■■■ to 100 ■■■■ are Russian Provinces, 102.9; Poland, 98.6; Caucasus, 88.9; Siberia, 98.7; The Steppes, ■ 4; Turkestan and Transcaspiian, 88.0; Russian Empire (exclusive of Finland), ■ ■

The ethnical composition of the population shown by the last census is set forth ■ the following table —

	European Russia	Poland	Caucasus	Siberia	Central ■■■■	■■■■
Aryans	81,515,580	8,281,807	4,901,418	4,711,672	1,083,245	100,831,610

II. MOVEMENT OF POPULATION.

The movement of population in European Russia, exclusive of Finland, is seen from the following statement for 1909 and 1910 :—

	1909	1910
<i>Births</i>	5,545,901	5,680,480
<i>Deaths</i>	3,661,808	3,916,612
Increase	1,884,093	1,763,868

The births and death rates in European Russia for five years and per 1,000 inhabitants are given from the following :—

	1905	1907	1908	1909	1910
<i>Births</i>	45.9	46.3	44.1	43.8	44.2
<i>Deaths</i>	29.2	27.8	27.7	28.9	30.5
Increase	16.7	18.5	16.4	14.9	13.7

The movement of population from [] into the Russian Empire in five years was as follows —

	From Russia			Into []		
	[]	Foreigners	Total	Russians	Foreigners	Total
[]	329,853	216,430	546,283	202,786	338,002	540,788
1907	304,019	277, []	581, []	307,836	457,031	764,867
1908	245,080	285,040	530,120	206,855	340,848	547,703
1909	272,721	299,467	572,188	211,442	370,776	582,218
1910	301,441	353,119	654,560	292,080	426,067	718,147

The Russians, especially [] and Poles, contributed a large part to the flow of emigrants into the United States. The number of immigrants from the Russian Empire into the United States during the years 1873 to 1910 was 2,527,457 (838,364 from 1873 to 1900). The emigration for the last ten years was as follows: —

1901	85,257	1906	216,665
[]	107,347	1907	258,943
[]	136,093	1908	150,711
1904	145,141	1909	120,460
1905	184,897	1910	186,792

III PRINCIPAL TOWNS.

The great majority of the population of Russia being agriculturists, they dwell in villages. The number of towns and villages in the Russian Empire (exclusive of Finland), grouped according to population, is given as follows: —

Towns with population	Number	Villages with population	Number
Over 100,000	19	1,000—3,000	17,724
50,000—100,000	38	100—1,000	186,157
20,000—50,000	118	Under 100	521,754
10,000—20,000	315		
8,000—10,000	3,032	Towns and villages	728,157

In European Russia there is an average of one town or village to every 47 sq miles, the average varying from 1 to every 0.43 sq miles in Courland to 1 for every 148 sq miles in the government of Archangel. In Poland there is 1 for every 1.33 sq miles; in the Caucasus 1 for every 9 sq miles. In Asiatic Russia the average is between 1 to 14 miles in Samarcand, and 1 to every 2,760 sq miles in the province of Yakutsk. It will thus be understood that the distinction between the population of towns and of country on January 1, 1911, given in the following table, and based on the [] of 1897, and the yearly increase of the population, is not to be closely pressed: —

Population of	In Towns	In the Country	Males	Females
European []	11,797,900	104,790,100	59,661,000	50,981,000
Poland	2,807,300	9,540,100	5,274,500	4,192,500
Caucasus	1,577,500	10,459,700	5,321,800	5,715,900
Siberia	1,050,600	7,668,800	4,451,800	4,287,900
[]	1,384,500	8,731,300	5,419,000	4,688,300
	22,718,700	141,200,900	82,103,400	81,816,600

The following are the populations of the chief towns of governments or provinces, and of the other towns having more than 40,000 inhabitants:—

European Russia proper
(chiefly in 1910)—

Religion.

The established religion of Russia is the Greek-Russian, officially called the Orthodox Church. It has its own independent synod, but maintains relations of a sister Church with the four Orthodox patriarchates of Constantinople, Alexandria, Antioch, and Jerusalem. The Holy Synod, the board of government of the Russian Church, was established in 1721.

The Emperor is head of the Church; he appoints to every office therein, but is restricted only so far as to leave to the bishops the prerogative of proposing candidates; and he transfers and dismisses persons from their offices in certain cases. The Emperor has also claimed the right of

deciding theological and dogmatic questions. Practically, the Procurator of the Holy Synod enjoys wide powers in Church matters.

With the exception of the restraints laid on the Jews, all religions may be freely professed in the Empire. The dissenters have been and are still, however, severely persecuted, though recently liberty has been extended to those of the 'United Church'. It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory, both settled at St. Petersburg. Roman Catholics are most numerous in the former Polish provinces, Lutherans among those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces.

There are no trustworthy figures as to the numbers of adherents of different creeds—many dissenters being inscribed under the head of Greek Orthodox. The numbers, however, according to the returns of 1897, published in 1905, are given as follows—

Orthodox Greek and United Church	87,128,604	Anglicans	4,188
Dissenters	2,204,596	Other Christians	8,952
Armenian Gregorians	1,179,241	Karaims	12,894
" Catholics	38,840	Jews	5,216,805
Roman Catholics	11,467,994	Mohammedans	13,906,972
Lutheran	8,572,653	Buddhists	492,863
Reformed	85,400	Other non Christians	285,321
Baptists	38,139		
Mennonites	66,564	Total	125,640,021

The Russian Empire is divided into 66 bishoprics (*eparchiya*), which were under 8 metropolitans, 14 archbishops, and 50 bishops, the latter had under them 37 vicars, all of them are of the monastic clergy. There were, in 1910, 52,860 churches both public and private with 49,642 priests and 14,670 deacons. The monasteries on December 31, 1910, numbered 942, 418 for men and 418 for women, with 9,987 monks and 9,582 aspirants and 14,008 nuns and 46,811 aspirants. The management of Church affairs is in the hands of the "consistoria". For Roman Catholics there is an Archbishop of Warsaw and another of Mohilev, each with two suffragan bishoprics. Of the suffragans of Mohilev one is of the Graeco Ruthenian rite, of which rite there is another bishop immediately subject to Rome.

The expenditure of the Synod in the budget of 1912 is 40,129,979 roubles contributed by the Imperial budget. The expenditure for other churches is about 1,500,000 roubles, contributed chiefly by the Ministry of Interior.

Instruction

Most of the schools in the Empire are under the Ministry of Public Instruction, and the Empire is divided into educational districts (St. Petersburg, Moscow, Kazan, Orenburg, Kharkov, Odessa, Kiev, Vilna, Warsaw, Riga, Caucasus, Turkestan, West Siberia, East Siberia, and Amur). However, there are special schools under separate Ministries.

There are universities at St. Petersburg (8,746 students), Moscow (10,399), Kharkov (4,062), Kiev (5,302), Kazan (2,147), Odessa (2,756), Yuriev or Dorpat (2,668), Tomsk (1,271), Warsaw (2,002), and Saratov (200). Total number of students, 39,853, (January 1, 1911). A Popular University bearing the name of General Alphonse Slawiatzky, who gave the funds necessary for its creation, has existed in Moscow since autumn, 1905. Finland has a university at Helsingfors, with 2,778 students.

on January 1, 1911 (see *Finland*). Nearly 4,000 students in [] are either supported by bursaries [] dispensed from paying fees []

Besides the universities there are [] of institutions [] special [] —theological, medical, legal, technical, [] languages—distributed [] the larger [] Empire

The nature and number of the [] schools, and the number of pupils attending them are [] follows (exclusive of Finland) —

Middle Schools in 1910-11	Number	Pupils	[] in 1910-11	Number	Pupils
Gymnasia	980	119,079	Gymnasia of Cossack	89	0,792
Progymnasia	37	5,516	Fouskas	58	
Realschools	237	67,230	Progymnasia	80	
Normal schools (Teachers' Institutes)	17	1,825	Girls' gymnasia . . .	14	4,312

Girls' progymnasia . .	106	17,443	Institute of E Marie .		
Cadet corps (149) . .	29	12,304	Seminarica	57	20,163

The nature and numbers of the special schools, middle and primary and the number of pupils attending them [] follows (exclusive of Finland) —

Special Schools in 1910-11	Number	Pupils	Special [] in 1910-11	Number	Pupils
Theological	470	77,786	Fine Arts	75	10,508
Pedagogical		21,743	Topographical	8	
Medical	72	9,112	Strange Languages . .	66	
Military	82	12,079	Professional	48	2,730
[]		1,180	Various		2,275
Forestry and Agriculture .		6,519			
Technical		40,299	Total	2,107	
Commercial and Industrial	179	27,627			

The expenses for the middle schools [] contributed by the [] Exchequer, by fees and by donations of the *zemstvos*, the municipalities, and [] The Cossack schools [] maintained by [] separate *cowstos*, which, moreover, maintain a number of their pupils in the governmental schools.

According to the Census of January 18 (31), 1911, concerning the elementary schools, the numbers of schools, teachers, and pupils in the Russian Empire [] in this day [] follows:—

	Schools	Teachers	Pupils
Ministry of Public Instruction	59,682	120,019	4,186,078
Holy Synod	37,922	66,525	1,793,429
Other [] and various foundations	2,691	6,729	201,005
Total	100,295	203,273	6,180,510

According to the issue (1912) of the "Year Book of Russia," published by the Central Statistical Committee, the numbers of all kinds of schools and of children attending them, on January 1, 1910, were as follows:

	Number of schools	Schools or pupils attending				
		High schools	Common schools	Special schools ²	Primary schools	Total
European Russia	87,434	57,470	336,236	184,688	5,044,125	5,622,599
Poland	6,850	2,663	18,856	16,137	284,863	321,519
Transcaucasia	2,610	—	8,778	3,698	175,575	188,251
Transcaucasia	2,833	315	12,451	5,518	107,305	125,389
Siberia	5,278	3,994	19,586	9,051	250,685	282,819
Central Asia	9,833	—	11,397	5,090	91,058	111,885
Total	114,837	68,343	494,904	223,205	5,968,011	6,649,462

¹ Exclusive of the cities of St. Petersburg, Kronstadt, and Baku, the governments of Warsaw and Tiflis, and the province of Georgia.

² Common and primary.

To the total number of 6,649,462 students or pupils must be added: 166,180 pupils of private schools, lay or religious of Christian creeds; 1,105 pupils of schools for blind, and deaf and dumb, 288,274 pupils of religious schools of non-Christian creeds, and 203,061 not classed in the above categories. Total number of persons attending the schools of the Russian Empire (exclusive of Finland): 7,307,082.

Number of pupils attending the schools per 1,000 inhabitants of both sexes:—

	Males	Females	Of both sexes
European Russia	71.3	32.3	51.8
Poland	60.0	33.1	41.8
Transcaucasia	61.4	39.7	45.8
Transcaucasia	48.8	16.8	37.2
Siberia	46.7	22.7	35.0
Central Asia	30.7	10.1	21.8
Russian Empire	66.7	31.0	48.8

The less illiterate provinces of European Russia are—Esthonia, 20.1 illiterates per 100 of population; Livonia, 22.3; Curland, 29.1; St. Petersburg, 44.9; other provinces, more than 50 per 100.

The contributions of the Ministry of Public Instruction, of the Holy Synod, and of the different ministries for educational purposes in the budget for 1912 appear as follows: Ministry of Instruction, 98,800,000 roubles; Holy Synod, 20,247,000; Ministry of War and of Navy, 17,904,000; General Direction of Land Organization and Agriculture, 4,297,000; Ministry of Commerce and Industry, 3,384,000; Ministry of Finances, 232,000; other ministries, 2,951,575. Total, 142,805,000 roubles.

Justice and Crime

which functions similar to the peace, before which appeals from judgments of individual magistrates might be brought; appeal courts for re-hearing cases tried by jury. Above all

these courts ■■■ the Court of Cassation, which formed part of the Senate. This system ■■■■ became general throughout the Empire, ■ reaction having ■■■■ begun. The examining magistrates, who ought on principle to have been irremovable ■■■ very rarely confirmed in their office, and the investigation of criminal ■■■■ entrusted to magistrates temporarily appointed. By law of May 20, 1885, the principle of irremovability ■■■ restricted; by laws of May 9, 1878, and July 7, 1889, the assistance of ■ jury in certain ■■■■ suppressed. A law of July 12, 1889, abolished elective justices of peace-putting in their places, in the country districts, the country chiefs, (*zemskiy nachalnik*), nominated by the administration from among candidates taken from the nobility, recommended by the nobility, and endowed with wide disciplinary ■■■■ against the peasants, and, in the towns, the urban justices (*gorodskoi sudia*), nominated in the ■■■■ way; in both cases the appointments being made by the Minister of Justice. Justices of peace have been retained only in the two capitals and in six of the largest towns of the Empire.

Reformed tribunals, but without juries, ■■■■ introduced in Poland in 1875; in the Baltic Provinces in 1889; in the Governments of Ufa, Orenburg, Astrakhan, and Olonets in 1894; and in Siberia in 1897. The reformed system of justice ■■■■ extended ■■■■ Turkestan, the Provinces of the Steppes, the north-eastern districts of Vologda, and the Transcaaspian Province in 1898 and 1899. The tribunals of the days anterior to 1864 ■■■■ thus everywhere disappeared.

In conjunction with the assemblies of the Volost and Gmina (see Local Government), are cantonal tribunals, consisting of from four to twelve judges elected at cantonal assemblies. Injuries and offences of every kind, ■ well ■ disputes relating to property between the peasants, not involving ■■■■ than ■ hundred roubles, come under the jurisdiction of these popular tribunals. Affairs of more importance, up to 300 roubles, are judged by the County Chiefs.

The appeal courts ■■■ fourteen: 11 in European Russia and Caucasus (at St. Petersburg, Moscow, Kharkov, Odessa, Kazan, Saratov, Kiev, Novocheerkassk, Vilna, Warsaw, and Tiflis), and 3 in Asiatic Russia (at Tashkent, Irkutsk, and Omsk). There are 104 assize courts: ■ in European Russia and ■ in Asiatic Russia.

Since ■■■■ nearly two-thirds of the Empire having been placed in a state of siege, the great number of crimes have been judged by the tribunals of exception: courts martial, and from August, 1906, to April, 1907, field courts martial. Before 1905 the executions ■■■■ unusual: 281 in ■ years, from ■■■■ 1890, 126 from 1891 to 1900. The numbers of death sentences and of executions, from November, 1905, to November, 1908, ■■■■ 4,812 and 2,298; the number of executions without trial ■■■■ 1,331. Total of executions in ■ years, 3,629. In 1908, 131,914 persons were judged by normal tribunals; 50,514 of them ■■■■ acquitted, and 81,127 condemned ■ various punishments.

The prison population ■ January ■ of each of the ■■■■ six years ■■■■ ■■■■ :—

Years	Number of prisoners	Years	Number of prisoners
1906	160,925	1909	180,206
1907	125,298	1910	174,492
1908	160,925	1911	174,733

The expenditure for prisons is ■■■■ in the budget for ■■■■ ■ the sum of 33,740,259 ■ against 31,597,277 roubles for 1911.

Finance.

I. STATE FINANCE

The following table gives the total actual *ordinary* and *extraordinary* and expenditure for each of the five years —

Year	Ordinary			Extraordinary	
	Revenue	Expenditure	Balance	Revenue	Expenditure
	Roubles	Roubles	Roubles	Roubles	Roubles
1907	2,342,474,595	2,195,963,445	+146,506,140	149,043,178	888,640,082
1908	2,417,807,828	2,387,750,591	+30,057,237	200,960,027	269,932,209

3. Banking and miscellaneous expenses	1,110,860	966,540	1,112,449
— payment of loans	407,406,704	401,931,748	402,907,055

Defence.

I. FRONTIER.

Russia has — extensive frontier both by sea and land, protected by — fortifications of various classes. On the west, Poland is defended by a system of four strongholds, sometimes called the Polish Quadrilateral—Novogeorgievsk — the right bank of the Vistula; Warsaw and Ivangorod each — both banks of the Vistula; Brest-Litovsk — the Bug. There — numerous other fortified places, mostly neglected, on the Vistula and Bug.

The — important fortresses and forts — divided into three classes as follows.—In the first class are Warsaw, Novogeorgievsk, and Brest-Litovsk in the Warsaw district, and Kovna in the Vilna district. The second class consists of Kronstadt and Sveaborg in the St. Petersburg and Finland district; Ivangorod in the Warsaw district; Kerch in the Odessa district; Libau in the Vilna district; and Vladivostok in the Amur district. In the third class — Viborg in the Finland district; Ossovetz and Ust-Dvinsk (previously Danamund) in the Vilna district; Sevastopol and Ochakov in the Odessa district; and Kars and Batum in the Caucasus district. There are also forty-six places unclassified, many of them being mere fortified posts.

II. Army.

Military service — — universal and compulsory. Service begins — the — and extends to completion of the 43rd year. Owing — extent — Empire, there are 3 armies in Russia, known — the army of European Russia, the — of — Caucasus, and the Asiatic army. These — are practically distinct — each other, and the — of service — are slightly —

Speaking generally, service in — — line, or active army, is for 3 years

in the infantry, field, and foot, artillery, and for 2 years in the other arms. The soldier is then transferred to the reserve (*Zapas*), in which he remains for 15 or 14 years, undergoing during this period 2 trainings of 6 weeks each. Having completed 18 years in the first line and its reserve, the soldier passes to the 'Opolchénié.' Service in the Opolchénié is for 2 years, that is to the completion of the 43rd year of the soldier's age.

The Cossacks, occupying the S.W. portion of European Russia, hold their lands by military tenure, and are liable to service for life. The Cossack troops are almost entirely mounted; they provide their own horses and equipment. The young Cossacks from the age of 19 are trained for two years at their homes. They then enter the 'first category' regiment of their district, in which they remain for four years. These regiments are permanently embodied and may be employed in any part of the Empire. They then pass to the 'second category' regiment for another four years, and then the 'third category' regiment for a similar period. The men of the second category regiments live at their homes, but retain their equipment and horses; in the third category, the men have their equipment, but no horses; they are called out for three weeks' training every year. Finally there is a period of five years in the reserve, which fills casualties in time of war. Besides this, every Cossack up to any age can be called out in time of emergency to assist in the national defence.

The Opolchénié, or territorial army, is divided into 2 classes, or 'bans.' The first ban includes not only the trained men who have passed through the first line and reserve, but the young surplus to the annual contingent, and all are liable to embodiment in the active army in time of war. This part of the Opolchénié therefore fulfils the purpose of a supplementary reserve. But provision is also said to have been made for the formation of a large number of units, which are to be organised in 40 divisions, each consisting of 16 battalions, 2 batteries, and a cavalry regiment of 4 squadrons; these are for home defence. The second ban of the Opolchénié is the levy *en masse*, containing all those exempted from actual service, whether students, only sons, &c., or not quite up to the physical standards of the army, and also the older classes of the surplus men who have all had a certain amount of training.

There is a modified system of one year volunteers in Russia, which furnishes the majority of the officers required for the troops on mobilisation.

A Russian division consists of 2 brigades of 2 regiments of 4 battalions. To each division is attached an artillery brigade of 3 batteries, with its ammunition columns, an engineer battalion and 2 or 3 sotnias (squadrons) of Cossacks. The normal army corps consists of 2 divisions, a howitzer division, a sapper battalion, and, in the case of several army corps, a cavalry division. A cavalry division ordinarily consists of 2 brigades of 2 regiments (one brigade of uhlans and hussars, the other of dragoons and Cossacks), and 2 batteries of horse artillery. Field batteries have 8 guns each, horse artillery batteries have 6 guns each. The fighting strength of an army corps may be taken as 36,000 men, without a cavalry division; and 40,000, if a cavalry division is included. In European Russia, including Finland, army corps are organised in regiments of 2 battalions, and form permanent brigades of 2 regiments (battalions). These brigades have their own artillery (3 batteries), and they are not included in army corps; they are considered special troops, and are supplied with a better stamp of recruits than the line.

The army of European Russia consists of 3 army corps viz.:—the Guard and Grenadier Corps, and 25 line army corps. The cavalry

comprises 2 guard divisions and a guard brigade, 15 line divisions, 2 'mixed' divisions (half dragoons and half Cossacks), a Don Cossack division, and 3 independent cavalry brigades. Of the cavalry divisions, are permanently attached to army corps, and 4 formed into two cavalry corps. The second mixed division and the separate brigades are independent. All told, the army in Europe comprises 1,038 battalions, 642 squadrons, and 497 batteries.

The field army in the Caucasus consists of 3 army corps, each of divisions (one division of Caucasian grenadiers), and 4 cavalry divisions, 1 of line cavalry (dragoons) and divisions of Caucasian Cossacks (Kuban and Terck), a brigade of Cossack (Kuban) infantry of battalions, and brigades of Caucasian rifles, each of 4 battalions. The second rifle brigade recruited from Christian natives of the Caucasus.

In the Asiatic army there are Russians, with the exception of a few Turkoman irregular horse (jaghs). In Siberia the troops are mainly, if not entirely, recruited from military colonists. In Western and Central Asia there are rifle brigades, each of 4 battalions in peace, and 8 in war. There is also a Turkestan Cossack Division, and a Transcaspian Cossack brigade. The 5 brigades mobilise the first and second Turkestan Army Corps. Each army corps has a Turkestan artillery brigade, of and of batteries.

But the largest part of the Asiatic army is in East Siberia, which possesses a strong and complete army of its own. Since the Russo-Japanese war the East Siberian forces have been increased and reorganised. There are 11 divisions of Siberian rifles, each with a corresponding artillery brigade of 4 batteries of guns. Mounted troops are supplied by the Trans-Baikal, Amur, and Usuri Cossacks and the Primorsk Dragoons, who collectively furnish 36 sotnias and squadrons in peace, and over 80 in war. Also 2 Cossack H.A. batteries, expanding to 4 in war. The whole would mobilise 5 Siberian army corps (instead of 3, as formerly), and from 2 to 3 Cossack cavalry divisions.

The troops of the Russian Empire are so far territorialised that each corps draws its recruits from a particular district, and is as a rule permanently quartered in the same garrisons. But in European Russia the bulk of the army is stationed west of a line drawn north and south through Moscow, consequently recruits and reservists have the majority of them to travel long distances to join their corps. Moreover, a number of recruits from 'Great Russia' are sent to corps outside. All this makes mobilisation a slower and more difficult process than in Germany or France. The peace strength of the armies of Russia is upwards of 1,200,000 of all ranks. The field armies of European Russia and the Caucasus, with the first category divisions, and the second category regiments of the Don and Caucasian Cossacks, may amount to 1,500,000 or 1,600,000 men. The Asiatic army might at present mobilise for field operations about 300,000 altogether. The grand total of the Russian armies may, therefore, be taken at 1,850,000, of which, under favourable circumstances, 1,200,000 might perhaps be assembled as a single theatre.

The infantry is armed with the '3 line' rifle, model 1891. It is a magazine arm, calibre , muzzle velocity 2,035 f.s., sighted to 3,000 paces. The magazine holds cartridges. The cavalry and Cossacks have a similar rifle, inches shorter in barrel, taking the same cartridge. The artillery is armed with a Q.F. shielded gun, model 1902, firing a shell 13½ lb. with a muzzle velocity of f.s.

The military budget of Russia for 1911 amounted to about 51,350,000l. ordinary expenditure, and 5,000,000l. extraordinary. Total 56,350,000l. sterling.

III NAVY

1910	£10,319,890	1906	£10,847,000	1904	£11,949,906
1907	£9,581,190	1905	£12,892,684		£12,849,567

The Russian Navy is subject to special conditions such as do not affect the navies of other Powers. Owing to the geographical situation of the Empire, the widely separated coasts which wash its shores, Russia is obliged to maintain four distinct fleets or flotillas, each with its own organization. Of these the most important in regard to Western relations is the Baltic Fleet. The chief base of the Baltic Fleet is Kronstadt, which is heavily fortified, and are Danaburg (Ust Dvinsk), Viborg, Sveaborg, and other Baltic ports. The Gulf of Finland is usually blocked by ice from November to April, whereby the operations of the fleet are impeded, but a new ice port, Libau, in Courland, has now been made ready for the fleet. It is further in contemplation to establish a naval port on the Arctic coast of Lapland, which is free from ice throughout the year, and thus to open up the possibility of creating a naval force with access to the Atlantic Ocean, but the advantages of this would be very slight, such a force would be too distant from any theatre of operations to effect much. Considerable progress has lately been made in the construction of ice breaking vessels, and Kronstadt can no longer be considered ice bound.

In the Black Sea, Sevastopol, headquarters of the Euxine fleet, has been strongly fortified, Nikolaiev, Kumburn, and Ochakov have received important defensive works, Keitch and Yankale have been made very strong, and Azov, Poti, and Batum have been strengthened. There is a flotilla also in the Caspian Sea, which ensures the communications of the Trans Caspian railway between Baku and Krasnovodak, and would have its purpose in operations against Persia.

State dockyards are at Nevsky, New Admiralty and Galernyi Ostrov, St Petersburg, Kronstadt, Libau, Revel, Sevastopol, Nikolaiev, and Vladivostok. Some private yards exist at the Baltic works, St Petersburg, Larna Abo, and Nikolaiev.

In the Russo-Japanese war the Russian fleet suffered a severe disaster. In the torpedo attack of February 8-9, it issued out later only to lose the *Petropavlovsk* with Admiral Makarov on board. In August it again issued from Port Arthur, and after a naval battle retreated again to its base, less its best battleship, the *Tsesarevich*, interned at Kiao Chau, and three cruisers. Captain Wren, of the *Bayan*, who alone earned distinction on the Russian side in the war, then made Admiral, but with a battered fleet and no support used by General Stoessel to no avail, he could accomplish nothing. In December the Japanese guns reached the warships, which were all sunk by their fire, or by the Russians when the surrender took place.

Subsequently the Baltic Fleet was sent out under Admiral Rozhdestvensky. It consisted of five modern class battleships, 11 old battleships, 10 ancient armoured cruisers, 10 protected cruisers, and about ten destroyers, together with a multitude of store ships. This heterogeneous armada encountered the Japanese fleet in the Straits of Tsushima, and was there completely annihilated by gun and torpedo without loss to Japan. 10 modern class and three old battleships were captured. A few protected cruisers escaped—all the others were sunk.

The chief of the Russian Navy is the General Admiral, Commander-in-Chief. There are 12 admirals, 28 vice and 37 captains, 100 lieutenants,

DEFENCE

252 commanders, 1,542 (including staff-commanders and subalterns of marine artillery) junior officers, 503 engineers, 702 medical and civil officers, and 162 naval-yard officers. There are 20 'equipages' in the Baltic, a half equipage ■ Revel, and ■ company ■ Sveaborg, ■ equipage of the Imperial Guard at St. Petersburg, 10 equipages in the ■ Sea, one ■ Baku, one ■ Vladivostok, each including the complements of ■ battleship and of ■ number of smaller vessels. There is also ■ training school for gunners and ■ torpedo school, ■ naval cadets' training squadron of full-rigged cruisers and sloops, and ■ divers' school hulk. The total number of officers and men ■ about 60,000, but many of the men are raw recruits.

The following ■ ■ statement of the strength of the ■ Fleet, including ships building and provided for, but excluding training ships, transports, and non-effective vessels.

BALTIC FLEET.

II FORESTS

Of the total area of the Empire under forest, only that of European Russia proper, the Kingdom of Poland and the Caucasus can be estimated with some degree of certitude. In European Russia forests cover a territory of 474 millions of acres, in Finland, 50 millions; in Poland, 67 millions; in the Caucasus, 187 millions, reaching a total for the regions named of 550 millions of acres, 70 per cent of total area. In the two Ural mountain provinces, 70 per cent of total area; in the two northern provinces, 68 per cent; in Finland, 80 per cent; in the four provinces, 80 per cent.

The forests of the Empire are distributed as follows (January 1, 1911):—

	Area in acres	Area in exploitation
Poland	288,889,608	46,083,867
Caucasus	3,101,839	1,832,597
Siberia	13,811,084	5,841,041
	288,889,608	1,177,658
Total	941,912,527	56,871,236

The revenues and expenses of State forests during years are given in the following table (in 1,000 roubles) :—

Years		Expenses	Net profit		Revenue	Expenses	profit
1906	53,191	10,226	42,965	1906	61,712	19,054	42,658
1906	55,203	10,751	47	1906	66,687	761	45,926
1907	62,845	12,356	47,489		74,778	22,852	51,926

III MINING METALS

The soil of Russia is rich in minerals of all kinds, and mining industry is steadily increasing. The statistics during five years are given in the following table :—

Year	Gold	Platinum	Silver	Lead	Zinc	Copper	Pig iron	Iron and Steel	Coal	Naphtha	Salt
	Kilogrammes			Tons			Thousands of tons				
1906	29,911	5,695	1,564	997	9,325	9,162	2,646	2,221	21,459	7	1,708
1907	31,118	5,401	2,141	512	9,335	17,087	2,773	2,364	24,537	7,675	1,886
1908	40,600	4,885	9,508	538	9,960	17,1	2,420	2,407	35,586	8,767	1,580
1909	56,796	5,116	15,479	794	9,606	16,432	2,635	2,598	36,736	9,804	276
1910	68,841	5,471	16,947	1,285	10,667	32,1	2,865	2,964	27,094	9,474	2,035

¹ (achhigh gold), on the average it produces about per cent fine gold
² Grade Unrefined silver extracted from argentiferous ores, the
it produces 92 cent fine silver Rolled of all kinds

The following table gives the production of pig-iron in the different regions of Russia for five years, in thousands of pounds :—

	1907	1908	1909	1910	1911
South Russia	111,073	117,415	122,679	128	147,747
Siberia	35,611	35,826	36,914	39,071	
Central Russia	4,888	4,906	4,226	4,694	5,223
N & N Russia	214	120	110	14	77
Poland	17,837	12,798	13,166	15,300	21,161
Total	171,601	171,072	175,205	166,540	

1 1 000 pounds = 16 121

The quantities of iron and steel worked in the above-mentioned regions of Russia for five years, in thousands of pounds, are given in the following table :—

	1907	1908			
South Russia	73,161	75,511	89,975	98,885	112,743

The number of persons engaged in the making and working of metals was 580,165 in 1910

IV MANUFACTURES

According to the last statistics published by the Department of Industry of the Ministry of Finance, the number of all kinds of industrial establishments under the inspectors of manufactories, in European Russia proper, Poland, and four governments of the Caucasus (Baku, Kutais, Tiflis, and Black Sea), was, on January 1, 1911, 15,721, employing 1,951,956 work people 1,227,360 men, 521,236 women, and 203,360 children (118,007 males, and 85,352 females)

Alcohol production of the last five years (ending June 30):—

	1907-08	1908-09	1909-10	1910-11	1911-12
Number of distilleries	2,010	2,624	2,804	2,661	2,916
Production of alcohol in 1,000 gallons	115,106	111,311	114,278	113,454	121,086

Sugar production of the last five years (ending June 30) —

	1907-08	1908-09	1909-10	1910-11	1911-12
Number ■■ sugar works	278	274	277	276	283
Area under beetroots, in acres	1,517,063	1,369,541	1,606,108	1,625,000	1,699,018
Sugar production, in 1,000 pounds	76,046	68,326	85,556	92,596	121,240

The share capital of various financial, manufacturing, industrial, steam ship and other enterprises in operation in Russia, numbering 1411, was estimated, ■■ 1905, at 2,156,986,021 roubles (Nearly 20 per cent represented the capital of foreign companies).

V. FISHERIES

Russia ranks third among the fish and deep ■■ food producing countries of the world. The total yield of fish amounts to about 1,208,000,000 pounds per annum. This is, however, by ■■ means sufficient for the population of the vast Empire. The shortage is made up by imports of all kinds of low priced fish, especially cod-fish and herrings. Russia's purchases of the ■■ aggregate 90,000,000 pounds and of ■■ latter 396,000,000 pounds.

A steady falling ■■ the catch of ■■ the various species of fish ■■ noticed in European Russia. According to ■■ data, the yield of fish in European

Russia dropped from 1,587,600,000 pounds in 1897 to 1,044,000,000 pounds in 1907.

Commerce.

The trade of the Russian Empire is carried on chiefly through its European frontier, through the Black Sea frontier of the Caucasus, and with Finland. The duties levied at these three frontiers form 90 per cent. of all custom duties.

The following table gives the average yearly exports and imports of Russia for 1900-1904, and 1905-1909 and the exports and imports of the years 1906 and 1910 in the trade with Europe, Asia, and Finland (bullion not included, and the external trade of Finland) :—

Years	Exports	Imports	
	Millions of roubles	Millions of roubles	Millions of roubles
1900-1904	889 2	630 4	252 6
1905-1909	1,130 2	906 3	281 8
1906	1,427 7	1,084 4	315 6
1910	1,449 1		

The exports and imports from and to the different frontiers for the last five years are given in the following table :—

	1906	1907	1908	1909	1910
Exports:—	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles
Through European frontier and Black Sea frontier of Caucasus	954 6	941 9	890 0	1,815 4	1,841 1
Trade with Finland	47 3	49 7	46 2	31 8	31 8

Internal Communications.

I. RIVERS AND CANALS.

In European Russia (exclusive of Finland) there were 153,782 miles of rivers, canals and lakes, 20,670 miles being navigable for steamers, 7,482 for small sailing vessels, 88,789 for rafts. In Asiatic Russia there were 86,422 miles of rivers, canals, and lakes, 21,421 miles being navigable for steamers, 8,678 for small sailing vessels, 33,224 for rafts.

The following tables give the results of the survey of river fleet of European Russia in 1900, compared with those of 1890 and 1895, and the provisional data of the survey of 1906, as regard the number of vessels.

Number of vessels and their tonnage :—

	1890		1895		1900		1906
	Number	Crew	Number	Crew	Number	Crew	Number
Steamers	1,824	25,814	2,539	32,689	3,296	40,608	3,696
Other vessels	20,125	90,356	20,580	95,608	22,859	98,269	22,980
Total . . .	21,949	116,170	23,119	128,297	26,155	138,877	26,676

The horse-power of the river fleet in 1895 was 108,206; in 1895, 129,759; in 1900, 165,004. The tonnage of vessels not provided with steam power:—In 1890, 6,468,835 tons; in 1895, 8,495,215; in 1900, 10,869,583; in 1906, 13,000,000.

The naphtha flotilla of the Caspian Sea numbers 57 and sailing vessels, which have transported above 30,000,000 cwt. of naphtha.

II. RAILWAYS.

The railway-net open for traffic on January 1, 1912, had a length of 46,025 miles, of which 35,447 miles were in European Russia, 10,578 in Asiatic Russia. The length of the lines belonging to and worked by the Government is 33,828 miles; that of the lines belonging to public companies is 10,787 miles; short local lines, 1,410.

The progress of the railways of Russian Empire (exclusive of Finland) for ten years (in English miles) is from the following table:—

Years	European Russia	Asiatic Russia	Total	Years	European Russia	Asiatic Russia	Total
1902	30,451	5,147	35,598	1907	33,048	8,128	41,176
1903	31,299	5,158	36,452		34,108	10,472	44,580
1904	31,785	6,372	38,157	1909	34,465	10,485	44,950
1905	32,108	7,478	39,586	1910	34,531	10,497	45,028
1906	32,748	8,005	40,753	1911	35,447	10,578	46,025

Gross receipts, number of passengers, and weight of goods carried for two years:—

	Passengers		Goods		Receipts	
	1910	1911	1910	1911	1910	1911
	1,000 persons	1,000 persons	million pounds	million pounds	1,000 roubles	1,000 roubles
Railways	134,025	144,983	7,912	8,980	684,991	690,457
Public companies	48,518	51,897	2,868	3,000	291,522	300,000
Short local lines	12,862	14,298	—	163	7,498	8,894
Total	194,969	211,032	11,425	12,798	983,970	1,000,000

number of employed on Russian railways 615,884 1901, 825,815 in 1906, 836,084 1907, 844,218 in 1908.

The cost of construction of railways of Russia, without Finland, was 1909 6,723,780,998 roubles.

III. POSTS, TELEGRAPHS, TELEPHONES.

The following are postal telegraphic statistics for five years:—

INTERNAL EXTERNAL COMMUNICATIONS.

	postcards	post, periodicals and parcels	money and postal orders
1907	586,035,900	513,757,758	21,911,544
1908	587,900,000	558,045,000	27,582,000
1909	1,081,918,000	571,591,000	28,528,000
1910	1,209,056,000	610,926,000	41,828,000
1911	1,351,938,000	677,538,000	46,055,000

	Telegraphs		
	Land	Wire	Telegrams Carried
	Miles	Miles	Number
1907	106,146	399,743	156,766,583
1908	106,238	415,897	161,657,788
1909	119,117	415,004	163,368,094
1910	120,865	425,969	181,748,546
1911	126,483	453,530	—

	1906	1907	1908	1909	1910
Revenue	74,821,108	77,092,369	80,307,684	88,346,475	98,387,928
Expenditure	46,079,264	46,520,211	50,361,680	56,246,914	62,285,545

Money and Credit.

By an Imperial decree, dated January 1 (15), 1897, it was ordered that the State Bank should accept paper money and exchange it for gold money.

A regular value of the paper currency having thus been introduced, a law was passed on August 29, 1897, to the effect that paper currency may be issued by the State's Bank, when necessity occurs, but on the following conditions: the amount of paper currency does not exceed 600,000,000 roubles, it must be guaranteed by half that sum; while every issue of 600,000,000 roubles must be guaranteed to the full amount in gold deposited in the bank. The growth of the paper currency and the fluctuations of the guarantee fund on January 1 (14), of the last five years are represented as follows in millions of roubles:—

	1908	1909	1910	1911	1912
Paper currency	1,290.0	1,290.0	1,300.0	1,330	1,450
Gold (in gold) and Treasury.	1,230.0	1,230.0	—	—	—
Gold and gold at the Bank.	1,328.9	1,402.5	1,411.2	1,427.3	1,520.7

Bank of Russia acts in a double capacity—of State Bank and of commercial bank. It has 134 branches. The situation of the bank in 1911, was as follows (in 1,000 of roubles) —

		Liabilities.	
Cash and credit notes	1,609,900	Capital and reserve	55,000
Portfolio	671,700	Note circulation	1,853,600
Advances, loans	112,300	Deposits, &c.	287,300
Various	30,700	Treas. acc. current	724,200
		Various	54,500
Total	2,424,600	Total	2,424,600

The Savings Bank.—The number of banks and of depositors and the amount of deposits on January 1 (14) of three years were as follows. —

Number of savings banks	701	735	762
depositors	1,439,000	7,449,000	7,979,043
sums deposited	1,382,900,000	1,898,100,000	1,502,427,000

Mortgage Banks.—On January 1, 1912, there were in European Russia, Poland, and Caucasus, 58 mortgage banks. State Mortgage Bank for the nobility, a section of this bank, State Mortgage Bank for the peasantry, and 50 private banks, out of which 10 are shareholders' banks and 40 town and land banks.

The number of properties mortgaged, their area and value, and the sums advanced, on January 1 of the last five years by the State Mortgage Bank for the nobility and its section, State Mortgage Bank for the peasantry, Land Bank of the Government of Kheison and 10 shareholders' banks are seen from the following —

	1907	1908	1909	1910	1911
Number of properties	144,078	160,473	170,981	—	808,700
Acres mortgaged	142,316,744	149,866,692	147,209,091	—	151,866,654
Value (in roubles)	3,685,906,387	3,703,744,790	3,917,791,973	—	4,361,190,963
Sum advanced (in roubles)	2,047,870,220	2,000,000,542	2,217,353,732	—	2,617,200,736

The most important of the mortgage banks are:—

Bank for mortgage loans to the nobility.—Number of properties mortgaged on January 1, 1911 26,560; mortgaged, 39,455,028; value (in roubles), 1,197,747,871; advanced, 689,350,800 roubles—Loans granted: in 1906, 32,573,000 roubles; in 1907, 26,164,000 roubles; in 1908, 31,657,900 roubles; in 1909, 49,701,600 roubles; in 1910, 87,125,400 roubles.

b. Land Bank for the purchase of land by the peasants.—

	1907	1908	1909	1910
Acres bought with of the bank	2,518,430	2,751,062	3,312,564	4,162,810
in roubles	120,596,004	124,007,878	172,455,504	204,826,403
Acres bought by the	167,831,578	116,233,714	144,497,684	162,658,820
Value in roubles	8,802,681	1,544,480	466,600	464,000
	169,122,584	84,804,441	18,554,708	18,722,863

Shareholders' banks of commercial credit on January 1 of last five years:—

	1906	1910	1911	1912
Number of banks	81	81	83	84
Balance in 1,000 roubles	2,007,835	2,242,996	2,611,643	3,826,575

Money, Weights, and Measures.

MONEY.

The legal unit of money is the silver *Rouble* of 100 *Kopecks*. It is of the value of 2s. 1'6d., but in official calculations 9'46 roubles are taken as equal to the pound sterling. Exact equivalents: 1,000,000 roubles = £105,735 7s.

Gold coins are the *imperial* and half *imperial* of 15 and 7'5 roubles. The half-imperial weighs 6'544041 grammes '916 fine, and contains, therefore, 5'994341 grammes of fine gold. The imperial weighs 12'902 grammes fine, and consequently contains 11'6118 grammes of fine gold.

New gold is coined, bearing the inscription of 10 roubles, and 5 roubles = £1 1s. 3d. and 10s. 6d.

The silver rouble weighs 20'7315 grammes '86806 fine, or (in the new coinage) 19'9957 grammes '900 fine, and consequently contains 17'994 grammes of fine silver. Besides the silver rouble, credit notes (500, 100, 50, 25, 10, 5, 2, and 1 rouble) are legal tender.

WEIGHTS AND MEASURES.

1 <i>Verst</i> (500 <i>sajens</i>)	= 3,500 ft., or two-thirds of a statute mile (0'662879).
1 <i>Sajens</i> (3 <i>arshins</i>)	= 7 feet English.
1 <i>Arshin</i> (16 <i>vershoks</i>)	= 28 inches
1 <i>Square</i>	= 0'439408 square mile.
1 <i>Desiatine</i>	= 2'69972 English acres.
1 <i>Pound</i> (16 <i>solotniks</i> = 32 <i>lo</i>)	= $\frac{1}{16}$ of a pound English (0'90283 lb.).
1 (40 <i>pounds</i>)	$\left\{ \begin{array}{l} = \text{ } \text{ lbs. English.} \\ = 0'32243578 \text{ cwt.} \\ = 0'016121789 \text{ tons.} \end{array} \right.$
1 <i>Vedro</i> (3 <i>shluffs</i>)	= 2 $\frac{1}{2}$ imperial gallons (2'7056).
1 <i>Chetvert</i> (8 <i>Chetveriks</i>)	= 5'7719 imperial bushels.

Diplomatic and Consular Representatives.

I. OF RUSSIA IN GREAT BRITAIN.

Ambassador.—Count A. de Benckendorff.

Counsellor.—N. de

Secretary.—V. Tomanowsky.

Secretaries.—B. de Siebert and G. Walkoff.

Attaché.—G. Wilenkin.

Military Attaché.—General N. Yermoloff, K.O.V.O.

Assistant „ —Colonel Semenov.

Naval Agent.—Captain Rein.

„ *Assistant*.—Lt. Col. Sagowsky.

Financial Agent.—M. Rontkowsky.

Consul-General.—Baron de Heyking.

Russia has consuls at Belfast, Hull, Liverpool, Newcastle, and Plymouth; vice consuls at Aberdeen, Birmingham, Bristol, Cardiff and Newport, Chatham and Sheerness, Cowes, Dover, Dublin, Dundee, Exeter, Falmouth, Glasgow, Gloucester, Goole, Grimsby, Guernsey and Jersey, Harwich, King's Lynn, Leeds, Leith, Lerwick, Londonderry, Lowestoft, Manchester, Milford, Peterhead, Portland, Portsmouth, Queenstown and Cork, Ramsgate, Rochester, Southampton, Sunderland, Swansea and Llanelli, and Yarmouth.

OF GREAT BRITAIN ■■■ RUSSIA.

Ambassador—Right Hon Sir George Buchanan, G C V O, K C M G, O B, appointed 1910

Councillor—H J O'Brien, C V O, C B

Secretaries—E Phipps Neville Henderson, and Hon T Spring Rice

Military Attaché—Lt Col A W Foster ■■ Knox

Naval Attaché—Commr A C ■■ Smith, R N, M V O

Consul—A W W Woodhouse

There are also British Consuls (General (G G), Consuls (C), ■■ Vice Consuls at Abo, Archangel, Baku, Batûm (C), Beldiansk, Fredrickshamn, Cronstadt, Helsingfors, Kiev (C), Kerch, Libau, Mariupol, Moscow (C), Narva, Nicolaiev, Novorossiysk, Odessa (C G), Pernaù, Poti, Revel, Riga, Rostov, Sebastopol, Taganrog, Theodosia, Warsaw (C), Windau.

FINLAND

The Government of Finland and her relations to the Empire have been described under the heading of Local Government, and its ■■ and population are given with the ■■ and population of the Russian provinces. Of the total area 10.83 per cent is under lakes. In 1890 the postal administration of Finland ■■ subjected to the Russian Ministry of Interior.

Population.

Years	In Towns	In Country	Total	■■■	■■■
■■■	410,807	2,523,049	2,933,856	1,456,478	1,477,378
1907	425,087	2,549,717	2,974,804	1,477,281	1,497,523
■■■	438,564	2,574,285	3,012,849	1,496,933	1,515,916
■■■	445,998	2,625,254	3,071,252	1,524,265	1,547,007
1910	456,878	2,658,324	3,115,197	1,546,694	1,568,503

In ■■■ the present population consisted of 2,565,742 Finns, 344,364 Swedes, 7,339 Russians, 1,794 Germans, 1,660 Laps, etc.

■■■ the total population there were ■■ and of 1910 —Lutherans, 3,057,627; ■■■ Orthodox and raskolniks, 52,004, Roman Catholics, 428; Baptists, etc., 5,148.

The chief towns, with population, ■■ Finland are (1910) —Helsingfors (with Sveaborg), 147,219; Abo, 49,691; Tampere, ■■ 442; Viborg, ■■■; Uleåborg, 19,602; Björnsborg, 16,921; Nicolaistad (Wasa), 21,819; Kuopio, 15,845.

The movement of the population in years was as follows:-

Years	Marriages	Births	Deaths	
	19,937	91,401	50,857	40,544
1907	20,266	92,457	53,028	39,429
	16,551	92,148	55,305	36,841
	19,418	95,005	50,577	44,428
1910	18,781	92,984	51,007	41,977

The births and deaths exclusive of still births, numbering, in 1910 2,879 = 2.49 per cent. of total births

Emigration, 1904, 10,952; 1905, 17,427; 1906, 17,517; 1907, 16,296; 1908, 5,812; 1909, 12,144; 1910, 19,007; 1911, 9,372.

Instruction.

In 1912 Finland had 1 university, with 3,080 students (780 ladies); in 1912, 1 technical high school, 438 students (15 ladies); 1 commercial high school with students; 1911, 1 lyceum (26 State), 15,765 pupils (5,148 girls); 15 continuation classes for boys and girls, 642 pupils; elementary schools for boys and girls, 2,999 pupils; 25 girls' schools, 5,048 pupils; 48 preliminary schools, 2,427 pupils; in the country 47 popular high schools with 1,886 pupils; in the country 2,903 primary schools (of higher grade) with 185,162 pupils; and primary schools (of lower grade) with 64,014 pupils; in 38 towns, primary schools with 1,323 teachers and 37,981 pupils; 8 training colleges for primary (popular) school teachers, with 1,089 pupils; 6 for preliminary schools with 209 pupils. There are besides 6 navigation schools, with 132 pupils (1912); 21 commercial schools with 1,780 pupils, primary trade schools, with 1,872 (1910) pupils; 19 higher trade schools, with 1,774 (1910) pupils; 10 technical schools, with 1,032 (1911) pupils; 108 schools for art and crafts ("alojd"), with 1,891 pupils (1910); 37 agricultural, 1 dairy schools, cattle-managers' schools, and horticultural schools with together 2,257 pupils; 6 forester schools with 138 pupils. The school in the primary schools is from 7 to 15 years.

In 1911 published newspapers and reviews in Finnish, 100 in Swedish, 6 in Swedish and Finnish, 1 in German, 1 in Russian and 2 in English.

Pauperism and Crime.

The number of paupers in 1910 supported by the towns and the village communities was 86,350 (2.77 per cent. of the population); and the total cost was 6,276,421 marks.

The prison population, at the end of 1910, was 3,236 men and 516 women, while the of sentences pronounced, in the instance, for crimes 32,144, and for subjects of contention 44,303.

Finance.

The receipts 1911 were 6,376,868 $\frac{1}{2}$ (25,133 $\frac{1}{2}$ being extraordinary revenue, 23,520 $\frac{1}{2}$ taken from the funds, and 8,465 $\frac{1}{2}$ being accidental revenue), and expenditure 6,241,864 $\frac{1}{2}$ (718,265 $\frac{1}{2}$ extraordinary expenditure, and 23,766 $\frac{1}{2}$ disposed for funds 80,801 $\frac{1}{2}$ being accidental expenditures) If revenue, 258,036 $\frac{1}{2}$ came from taxes; 2,506,406 $\frac{1}{2}$ indirect taxes, 2,766,327 $\frac{1}{2}$ from railways, forests, domains, and

fortunes of ■■■ State, and 783,987/ other revenues. The chief items of expenditure ■■■ government, 117,378/ , justices and prisons, 205,667/ , military affairs, 487,157/ , civil administration, 541,044/ , religion and education, 687,202/ , communications, 1,836,724/ , public debt, 318,947/ , construction of railways, 528,426/ , ■■■ and industries, 266,632/ , agriculture, 281,699/ , pensions and grants, 212,435/ &c.

On January 1, 1911, the public liabilities of the Grand Duchy, contracted entirely for railways, amounted to 7,054,639/.

Industry.

The land ■■■ divided in 1901 into 271,154 farms, and the landed property ■■■ distributed ■■■ follows —Less than 3 hectares cultivated, number of farms, 106,462 , $\frac{1}{2}$ hectares, farms 78,778 $\frac{1}{2}$ hectares, farms 56,790 , 100 hectares, farms 27,269 over 100 hectares, farms 1,853.

The crop of 1910 ■■■ in hectolitres —Wheat, 43,738 (1910), rye, 4,350,000 (1911, 3,577,800), barley, 2,380,000 (1911, 2,336,700), oats, 9,380,000 (1911, 7,979,100), potatoes, 8,270,000 (1911, 7,996,100), flax and hemp, 22,910 (1910).

Of domestic animals Finland had in the country at the end of 1910 —Horses, ■■■ years of age, 289,553 , horned cattle, 2 years of age, 1,138,800.

The crown forests cover January, 1912, 12,570,000 hectares. Their maintenance cost (1911) 5,066,905 marks, and the income derived from them was 13,694,479 marks. In 1909 there ■■■ 162 ■■■ mills with water motors and ■■■ steam and 59 motor mills. They give occupation to 28,596 workers, and their aggregate production was 3,615,000 cubic metres of timber, ■■■ against 2,809,000 cubic metres ■■■ 1900.

The annual produce of ■■■ iron and non, in metric tons, for five years:

Years	Ors	Pig iron	Bar iron
1906	35,820	15,865	22,531
1907	33,108	15,100	23,136
1908	9,393	11,712	19,760
■■■	5,008	8,579	21,756
1910	5,193	8,238	33,409

Finland had in 1910, 4,040 large manufactures, employing an aggregate of 92,928 workers, and yielding an aggregate product (exclusive of flour mills) of 626,655,300 marks (250,662,120/). The chief ■■■ —

FINLAND

total number of was 1910, 1,585; horse-power 100,158; 1,304 electric engines; and 820 other engines

The exterior trade of Finland appears as follows, in thousands of marks (francs) —

	1904		1910		1911	
	Imports from	Exports to	Imports from	Exports to	Imports from	Exports to
Russia	117,329	71,808	109,676	70,693	137,516	50,048
Sweden and Norway	19,229	9,757	20,009	12,005	21,580	14,899
Denmark	19,236	8,619	20,855	9,953	29,071	11,639
Germany	144,577	81,540	159,680	94,720	173,873	46,474
Gt Britain	41,307	73,930	47,705	85,483	61,724	86,183
Spain	1,871	7,262	3,315	9,791	3,317	8,797
France	4,293	20,760	5,754	24,594	8,888	27,100
Various	18,896	26,747	19,981	33,443	14,587	94,068
Total	307,127 (14,685,100f)	257,054 (10,382,300f)	334,059 (15,303,560f)	290,142 (11,605,680f)	444,504 (17,780,000f)	319,560 (12,793,000f)

The chief articles of export are timber (167,087,000 marks in 1911, against 91,200,000 in 1898), butter (54,028,000), paper, paper mass, and cardboard (58,169,000), iron and iron goods (23,114,000), textiles, leather, hides, tar, pitch and fish

chief imports cereals (101,010,000 marks), coffee and chicory (28,874,000), sugar (19,659,000), iron and ironware (23,113,000), cotton (14,001,000), cottons (7,795,000), machinery (23,667,000), chemicals, leather wares, tobacco, colours, oils, leather and hides

Shipping and Navigation.

Number of vessels entered and cleared in 1911 —

	Entered		Cleared	
	Vessels	Tons	Vessels	Tons
Finnish	4,016	1,065,000	3,970	1,048,417
Russian	1,031	184,419	990	181,166
Foreign	2,562	1,435,968	2,549	1,438,702
Total	7,599	2,690,475	7,509	2,668,285

The Finnish commercial navy numbered January 1, 1912, 2,959 sailing vessels of 327,625 tons, and 111 steamers, 72,013 tons; total, 3,416 vessels of 400,000 tons

Internal Communications.

The communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals. The

number of vessels which passed along the canals in 1911 48,588; the receipts from vessels, 1,045,822 marks; expenditure, 887,946 marks.

In 1910, there were 2,268 miles (1911, 2,332 miles) of railways, all but 111 miles (1911, 211 miles) belonging to the State. The traffic upon the State's railways in 1910 was 14,462,769 passengers and 3,840,000 of goods. The total cost of the State railways to the end of 1910 was 402,701,000 marks. The total of the same in 1910 was 44,261,432 marks (1911, 50,062,543), and the total expenditure 36,496,150 marks (1911, 36,747,043).

Finland had 2,138 post-offices in 1911, and and expenses respectively 7,422,620 and 6,426,295 marks; united letters and post-cards, 45,183,852; samples, and printed packets, 9,350,243; newspapers, 60,576,109.

The 382 savings-banks had on December 31, 1911, 308,939 depositors, with aggregate deposits of 10,037,591/

Money, Weights, &c.

The *markka* of 100 *penni* is of the value of a franc, 94d. The standard is gold, and the *markka*, though not coined in gold, is the unit.

Gold coins are 20 and 10-*markka* pieces. They contain 290.3225 grammes of fine gold to the *markka*.

Silver coins are 2, 1, $\frac{1}{2}$, and $\frac{1}{4}$ -*markka* pieces.

Copper coins are 10, 5, and 1-*penni* pieces.

The paper currency is exchangeable at par against gold.

The metric system of weights and measures is universally employed in Finland.

RUSSIAN DEPENDENCIES IN ASIA.

The following two States in Central Asia are under the suzerainty of Russia:—

BOKHARA.

A vassal State in Central Asia, lying between N. latitude 41° 30' and 36° 40', and between E. longitude 61° 40' and 73°, bounded on the north by the Russian provinces of Syr-Daria and Samarkand, on the east by the province of Ferghana, on the south by Afghanistan, and on the south-west by the Russian Trans-Caspian province and the Khanat of Khiva.

The reigning sovereign is Sayid-Mir-Alim Khan, son of the late Amir Mir-Jamal Ahad; born January 3, 1880, succeeded his father on January 6th, 1911. The heir is his son, Sayid Mir Ibrahim, born December 27, 1911.

The modern State of Bokhara was founded by the Usbeks in the fifteenth century, after the power of the Golden Horde had been crushed by Tamerlane. The dynasty of Manguts, to which the present ruler belongs, dates from the end of the 18th century. Mir Muzafer-ed-din in 1866 proclaimed a holy war against the Russians, who thereupon invaded his dominions, and forced him to sign a treaty ceding the territory forming the Russian district of Syr Daria, consent to the demand for a large indemnity, and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted to Bokhara without a Russian passport, and the State became practically a Russian dependency.

Amirs of Bokhara.—Sayid Ameer Hyder, 1799-1826; Hussein, 1826; Mir Omir, 1826-27; Mir Nasrulla, 1827-60; Muzafer-ed-din, 1860-86; Amir Sayid Abdul Ahad, 1885-1911.

Area 83,000 square miles, population about 250,000. Chief towns.—Bokhara, about 75,000; Karshi, 25,000; Khuzar, Shahr-i-Zab, Hissar, 10,000; Charjui, Karakul, Kermine.

The religion is Mahomedan. The Amir is stated to have given 20,000 roubles for the foundation of a school.

The Amir has 11,000 troops, of which 4,000 are quartered in the city. A proportion of the troops are armed with Russian rifles and have been taught the Russian drill.

Bokhara produces corn, fruit, silk, tobacco, cotton, and hemp; and breeds goats, sheep, horses, and camels. Gold, salt, alum, and sulphur are the chief minerals found in the country.

The yearly imports of green tea, mostly from India, are said to amount to 1,125 tons. The imports from India also include indigo, Dacca muslins, drugs, shawls, and kincobs. Bokhara exports raw silk to India, the quantity exported in one year being estimated at 34 tons. By the treaty of 1873 all merchandise belonging to Russian traders, whether imported or exported, pays a duty of 2½ per cent. *ad valorem*. No other tax or import duty is levied on Russian goods, which are also exempt from all transit duty. The Ameer has forbidden the import of spirituous liquors except for the use of the Russian Embassy.

The Russian Trans-Caspian Railway runs through Bokhara from Charjui, on the Oxus, to a station within a few miles of the capital, and thence to Tashkent; the distance from Charjui to the Russian frontier station of Katty Kurghan being about 186 miles. There is steam navigation on the Oxus.

There is a telegraph line from Tashkent to Bokhara, the capital.

Paper roubles are current everywhere. The Bokhara silver tanga is valued at 5d.

There is a Russian Political Agent at Bokhara.

KHIVA

A Russian vassal State in Central Asia, lying between N latitude 43° 40' and 40°, and E longitude 57° and [REDACTED] 20 Bounded [REDACTED] the north by the Aral Sea, on the [REDACTED] by the river Oxus, [REDACTED] the south and west by the Russian Trans Caspian province

Seyid Asfendiar Khan succeeded his father [REDACTED] 1910 [REDACTED] reigning [REDACTED] [REDACTED], born about 1871 The heir apparent, accepted by Russia, is Nasr Tyouara, son of Asfendiar

Russian relations with the Khanate of Khiva—an Usbeg State, founded, like that of Bokhara, [REDACTED] the [REDACTED] of Tamerlane's Central Asian Empire—date from the beginning of the 18th century, when, according to Russian writers, the Khivan Khans first acknowledged the Tsar's supremacy In 1872, [REDACTED] the pretext that the Khivans had aided the rebellious Kirghiz, an expedition advanced [REDACTED] the capital, bombarded the fortifications, and compelled the Khan to sign a treaty which puts the Khanate under Russian control A [REDACTED] indemnity of about 274,000 [REDACTED] was also exacted This heavy obligation, still being liquidated by yearly instalments, has frequently involved the [REDACTED] in disputes with his subjects, and Russian troops have more than once crossed the frontier to afford him aid and support

The Khans of Khiva have been Mohamed Rahim Khan, 1806-25, Ali Kuli Khan, 1825-42, Rahim Kuli Khan, 1842-46, Mohamed Arnin Khan, 1846-55, Abdulla Khan, 1855-56, Kutlugh Murad Khan, 1856, Seyid Mohamed Khan, 1856-65, Seyid Mohamed Rahim Khan 1865

Area, 24,000 square miles, population estimated at 800,000, including 400,000 nomad Turcomans Chief towns—Khiva, 4,000 5,000, New Urgenj 3,000, [REDACTED] Asp, and Kungrad

The religion is Mahomedan Army, about 2,000 men

The chief commercial products are cotton and silk

SALVADOR.

(REPUBLICA DEL SALVADOR)

Constitution and Government.—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, dissolved, and Salvador became an independent Republic. The Constitution, proclaimed in 1824 under the Federation, and modified in 1859, 1864, 1871, 1872, 1880, 1883, and 1886, vests the legislative power in a Congress of 42 Deputies, 3 for each department. The election is for one year, and by universal suffrage. The executive is in the hands of a President, whose tenure of office is limited to four years.

President of the Republic—Dr. Manuel E. Arango. Inaugurated March 1, 1911, for four years.

Vice-President—Señor Onofre Durrán.

The administrative affairs of the Republic are carried on, under the President, by a ministry of four members, having charge of the departments of—The Exterior, Justice, Worship, and Instruction, War and Marine, Interior and Government, Finance, Public Work, and Beneficence.

The army may be divided into three parts: (1) available force, 78 officers, 512 petty officers, and 15,554 men; (2) force that can be made available at short notice, 10 officers, 100 petty officers, and 11,176 men; (3) reserve force, 251 officers, 1,743 petty officers, and 15,554 men. Total, 878 officers, 2,611 petty officers, and 82,881 men. In case of war, military service is compulsory from 18 to 30 years of age. There is a custom-house cruiser.

Area and Population.—The area of the Republic is estimated at 7,225 English square miles, divided into 14 departments. Population (1 Jan. 1912), 1,161,426. The number of foreigners in the Republic is estimated at 200,000. Aboriginal and mixed races constitute the bulk of the population, Ladinos and Mestizos being returned as numbering 772,200, and Indians 234,848. The capital is San Salvador, with 59,540 inhabitants. Other cities: Santa Ana, population 48,120; San Miguel, 24,768; Nueva San Salvador, 18,770; San Vicente, 17,832; Sonsonito, 17,016.

The number of births in 1911 was 49,179 (46,866 in 1910), the number of deaths 26,472 (27,358 in 1910). Of the births in 1911, 25,028 were males, and 24,151 females.

Instruction and Justice.—Education is free and obligatory. There are in Salvador 1,000 primary schools, with 10,000 teachers and 21,569 enrolled pupils (11,638 boys and 9,936 girls). There are also 10 higher schools (including 1 normal and 3 technical schools) and special schools for jurisprudence, and for medicine, pharmacy, and dentistry.

Justice is administered by the Supreme Court of Justice, one court of appeal (in the capital) and several courts of first and second instance, besides a number of local courts. Judges of second and third instance are elected by the National Assembly for a term of 3 years, while the judges of first instance are appointed by the Supreme Court for a similar period.

Finance.—Revenue and expenditure (in silver dollars) for five years—

	1909	1910	1911	1912	1913
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	12,068,750	12,321,600	12,477,078	12,120,750	12,140,416
Expenditure	11,572,664	12,006,248	12,041,181	12,228,750	12,095,101

The outstanding foreign debt of the Republic in 1911 amounted to 1,461,552l

The outstanding debt on December 31, 1911, was 14,407,816 dollars

Production and Commerce.—The population of Salvador is largely engaged in agriculture. The chief produce is coffee, under which there are about 186,039 acres, with 1,000,000 trees. The estimated crop for 1911-12 was 70,000,000 pounds. Of this 65,000,000 pounds were exported. Other agricultural products are cheese, cacao, rubber, tobacco, sugar. The Government is encouraging cotton growing by bounties on exports. Efforts are made towards wheat cultivation. Tree planting is also encouraged. In 1911 there were 284,013 head of cattle, 74,336 horses, 21,457 sheep and 422,980 pigs. The mineral wealth of the Republic includes gold, silver, copper, iron, mercury. Mining operations are growing in importance. Operations are carried on by Salvadorian, United States, and British companies.

The imports subject to duty and the exports have been as follows (imports in gold dollars, exports in silver dollars) in five years:—

	1907	1908	1909	1910	1911
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports (Gold)	\$ 430,791	\$ 240,560	\$ 177,981	\$ 745,249	\$ 118,118
Exports (Silver)	15,164,460	15,483,410	\$ 481,787	\$ 122,295	\$,888,881

The trade is chiefly with the United States, Germany and France. The chief imports are cottons (1,757,950 dollars), hardware (\$35,917 dollars), flour (268,702 dollars), silk goods and yarn. The chief exports in 1911 are coffee (\$77,428 quintals, valued at 1,432,450 dollars), indigo, balsam, 26,860, gold, 916,372, silver, 482,694, lead, sugar, 4,725.

A treaty of commerce of 1862 between the United Kingdom and the Republic of Salvador provides for "the favoured nation" treatment in respect of trade navigation, manufactures, mining and the holding of property.

Total trade between Salvador and the U. K. in thousands of pounds for 5 years:—

	1907	1908	1909	1910	1911
Imports from Salvador into U. K.	58	84	79	57	84
Exports from U. K. to Salvador	57	161	270	264	111

Shipping and Communications.—In 1909, 10 steamers called at the ports of the Republic, and many cleared.

A railway connects the port of Acajutla with La Unión, Anna and La Unión, with this system Salvador, the capital, is connected—a distance of 65 miles. Another railway connects the capital with Tecla. Total length of railway open (1911), 180 miles, all of which are single or double tramway and is to connect La Unión with Nueva América, Salvador. There are over 2,000 miles of good roads in the Republic. In 1911 there were 82 post offices which handled 2,140,088 pounds of mail. In 1911 there were 148 telegraph offices and 1,700 miles of telegraph wire, over which passed 1,540,440 telegrams. There are 100 telephone stations.

and 2,106 miles of telephone line. A ~~line~~ is in operation at Las Lomas de Candelaria.

Money, Weights, and

There are ~~several~~ banks of issue, the principal of which are the Banco Salvadoreño (paid up capital, 3,126,000 pesos silver), Banco Occidental (paid up capital, 1,000,000 pesos silver), and Banco Agrícola Commercial (paid up capital, 922,500 pesos silver). On December 31, 1910, they had notes in circulation to the value of 1,858,636 pesos.

The Dollar, of 100 centavos, nominal value 4s, real value about 100.

In August, 1897, a law was passed adopting the gold standard. The import of debased silver coin was prohibited. In October, 1899, the Salvador mint, formerly the property of a company, was transferred to the Government.

In 1911, the Government of Salvador contracted with the four banks of San Salvador for the coinage abroad and the introduction of silver pieces of 5, 10, and 25 centavos, aggregating 300,000 pesos. These will be 0.895 fine. Those of 5 centavos will weigh 1.25 centigrams each, those of 10 centavos, 2.5 centigrams, and those of 25 centavos, 6.25 centigrams.

The fractional currency in circulation in Salvador now consists of silver reales (12½ centavos), real pieces (6½ centavos), and quartillos (½ real or 3½ centavos). The decimal coins in existence are not accepted in the native stores or in the markets, but the Government offices and the banks take them.

WEIGHTS AND MEASURES

<i>Libra</i>	= 1.043 lb av	<i>Arroba</i>	= 25.35 lb
<i>Quintal</i>	= 104.3 lbs av	<i>Fanega</i>	= 1.6745 bushel

In 1885 the metrical system of weights and measures was introduced.

SANTO DOMINGO.

(REPUBLICA DOMINICANA)

Government—The Republic of Santo Domingo, founded in 1844, is governed under a Constitution bearing date November 18, 1844, re proclaimed, with changes, at various dates in 1879, 1880, 1881, 1887, 1896, and 1908. By the Constitution of [] the legislative power of the Republic is vested in a National Congress, consisting of a Senate of [] senators and a Chamber of Deputies of 24 members. These representatives [] remunerated at the rate of 480¢ per annum each. There [] senator for each province, and the deputies [] elected by the provinces in proportion to the number of their inhabitants. The members are chosen by indirect vote, in the ratio of two for each province, for the term of four years. But the powers of the National Congress only embrace the general affairs of the Republic.

The President is chosen by an electoral college for the term of [] years, and [] salary of 9,600 dollars per annum. There [] Vice President. In [] of death [] disability of the President, Congress designates [] person to take charge of the executive office.

President ad interim of the Republic—Dr. Adolfo A. Nouel (elected by Congress in November, 1912, on the resignation of President Victoria). Term of office 1912-14.

The executive of the Republic [] vested in a Cabinet composed of the President and seven Ministers, who are the heads of the departments of the Interior and Police, Finance and Commerce, Justice and Public Instruction, War and Marine, Agriculture and Immigration, Foreign Affairs, and Public Works and Communications.

The Republic is divided into twelve []. Each province is administered by a governor appointed by the President of the Republic, and they have all the [] political, administrative, and judicial rights and powers. The [] communes, cantons, and sections are provided over by prefects or magistrates appointed by the governors. The [] have municipal corporations elected by the inhabitants.

Area [] **Population**—The [] of Santo Domingo, which embraces the [] portion of the island of Quisqueya [] Santo Domingo—the western division forming the Republic of Haiti—is estimated [] 19,325 English square miles, with a population estimated (in 1911) [] 708,000 inhabitants.

The population [] mainly composed of creoles of [] Spanish descent, and a mixed [] of European, African and Indian blood, there are, however, [] Turks and Syrians, especially in Santo Domingo city, where the dry goods trade is almost exclusively in their hands. The language used by the populace is Spanish, but [] the Samaná Peninsula there are a few hundred farmers, some of whom (descended from American negro immigrants of 1828) speak corrupt English, and others Haitian patois. The capital, Santo Domingo, [] by Bartolomeo Colombo, brother of the discoverer, [] of the river Ozama, was destroyed [] 1547 by a hurricane, [] subsequently rebuilt [] the right bank of the [] river. It has [] 1912, 22,000 inhabitants, Santiago, 20,000, Puerto Plata, the chief port, [] have between 15,000 and 16,000 each; Samaná, Sanchez, Anna, [] Christy have from 4,000 [] 5,000 each.

[] 1911 there were 27,407 births, 2,442 marriages, and 6,605 [].

Religion and Instruction—The religion of the State is Roman Catholic, other forms of religion being permitted. There is a Catholic arch-

bishopric with one suffragan see, viz., Porto Rico, belonging to the United States.

Primary instruction is gratuitous and obligatory, being supported by the communes and by central aid. Public or state schools are primary, superior, technical schools, normal schools, and a professional school with character of a university. In 1911 there were 590 schools in the Republic with 20,452 children (10,422 boys and 10,031 girls).

Justice.—The chief judicial power resides in the Supreme Court of Justice, which consists of a president and justices chosen by Congress, and (ministro fiscal) appointed by the executive; all these appointments are only for years, but may be prolonged indefinitely. The territory of the Republic is divided into 12 judicial districts, each having its civil and criminal tribunal and court of first instance, and these districts are subdivided into communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). There are appeal courts at Santiago de los Caballeros, and the other at Santo Domingo City.

Finance.—The is derived chiefly from customs. There are, besides, sugar and liquor taxes and stamp taxes, and considerable receipts from posts, telegraphs, and telephones, and also from civil registration. The receipts and disbursements for 4 years were (estimates for 1912) in United States dollars :—

Fiscal years	Receipts		Disbursements Total
	Customs	Total	
	Dollars	Dollars	Dollars
1910	3,110,000	4,706,738	4,645,287
1911	3,001,400	3,941,800	3,941,800
1912	3,941,400	4,859,085	4,806,977
1913	3,280,000	4,208,400	4,308,400

Under the Convention signed on the part of the United States and Dominican Governments, an American citizen is General Receiver of Customs with authority to deposit 100,000 dollars each month towards interest (5 per cent.) and Sinking Fund, in trust for the national creditors. In addition half the Customs Receipts in excess of 3,000,000 dollars is applied to the same end.

Defence.—The regular army provided for by law consists of 6 companies of artillery (648 officers and men), the greater part of the force being usually kept at Santo Domingo, but Puerto Plata and Santiago also military posts. The Government has about 1,300 men under pay. The Rural Guard is provided for in the budget to the extent of officers and men, but only about half that number have been embodied and equipped. There is also a force on the Haitian frontier under the direction of American officers, and dependent on the Receivership of Customs, but paid from the Dominican budget.

The navy consists of six vessels. For the customs service a large, light-draught motor cutter has been built in the United States and is now in commission.

Agriculture and Industry.—Of the total area about 15,500 square miles is cultivated. Sugar-growing is a flourishing industry; shipments in 1911, 193,487,948 lbs., valued at 4,767,533 dollars, being an increase of 15,780,772 lbs. and 1,095,660 dollars over those of 1910. Coconuts exported to the extent of 42,844,741 lbs., valued at 3,506,577 dollars. The exports

of tobacco ■■■ 1911 amounted ■■ 30,441,476 lbs., value 1,822,800 dollars. Cotton exported in 1911 ■■ 319,374 lbs., valued ■■ 45,800 dollars. ■■■ shows marked improvements in quality and a decrease in ■■ quantity shipped in 1911 (4,575,440 lbs., value ■■ 310,888 dollars).

Commerce.—The ■■■ imports into and exports from the Dominican Republic in 4 years were valued ■■ follows in U.S. dollars :—

	1907	1909	1910	1911
	Dollars	Dollars	Dollars	Dollars
Imports . . .	5,295,272	4,563,990	6,462,288	7,126,877
Exports . . .	9,713,135	8,625,017	10,945,046	11,033,566

The foreign trade in 1911 was ■■ follows :—

Countries	Imports	Exports
United States . . .	4,228,708	6,654,340
Germany . . .	1,366,377	2,128,678
France . . .	284,998	1,040,110
United Kingdom . . .	601,232	280,461
Other countries . . .	542,702	948,586
	7,136,877	11,033,566

In 1911 the chief imports were : cotton goods, 1,601,803 dollars ; iron and steel manufactures, 501,233 dollars ; provisions, 2,179,735 dollars, manufactured vegetable fibres (hags, sacks, &c.), 210,085 dollars ; chemical products (including soap, perfumes, and drugs) 444,570 dollars ; machinery, 598,822 dollars ; leather and manufactures, 236,240 dollars ; agricultural implements, 384,600 dollars. The bulk of the sugar and cacao are shipped for order to the U.S.A. and included in the trade with the United States. The greater part (more than 75% of the sugar) is re-shipped to Canada and Europe. In 1911 the United Kingdom actually received nearly 50% of the entire sugar export, and Canada nearly 25%.

Shipping and Communications.—In 1911, 913 vessels of 989,226 tons entered the ports of the Republic, and 916 of 986,591 tons cleared in the foreign trade. The port is served by regular liners under the German, French, American, and Cuban flags, but by no British vessels. Of the value of total foreign trade U.S.A. vessels carried 40%, German vessels 22%, Norwegian (chartered for U.S.A.) 22%, French, 6%, British (exports only) 3%. In 1910 a jetty and sea wall was constructed ■■ the entrance of Santo Domingo harbour. A concrete wharf 1,400 feet long with 20 feet depth will probably be completed ■■ San Domingo by the beginning of 1913.

The interior ■■ not well supplied with roads, though good ■■■ are in course ■■ construction between the principal northern cities and in ■■ south ■■■ ports ■■ the neighbouring agricultural districts.

There are two railway lines in the Republic : (1) Samaná-Santiago line, ■■■ English company, runs from Sanchez ■■ the Bay ■■ Samaná ■■ La Vega (73 miles) ; ■■ two branch lines (under the same management, but ■■■ ownership) from La Jina to San Francisco de ■■■ (8½ miles), ■■ Las Carballas ■■ ■■ (8 miles). A Government line, the ■■■ railway, runs ■■ Puerto ■■■ Santiago and Moca (60 miles). A railway route from Santo Domingo ■■ to La Vega ■■ surveyed by ■■■ engineers, ■■ negotiations ■■ construction and management by ■■■ foreign company have ■■ in progress for some time. Its length will be approximately ■■ A short ■■■ will also be con-

structed uniting the two existing lines. Total length of line (1911) 150 miles. There are, besides, 225 miles of private lines—the large

Number of post-offices (1911–12), 105; number of telegraph offices, 16; and of telephone offices, 15. Total pieces of mail handled, 5,580,506.

The telegraph, in the hands of a French Telegraphic Company, in operation between Santo Domingo, Puerto Plata, and Santiago, from Santiago to Cristi, and along the railway from Sanchez to La Vega, total length, miles. Several other inland lines are in project. The foreign telegraphic system in operation is that of the French Submarine Telegraphic Company, total length of telephone lines, 719 miles. Negotiations are proceeding with the Marconi Company to link Santo Domingo with the Marconi system. It is hoped to erect (in 1913) a powerful station in the Capital with sub stations throughout the Republic.

Money, Weights, and Measures.—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A certain amount of debased silver circulates as small change in the ratio of 5 to 1.

In 1912 the National Bank of Santo Domingo was established with a capital of 2,500,000 dollars. The Royal Bank of Canada has opened branches at Santo Domingo City, San Pedro de Macoris, and Santiago.

Quintal = 4 arrobes = 100 lbs. (of 16 =) = 46 kilograms.

For liquids the arroba = 32 cuartillas = 25.498 litres = 4.110 gallons.

Diplomatic and Consular Representatives.

1 OF SANTO DOMINGO IN GREAT BRITAIN

Consul General—Arturo L. Fiallo

—Octavio Ventura

Vice Consul—Albert M. Ventura

There are consular representatives at Cardiff, Southampton, Grimsby, Liverpool, Birmingham, Glasgow, Leeds, Manchester, Nottingham.

2 OF GREAT BRITAIN IN SANTO DOMINGO

H. M. Consul General—Arthur Nightingale (resident at Port Prince)

H. M. Vice Consul—San Domingo—Godfrey A. Fisher

SERVIA.

(KRALJEVINA SRBIJA.)

Reigning Sovereign Family.

Peter I., born June 29 (O S.), 1844, son of Alexander ■■■ Georgevitch, married, July ■■ (O S.), 1883, to Princess Zorka, daughter of Prince Nikolaï of Montenegro, widower ■■■ (O S.), 1890, ascended the throne, June 2 (O S.), 1903. The children of the King ■■ Princess Helene, born October ■■ (O S.), 1884, Prince George, born August 27 (O S.), 1887, ■■ March 27 (N S.), 1909, Prince George renounced his right of ■■■ to the throne to which Prince Alexander will succeed, Prince Alexander, ■■■ heir apparent, born December ■ (O ■), ■■■

The King has ■■■ brother, Prince Arzène, born April 4, 1859, married, April 15, 1892, ■■ Aurora Demidoff (divorced in 1896), offspring: Prince Paul, born April 15, ■■■

The founder of the dynasty was Kara George (or Black George) Petrovitch, who, ■■ 1804, ■■■ proclaimed Commander ■ Chief in Serbia, but ■■■ murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander ■■■ chosen reigning Prince by the Skupshchina, and the title ■■■ confirmed by the Porte, but the dignity ■■■ not hereditary. In 1858 Alexander had to abdicate and ■■■ banished, and ■■ 1885 he died in exile. King Peter is thus the third of his house who have ruled in Serbia. He succeeded to the throne ■■ the murder of King Alexander of the Obrenovitch dynasty, ■■■ elected King by the Skupshchina June 2 (O S.), and assumed royal rights and duties June 12 (O S.), 1903.

The independence of Serbia from Turkey ■■■ established by article 34 of the Treaty of Berlin, signed July 13, 1878, and ■■■ solemnly proclaimed by Prince (afterwards King) Milan at his capital, August 22, 1878. The King's civil list amounts to 1,200,000 dinars.

Constitution ■■■ Government.

The Constitution voted by the Great National Assembly, January 2, ■■■ (December 22, 1888, old style), continued in force till May, 1894, when it ■■■ repealed, and the constitution of July, 1869, revived. On the 6/19 April, 1901, ■■■ Constitution ■■■ granted by King Alexander, entailing the ■■■ to the throne of Serbia upon his direct descendants of either ■■■ On June 15, 1903, after the murder of King Alexander, the Constitution of 1901 ■■■ abolished, and that of ■■■ was revived. The executive power is vested ■■ the King, assisted by ■■ council of eight Ministers, who are, individually and collectively, responsible to the King and the National Assembly. The legislative authority ■■ exercised by the King, ■■ conjunction ■■■ the National Assembly, ■■ 'Narodna-Skupshchina'. The ■■■ Council ■■■ of members appointed partly by the King, and partly by ■■ Assembly. It decides complaints ■■ injury to private rights resulting from Royal and Ministerial decrees, questions of administrative competence ■■■ obligations, matters relative to departmental and communal surtaxes and loans, and the transfer of their real property, the expropriation of private property for public purposes, the final settlement of debts due ■■ the State, and which cannot ■■ collected, the outpayment of extraordinary sums sanctioned by the Budget and exceptional admissions to ■■ privilege of Serbian citizenship. This body ■■ always sitting. The ■■■ Assembly ■■ composed of 166 deputies ■■ elected by the people. Every male Serbian (with ■■■ exception ■■ officials and soldiers under the colours) 21 ■■■ ■■■ paying ■■ dinars in

direct taxes, ■ entitled to vote; Servians 30 years of age, paying 30 dinars in direct taxes, ■ eligible to the Assembly provided they reside permanently ■ Serbia Government employees, except ministers, ■ ate councillors, judges, professors (of middle schools and universities), and Communal Mayors are not eligible ■ Assembly meets each year on October 14, and elections take place every fourth year on September 21 The deputies ■ travelling expenses and ■ salary of 15 dinars (12s) a day.

Prime Minister —M Pashitch (September, 1912)

Other ministries ■ for Foreign Affairs, Instruction and Worship, the Interior, War, Finance, Public Works, Commerce, Agriculture and Industry, and Justice

Counties, districts, and municipalities have their own administrative assemblies For administrative purposes, Serbia ■ divided into 17 provinces or counties, 1,407 communes, which include 4,267 villages and ■ towns ■ cities (1905)

1910	30,822	112,235	64,460	47,785
1911	30,453	107,229	64,416	42,814

There are no trustworthy statistics of emigration and immigration.

Religion.

The religion of Serbia is Greek-Orthodox. According to the census of 1910 there were 2,881,220 of the total population:—Greek-Orthodox, 2,881,220; Roman Catholics, 8,435; Protestants, 799; Jews, 5,997; Mohammedan Turks and Gipsies, 14,435; other religions, 915.

The Church is governed by the Synod of five Bishops, the Archbishop of Belgrade, Metropolitan of Serbia being president, but all the ecclesiastical officials are under the control of the Minister of Education and Public Worship. There is unrestricted liberty of conscience. In 1910 there were 771 churches and chapels, and 51 monasteries; the clergy numbered 1,048, and the monks, 77. The property of the churches was valued (1910) at 18,701,114 dinars, and of the monasteries at 8,435,053 dinars; the expenditure of the churches, 611,082 dinars, and of the monasteries, 250,158 dinars.

Instruction.

Elementary education in Serbia is compulsory, and, in all the primary schools under the Ministry of Education, it is free. Of the total population in 1900, 423,433 (16.99 per cent.) could read and write. In 1910 there were 1,296 elementary schools with 2,584 teachers and 128,434 pupils (109,488 boys and 29,001 girls). There were, of a higher grade, 10 secondary schools with 1,048 teachers and 7,317 pupils; 1 theological school with 10 teachers and 100 students; 5 normal schools with 56 teachers and 560 students; 1 special schools with 10 teachers and 321 pupils; 1 superior schools for girls with 10 teachers and 1,001 pupils. Belgrade University, founded in 1838, had 78 professors and 1,022 (Winter). For 1912 the expenditure on elementary schools was 4,228,002 dinars; on the secondary schools, 2,455,454; on the theological school, 267,049 dinars; on the University, 710,671 dinars.

The Government has a Military Academy. There are several private schools, elementary and other, and an orphanage supported by voluntary contributions.

For elementary schools the State pays the teachers' salaries, and the municipalities provide the other expenditure. The cost of other public schools is borne entirely by the State.

Justice, Crime, and Pauperism.

The judges are appointed by the king. There are 27 courts of first instance in Serbia, a court of appeal, a court of cassation, and a court of arbitration.

In all the courts of ■■■ instance there were in 1906, 8,972 convictions. At the end of 1907 the 3 penal establishments contained 8,471 prisoners (8,844 ■■■ and 127 females).

There is no pauperism in Servia in the sense in which it is understood in ■■■ West; the poorest have ■■■ sort of freehold property. There ■■■ ■■■ poor people in Belgrade, but neither their poverty nor their number has necessitated ■■■ institution like ■■ workhouse. There ■■■ a free town hospital.

Finance.

State receipts and expenditure (estimated for 1911) as follows —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1906	3,650,820	3,494,480	1909	4,205,222	4,153,254
1907	3,444,500	3,472,450	1910	4,603,246	4,474,461
1908	3,812,930	3,630,490	1911	4,805,476	4,803,262

For 1912 the estimates were in 1,000 dinars —

Sources of Revenue	1,000 dinars.	Expenditure	1,000 ■■■■
Direct taxes	30,613	Civil list	1,440
Customs	14,500	Debt charge	32,894
Excise	9,007	National Assembly	668
Taxes	8,402	Pensions and dotations	4,807
Monopolies	31,635	Ministries	
Domains	2,720	Justice	3,043

		Commerce and Agriculture	6,480
		Miscellaneous	1,406
Grand Total	127,970 (£5,118,400)	Total	117,700 (£4,708,240)

On January 1, 1913, the public debt of Servia amounted to 26,862,2407. ■■■ debt charge in 1912, 1,295,7821.

Defence.

In Servia military service is compulsory and universal. Liability is from ■■■ to ■■■ years of ■■■ but recruits join at 21, and complete their military service at 45. The National Army has three 'bans.' The first is the active army and its reserve, constituting the first line. ■■■ second 'ban' is supposed to provide ■■■■ troops. The third ■■■ territorial army. There is also the *leved* ■■■ *masse*, which contains all those who have passed through the National Army, and all other males between 18 and ■■■

Continuous service for the infantry ■■■ for 1½ year only; for artillery and cavalry 2 years. Service in the ■■■■ is for 9½ or 8 years (to complete 10 years in the ■■■ 'Ban'). After ■■■ the Servian soldier passes successively to the Second 'Ban,' in which he remains 6 years, ■■■ to ■■■ Third 'Ban' ■■■ 8 years.

The Kingdom of Servia ■■■ divided into 5 divisional areas, each supplying a division ■■■ 2 infantry brigades ■■■ of 2 regiments of 4 battalions, ■■■ ■■■■ every regiment of 9 batteries of 2 guns, and ■■■ regiment of divisional cavalry. The

latter resemble ■■■ yeomanry, and are ■■■ embodied in time of peace. In war, the ■■■ army, consisting of ■ divisions, ■ cavalry division of 4 regiments and 2 horse batteries, one regiment of mountain artillery, and ■ of howitzers, would amount to about 110,000 combatants. If the ■■■ troops of the Second 'Ban' are fit to take the field, they would raise the total strength to about 175,000. The reservists of the First and Second 'Bans' not required to form first line ■■■ troops, and therefore available to make good losses in the field, would amount to some 95,000 men.

The units of the Second 'Ban' exist in part as cadres only. In ■■■ will provide 15 regiments, each of ■ battalions, 5 regiments of divisional cavalry, and ■ engineers. The Third 'Ban' has at present ■ organisation, but it is hoped that if necessary, 15 regiments, and a few squadrons, may be formed for home defence.

The Servian infantry is armed with the Mauser rifle, model 99, calibre 7 mm. The field gun is ■ quick firer ■ the Schneider-Canet system.

The peace strength of the Servian army, according to the Budget of 1911, amounts ■ 381,747 all ranks.

The military budget for 1912 amounted to 30,116,312 dinars (about 1,204,652*l.*), of which 1,541,960 dinars (about 61,678*l.*) is for the Gendarmerie and Frontier Guards.

At Nish ■ series of forts is being built; some ■■ ready to receive their armament. At Zayecbar, near the Bulgarian frontier, are 5 forts, and Pirot is also provided with works.

Production and Industry.

Servia is an agricultural country, where almost every peasant cultivates his ■■ freehold. The holdings vary in size from 10 to 30 ■■ mostly. Of the total ■■ (11,930,740 acres), 4,607,520 acres ■■ cultivated in 1904, and 3,818,620 acres were under woods and forests. The ■■ and produce of the principal crops for ■ years was as follows:—

	Area in acres		■ ■■ ■■ cwts.		
Crops	1909	1911	1909	1910	1911
Wheat	938,799	932,225	964,671	8,846,761	8,200,442
Barley	281,350	265,913	264,598	1,776,250	1,974,660
Oats	207,778	207,049	258,739	1,237,879	1,442,683
Rye	124,953	124,765	128,218	680,798	865,199
Maize	1,445,806	1,439,578	1,443,538	14,546,359	18,261,866
Beetroot sugar	7,677	7,420	11,268	1,471,600	1,242,180

Plum marmalade and also fresh plums are exported in large quantities, spirits ■■ distilled in large quantities from plums, and various fruits ■■ grown. ■■ culture employs a large number of persons (31,522 ■■ 1910) ■■ export of ■■ was (in 1910) valued at 25,224*l.*

There is ■ school of agriculture ■■ Kraljevo and ■■ of wine-culture ■■ egot.

On December 31, 1910, there were ■■ 152,617 ■■; 957,916 ■■ of cattle; 3,808,815 sheep; 863,544 pigs; ■■ 627,427 goats.

The State forests have an area, 1910, of 1,375,000 ———, parish forests, 1,625,000; church and monastery, 42,500; private, 750,000. The forests consist largely of beech, oak, and fir, ——— less profitable than, with proper management, they might be. Cask staves are exported to Austria and F ——— in great quantities.

Servia has considerable mineral resources, including coal and lignite, worked by Government, by Belgian companies, and by private enterprise. In 1911 the output of the various sorts ——— valued at 15,413,945 dinars. The production of copper ——— amounted to 7,023 metric tons, value 8,165,731 dinars, and of coal to 235,058 metric tons, value 3,775,776 dinars. In addition ——— this ——— kilogrammes of gold ——— mined, estimated value 1,433,603 dinars; and 1,693 waggon loads of cement produced, value 759,841 dinars.

Of Servian industries, flour milling is ——— of the most important; in 1911 there ——— 17 large flour mills in the country; brewing and distilling ——— extensively carried on; sugar works and a celluloid factory are in German hands; weaving, tanning, bootmaking, pottery, and iron-working ——— also carried on. Carpet weaving is ——— of the oldest industries in Servia. The product is manufactured principally ——— Pirot, in south-eastern Servia, and the carpets are named after that place. The chief characteristics of these carpets are that they ——— made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son and is known only to the inhabitants of Pirot. Meat packing is also becoming important. The total value of the products of all Servian industries in 1911 was 4,872,620%.

Commerce.

The following table shows the value (25 dinars = £1) of the imports and exports of Servia for five years:—

Year	Imports	Exports	Year	Imports	Exports
1906	£ 1,772,150	£ 2,964,160	1909	£ 2,941,000	£ 3,710,000
1907	2,825,800	3,359,650	1910	3,387,898	3,926,921
1908	3,026,420	3,019,960	1911	4,455,421	4,512,971

The following table shows the chief imports and exports in two years:—

Imports	1910	1911	Exports	1910	1911
	£	£		£	£
Cotton tissues	292,768	380,094	Prunes	430,452	686,658

The treaty of June, 1893, provides for "the most favoured nation" treatment in commerce and navigation between the United Kingdom and Serbia. A new treaty, signed February 17, 1907 (for 10 years), provides for tariff reductions and for 'most favoured nation' treatment as regards commercial travellers, the acquisition and possession of property, and other matters.

Total trade between Serbia and the United Kingdom for 5 years :—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports from Serbia into United Kingdom	22,096	4,429	4,744	154,113	29,809
Exports to Serbia from United Kingdom	159,304	142,862	204,916	341,074	318,604

Communications.

Serbia has two principal railway lines, Belgrade-Nish-Vranyé, and Nish-Caribrod; also several secondary branches, Smederevo-Velika Plana, Lapovo-Kragujevatz, total (June 1912) 606 miles.

Of highways there are 3,495 miles, many of them in a ruinous condition. Of rivers only those bordering on Serbia are navigable, viz. Danube, 111 miles; Save, 111 miles; and Drina, 106 miles. The navigation on the Danube and Save is in the hands of the Servian Steamboat Company, and several foreign companies, Austrian, Hungarian, Rumanian, and Russian.

There are 2,184 miles of telegraph line and 6,421 miles of wire, with 217 State telegraph offices, at the end of 1911. In 1911, 1,078,308 messages were transmitted.

In 1911 there were 25 urban telephone systems with 412 miles of line and 4,460 miles of wire, and 38 inter-urban systems with 111 miles of line and 2,000 miles of wire. Total number of conversations in 1911: urban, 4,406,171; inter-urban, 195,489.

There are 1,539 post-offices in 1911. In 1911 the letters transmitted were: internal, 54,223,000; international, 10,636,000. The post and telegraph receipts for 1911 amounted to 3,566,238 dinars (francs), and expenditure to 3,177,087 dinars.

Money and Finance.

The principal bank is the National Bank of Serbia in Belgrade, with nominal capital of 20,000,000 dinars, of which 7,500,000 has been paid up. Its circulation, December 31, 1910, amounted to 65,823,120 dinars, of which 44,318,411 dinars in gold and 6,521,879 dinars in silver. The Export Bank, with agencies abroad, assists in the exportation of goods.

produce. The Uprava Fondova or Mortgage Bank, the only large State institution of the kind in Serbia, makes advances to a large amount for agricultural operations.

Money, Weights, and Measures.

Serbia accepted, by the law of June 20, 1875, the French decimal system for its money, weights, and measures. The Serbian dinar = equal to one franc. In circulation are gold coins of 10 and 20 dinars (milan d'or), silver of 5, 2, 1, and 0.5 dinar; bronze of 2, and nickel of 20, 10, and 5 paras.

The decimal weights and measures (kilogram, metre, &c.) have been in practical use since the commencement of 1883.

Diplomatic and Consular Representatives.

1 OF SERBIA IN GREAT BRITAIN.

Charge d'Affaires—Svetko Y. Grouitch.

First Secretary—Alex. V. Grouitch.

Consul General for London—Alexander Tucker.

There are consular representatives in Glasgow, Manchester, Liverpool, Bristol, and Sheffield.

2 OF GREAT BRITAIN IN SERBIA.

Envoy Extraordinary and Minister Plenipotentiary—Sir Ralph Paget, K.C.M.G., C.V.O., appointed 1910.

Secretary—D. Cuckenthorn.

Vice-Consul—C. L. Blakeney.

SIAM.

(SAYAM, OR MUANG-THAI.)

Reigning King.

■ ■ ■ Vajiravadh, born January 1, 1880, eldest son of the late King Chulalongkorn I., succeeded to the throne ■ the death of his father, October 23, 1910, and ■ crowned on December 2, 1911. The royal dignity is nominally hereditary, but does not descend always from the father to the eldest son, each sovereign being invested with the privilege of nominating his ■ ■ ■ On November 24, 1910, it ■ officially announced that until the new King has male issue, the succession will pass presumptively through the line of the Queen Mother's ■ ■ ■ Therefore, Prince Chowfa Chakrapongse Poowanarth, born March 3, 1881, ■ the Heir Presumptive.

Brothers of the King.

- I. Prince Chowfa Chakrapongse Poowanarth, March 3, 1881.
- II. Prince Chowfa Asadang Dajarvoot, May 1889; and others.

Government.

The executive power is exercised by the King advised by a Cabinet consisting of the heads of the various departments of the Government: Foreign Affairs, Interior, Justice, Finance, Public Instruction, Public Works, War, Marine, Local Government, &c. Many of the portfolios ■ held by the King's half-brothers and uncles. The law of May 8, 1874, constituting ■ Council of State, has now been superseded by the Royal Decree of January 10, 1895, creating a Legislative Council. The latter is composed of the Ministers of State (Senshodi) and others, not less than 12 in number, appointed by the Crown. The total membership is now 40. In the preamble of the Royal Decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least ■ ■ week, and it may appoint committees of 3 ■ ■ members, with the addition of competent outsiders who must not outnumber the members. An important article gives the Legislative Council power to promulgate laws without the Royal assent in the event of any temporary disability of the Crown. At other times the Royal signature is indispensable. This Council has shown considerable legislative activity.

The Siamese Malay States ■ administered by the Rajahs under the control of Commissioners sent from Bangkok.

The trans-Mekong portion of the State of Luang Prabang is ■ under French protection. The remainder is ■ Siamese.

The Siamese dominions ■ divided into 18 provincial circles (Monthons), of which 17 have each ■ High Commissioner, deriving authority direct from the King, and having under him subordinate governors ■ the various parts of his district. Until 1895 the administration of the country ■ divided between the Ministers of the North, South, and Foreign Affairs. With the exception of the Metropolitan Monthon of Bangkok, it was then brought under the single authority of Prince Damrong, as Minister of the Interior, under whose administration great improvements have been already made. Official buildings, such ■ court-houses and gaols, are being erected ■ over the country, and the system of provincial *gendarmerie* is being extended. There is, however, an insufficient supply of suitable ■ to carry ■ reforms. Several of the ■ butary districts are administered by their ■ chiefs; but of late years centralisation has greatly increased. Commissioners, chosen by the King, are now regularly sent from Bangkok to all of these tributary provinces, both to those ■ the north, as Chiengmai,

and those in the south, as Singora, and others, with very full powers. The Monthon of Bangkok is under the control of the Minister of Local Government.

Area and Population.

The limits of the Kingdom of Siam have varied much at different periods of its history most of the border lands being occupied by tribes more or less independent. The boundary between Burma and N W Siam is delimited in 1891. By the Anglo French Convention of April, 1904, the agreement of 1891 is confirmed, and its provisions more clearly defined, the territories to the west of the Mekong and the Gulf of Siam being recognised as in the British sphere, and those to the east in the French. Various changes have recently been made in the Franco Siamese frontier line. In 1904, the Luang Prabang territory to the west of the Mekong was acknowledged by Siam to belong to France, and the provinces of Malaprey and Barak (west of the Mekong) were also transferred to French rule, so that an area of about 7,800 square miles passed from Siamese possession. On March 28, 1907, a new boundary in this region was accepted by Siam whereby the provinces of Battambang, Siem Reap, and Sisophon are ceded to France while the strip of coast to the south with the port of Kiat returns to Siam. At the same time a rectification of the boundary was made in the Luang Prabang region, whereby a tract of the Laos country was restored to Siam. It was agreed also that four ports on the Mekong are to be held by France on perpetual lease. By these arrangements the territory of Cambodia is increased by about 7,000 square miles. The treaty also provides for the future jurisdiction of the Siamese courts over all French Asiatic subjects and proteges in Siam, under certain conditions.

A treaty for a modification of British extra territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Keda to Great Britain was signed at Bangkok on March 10, 1909. The three states have an area of about 15,000 square miles, and a population estimated at over 800,000, of whom about 300,000 live in Kelantan.

The area of Siam is now about 196,000 square miles, about 45,000 being the Malay Peninsula. The numbers of the population have hitherto been imperfectly known than the extent of territory, and the difficulty of any correct result is the greater on account of the Oriental custom of numbering only the men. The work of taking the first detailed census of Siam was, however, completed in 1904. Unfortunately, this included only 12 of the provincial circles, the Monthons. In November, 1910, full statistics were issued for the whole kingdom. According to these figures the total population of the country is given as 8,117,951. The number of Siamese in the Bangkok Monthon is 639,820, and in the remaining Monthons, with the exception of Payap and Iahu (now Abou and Roiet) where no details are given, there are 3,779,586 of the Siamese. Thai. The population of Monthon Paket is put at 222,802. The town of Bangkok includes 628,675 inhabitants. The population of Paket is put at 179,800. Siam is called by its inhabitants Thai, Muang-Thai, which means 'free,' or 'the kingdom of the free.' The word Siam is probably identical with Shan, applied to Burma and the Lao race, as well as to the proper and the Siamese.

In recent years the results of Western civilisation have to a considerable extent been introduced. Much excellent work has been done by a General Adviser of American nationality, and with the aid of a British Judicial Adviser, a French Legislative Adviser and Legal Advisers of various nationalities important reforms have been made in the administration.

justice in the native courts and in the International Court which tries suits of foreigners against Siamese. The Penal Code has been completed, and came into force on September 21, 1908; work on other codes ■ being proceeded with. The Consular Courts exercise jurisdiction ■ their nationals, subject, in the ■ of Great Britain and France, to the Treaty modifications. A great improvement ■ taken place in the metropolitan police force under the superintendence of several English police officers lent by the Government of India. The police administration of the Provinces is entrusted to the Provincial Gendarmerie, a force which includes ■ Danish inspector-general and ■ body of Danish instructors.

Religion ■ Instruction.

The prevailing religion is Buddhism, and throughout the country education is chiefly in the hands of the priests, of whose services the Government intend ■ make more effective ■ In the whole country there ■ some 13,000 temples, containing ■ 93,000 priests, with a total of over 157,000 pupils. The Siamese language is ■ firmly established ■ the official language ■ the whole country. The Minister of Public Instruction and Ecclesiastical Affairs has also under his charge several Government hospitals, which have been established by the King, besides a public museum, and all the royal monasteries in the capital.

The capital possesses the following Government schools: 138 lower and middle primary schools, with 10,083 pupils; 4 upper primary schools with 420 pupils; 2 secondary schools, with 184 pupils; 6 English schools, with 549 pupils; 1 medical college, with 108 pupils; 1 training college for teachers, with ■ pupils; 1 Civil Service college, with 70 pupils; and 1 midwifery school, with 32 pupils. Schools not under the Education Department ■ are military, naval, and survey residential colleges, and Law, Gendarmerie, and Police non-residential schools. Sericulture and railway schools have been formed, and the establishment of ■ University at Bangkok (with ■ faculties:—medicine, law, engineering, agriculture, commerce, pedagogy, and political science) is in progress.

Finance.

Revenue and Expenditure for the years 1909-10, 1910-11, 1911-12:—

	1910-11.	1911-12 (Estimate)	1912-13 (Estimate)
■	■	■	■
Expenditure against ■	4,625,951	4,763,261	4,738,403
Extraordinary Expenditure against ■	4,625,911	4,763,305	4,737,008
Capital Account* ■	710,833	894,352	1,321,580

* Including Expenditure from Loans.

■ principal ■ of ■ for 1911-12 ■ duties, 451,832; ■ taxes, 2,768,687; ■ forests, 223,171; railways, 329,615; post, telegraphs, ■ telephones, 86,800; other ■ (including revenue from lottery ■ gambling, farms, &c., 887,285).

■ March, 1905, a loan of 1,000,000 ■ contracted, and ■ February 1907, a loan ■ 3,000,000. The proceeds are being devoted mainly to railway construction. In ■ a further loan of 4,000,000, bearing ■ 4 per cent. was negotiated, ■ to be gradually advanced ■ the ■ by the ■ of the ■ Malay ■ It

■ stipulated that the ■■■■ thus received shall be devoted to the construction and operation of railways ■ the Siamese dominions of the Malay Peninsula.

A British officer occupies the position of Financial Adviser, and there are ■■■■ other British officers holding high positions under the Government, ■■■■ especially in the Finance and Audit, Revenue, Forests, Survey, Police, Justice, Customs, Mining, Mint, and Education departments. There ■■■■ also several Europeans of other nationalities in various Departments. The financial position of the kingdom ■■■■ extremely favourable, the revenue ■■■■ steadily increasing, and the expenditure is less than the revenue, and well under control. Some revenue ■■■■ derived from gambling, for the abolition of which measures ■■■■ being taken throughout the country. There remain now to be abolished only the gambling houses in the Capital. The suppression of these awaits the consent of the Treaty Powers to ■■■■ revision of the existing Customs Tariff whereby it ■■■■ hoped to make up the loss in ■■■■ occasioned by the extinction of the gambling farm.

Defence.

Universal liability to military service ■■■■ the European model is ■■■■ in force in all the provinces including Bangkok. The legal exemptions are, however, rather numerous, and personal service is not enforced in the case of the uncivilised tribes. Chinese settlers pay a tax in lieu. The period of continuous service in the ranks is 2 or 3 years. The army ■■■■ organised in 10 mixed brigades, each comprising 2 battalions of infantry, ■■■■ regiment of cavalry of ■■■■ squadrons, 1 battalion of artillery, a company of engineers, &c. The total peace strength is about 25,000 of all non-commissioned ranks, with 1,200 officers. The troops are armed with modern weapons. Considerable reliance is now placed upon the newly constituted force of ■■■■ infantry mentioned below.

The navy consists nominally of 21 vessels, all of small size and no fighting value. The largest is the royal yacht *Maha Chakreri*, of 3,000 tons. The rest are very small gun boats. There ■■■■ 5,000 men available for service afloat, besides ■■■■ reserve of 20,000. A destroyer and three torpedo boats, obtained from Japan, were added to the Siamese navy in August, 1908, and ■■■■ second destroyer, also built in Japan, was added in June, 1912.

The marine infantry, recruited from the inhabitants of the maritime provinces, between 18 and 40 years of age, numbers 15,000 in ■■■■ shifts, besides a 1st and 2nd reserve of 3,000 and 2,000 respectively.

At the mouth of the Menam River ■■■■ the Paknam forts. The bar prevents ships of ■■■■ than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

Production ■■■■ Industry.

The economic development of the country has been retarded by the institutions of forced labour and slavery, but these hindrances ■■■■ being removed by the substitution of ■■■■ poll tax for the *corvée* and by the gradual abolition of slavery, hastened by royal decrees of 1900 which liberated all slaves born after December 16, 1897, and reduced the redemption fee of all others. The cost of labour ■■■■ probably higher than in any other Oriental country. Chinese coolies do the chief part of both skilled and unskilled labour in the south, especially ■■■■ the mills and ■■■■ mining; while ■■■■ the north forest work ■■■■ confined almost entirely to Burmese, Karens, and Khamus. To the north of Bangkok, large tracts of land, formerly lying waste, have been opened up by an Irrigation Company, which has connected by a canal the Menam and ■■■■ Chao Phraya rivers, and has constructed numbers of smaller canals. The chief produce of ■■■■ country ■■■■ rice, which forms the

national food and the staple article of export. For the Siamese Year, 130 (April 1, 1911, to March 31, 1912), the rice export amounted to 627,467 tons valued at 4,989,458. In Siam there are 67 large mills, of which 1 are British, 1 German, and 63 Chinese, 1 of these Chinese firms being nominally British, 1 from Hong Kong or the Straits Settlements. Other produce is pepper, salt, dried fish, cattle, and sesame, while, for local consumption only, hemp, tobacco, cotton, and coffee are grown. Fruits are abundant, including the durian, mangosteen and mango. Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. In 1910-11 (Siamese year, 129), 89,154 tons were exported, in 1911-12, the exports amounted to 75,080 tons, valued at 463,180. The forests are under the control of an English conservator, aided by several English officers. The export of rubber is negligible, but planting of rubber trees is proceeding in the Malay Peninsula. Gold is found in many of the provinces, and concessions have been granted to mining companies. The small mineral resources of Siam are extensive and varied, including tin, coal and iron, zinc, manganese, antimony, probably quicksilver. Tin mining is on a considerable scale in the island of Fonglah (or Junk Ceylon) and the ore is found in other parts of the Siamese portion of the Malay Peninsula where also wolfram is now being extracted in considerable quantity. From Puket (the port of Junk Ceylon) in 1911-12, 2,022 tons of tin and 4,369 tons of ore were exported.

Commerce.

Nearly the whole of the trade is in the hands of foreigners, and in recent years many Chinese have settled in the country. The foreign trade of Siam centres in Bangkok, the capital.

For the year 1911-12 the value of the articles imported and exported were:

Imports	—	Exports	—
Cotton goods	1,090,954	Rice	1,369,411
Provisions	504,515	Teak	463,180
Treasure	373,590	Marine products	165,760
Iron, steel and machinery	236,382	Hides	111,780
Silk goods	287,146	Milk and goods	77,760
Opium	222,282	Pepper	69,808
Sugar	209,156	Treasure	6,121
Jewellery	197,706	Bullocks	43,810
Petroleum	134,435	Wood other than teak	28,970
Cotton yarns	115,073	Raw silk	28,669
Beer, wine and spirits	109,216	Iron and steel	21,498
Oils, other than petroleum	95,001	Horns	16,000
Gunny bags	91,041	Swine	14,725
Tobacco	90,765	Other articles	103,770
Chemical products	88,560		
Furniture and cutlery	86,962	Total	6,206,810
Cannages, cars, cycles and parts thereof	82,120	Articles exported,	
Coal	17,440	Jewellery	—
Other articles	1,450,692	Other articles	61,741
Total	5,542,568	Total	6,113,061

The imports in 1911-12 (in order of value) were chiefly from the United Kingdom (24.5 per cent), Singapore (15.5 per cent), China (14 per cent), Hong Kong (12 per cent). The exports (in order of value) were chiefly to Singapore, Hong Kong, Germany, United Kingdom, India, and Holland.

Into Northern Siam from Burma in 1912 the imports (chiefly tea, cottons, silk, apparel, hardware and jewellery) amounted to 190,598 £ value, and the exports from Northern Siam to Burma (chiefly tea, rice, teak, cattle, elephants and silks) to 227,332 £. There is a considerable trade between the northern frontiers with the British Shan states and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years —

	1907	1908	1909	1910	1911
Imports from Siam into U. Kingdom	£ 11,143	6,735	3,000	78,100	4,110
Exports to Siam from U. Kingdom	£ 81,770	5,700	44,075	16,000	1,034,368

Shipping and Communications.

In 1911, 758 vessels of 647,390 tons (69 of 65,107 tons British) entered and 767 vessels of 662,884 tons (70 of 69,157 tons British) cleared from the port of Bangkok. About half the tonnage visiting Bangkok is German (266 vessels of 271,915 tons in 1911), Norwegian vessels have the second place (257 of 207,373 tons in 1911), and British the third. In 1909, the Siam-Thai Company instituted a regular service between Bangkok, Hong Kong, and the Southern China Ports, in competition with the North German Lloyd Orient Line. The Company at present chartered 9 vessels, 7 Norwegian and 2 German.

The railway from Bangkok to Paknam (14 miles) was opened in April 1893, a railway from Bangkok to Korat (165 miles) was opened for regular traffic on November 1, 1900. A further line to Lopburi was opened in January, 1901, and has been extended northwards beyond Paknampho and Utaradit to Mukdahan, which is the terminus for the present. A branch line from Sawankalok to Ban Dara on the main Northern railway was opened in August, 1909. The total length of the Northern line amounts to 327 miles. A line from Bangkok to Petrol on the East (39 miles) was opened early in 1908, whilst a line to Petchaburi, 110 miles from Bangkok, was inaugurated in June, 1903. This latter railway is being continued southwards, and is open as far as Hua Hin, about 86 miles south of Petchaburi, and thus forms the initial portion of the projected trunk line down the Malay Peninsula, which will in time connect Bangkok with Singapore. A railway across the peninsula, starting from Trang on the west coast, and joining the Bangkok-Singapore line at Singapore, is under construction (39 miles completed). A line to Tachin, 20 miles from Bangkok, was opened by a private company in January, 1905, and has been extended to Meklong, about 10 miles further. The total length of railway open, State and private, is about 680 miles. All the lines except the Korat and Northern lines have a gauge of a metric.

Telegraph lines have been completed to the total length of 2,900 miles, and Bangkok is now in communication with Korat, Nong Khai, Sisophon, Chantabun, Bangtaphan, and Chingmai, with Monywa, and Tavoy in

Lower Burma, and with Saigon in Annam, the overland telegraph line to Penang has been completed.

Estimates for three wireless stations and installations on three vessels of the fleet have been placed in the budget for Siam for the fiscal year 1912-1913. An experimental station of the Telefunken system was erected on the island of Kohsichang some years ago, and this system will be used for the installations. The sites for the land stations will be at Platoonawan, at Kohsichang, and at the top of the mountain of Singora.

There is a postal service in Bangkok, and in 1885 Siam joined the International Postal Union. The mail service down the Malay Peninsula, and also towards the north of Siam, has been largely developed. In 1890 a parcel post was established having connection with Singapore and the international system.

Money, Weights, and Measures

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, and the Banque de l'Indo Chine, all of these banks issue notes, bank note issue is in Siam regulated by the Siamese Government. A native bank, with a German manager for its Foreign Department, has recently been established under Royal Charter and with the name of the Commercial Bank of Siam, Limited. The Government in 1902 began to issue currency notes which have driven the bank notes out of circulation. At the end of July, 1912, there was 1,903,343/ worth of currency notes in circulation against which the treasury held 1,289,392/ in bullion, Indian stock, 108,609/ , British consols, 1,44,041/ , German Imperial bonds 57,295/ , Siam stock, 193,164/ , Japanese bonds, 93,314/ , and Egyptian United stock, 97,162/.

The unit of the monetary system is the silver tical weighing 15 grams 900 fine. Its value (formally varying with the price of silver) has, by the Gold Standard Act of 1908, been fixed at 1s 6½d or 18 ticals = 1/ , the gold value of the tical being equal to that of 55.8 centigrams of pure gold. There will be a 10 tical gold piece = Doa weighing 150 grams 900 fine and thus containing 135 grams of pure gold. In addition to the tical, the following are actually in use—the *Salung*, = ½ tical, the 10 *Salung* piece, = 1/4 of a tical, the 5 *Salung* piece, = 1/8 of a tical, and the *Salung*, = 1/16 of a tical. The *Salung* is of silver hue. The 10 *Salung* and 5 *Salung* pieces are of nickel, whilst the *Salung* is of bronze.

The units of weight are—1 *Tual* = 15 grams or approximately 5/8 oz, 4 *Tuals* = 1 *Tamung*, (60 grams = 2 1/4 oz), 20 *Tamungs* = 1 *Chang* (12 kilograms = 26 lbs 10 3/4 oz), and 1 *Chang* = 1 *Hop* (80 kilograms = slightly more than 132½ lbs).

The units of length are, 1 *Lin* = 8 1/2 inches, 12 *Lin* = 1 *Koup* (10 inches), 2 *Koup*, = 1 *Sok*, (20 inches), 1 *Sok*, = 1 *Wa* (80 inches) 1 *Wa* = 1 *Sen* (133 feet); 1 *Sen* = 1 *Yot* (10 miles, roughly).

Diplomatic and Consular Representatives

1. OF SIAM IN GREAT BRITAIN

Envoy and Minister —Phya Sudham Maitri
Councillor of Legation —W J Archer, C.M.G.
First Secretary —Luang Saupakitch
Secretary-Interpreter —Lewis C. [redacted]
Attaché —Nai Tiem.

2 OF GREAT BRITAIN IN SIAM.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General —

A R Peel

BANGKOK — *First Secretary of Legation and Consul* — W R D Beckett,

(ESPAÑA)

Reigning Sovereign.

Alphonso XIII., ■ of the late King Alphonso XII and Maria Christina, daughter of the late Karl Ferdinand, Archduke of Austria, born after his father's death, May 17, 1886, succeeding by his birth, being a male, his eldest sister, married May 31, 1906, to Princess Victoria Eugenia, daughter of the late Prince Henry of Battenburg and Princess Beatrice (daughter of the late Queen Victoria) of Great Britain and Ireland, offspring, Prince *Alphonso*, born May 10, 1907; Prince *Jaime*, born June 28, 1908, Princess *Beatrice*, born June 22, 1909, Princess *Maria Cristina*, born December 12, 1911.

Sisters of the King — I *Maria de las Mercedes*, Queen till the birth of her brother, born September 11, 1880; married February 14, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta, died October 17, 1901, offspring, Alfonso born November 30, 1901, Isabel, born October 16, 1904. II *Maria Teresa*, born November 12, 1882, married January 17, 1906, to Prince Ferdinand of Bavaria, died September 23, 1912, offspring, Luis Alfonso, born December 12, 1906, José Eugenio, born March 26th, 1909, Pilar, born September 5, 1912.

Aunts of the King — I *Infanta Isabel*, born December 20, 1861; married, May 13, 1868, to Gaston, Count de Gucgenti; widow, November 26, 1871. II *Infanta Maria de la Paz*, born June 23, 1862; married, April 3, 1883, to Prince Ludwig, eldest son of the late Prince Adalbert of Bavaria, offspring, Fernando Maria, born May 10, 1884; married January 12, 1906, the Infanta Maria Teresa (*see above*), Alberto Alfonso, born June 3, ■; Maria del Pilar, born March 13, 1891. III *Infanta Eulalia*, born February 12, 1864, married to Prince Antoine, ■ of Prince Antoine d'Orleans, Duc de Montpensier, March 6, 1886; the marriage was dissolved July, 1900, offspring, Alfonso Marie, born November 12, 1886, married July 15, ■ Princess Beatrice of Saxe-Coburg-Gotha; Luis Fernando Maria, born November 5, ■ (All sisters of the late King.)

Cousin of the late King — *Infanta Don Jaime*, ■ of the late Don Carlos and Margaret of Parma, Princess of Bourbon, born June 27, 1870. He has four sisters.

The King, Alfonso XIII, has a civil list, fixed by the Cortes, 1886, of 7,000,000 pesetas, or 280,000*l.*, exclusive of allowances to members of the royal family. The annual grant to the Queen ■ fixed at 450,000 pesetas (18,000*l.*), and, should the King predecease her, 250,000 pesetas (10,000*l.*) during widowhood. The annual grant ■ the mother of the King ■ fixed at 250,000 pesetas. To the Prince of Asturias, heir to the throne, 500,000 pesetas have been assigned, and 250,000 to the second sister of the King. The Infantas, his aunts, receive 550,000 pesetas.

The following is a list of the sovereigns and rulers of Spain, with dates of their accession, ■ the foundation of the Spanish Monarchy by the ■ of the ■ of Aragon and Castile —

<i>House of Aragon</i>		<i>House of Bonaparte</i>	
Isabel II, 'The Catholic'	1879	Joseph Bonaparte	1808
<i>House of Habsburgs</i>		<i>House of Bourbon</i>	
Carlos I	1516	Fernando VII, restored	1814
Felipe II	1556	Isabel II	1835
Felipe III	—	Provisional Government	—
Felipe IV	—	Marshal Serrano, Regent	1869
Carlos II	1665	<i>House of Savoy</i>	
<i>House of Bourbon</i>		Amadeo	1870
Felipe V	1700	<i>Republic 1873-75</i>	
Fernando VI	1746	<i>House of Bourbon</i>	
Carlos III	1759	Alfonso XII	1875
Carlos IV	1788	Maria (pro tem)	—
Fernando VII	1808	Alfonso XIII	1886

Government and Constitution

I CENTRAL GOVERNMENT

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyente elected for its ratification March 27, 1876, was proclaimed June 30, 1876. It enacts that Spain shall be a constitutional monarchy the executive resting in the king and the power to make laws in the Cortes with the king. The Cortes are composed of a Senat and Congress, equal in authority. There are three classes of senators—first senators by their own right in *36* *under 18* *of their own property*, secondly, 100 life senators nominated by the Crown—these two categories not to exceed 150—and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial states, the church, the universities, academies, &c. and by the largest payers of contributions. Senators in their own right and by the sons of any, of the king and of the immediate heir to the throne, who have attained their majority. Grandees who are so in their own right and who can prove an annual *renta* of 60,000 pesetas or 2,100 £, captains-generals of the army, admirals of the navy, the patriarch of the Indies and the archbishops, the presidents of the Council of State, the Supreme Tribunal, of the Tribunal of Castiles del Reino, and of the Supreme Council of War and of the Navy after two years of office. The elective senators must be renewed by *one* half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies named in the electoral Juntas in the form the law determines, in the proportion of *one* to every 50,000 souls of the population. According to a law of August 8, 1907, voting is compulsory for all males over the age of *18* with a few unimportant exceptions. This law further enacts that all such voters must be registered on the voting list, possess full civil rights, and must have been members of a Municipality for *at least* 2 years. Members of Congress must be 25 years of *age*, they *are* eligible indefinitely, the elections being for five years. Deputies to the number of *450* elected by *universal suffrage* in 28 large districts in which minorities may be duly represented. There *are* *no* deputies. The deputies cannot take State office, pensions, and salaries, but the ministers *are* exempted from *any* law. Neither senators nor deputies are paid for their services. Both Congress and *the* meet every year. The Monarch has the power of convoking them, suspending

them, or dissolving them, but in the latter — the Cortes must sit within three months. The Monarch appoints the president and vice presidents of the Senate from members of the Senate only, the Congress elects its — officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable but his ministers — responsible and that all his decrees must be countersigned by one of them. The Cortes must approve his marriages before he can contract it and the King cannot marry any one excluded by law from the succession to the crown. Should the lines of the legitimate descendants of the late Alfonso XII become extinct, the succession shall be — this order—first, to his sisters, next to his aunt and her legitimate descendants, and next to those of his uncles, the brothers of Fernando VII, 'unless they have been excluded'. If all the lines become extinct, 'the nation will elect its Monarch'.

The executive is vested, under the Monarch, in a Council of Ministers, constituted (December 31, 1912) as follows —

President of the Council — Count Romanones
Minister of Foreign Affairs — Señor Navarro Revertera
Minister of Public Instruction — Señor López Muñoz
Minister of War — General Luque
Minister of Marine — Señor Amalio Jemeno
Minister of Finance — Señor Duarte Inclán
Minister of the Interior — Señor Albu
Minister of Public Works — Señor Villanueva
Minister of Justice — Señor Barrio

II LOCAL GOVERNMENT

The various provinces and communes of Spain are governed by the provincial and municipal laws. Every commune has its — elected Ayuntamiento, consisting of from five to fifty Regidores, or Concejales, and presided over by the Alcalde, at whose side stand, in the larger towns, several Tenientes Alcaldes. The entire municipal government, with power of taxation, is vested in the Ayuntamientos. Half the members are elected every two years, and they appoint the Alcalde, the executive functionary, from their own body. In the larger towns he may be appointed by the King. Members cannot be re-elected until after two years. Each province of Spain has its — Parliament, the Diputación Provincial, the members of which are elected by the constituencies. The Diputaciones Provinciales meet in annual session, and are permanently represented by the Comisión Provincial, a committee elected every year. The Constitution of 1876 — to the Diputaciones Provinciales and the Ayuntamientos the government and administration of the respective provinces and communes. Neither the national executive — the Cortes have the right to interfere in the established municipal and provincial administration, except in the case of the action of the Diputaciones Provinciales and Ayuntamientos going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self government is almost abolished — civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution, pressure is frequently brought — upon the local — by the Central Government.

Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands and the Spanish possessions in the north and west coast of Africa, the total area is 194,788 square miles. The growth of the population has been as follows —

Census year	Population	Increase	Rate of annual increase
1857	15,464,340	—	—
1860	15,873,481	209,141	0.39
1877	16,634,345	960,864	0.58
1887	17,565,632	931,287	0.56
1897	18,132,475	566,843	0.32
1900	18,618,086	485,611	0.29
1910	19,588,656	970,602	0.51

Area and population of the forty provinces. —

Province	Area in square miles	Population, Census 1910	Pop per sq mile	Province	Area in square miles	Population, Census 1910	Pop per sq mile

León	5,936	393,868	66.0				
Lérida	4,690	283,486	60.4	Total	194,788	19,588,656	100.0

The population of Ceuta (13,000) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop. 353), the Chaerinas (852), Melilla (8,956), Peñon de la Gomera (821), and Rio de Oro (130). The North African possessions are no longer used as convict stations, centuries old "Presidios" having been suppressed by a recent Decree and the prisoners brought back to the Peninsula. The Basques in the North, numbering 440,000, are of a different race and language from the rest of Spain; there are 600 Moriscos in the South, 50,000 gypsies, and a small number of Jews.

The following were the principal cities (Census 1910), viz —

SPAIN

Town	Pop	Town	Pop	Town	Pop
Madrid	571,539	Palma	68,311	Lanarcs	91,419
Barcelona	560,000	Jerry	62,629	San Sebastian	87,894
Valencia	251,349	Córdoba	65,100	Alicoy	93,720
Sevilla	15,911	Santander	65,209	Badajoz	93,110
Málaga	139,041	Alicante	1,16	Vitoria	12,977
Murcia	105	Oviedo	2,874	Burgos	31,480
Cartagena	91,983	Gijón	72,236	Castellón	80,583
Zaragoza	10	Almería	4,196	Návarra	28,750
Bilbao	92,714	Las Palmas	53,824	Huelva	27,690
Granada	77,421	Córdoba	45,610	Jaca	26,894
León	67,174	San Cruz (Canaries)	3,403	Salamanca	129
Valladolid	67,749				

The movement of population in 5 years was as follows —

Years	Marriages	Births	Deaths	Surplus of births
1907	136,553	16,944	47,154	12,093
1908	141,041	17,691	48,042	12,739
1909	141,729	18,041	48,177	13,440
1910	141,177	18,078	48,111	13,660
1911	141,111	18,111	48,111	13,111

Emigration in 1906, 126,771 in 1907, 130,640 in 1908, 137,555 in 1909, 141,068, in 1910, 160,136 in 1911, 139,683 (99,709 men and 39,974 women); Emigration from Spain is chiefly to Argentina (99,000), Cuba (28,960) and Brazil (6,831)

Religion.

The national Church of Spain is the Roman Catholic, and the whole population of the kingdom adhere to that faith, except about 30,000, Protestants (about 7,000), Jews (about 4,000) Rationalists, etc. Within the Peninsula, apart from Portugal, there are 9 metropolitan sees and 47 suffragan sees, the chief being Toledo, whose archbishop bears likewise the title of Patriarch of the West Indies. The Constitution requires the nation to support the clergy and the buildings, &c., of the Church, and for this purpose the State expends annually about 41,000,000 pesetas. Efforts are being made for a reduction of the Church estimates. The relations between Church and State, are in accordance with the Concordat of May 6, 1851, and although it is laid down in this that only the orders of San Vicente de Paul, and Felipe Neri, with one other to be subsequently named, should be permitted in Spain, many other orders have been allowed to establish themselves. The third order referred to above, has never been named, and the conditions of this Concordat have been rigidly adhered to. The present Government is working to enforce the law above referred to, and fundamental changes are contemplated at present. A law known as the "Padlock Bill" was passed in December, 1910, prohibiting the establishment of any more religious houses, without the consent of the Government. This is only a temporary measure, a comprehensive Act is being drafted, which will be discussed shortly. Liberty of worship is allowed to Protestants. The communities of the religious orders are influential in Spain. Many of them have schools, and about 5,200 of their members are engaged in teaching

boys of the upper and middle classes, while, within many of these establishments, industries of all kinds are carried on. The number of religious houses in Spain is about 3,801, of which 1,94 are for men and 3,007 for women. Of those for men 447 are devoted to education, 34 to charity, and 113 to the training of priests. The total number of monks is about 12,801 (including 1,294 foreigners). The orders for women comprise 1,808 for education, 1,100 for charity and 1,000 for a contemplative life. The number of nuns is about 43,287 (including 2,418 foreign women).

Instruction

The latest census returns show that a large proportion of the inhabitants are illiterate. In 1880 10 per cent of the population could read and write, 4.6 per cent could read only, and 75.4 per cent could neither read nor write. In 1910, 14.4 per cent could read and write, 2.6 per cent could read only, and 63.7 per cent could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained. Education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be as rigidly uniform as possible. This system has not been rigidly enforced, but various improvements have been effected, especially by a law of June 9, 1909, which made education obligatory. There is now a Minister of Education with a council, there are ten educational districts, with the universities as centres, 43 primary inspectors and numerous local educational authorities. The public and primary schools are since 1902 supported by Government, the total sum spent in 1911 being 31,661,746 pesetas. Most of the children are educated free. The Royal Decree of July 1, 1902, regulates all schools, whether belonging to corporations or private persons, whether self-supporting or in receipt of Government or municipal subventions. It requires schools to be authorized by Government authority, and provides for their periodical inspection for the enforcement of rules respecting sanitation and discipline, and for the appointment of properly qualified teachers.

There are 24,861 public schools and 5,212 private schools, the total number of pupils being 2,052,153. Secondary education is conducted in institutions of a middle class, somewhat like universities, in their organization there must be one of them in every province. In 1910 there were 11 institutions with 6,514 pupils. These institutions prepare for the universities, of which there are ten, attended by about 16,000 students. The universities are at Barcelona, Granada, Madrid, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. Each university has two or more of the faculties of philosophy, law, mathematics and physics, medicine, and pharmacy. There are, besides, a medical faculty at Cadix. Government also supports various special schools—engineering, agriculture, architecture, fine arts, music, &c. In 1911 the total expended on education and the fine arts was 58,524,586 pesetas.

FINANCE

Revenue and expenditure for five years —

		1909	1910	1911	1912
	1,000 Pesetas	1,000	1,000	1,000	1,000
Revenue	1,072,480	1,066,680	1,040,523	1,131,411	1,191,433
Expenditure	1,020,868	1,011,111	1,086,211	1,045,111	1,169,859

The estimates for 1912 are as follows. The expenditure was increased to meet expenditure for action in Morocco.

REVENUE		EXPENDITURE	
	Pesetas		Pesetas
Land on land, mines, Government salaries registration, &c.	481,365,468	Army	2,760,000
Indirect taxes, customs, excise, &c.	415,100,000	Cortes	2,488,000
Tobacco monopoly, lottery, mint, and minor sundries	215,838,000	Public debt	410,514,845
National property:		Pensions	78,200,000
Revenue	22,890,254	President of Council	808,079
Sales	1,339,000	Ministry of State	6,114,587
Public treasury	28,782,750	Justice	19,512,052
		Worship	41,018,013
		War	150,788,979
		Marine	70,672,712
		Interior	79,809,477
		Instruction	62,711,878
		Public Works	90,840,379
		Finance	17,864,926
		Tax collecting	40,700,245
		Spanish possessions in Gulf of Guinea	1,000,000
		Action in Morocco	51,890,000
Total	1,165,804,479	Total	1,149,730,861

The National Debt of Spain on January 1, 1913 (last official figures available) amounted to 9,399,440,855 pesetas, composed as follows:—

External Debt:—	Pesetas.
4 per cent. perpetual exterior debt—called bonds	1,028,300,200
Internal Debt:—	
4 per cent. perpetual internal debt	6,524,820,864
6 per cent. redeemable debt	1,600,427,500
4 per cent. redeemable debt (1908)	155,832,500
Non-interest bearing debt due to officials	1,000,281
'Pagars' of the Ministry of the Colonies	100,000,000

Defence.

ARMY.

Military service in Spain is compulsory (Law of June 29, 1911). The total term of service is for 18 years; 3 are spent in the active army (generally reduced to 2), 3 are spent in the first reserve, 6 are spent in the second reserve, and the rest in the "territorial reserve." The second reserve forms second line, reserve troops on mobilisation, and the men not required for these formations are available for supplying casualties on field service. There is at present no organisation for the "territorial reserve."

The country is divided up into territorial districts, each under a 'Captain-General.' The 1st to 10th inclusive each furnish the army 2 divisions, the remaining two, 11th and 12th, 1 division. A division consists of 2 infantry brigades, each consisting of 2 regiments of 3 battalions, but the third battalion only a cadre in peace time, 1 regiment of cavalry, 1 regiment of field artillery of 5 batteries, 1 regiment of engineers. There are also 3 independent brigades of chassours, each of 6 battalions, 1 regiments of mountain artillery, making 14 batteries, and 1 regiment of artillery of 5 batteries. Batteries have 4 companies. There is 1 permanent cavalry

division of 2 brigades, and there are 3 permanent cavalry brigades. The total strength of the field army would probably be about 220,000 combatants.

For the units of the second line, or reserve troops, there are at present 116 battalion cadres, 14 squadron, and 14 battery, cadres. The second line troops are apparently intended to provide 7 divisions of about 13,000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil is somewhat less than 20,000 (2,000 mounted), and of the Carabineros nearly 15,000 (500 mounted).

Outside the Spanish peninsula, there are the 2 military commands of Melilla and Ceuta on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa they are Spanish, and are supposed to be always on a war footing. Melilla has been raised to a Captain General's command. The corps of occupation recently consisted of 3 regiments of Infantry of 3 battalions, and 3 battalions of Chasseurs (all battalions have 3 companies), a regiment of cavalry of 6 squadrons, 3 field batteries, 3 or 4 mountain batteries, a howitzer battery, a regiment of engineers and the necessary subsidiary services. A native battalion of infantry and squadron of cavalry have been raised at Melilla and 3 companies of native infantry and a "mixed" company (horse and foot) have been raised to perform the duties of military police. The total strength of the corps of occupation is 12,000 to 15,000 combatants. The troops in the Ceuta district have also been strengthened. It is also the garrison of Larache and Alcazar. The native troops in that district comprise 1 squadron of cavalry, 1 company of marines, and 2 companies of tirailleurs. The following table shows the distribution of troops in Spain and in the overseas garrisons, the battalions which are only cadres being shown as battalions —

	Infantry		Cavalry Regiments	Artillery		Engineers Battalions

The Spanish infantry is armed with the Mauser rifle, model 1893. Calibre .275. The cavalry have the Mauser carbine. The field artillery gun is a Schneider Canon 14½ pr. of 19 106.

The peace establishment of the Spanish army including Guardia Civil and Carabineros amounts to 13,405 officers and 114,668 men. The budget for 1911 showed a total of 188,356,697 pesetas (about 7,530,000/).

Spain has several fortresses which guard the passes of the Pyrenees and the Portuguese frontier. On the north and north west coasts are the fortified ports of Pasajes, Santona and Santander, Ferrol, Coruña, and Vigo. On the Straits of Gibraltar are Tarifa and Algeciras, with Cadiz.

The estimates for [REDACTED] are as follows: The expenditure was increased to meet expenditure for action in Morocco

REVENUE		EXPENDITURE	
	Pesetas		Pesetas
Direct taxes on land trade		Civil list	8 760 000
Government salaries		Cortes	486,000
Registration	151 94 418	Public debt	410 14 940

The National Debt of Spain on January 1, 1913 (last official figures available) amounted to 9,399,440,865 pesetas, composed as follows —

External	—	Poestas
■ per cent perpetual external debt—scaled bonds		1 028 300 200
Internal Debt		
■ per cent perpetual internal debt		■ 524 980
■ per cent redeemable debt		1 100 427 500
■ per cent redeemable debt (1946)		1 154 932 500
Non interest bearing debt due to officials		1 000 000
Figures of the Ministry of the Colonies		100 000 000

Defence.

ARMY.

Military service in Spain is compulsory (Law of June 29, 1911). The total term of service is for 18 years, 3 years spent in the active army (generally reduced to 2), 4 years spent in the first reserve, 6 years spent in the second reserve, and the rest is the "territorial reserve". The second reserve forms second line, receive troops on mobilisation, and the men not required for these formations are available for supplying casualties on field service. There is at present no organization for the "territorial reserve".

The country is divided up into 8 territorial districts, each under a 'Captain General'. The 1st to 8th inclusive each furnish to the field army 2 divisions, the remaining two, 1 division. A division consists of 2 infantry brigades, each consisting of 1 regiment of 8 battalions, but the third battalion is only a cadre - peace time, 1 regiment of cavalry, 1 regiment of artillery of 8 batteries, 1 regiment of engineers. There are also 8 independent brigades of chasseurs, 8 of 6 battalions, 4 regiments of artillery, making 14 batteries, and 1 regiment of horse artillery of 5 batteries. Batteries have 4 guns. There are 8 permanent cavalry

division of 2 brigades, and there are 3 permanent cavalry brigades. The total strength of the field army would probably be about 220,000 combatants.

For the units of the second line, there are troops there are at present 116 battalion cadres, 14 squadron, and 14 battery, cadres. The second line troops are apparently intended to provide 7 divisions of about 13,000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter is military police used as a customs guard on frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil is somewhat less than 1000 (2000 mounted), and of the Carabineros nearly 15,000 (500 mounted).

Outside the Spanish peninsula, there are the 2 military commands of Melilla and Ceuta on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa they are Spanish, and are supposed to be always on a war footing. Melilla has been raised to a Captain General's command. The corps of occupation recently consisted of 4 regiments of Infantry of 3 battalions, and 3 battalions of Chasseurs (all battalions have 4 companies) a regiment of cavalry of 4 squadrons, 3 field batteries 3 or 4 mountain batteries a howitzer battery a regiment of engineers and the necessary subsidiary services. A native battalion of infantry and squadron of cavalry have been raised at Melilla and 8 companies of native infantry and a mixed company (horse and foot) have been used to perform the duties of military police. The total strength of the corps of occupation is 12,000 to 15,000 combatants. The troops in the Ceuta district have also been strengthened and also the garrison of Larache and Alcazar. The native troops in that district comprise a squadron of cavalry, a company of mules, and 2 companies of tirailleurs. The following table shows the distribution of troops in Spain and the overseas garrisons, the battalions which are only cadres being shown as battalions.

There are 7 destroyers and 24 modern torpedo boats, and a number of gunboats.

A new programme has been projected, to consist of 1 Dreadnoughts, 1 scouts, 1 destroyers, various torpedo boats, and submarines.

The Spanish dockyard at Ferrol is now worked by a British syndicate, employing Spanish workmen.

Production and Industry.

Of the soil of Spain 79.65 per cent. is classed as productive; of this 33 per cent. is devoted to agriculture and gardens, 3.7 vineyards, 1.6 olive culture, 19.7 natural grass, and 1.1 fruits.

The soil is subdivided among a very large number of proprietors. Of 3,426,083 recorded assessments to the property tax, there are 624,920 properties which pay from 1 to 10 reales; 511,666 from 10 to 20 reales; 642,377 from 20 to 30 reales; 788,184 from 40 to 100 reales; 416,546 from 100 to 200 reales; 165,202 from 200 to 500 reales; while the rest, to the number of 279,188, are larger estates, charged from 500 to 10,000 reales and upwards. The subdivision of the soil is partly the work of recent years; for in 1800 the number of farms amounted only to 677,520, in the hands of 273,760 proprietors and 408,760 farmers.

The following table shows the principal crops and the yield (for 3 years) as follows.

PRODUCTION AND INDUSTRY

1263

	Area			Yield		
	1909	1910	1911	1910	1911	
Wheat	512,377	940,333	1,701,513	77,177 1/3	73,612 1/3	1,521 3/4

Peas	119,077	441,111	441,111	2,111 1/2	2,111 1/2	1,111 1/2
Vetches	117,111	1,111	1,111	1,111 1/2	1,111 1/2	1,111 1/2

In 1912, 1,022,092 acres under vines produced 2,413,453 tons of grapes, yielding ordinary red and white wines. Sherry, malaga and generous wines were exported 3,560,532 cases (1912) under olives yielded 1,274,656,680 pounds of olives and 228,068,920 pounds of oil. Other products are capsaite, flax, hemp, pulse, oranges and hazel nuts are largely exported, and Spain has important industries connected with the preparation of ■■■■ and fruits. Silk culture is carried ■■■■ Valencia, Murcia, and other provinces.

The number of farm animals in 1911 was estimated ■■■■ follows —Horses, 546,035, mules, 901,725, asses, 836,741, cows, 2,511,112, sheep, 15,725,882, goats, 1,369,624, pigs, 2,472,416, camels (Canary Islands), 3,398.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Huelva, and Seville, coal is found ■■■■ Oviedo, Leon, Valencia, and Cordoba, zinc in Santander, Guipuzcoa, and Vizcaya, cobalt in Oviedo, lead in Murcia, Jaen, and Almeria, quicksilver ■■■■ Ciudad ■■■■, silver in Guadalupe, sulphate of soda ■■■■ Burgos, salt ■■■■ Guadalupe, sulphur in Murcia and Almeria, phosphorus ■■■■ C ■■■■ and Huelva.

In 1909 workers employed in connection with the mining industries were as follows: 119,358 men, 2,508 women, of which 19,484 boys under 18, and 1,140 girls under 18. The total value of the mineral output ■■■■ 1909 ■■■■ 200,563,171 pesetas. The quantities and values of the more important minerals ■■■■ 1910 ■■■■ as follows —

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite	211,958	8,119,124	Iron pyrites	234,184	1,754,500
Bituminous (pyrites)	1,461	23,273	Coal	5,000,000	54,411,891
Asphalt	7,782	94,000	Lignite	245,518	791
Mercury	23,714	1,791,607	Manganese	8,607	18,740
Sulphur	30,113	222,111	Silver	8,17	962,777
Zinc	1,611	7,016	Gold	1,117,98	20,110,495
Copper	1,231	3,014,004	Alumina	150,891	2,721,115
Iron	8,111	17,780	Salt	24,236	452,777
Phosphoric	1,680	55,110	Wolfram	153	88
Iron	8,668,795	43,890,000			

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1910 there ■■■ undertakings employing about 68,800 looms, with 2,614,500 spindles; in woollen manufactures there ■■ 8,800 looms with 662,000 spindles. There are in Spain about 144 paper mills (likewise in Catalonia) making writing, printing, packing and cigarette paper. There ■■ glass-making factories. Corks ■■ manufactured to ■ large extent; ■ 1910, 21,457 tons; in 1911, 28,019 tons.

In the Spanish fisheries the ■■ number of boats employed is about 14,000; fishermen, 71,500; and the value caught annually about 60,000,000 pesetas. The most important catches ■■ those of sardines, tunny fish, and cod. In Spain there are ■■ factories, with 16,500 workmen, for the preparation of sardines. The value of their output is about 600,000£ annually.

Commerce.

Imports and exports ■ pounds sterling:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1907	46,949,000	35,739,000	1910	39,781,000	35,224,000

In 1911 the total value of wine exported ■■ 4,003,251£.

The following ■■ shows the distribution of the commerce of Spain (general and special imports, and general exports) in ■■ and 1911, in pesetas:—

Country	Imports		Exports to	
	1910	1911	1910	1911
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
United Kingdom	203,863	166,422	262,795	231,512
France	196,555	164,851	249,853	280,707
Germany	115,695	126,521	11,946	61,044
United States	110,246	129,622	60,101	57,412
Cuba	4,100	1,794	55,680	4,457
Porto Rico	6,794	6,000	5,504	5,537
Philippine Islands	15,190	14,821	8,584	6,720
Morocco	6,310	6,151	1,806	4,521
Other countries	442,891	451,651	961,167	895,560

The customs receipts and post dues in 1911 amounted to 5,557,079l. in 1910, 5,329,827l.

There is no formal treaty providing for "most favoured nation treatment" between Great Britain and Spain, but, under an Act passed by the Spanish Cortes in 1894, imports from the United Kingdom into Spain are subject to the minimum tariff, and British merchants have all the advantages conceded to those of any European State, except Portugal. Under notes exchanged in December, 1894, there is an understanding that commercial relations between the two countries will continue on this basis, subject to six months' notice on either side.

The quantities and value of wine imported into the United Kingdom from Spain were as follows in each of the last five years (Board of Trade) returns —

	1907	1908	1909	1910	1911
Quantities (gallons)	3,396,447	2,107,901	2,452,222	4,262,066	3,172,261
Value (£)	464,545	416,107	449,411	1,761,761	451,513

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years —

	1910	1911		1910	1911
	£	£		£	£
Iron	1,104,434	2,480,260	Oranges	1,887,637	1,922,962
Lead and	1,007,750	1,027,186	Other fruits	1,637,418	1,746,975
Pyrites	932,096	1,031,501	Esports	228,766	169,974
Copper ore	1,000,612	691,990	Onions	579,946	617,122
Quicksilver	329,865	322,837	Cork	100,920	861,414

The chief British exports to Spain in 1911 were linen yarn and linens, of the value of 110,671l.; iron, wrought and unwrought, 561,825l.; coal, 1,447,505l.; machinery, 653,439l.; cotton goods, 239,731l.; woollen goods, 109,918l.; wool, 113,341l.; new ships and boats, 32,970l.

Total trade between Spain and the United Kingdom in thousands of pounds for five years. —

	1906	1909	1910	1911	1912
	£	£	£	£	£
Imports from Spain into U Kingdom	13,428	12,441	13,026	13,608	14,558
Exports to Spain	5,220	4,810	4,892	5,496	6,694

Shipping and Navigation.

The merchant navy of the Kingdom contained on January 1, 1912, 582 steamers of 750,081 tons net, and sailing vessels of 44,325 tons net, and in 1911, 577 steamers of 744,517 tons net, and 302 sailing vessels of 44,940 tons.

Bilbao is the chief maritime centre, Barcelona second.

The shipping entered and cleared in Spanish ports in two years was as follows —

	1910		1911	
Entered	No	Tons	No	Tons
With cargoes	10,110	9,844,131	10,666	9,048,871
In ballast	10,726	11,644,523	10,100	11,261,971
Total	21,645	21,488,654	20,766	20,310,842
Cleared				
With cargoes	16,242	16,745,506	15,427	16,422,080
In ballast	2,099	3,673,123	1,140	3,516,441
Total	18,341	20,418,629		

Of the vessels entered in 1910, 6,492 of 5,491,208 tons, and of those cleared 7,919 of 6,824,201 tons, were Spanish, and in 1911, 11,358 vessels of 7,948,303 tons (entered) and 9,069 vessels of 7,476,300 tons (cleared) were Spanish. Shipping under the British flag formed 39.3 per cent of the whole.

Internal Communications.

The length of railways in Spain in 1912 was 9,179 miles open for traffic. The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees or subventions from the Government. The law of March 14, 1908, sanctioned the construction of secondary and strategical railways, of the former 3,336 miles; of the latter 2,900. Interest at 4 per cent to be guaranteed by the State. The first of these lines, a railway 18 miles in the Province of Palencia, was opened in 1912.

The Post Office carried in 1911, in the inland service, 114,118,566 letters and post-cards, and 139,615,236 printed papers and samples; in the international service, 35,689,198 letters and post-cards, and 48,686,192 printed papers and samples. There were 5,573 post-offices. Receipts, 38,747,097 pesetas; expenses, 15,054,889.

The length of lines of telegraphs in Spain in 1911 was 57,858 miles; the total number of interior messages sent and received was 4,247,642. International messages sent 764,983, received 846,929, transit 187,946. The number of telegraph offices was 1,944.

In 1911 there were 67 urban telephone systems and 41 interurban circuits; the total number of telephone stations was 22,101.

A company holding a concession from the Government have opened for the public service 11 wireless stations, Marconi system. These stations have a range of 1,000 miles, and are situated at 11 near Las Palmas and Tenerife in the Canary Islands and 11 Cadix and Barcelona on the Peninsula. This system is completed by short-range stations (500 miles) at Vigo, Soller (in the Balearic Islands) 11 Aranjuez (Madrid).

A royal decree recently promulgated in accordance with which all Spanish merchant vessels carrying passengers or mails must be fitted with wireless telegraphy.

Money

The note issue of the Bank of Spain is regulated by law of May 13, 1902. On January 27, 1913, the position of the Bank is as follows:—

	1,000 Pesetas.
Cash in hand { gold	640,445
{ silver	737,527
{ bronze	3,187
Portfolio	775,609
Public Treasury	105,188
Advances to Treasury	150,000
Property	19,100
Capital	170,000
Notes in circulation	1,855,684
Deposits and Accounts current	409,168
Discounts	280,980

Savings bank deposits in Spain, December 31, 1911, 446,303,000 pesetas, distributed over 661,889 accounts.

The nominal value of the money coined in Spain from 1868 to 1907 was : gold, 920,613,935 pesetas ; silver, 1,330,589,807 pesetas. In 1905-07 no gold was coined ; in 1906-07, silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centime pieces (silver) to replace money retired from circulation. In 1911, 263,023 pesetas of 50 centime pieces were coined, as well as 60,286 pesetas of bronze centime pieces.

Money, Weights, and Measures.

The *Peseta* of 100 *Centimos* is of the value of a franc, 94*d.*, or 27 to 28 pesetas to the pound sterling, but the actual value is about 8*d.* to 8½*d.*

Gold coins in Spain are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50 centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5-peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being 15½ to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are :—The *Quintal* = 220·4 lbs. avoirdupois ; the *Libra* = 1·014 lbs. avoirdupois ; the *Arroba*, for wine = 3½ imperial gallons ; for oil = 4 imperial gallons ; the *Square Vara* = 1·09 metres = 1 yard ; the *Fanega* = 1½ imperial bushel.

Diplomatic and Consular Representatives.

1. SPAIN — GREAT BRITAIN.

Ambassador.—Don Wenceslao Ramirez de Villa-Urrutia, G.C.V.O.

Minister Resident.—Don Conde de Velle.

Second Secretary.—Don Carlos de la Huerta.

Attaches.—Marqués de los Arcos, Don Manuel Casulleras, Don F. Carlos Silva, Don Esteban Martinez, Don Eduardo M. Peña, Señor Marqués de Mós.

Military Attaché.—Major Julio Vicens.

Consul-General in London.—Don José Congosto (appointed March 1913).

There are Consular representatives at Cardiff, Dublin, Glasgow, Liverpool, Newcastle, Aberdeen, Newport, Swansea

2 OF GREAT BRITAIN IN SPAIN

Ambassador—Rt Hon Sir Maurice de Bunsen, G. C. M. G., G. C. V. O., C. B., appointed Feb 1906

Councillors—E. A. Rennie, M. V. O.

Secretaries—Cland Russell, Hon. Mayvyn Herbert, and C. E. Rimeden

Naval Attaché—Captain W. Kelly, R. N.

Military Attaché—Lieut Col Hon Henry Yarde Buller, M. V. O., D. S. O.

Consul General (at Barcelona)—J. E. Roberts, C. M. G.

There are Consular representatives at Bilbao, Cadix, Coruna, Madrid, and other places.

Colonies.

The area and population of the colonial possessions of Spain are approximately as follows—

Colonial Possessions	Area—English square miles	Population
POSSSESSIONS IN AFRICA		
Rio de Oro and Añis	74,000	12,000
Spanish Guinea	12,000	200,000
Fernando Po		
Little B. lobey	814	24,544
Total Africa	86,814	220,544

For administrative purposes the Canary Islands are considered part of Spain. Rio de Oro and Añis, stretching southwards along the Sahara coast from the south western frontier of Morocco, are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The Spanish territory in the Gulf of Guinea, extends from the Muni to the Campo river and the German Kamerun, its eastern boundary being on the meridian of 11° E. of Greenwich. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French and English factories. But there are no harbours and the coast is all inaccessible to vessels. The population comprises about 300 Europeans. There are Catholic and American Presbyterian missions at work among the natives. Spain has given to France the right of pre-emption in case of the sale of any of these African colonies and the adjacent islands.

The budget for 1911 estimates the revenue and expenditure of the colonies each at 2,758,948 pesetas.

Books of Interest concerning Spain and Colonies.

SWEDEN.

(SVERIGE.)

Reigning King.

Gustaf V., born June 16, 1859. Succeeded to the throne on the death of his father, Oscar II., December 8, 1907. Married, Sept. 20, 1881, **Princess Victoria**, born August 7, 1862, daughter of Friedrich, Grand Duke of Baden.

Children of the King.

I. The Crown Prince **Gustaf Adolf**, Duke of Scania, born Nov. 11, 1882, married, June 15, 1905, to Princess Margareta Victoria, born January 15, 1882, daughter of Prince Arthur, Duke of Connaught: offspring, Prince Gustaf Adolf, born April 22, 1906; Prince Sigvard, born June 7, 1907; Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb. 28, 1912.

II. Prince Wilhelm, Duke of Sudermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 18, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia. Issue, Prince Lennart, born May 8, 1909.

III. Prince Eric, Duke of Vastmanland, born April 20, 1889.

Brothers of the King.

I. Prince Oscar Bernadotte, Count of Wisborg, born Nov. 16, 1859. Renounced his succession to the throne and married, **Sept. 17, 1884**, Erika Munch of Falkila, born Oct. 24, 1858.

II. Prince Carl, Duke of Vastergotland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik of Denmark. Issue, Princess Margaretha, born June 25, 1899, Princess Mattha, born March 26, 1901, Princess Astrid, born Nov. 17, 1901, and Prince Carl, born Jan. 10, 1911.

III. Prince Eugen, Duke of Närke, born Aug. 1, 1869.

King Gustaf V. is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21, 1810, and ascended the throne Feb. 5, 1818, under the name of Carl XIV. Johan. He succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and succeeded by his eldest son Carl XV., at whose premature death without male children, the crown fell to his next surviving brother, the late King.

The royal family of Sweden have a civil list of 1,493,000 kronor, or 82,218*l*. The sovereign, besides, has an annuity of 300,000 kronor, or 16,520*l*, voted to King Carl XIV. Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, under Norway.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

House of Vasa.

Gustaf I.	1521
■ XIV.	1560
Johan III.	■
Sigismund	1592
Carl IX.	1599
Gustaf II Adolf	1611
Christina	1632

House of Pfalts.

Carl X.	■
Carl XI.	1660
Carl XII.	1697
Ulrika Eleonora	1718

House of Hesse.

Fredrik I.	1720
<i>House of Holstein-Gottorp.</i>	
Adolf Fredrik	1751
Gustaf III.	1771
Gustaf IV. Adolf	■
Carl XIII.	■

■ of Ponte Corvo.

Carl XIV. Johan	1818
Oscar I.	■
Carl XV.	■
Oscar II.	■
Gustaf V.	■

Constitution ■■■ Government

The fundamental laws of the Kingdom of Sweden are — 1 The Constitution or *Regeringsformen* of June 6, 1809, 2 The amended regulations for the formation of the Diet of June 22 1866 (modified under ■■■ act passed in 1909), 3 The law of royal succession of September 26 1810, and 4 The law on the liberty of the press of July 16 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised ■■ conjunction with the Council of State ■■ (in legislation) in concert with the Diet and every ■■■ law must have the assent of the crown. The right of imposing taxes is however vested in the Diet. This Diet or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. The election of the members takes place by the 'Landstings' or provincial representations, 25 ■■ number and the municipal corporations of the towns, not already represented in the 'Landstings, Stockholm, Göteborg, Malmö, Norrköping and Gästrik. The Constituencies ■■■ arranged in 8 groups, in ■■■ of which ■■■ election takes place in September every year. The manner of the election is proportional and regulated by ■■ special election law. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 50 000 kronor or 2 777/ or an annual income of 9 000 kronor or 166/ . They are elected for the term of six years. The Second Chamber consists of 280 members, elected for 3 years by universal suffrage, every Swede over ■■ years of age and not under any legal disability, having the right to vote. The country is divided into 56 constituencies, in each of which one member is elected in every 210th part of the population of the kingdom it contains, the number to be elected in each constituency being ascertained prior to every 3 year period. The method of election is proportional, and the voter may (or may not) indicate on the ballot paper the party to which the candidate he votes for belong. On the voting paper the names of the candidates must appear in vertical succession and these names may be preceded in number the number to be elected by ■■■ than 2. In the counting of votes, papers with the indication of party ■■■ grouped according to parties and the order of candidates within each group determined, papers with no party indication ■■■ counted separately in a 'free group'. The places to be given to the different groups of voting papers are decided according to the ■■ Hondt rule. Representatives and their substitutes are chosen ■■ the ■■■ election. The members of both Chambers obtain salaries, free of income tax, for their services, at the rate of 1,200 kronor, ■■ 66/, for each ■■■ ■ of four months, or, ■■ the ■■■ of an extra ■■■ 10 kronor (11s.) a day, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power ■■■ the hands of the King, who acts under the advice of ■■ Council of State, ■■■ head of which is the Minister of State. The Ministry, appointed October 7, 1911, is composed as follows —

Premier and Minister of State — Karl Staaff
Minister for Foreign Affairs — Count Albert Ehrenmark
Minister of Justice — Gustaf Sandström
Minister of War — David Bergström
Minister of Marine — Jacob Larsson
Minister of ■■■ Interior — Axel ■■■
Minister of Finance — Baron Theodor Adelsköld

Minister of Education and Ecclesiastical Affairs —Fruchtjuv Beng

Minister of Agriculture —Alfred Prierson

Ministers without Portfolio —Bror Petron and Karl Stenstrom

All the members of the Council of State are responsible for the policy of the Government

The second chamber, elected Sept., 1911 101 Liberals, 63 Socialists, 64 Conservatives, 2 Independent Liberals.

Provincial administration is entrusted in Stockholm to a High Governor, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 118 bailiffs (*kronofogdar*) and 519 sub-officers (*Lansmän*). The right of the people to regulate their local affairs is based on the communal law of March 21, 1862. Each rural parish, and each town, forms a municipality, or *municipality*, in which all who pay the local taxes are voters, forming the communal assembly. The communal assembly in the county, and an elected town council in the towns, decide on all questions of administration, police and communal economy. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a county council (*Landsting*) which regulates the internal affairs of the government. The council meets annually for a few days in September under a president appointed by the King from among its members. The members are elected by the towns and provincial districts. Towns having a population of at least 1-150th of the total population of the realm and towns already separated from the 'Landstings', and where the number of inhabitants is not fallen below that which caused their separation, are administered separately by their municipal councils. These towns are Stockholm, Göteborg, Malmö, Norrköping, and Gälle. As elections for the Diet, so are the communal elections of municipal representatives, of members of the 'Landstings' &c., the method of election is proportional. Women possessing the right to the communal vote are also eligible to communal positions, except to be members of the 'Landstings'.

Area and Population

I. PROGRESS AND PRESENT CONDITION

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual enumerations of the people.

The area and population of Sweden, according to the census taken on December 31, 1910, and estimate for December 31, 1911, are as follows:—

Governments (Län)	Area English square miles	Population Dec 31 1910	Population Dec 31, 1911	Pop per square mile 1911
Stockholm (city)	11	42,923	110,509	26,061.6
Stockholm (rural district)	1,015	220,181	220,181	77.9
Uppsala	2,061	128,171	128,171	83.1
Södermanland	2,631	178,000	179,640	83.1
Östergötland	4,367	204,171	204,171	46.3
Jönköping	4,447	211,454	215,369	48.4
Kronoberg	3,525	177,000	177,000	41.2
Kalmar	4,449	177,000	177,000	51.4
Götaland	1,210	55,217	55,217	45.4
Blekinge	1,000	85,000	85,000	128.0
Kristianstad	2,000	228,307	230,041	92.0
Malmöhus	1,000	457,214	457,214	240.7
Halland	1,000	147,226	147,226	77.4
Göteborg and district	1,000	981,370	986,758	198.0

Governments (Län)	Area English square miles	Population Dec. 31, 1910	Population Dec. 31, 1911	Pop. ■ square miles 1911
Ålfsborg	4,988	287,692	288,950	58.5
Skaraborg	8,388	241,284	241,411	73.6
Värmland	7,485	260,135	260,543	35.0
Örebro	8,495	207,031	208,626	54.6
Västmanland	2,625	155,420	157,145	50.0
Kopparberg	11,522	232,878	233,497	20.4
Gästeborg	7,614	258,792	255,181	88.5
Västernorrland	9,837	220,512	223,415	25.6
Jämtland	19,712	118,115	119,263	6.1
Västerbotten	22,754	161,266	162,594	7.2
Norrbotten	40,870	161,132	165,180	4.0
Lakes Vanern, Vättern, Mälaren, Hjälmaren	5,516	—	—	—
Total	172,676	2,623,403	2,661,799	32.2

In 1911 there ■■■ 2,718,638 males and 2,843,161 females.
The growth of the population has been ■■ follows:—

Year	Population	Increase per cent per annum	Year	Population	Increase per cent per ■■■
1840	2,135,847		1900	2,136,441	0.71
1900	2,623,403		1910	2,622,403	0.72

With the exception of (1900) 22,138 Finns, 6,983 Lapps, and some thousands others, the Swedish population is entirely of the Scandinavian branch of the Aryan family.

In 1900 the foreign-born population numbered 35,627, of whom 5,107 were born ■■ Germany, 6,874 in Denmark, 7,978 in Norway, 6,644 in Finland, 1,506 in Russia, 779 in the United Kingdom, and 5,130 in the United States.

The population was divided as follows in 1900:—

	Male		Male	Female
Unmarried	1,566,868	1,566,868	Widowed	96,647
■	238,999	847,252	Divorced	1,322
				3,024

Leading occupations in 1900, including families and dependents:—

Agriculture, &c.:		Timber works	180,065
Landed and farm prop.	1,179,669	Various manufactures	740,152
Farmers, overseers, &c.	275,148	■ and locomotion	414,148
Planters, &c.	352,265	Officials and military	196,967
Crofters, cottagers, &c.	495,655	Learning and literature	49,268
Dairy-keepers	18,329	Medicine, &c.	26,058
Gardeners	19,107	Owners, pensioners, &c.	399,601
Fisheries	33,944	■ servants, &c.	462,480
Mining ■ metal works.	319,633	Various	69,977

I MOVEMENT OF THE POPULATION.

1 Births, Deaths, and Marriage.

Year	Total living Births	Of which Illegitimate	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths
1906	126,620	17,557	2,449	76,508	60,251
1907	136,793	17,942	1,937	76,149	58,306
1908	138,674	18,600	3,435	80,566	64,967
1909	139,505	19,496	4,382	74,536	68,419

1908	9,518	12,190	9,973	1911	7,712	11,917	15,711

III PRINCIPAL TOWNS

In 1870 the town population numbered only 539,649, and in 1911, 1,412,524, showing an increase of 162 per cent, or nearly five times the rate of the general average of the Kingdom.

Towns over 10,000 inhabitants at the end of 1911 —

Stockholm	146,500	Uppsala	26,000	Uddevalla	12,736
Göteborg	170,000	Länna	23,021	Kristianstad	11,704
Malmö	84,719	Borås	21,997	Talun	11,691
Norrköping	66,620	Lund	30,340	Ystad	11,450
Gävle	35,710	Västerås	19,803	Boderhusen	11,449
Hälsingborg	34,225	Halmstad	18,297	Hudösnäcke	11,271
Örebro	31,006	Karlstad	17,728	Västervik	10,101
Räpplinge	28,480	Bundav	16,894	Trälkåring	10,195

Jönköping	27,220	Kalmar	15,720	Väst	10,022

Religion and Instruction.

The of the population adhere to the Lutheran Protestant Church, recognised the State religion. There are 13 bishoprics (Uppsala being the metropolitan see), and 2,573 parishes in 1911. At of 1900, the number of 'Evangelical Lutherans' was returned 5,072,792, the Protestant Dissenters, Baptists, Methodists, and others numbering 844. Of other creeds, there are 2,378 Roman Catholics (under a Vicar Apostolic resident at Stockholm), Greek-Catholics, Irvingites, 3,912 Jews, 51 Mormons. civil disabilities to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has universities, Uppsala and Lund, the former frequented by 2,295 and the latter by 1,238 students in autumn of 1911. There are also a faculty of medicine at Stockholm students and private universities in Stockholm (philosophical and law faculties

with ■ students and 79 auditors) and Göteborg (philosophical faculty, with 27 students). In 1911 there ■ 77 public high schools, with 23,018 pupils, 44 people's high schools, 2,418 pupils, 15 normal schools for elementary school teachers, 1,685 pupils, 2 high and 7 elementary technical schools, about 3,600 pupils, 10 navigation schools, ■ pupils, besides institutions and schools for deaf mutes and the blind, medical schools, military schools, veterinary and other special schools. Public elementary instruction ■ gratuitous and compulsory, and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. In 1910 there ■ 14,894 elementary schools, with 21,585 teachers and 1,791,545 pupils. In 1910 the expenditure on elementary education was 41,600,768 kronor, of which about one fourth ■ from the national funds. Among the recruits (Bevaring) of 1910 only 0 ■ per cent ■ unlettered, only 0.43 per cent unable to write.

Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie Kansler, ■ Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown, while the latter, who is appointed by the Diet, has to extend ■ general supervision over all the courts of law. The kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1911) into 3 high court districts and 212 district courts divisions, of which 91 are urban districts and 121 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors, ■ the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

In 1910, 2,476 men and 251 ■ were sentenced for serious crimes. At the end of 1910 there were 1,473 hard labour prisoners.

Pauperism.

Each commune ■ bound to assist children under 15 years of age, if their circumstances require it, and all who from age or disease are unable to support themselves. In other cases the communal poor board decides what ■ to take. Each commune and each town (which may be divided) constitutes a poor district, and ■ each is ■ board of public assistance. In 1910 these districts possessed workhouses and similar establishments to the number of 1,964, capable of lodging 62,651 people.

The number of paupers assisted was in 1903, 235,277, of whom 78,596 were in the towns, in ■ 234,630, ■ whom 78,633 ■ in the towns, in 1906, 234,602, of whom 79,455 ■ in the towns, in 1908, 233,896, of whom 82,090 were in the towns, in 1907, 229,698, of whom 82,439 ■ in the towns, ■ 1908, 233,530, of whom 87,209 ■ in the towns; ■ 1909, 235,955, of whom 89,615 were in the towns, in 1910, 236,918, of whom 90,912 ■ in the towns.

FINANCE.

The budget of ■ and expenditure for the year 1913 ■ as follows (18 ■ kronor = 17.) —

REVENUE		EXPENDITURE			
	Kronor	(a) Actual Expenditure	Kronor	Ordinary expenses	Kronor
(a) State Taxes		Royal Household	1 484 000	124 060	1 617,000
Capitation tax	2,000	Justice	5 135,49	652 241	5,998 200
Income and property, &c	94 700 000	Foreign Affairs	1,500 000	406 620	1 956 700
Succession duty	1 000 000	Army	49 850 750	1 274 820	55 125 100

(e) Loans	44 401,900				
Total	208 027 000 (14 481 8771)	Total expenditure	—	—	027,200 (14 453,8771)

The value of the land and house property of Sweden is thus returned for 1911 —

Taxed	Agricultural land in the country	2,960,549,880
	in the towns	64,668,800
Other	in the country	1,196,808,100
"	in the towns	3,076,886 000
Total (1911)		7 298,907,580
Untaxed	National	285,250,000
	in the towns	175,582,700
	Belonging to commonalities, in the country	197,595,500
	academies in the towns	381,979,560
(1911)		1,059,408,560
Total		8 358,316,140

The expenditure for the Church is chiefly defrayed by the parishes and out of the [redacted] of landed [redacted] belonging to the Church, and the [redacted] do not appear in the budget estimates. The expenses for public instruction [redacted] in great part defrayed by the parishes.

On January 1, 1912, the public liabilities of the Kingdom, contracted entirely for productive purposes (railways, &c.), were as follows:—

Landed railway loan of 1880 with 3½ interest	Kronor
[redacted]	78 308 1
[redacted]	36 111
[redacted]	84 170
[redacted]	4 191 11
[redacted]	340 000
[redacted]	17 000 00
[redacted]	98 1 840
[redacted]	000
[redacted]	16 000
[redacted]	43 000
[redacted]	000
[redacted]	4 480 000
[redacted]	2 000 000
Total	06 000
	(38 875 840)

All the loans are paid off gradually by means of sinking funds. The debt amounts to about 67 per head of the population, and the interest to about 4s, but [redacted] the receipts from railways and outstanding loans, &c., amount to about the whole interest, the charge per head is nominal. The total assets of the State on January 1, 1912 amounted to 1,566,168,376 kronor, thus the financial situation of the State shows a surplus of assets of 950,072,208 kronor.

The [redacted] of the communes in 1910 was 178,630,252 kronor, and the expenditure 192,857,052 kronor. Their assets amounted to 825,957,178 kronor, and their debts to 548,144,686 kronor. The revenue of the provincial representative bodies [redacted] 11,207,989 kronor, and expenditure 12,498,481 kronor, their [redacted] 38,498,157 kronor, and debts 16,106,911 kronor.

Defence

ARMY

The military forces are a militia recruited on the principle of universal service, but aided by a voluntarily enlisted personnel which forms the permanent cadres for training purposes.

Liability [redacted] service [redacted] the age of 21, and lasts till the end of the 40th year. The [redacted] belong to the first 'ban' of the active army [redacted] [redacted] years then for 4 years to the second 'ban', and finally for [redacted] years to the Landstorm. The initial period of training [redacted] 150 days for the infantry, garrison artillery, heavy field artillery, and train. It [redacted] [redacted] days for cavalry, horse and field artillery, and engineers. The infantry, &c., are called up for exercise 3 times [redacted] the first period of their service, for [redacted] days each time. The cavalry and artillery have 2 trainings, each of [redacted] days.

The field army is likely to consist, in the first instance, of [redacted] divisions, each of [redacted] brigades of [redacted] regiments (12 battalions), with a regiment of cavalry (4 squadrons), [redacted] regiment of field artillery (11 batteries of [redacted] guns each), [redacted] company of engineers, [redacted] pontoon train, [redacted] telegraph detachment, a supply company, a bearer company, ammunition column and train. There would be also a cavalry division of [redacted] battalions and the [redacted] artillery division (16 squadrons and 3 batteries). The total would amount [redacted] about 100,000 combatants. The first [redacted] of [redacted] [redacted] [redacted] (as far [redacted] go) [redacted] furnish a nearly equal number of [redacted] troops, while

the second ban would provide a sufficient reserve to make good the losses on field service, but it is not known at present what is to be the organisation of the considerable reserves which will be available.

The table below shows the peace strength in 1912

Troops	On	New Com	and Enl.	and Enl.	Total
			Quoties (Voluntary Enlistment)	Contingents (Contingent on the Repetition of exercise, 1912)	
Army	63	3	—	—	70
Infantry 11 regiments (52 battalions)	1,392	1,348	8,651	45,917	57,408

1. Wohl, wir sind nicht

- N uova 202' indetta

1 Army Commissioner London

The total war strength is about 485,000

The strength of the reserve of officers and voluntarily enlisted men amounts to about 26,250, that of the Beavering to about 275,000

The land storm is supposed to amount to about 170,000 of all ranks.

The Swedish infantry are armed with the Mauser rifle (calibre 6.5 mm.), the horse and field artillery have the Krupp 7.5 cm Q F gun. The military budget for 1912 amounted to 2 150 938/, of which 370,518/ was for extra ordinary expenditure.

NAV3

The following is a list of the principal ships —

Year	Name	Displacement tons	Maximum armament		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1891	Gota	2,300	11½	7½	18.2 in , 7.6 in	1	4,750	■
	Thule	2,390						
	1895	2,880						
1895	Thor	2,700	■	10	21.0 in , 6.4-7 in	1	5,800	17
	Njord							
	Dristigsten							
1900	(A)	2,600	7½	5	25.2 in , 6.6 in	2	5,600	27
	(B)	2,750	7	7½	25.2 in , 6.6 in	2	5,500	17
	Lappaheten							
1901	Manhigsten							
1901	■	1,650	■	7½	25.2 in , 6.6 in	■	5,000	18
	Fylgia	4,810	■	■	8 in	2	12,400	22
1912	New ship (B)	7,000	■	8	41.1 in , 5.6 in	2	■	32

Bylgia is an armoured sea-going cruiser, the other ships are coast defence battleships. These battleships are of the type, low on the water with big bow and stern, lesser gun midships. The latest of them are sea-going vessels. There are 5 torpedo gunboats, 8 destroyers of about 11 knots, about 53 torpedo boats, and 5 submarines. There are also several gunboats and training ships, and 11 monitors for coast service, carrying one = two 6 in or 4 7 in guns each. A parliamentary defence committee (December, 1910) presented a report to the government, in which they expressed the necessity of building four coast defence battleships of greater fighting power than the Oscar II, and proposed a type (F) of 6,800 tons with four 11 in and eight 6 in guns. It has been found necessary to enlarge the naval station at Stockholm, and the committee has proposed its removal to a place outside the capital. It is proposed to extend obligatory military service in the navy from 300 to 365 days. A new Defence Committee (1911) has replaced the one appointed in 1910. This decided not to proceed with the battleship "F". The necessary amount was, however, collected by public subscription, and the ship is building.

The personnel of the Royal Navy is divided into three classes, viz. 1. The Active List, 2. The Reserve, 3. The Retiring. On the active list are 4 flag-officers, 8 commodores, 17 captains, 18 commanders, 1 lieutenant commander, 101 lieutenants, 50 sub lieutenants, 666 warrant officers, and 1,000 petty officers and men, while about 250 commissioned officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 2 lieutenant colonels, 6 majors, 29 captains, 37 lieutenants, 19 sub lieutenants, 166 warrant officers, and 1,361 petty officers and men.

Production and Industry.

I. AGRICULTURE.

The number of farms in cultivation in 1911 was 359,871. Of these, 11,000 of 2 hectares and under, 88,967, 2 to 20 hectares, 230,477, 20 to 100 hectares, 33,189, above 100, 3,163. Of the total land of Sweden 39 per cent is under cultivation, 32 per cent under natural meadows, and 52.1 per cent under forests, the products of which form a staple export.

The following table shows, in thousands of hectares (2.47 acres), the area under the chief crops in 1911, and, in thousands of hectolitres (2.75 bushels), the yield in 1911 —

	Wheat	Rye	Barley	Oats	Mixed Grain		
Area	101,000	400,100	180,000	750,000	163,000	40,000	152,000
Yield	2,791,700	3,390,000	4,880,000	22,364,000	5,320,100	7,000,000	18,760,000

The value of the cereal crops in 1911 is estimated at 1 million kronor, and all crops at 867.4 million kronor. At the end of 1911 Sweden had 1,445,709 horses, 588,485, of cattle, 2,689,609, sheep and lambs, 945,709 pigs, 951,164.

II MINES AND MINERALS

Mining is one of the most important departments of Swedish industry, and the working of the mines in particular is making rapid progress by the introduction of modern machinery. There were raised in the year 1911, throughout the Kingdom, 6,153,778 tons of iron ore. The pig-iron produced amounted to 684,392 tons, the bar iron 428,170 tons. Of iron in 1909 3,196,453, in 1910 4,418,600 tons, in 1911 5,086,898 tons were exported, of pig-iron, 105,854 in 1909, 133,598 in 1910, 150,444 in 1911, of bar iron, 126,996 in 1909, 168,044 in 1910, 158,000 in 1911. There were raised in 1911 2,999 tons of silver and lead ore, 1,628 tons of copper ore, 51,242 tons of zinc ore, 377 tons of manganese ore, and 30,096 tons of sulphur pyrites. The gold produced amounted to 11,020 kilogram, the silver to 1,289 4, the lead to 1,184,221, the copper to 3,221,198, the zinc to 2,123,641. There was not inconsiderable amount of coal in the southern parts of Sweden, giving 311,809 tons of coal in 1911. In 1911 there were 30,579 persons engaged in mining.

III INDUSTRIES

The timber and wood work industries of Sweden are of great importance. The public forests (mostly crown-lands), have an area of 8,948,111 hectares (not including settlement and crown farm forests amounting in 1900 to an area of over 1,100,000) and yielded, in 1910, 3,030,546 cubic metres of timber. In 1910 there were in Sweden 1,232 saw mills and planing mills with 89,605 workpeople who turned out sawn or planed timber to the value of 182,456,197 kronor, 519 factories for joinery and furniture with 10,108 workpeople, the output for the year being valued at 27,058,674 kronor, 166 factories for wood pulp with 13,178 workpeople, output 95,670,178 kronor, and 70 paper and pasteboard mills with 8,100 workpeople, output 53,885,555 kronor. The extent of other Swedish industries in 1910 is shown in the following table —

Industry	Factories	Workpeople	Value of output Kronor
Iron and steel, smelting, &c.	608	24,014	94,168
Machinery	450	23,110	82,338
Flour Mills	1,384	3,473	106,892,547
Sugar	21	6,211	280,881
Textile factories	—	8,396	(1,011)
Margarine factories	7	4,212	22,324,503
Brandy distilling	199	—	16,028,942
Factories for rectifying of brandy	17	210	82,819,062
Breweries	—	15,000	978,328
Spinning, cotton	31	—	20,933,072
Wool	117	3,717	30,858,977
Weaving, cotton	41	6,000	32,011
Wool	94	3,000	47,459,944
Metal work (other than iron & steel)	277	4,271	27,224,142
Tanneries	—	2,084	28,877,501
Other	87	6,776	54,119,881

Commerce.

The total amount levied in 1909 amounted to 59,239,298 kronor, and in 1911 to 61,781,435 kronor.

COMMERCE

1911

and commerce England and Sweden of 1854 provides for "most favoured nation" treatment between the two countries, and that of 1826 provides for similar treatment between the United Kingdom on the one hand, and Norway on the other

The imports and exports of Sweden have been as follows (18'16 kronor = £1):—

	1906	1907	1908	1909	1910	1911
Imports	Kronor 644,227,870	Kronor 622,104,619	Kronor 608,992,257	Kronor 616,805,588	Kronor 671,682,896	Kronor 696,818,881
Exports	504,284,813	524,662,547	482,017,467	474,950,172	502,551,140	663,575,515

The following are the values of the leading imports and exports for two years —

	Imports 1910	Exports 1910	Imports 1911	Exports 1911
	Kronor	Kronor	Kronor	Kronor
Textile manufactures	59,494,749	2,679,647	63,167,576	2,723,425
Corn and flour	51,291,220	1,098,450	160,431	5,114,314
Colonial wares	47,578,919	461,783	69,479,382	938,452

Other articles	167,313,477	11,290,044	178,652,312	41,600,288
Total	671,682,590 (36,954,172)	592,664,140 (32,646,704)	696,616,933 (38,330,968)	663,575,515 (36,740,502)

of imports and exports are calculated according to average prices in Swedish port, exclusive Customs duties. For most of these average prices merchants consulted by the Board of Trade (Kommers-Kollegium), and values thus obtained are published in the Board's annual report on commerce. The quantities in the Custom returns are most exactly given for imports. For the quantities of exports, statements of exporters are relied on. Imports are recorded from the country of origin, and exports as to the country of destination.

A new Swedish tariff law came into effect December 1, 1911. It provides for a single tariff instead of the maximum and minimum tariffs now in effect, and authorizes the Government to retaliate discrimination against Swedish products by surtaxes up to 100 per cent of duty on dutiable goods, up to the full value of the goods in case of goods admitted of duty under the tariff.

The national Swedish trade mark introduced (1911) by Sveriges Allmänna Handelsförening (General Commercial Association of Sweden) is a crown mark shows the royal crowns, light-blue ground, and the words "Sveriges Allmänna Handelsförening" (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with principal countries with which Sweden deals.—

Country	Imports from (1910)	Exports to (1910)	Imports from (1911)	Exports to (1911)
	Kronor	Kronor	Kronor	Kronor
Great Britain	164,461,933	187,852,051	160,805,218	192,768,287

Internal Communications.

In 1910 133,498 ships and boats passed through the canals of Sweden.

At the end of 1911 the total length of railways in Sweden was 8,077 miles, of which 2,770 miles belonged to the State. The receipts in 1909 136,544,718 kronor, and expenses 100,135,869 kronor. The total cost of construction for the State railways to the end of 1909 was 502,705,727 kronor, and for private railways 535,239,454 kronor. The total number of passengers on the State railways in 1909 was 18,173,613; weight of goods carried on State railways, 10,969,250 tons; private railways, 20,164,840 tons of goods, and 35,612,240 passengers.

The length of the telegraph and telephone lines at the end of 1911 was 24,502 miles, 6,560 miles of which belonged to the railways. The wires of the State telephone had a length of 177,114 miles, the wires of the private telephone lines a length of 84,837 miles. There were 2,904 telegraph offices. The number of despatches sent in the year 1911 4,380,997, including 980,551 in transit. In 1911 there were about 201,500 instruments employed in the telephone service, including 63,700 private telephones.

The Swedish Post Office carried 460,123,748 letters, post-cards, journals, &c., in the year 1911. The number of post-offices at the end of the year 3,790. The total receipts of the Post in 1911 amounted to 23,260,148 kronor, and the total expenditure to 20,395,816 kronor, leaving a surplus of 2,864,332 kronor.

Money and Credit.

The Riksbank, the National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. It is a bank of exchange to regulate its relations with foreign countries, it accepts deposits of money, and on sufficient security it lends money for purposes in which there is no speculative element. The bank is under the guarantee of the Diet, its capital and reserves are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its deposits in current accounts.

at home and abroad; but circulation is kept far within this limit.

The following table gives the National Bank, private banks, and joint-stock banks in Sweden on January 1, 1912 (18 16 kronor = 1l.) There are fifteen conjointly responsible private banks and sixty-one joint-stock banks (beginning of 1912). Since December 31, 1903, only the Riksbank has the right to issue notes:—

Assets	National Bank	Private Banks	Joint Stock Banks
	Kronor	Kronor	Kronor
Real estate	—	12,055,242	48,374,188
Coin and bullion	99,847,627	35,929,474	603,841
Accounts with other banks	69,056,912	31,467,221	1,154,252

Other credits, &c.	4,946,763	172,470,461	668,950
Total	201,698,601	767,288,190	1,814,771,559

Liabilities	National Bank	Private Banks	Joint Stock Banks
	Kronor	Kronor	Kronor
Notes and bills	20,177,010	15,000,109	81,809,727
Liabilities with other banks	9,202,056	84,834,116	98,325,477
Deposits &c.	64,676,664	402,580,987	1,019,868,607
Capital	50,000,000	93,566,915	277,479,664
Reserve	12,500,000	6,184,155	141,681,649
To be paid out to the public treasury	1,399,000	—	—
Various liabilities	6,846,679	42,325,734	944,166,479
To further disposition	689	17,944,421	6,943,973
Total	201,698,601	767,288,190	1,814,771,559

The savings-banks statistics (exclusive of Post Office) are as follows:—

		1909	1910	1911
Number of depositors at end of year	1,508,371	1,539,957	1,578,711	1,661,869
Deposits in kronor	719,677,079	767,017,760	818,818,819	864,976,668
Capital and fund	60,998,512	64,950,886	69,266,127	73,271,589

At end of 1911 the Post Office Savings Bank had 566,749 depositors and 47,186,406 kronor of deposits.

The Private and Joint-Stock act as Savings Banks. Their statistics of depositors and deposits are as follows:—

	1908	1909	1910	1911
Number of depositors at end of year	681,518	719,140	764,946	821,245
Deposits at end of year, kronor	251,002,466	261,626,740	278,676,376	304,766,557

Money, Weights, ~~and Measures~~

By a treaty signed ~~on~~ 27, 1873, ~~the~~ additional treaty of October 16, 1875, Sweden, Norway, ~~and~~ Denmark adopted the same monetary system.

The Swedish Krona, of 100 ore, ~~is~~ of the value of 1s. 1½d., ~~and~~ about ~~one~~ kronor to the pound sterling.

The gold 20-kronor piece weighs 8·960572 grammes, '900 fine containing 8·0645 grammes of fine gold, and the silver krona weighs 7·5 grammes, '800 fine, containing 6 grammes of fine silver.

The standard of value ~~is~~ gold. National Bank ~~notes~~ for 5, 10, 50, 100, and 1000 kronor are legal means of payment, and the Bank ~~is~~ bound to exchange them for gold ~~on~~ presentation.

The metric system of weights and measures is obligatory.

Diplomatic Representatives.

1. OF SWEDEN ~~IN~~ GREAT BRITAIN.

Envoy and Minister.—Count H. Wiangel.

Councillor—Baron C. E. Åkerhielm.

Attaché.—Baron O. Hamilton.

Naval Attaché.—Lieut. Comm. E. de Peyron.

Military Attaché.—Capt. E. de Linde.

Chancellors.—J. Stille and J. Kihlman.

Consul-General in London.—Daniel Danielsson.

There are Consular representatives at the following places:—Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Southampton, and many other places.

2. OF GREAT BRITAIN IN SWEDEN.

Envoy and Minister.—Fame W Howard, C.V.O., C.M.G. (April 15, 1913).

Secretary.—Hon. W. Erskine, M.V.O.

Honorary Attaché.—Viscount Camperdown.

Naval Attaché.—Commander W. P. Montague, R.N.

Military Attaché.—Lt.-Colonel Hon. A. V. F. Russell, M.V.O.

Consul at Stockholm—H. M. Villiers, M.V.O.

There ~~are~~ also Consular representatives ~~at~~ Gothenburg, Helsingborg, Gälle, Kalmar, Söderhamn, Visby, Varberg, &c.

SWITZERLAND.

(SCHWYZ — SUISSE — SVIZZERA)

Constitution and Government.

I CENTRAL

On August 1, 1291 the men of Uri, Schwyz, and Lower Unterwalden, entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but the addition was made to the number of cantons till 1798. In that year, under the influence of France, the united Helvetic Republic was formed. This failed to satisfy the Swiss and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied a subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia and the Federal Pact which had been drawn up at Zurich, and which included three cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory referendum or by direct popular vote, a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties, it regulates the army, the postal and telegraph system, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It provides for the ~~army~~ in general, and especially decides on the import and export duties in accordance with principles embodied in the constitution. It legislates on matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zurich, a Federal University and other higher educational institutions. There has also been entrusted to it the authority to decide ~~regarding~~ public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative and executive authority are vested in a parliament of two chambers, a 'Ständerath,' or State Council, and a 'Nationalrath,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs (16s) per day, representatives from the canton of Glarus receive 30 francs (25s), from Uri and from Unterwalden 15 francs (12s 6d) per day. The mode of their election and the term of membership depend

entirely the canton. Three of the cantons are politically divided—into Stadt and Land, Appenzell into Auser Rhoden and Inner Rhoden, and Unterwald into Ob- and Nidwald. Each of these pairs of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The National Council consists of 167 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20,000 souls. The members are paid from Federal funds at the rate of 1 franc for each day on which they are present, with travelling expenses, at the rate of 1 centime (2d) per kilometre to and from the capital. Members employed on the Federal Government receive additional pay at the same rate. On the basis of the general census of 1910, the cantons are represented in the National Council as follows:—

Canton	Number of Representatives	Canton	Number of Representatives
Zürich (Zurich)	25	Appenzell—Exterior and Interior	1
Bern (Berne)	32	St. Gallen (St. Gall)	15
Luzern (Lucerne)	8	Graubünden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	9	Thurgau (Thurgovie)	7
Unterwald—Upper and Lower	2	Ticino (Tessin)	1
Glarus (Glarus)	2	Vaud (Waadt)	16
Zug (Zoug)	1	Valais (Wallis)	1
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	7
Solothurn (Soleure)	6	Genève (Genève)	8
Basel (Bâle)—town and country	11	Total	189
Schaffhausen (Schaffhouse)	2		

A general election of representatives takes place by ballot every three years. Every citizen of the Republic who has entered his twenty-first year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundesversammlung,' the Federal Assembly, and they represent the supreme Government of the Republic. The first step towards legislative action may be taken by either of the popular initiative, and laws passed by the Federal Assembly may be vetoed by the popular voice. Whenever a petition demanding the revision or annulment of a measure passed by the Legislature is presented by 30,000 citizens, the alteration demanded by eight cantons, the law in question must be submitted to the direct vote of the nation. For the decision the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on. The chief executive authority is deputed to a 'Bundesrath,' the Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of the council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. It is only through this executive body that legislative measures are introduced to the deliberative councils, and they are present at, and take part in, their proceedings, but

do not vote. Every citizen who is a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not eligible the offices till after the expiration of another year. The Vice-President, however, may be and usually is, elected to succeed the outgoing President.

President for 1913—M. Edouard Muller (Bern). Born, 1848.

Vice-President—Arthur Hoffmann (St. Gall). Born, 1857.

The members of the Federal Council—each of whom has a salary of 4800 fr. per annum, while the President has 5400 fr.—are ministers, or chiefs of the administrative departments of the Republic. These departments are:—1. Foreign Affairs. 2. Interior. 3. Justice and Police. 4. Military. 5. Finance and Customs. 6. Agriculture and Industry. 7. Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

II LOCAL GOVERNMENT

Each of the cantons and demi cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in its instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called the *Grosse Rath*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except that of Freiburg and those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. This principle is most fully developed in Zurich, where all laws and concordats, agreements with other cantons, and the chief matters of finance, as well as all amendments of the constitution, must be submitted to the popular vote. In many of the cantons, the *popular initiative* has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow citizens, or receive a merely nominal salary. In each canton there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungsrath*) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, mayor, syndic, and not less than five other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I PROGRESS AND PRESENT CONDITION.

Area and population, December 31, 1900, and population December 1, 1910. The cantons are given in the official order, and the year of the entrance of each into the league or confederation is stated. —

Canton	Area : ■ miles	Population		Pop. ■ mils, 1910
		Dec. 1, 1900	Dec. 1, 1910	
Zurich (Zurich) (1851)	666	431,036	500,679	751.7
Bern (Bern) (1353)	2,657	589,435	642,744	241.9
Luzern (Lucerne) (1332)	579	146,159	166,782	288.0
Uri (1221)	415	19,700	22,055	53.1
Schwyz (1291)	351	55,385	58,847	166.2
Obwalden (Unterwalden-le- Haut) (1291)	183	15,260	17,118	98.5
Nidwalden (Unterwalden-le- Bas) (1291)	112	13,070	13,796	128.1
Glarus (Glaris) (1352)	267	82,349	88,211	124.8
Zug (Zoug) (1352)	■	25,093	28,013	304.5
Fribourg (Freiburg) (1481)	644	127,951	139,200	216.1
Solothurn (Soleure) (1481)	■	100,762	116,728	386.5
Basel-Stadt (Bâle-V.) (1501)	14	112,227	135,546	9,681.9
Basel-Land (Bâle-C.) (1501)	163	68,497	76,241	467.7
Schaffhausen (Schaffhouse) (1501)	114	41,514	45,943	403.0
Appenzell A.-Rh. (Ext.) (1513)	101	55,281	57,723	572.0
Appenzell I.-Rh. (Int.) (1513)	61	13,499	14,681	239.8
St. Gallen (St. Gall) (1803)	779	250,285	301,141	386.0
Graubünden (Grisons) (1803)	2,773	104,520	118,262	42.6
Aargau (Argovie) (1803)	■	206,498	229,850	424.0
Thurgau (Thurgovie) (1803)	■	113,221	134,055	351.8
Ticino (Tessin) (1803)	1,088	138,638	158,556	146.7

Valais (Wallis) (1815)	2,027	114,438	129,579	63.9
Neuchâtel (Neuenburg) (1815)	312	126,279	132,184	423.6
Genève (Genf) (1815)	■	132,609	154,159	1,427.8
Total	15,976	3,315,443	3,741,971	234.8

The German language is spoken by the majority of inhabitants in 15 of the ■ cantons, the French in five, the Italian in ■ (Ticino), and the Roumansch and Italian together in one (Graubünden). In 1910, 2,599,154 spoke German, 796,244 French, 301,325 Italian, and 39,834 Roumansch. The number of foreigners resident in Switzerland in 1910 ■ 565,296.

The following statistics show the preliminary results of the Swiss Federal ■ of 1911 regarding Swiss factory enterprises :—

Trades	Factories	Employees		
		■	Female	■
Cotton ■	326	11,617	17,939	39,549
Silk industry	812	7,735	■	81,537
■ industry	67	2,190	3,185	5,325
Linen industry	24	■	567	1,007
Embroidery	266	11,767	16,332	■
Other ■ trades	111	1,517	2,333	4,150
Clothing ■ outfitting	630	3,730	13,061	24,850
Provisions ■ alimentary trades	694	12,440	12,604	26,044

Trades	Factories	Employees		
		Male	Female	
Chemical industry	195	6,907	1,725	8,692
for power, and water	263	4,254	1	4,255
Paper graphic trades	625	13,237	4,090	18,157
Woodworking trades	1,268	23,333	432	23,765
working	623	21,865	1,400	23,325
Machinery, apparatus, etc	640	45,813	1,122	46,495
Jewellery and watchmaking	856	21,445	14,338	35,988
Clay and stone trades	441	17,160	1,000	18,160

Of the persons exercising a profession in 1900, 187,446 (140,939 and 46,507 women) foreigners, having 166,729 foreigners (47,876 male and 118,853 female) dependent on them; total foreigners dependent occupation, 354,175.

II. MOVING POPULATION.

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1906	94,971	3,766	26,231	62,971	30,400
1907	97,692	3,755	27,660	61,411	35,247
1908	99,464	3,223	27,637	60,940	38,544
1909	97,296	3,184	27,195	62,006	34,700
1910	96,669	3,154	27,114	64,078	30,991

In 1910 the illegitimate births numbered 4,417, or 4.6 per cent. The number of divorces 1,527.

The number of emigrants in five years was —1907, 5,710; 1908, 3,656; 1909, 4,918; 1910, 5,178; in 1911, 5,512; in 1912, 5,871.

III. PRINCIPAL TOWNS.

On December 1, 1910, the population of the principal towns was as follows:—Zurich, 189,088; Basel, 131,914; Geneva, 125,520; Bern, 85,264; Lausanne, 63,926; St. Gallen, 37,657; Chaux-de-Fonds, 37,636; Lucerne, 39,152; Biel, 23,583; Winterthur, 25,066; Neuchâtel, 23,505.

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed which he does not belong. No bishoprics can be created in any territory without the approbation of the Confederation. The order of Jesuits and affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of the country. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1910, the number of Protestants amounted to 2,108,590, of Roman Catholics to 1,590,792, and of Jews to 19,023. Protestants are in a majority in 12 of the cantons, and Catholics in 10. Of the most populous cantons, Zurich, Bern, Vaud, Neuchâtel, and

Basel (town and land) ■■■ mainly Protestant, while Luzern, Fribourg, Ticino, Valais and ■■■ Forest Cantons are mainly Catholic. The Roman Catholic priests are much more ■■■■ than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They ■■■ under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Fribourg), and Sitten (Sion), all of them immediately subject to the Holy See. The government of the Protestant Church, Calvinistic in doctrine and Presbyterian in form, ■■■ under the supervision of the magistrates of the various cantons, to whom is also entrusted, in the Protestant districts, the superintendence of public instruction.

Instruction.

In the educational administration of Switzerland there is ■■■ centralization. Before the y ■■■ most of the ■■■■ had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it ■■■ made obligatory (the school age varying in the different cantons), and placed under the civil authority. In ■■■ cantons the ■■■■ almost entirely ■■■ the communes, in others it is divided between the canton and ■■■■. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestant, the proportion of the school-attending children to the whole population is ■■■ one to five; while in the half-Protestant and half-Roman Catholic cantons it is ■■■ one to seven; and in the entirely Roman Catholic cantons as one to nine. The compulsory law has hitherto not always been enforced in the Roman Catholic cantons, but is rigidly carried out in those where the Protestants form the majority of inhabitants. In every district there ■■■ primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1910, '1 per cent. could not read, and '3 per cent. could not write.

The following are the statistics of the various classes of educational institutions for 1910-11 :—

	Schools	Teachers	Pupils
Infant schools	1,143	1,605	6,440
Primary schools	4,812	12,485	544,162
Secondary schools	636	2,118	87,570
■■■■ school- (preparatory)	48	1,188	14,798
■■■■ (private and public)	■	564	■

There ■■■ also improvement schools with 41,464 pupils, schools for girls with 1,847, gymnasia with 7,847. In 1911-12 there ■■■ commercial schools with altogether 3,937 pupils; industrial schools with 4,951 pupils; technical schools with 1,353 pupils; ■■■ schools for the instruction of girls in domestic economy and other subjects; agricultural schools with 1,161 pupils; schools for horticulture, for viticulture, for arboriculture, and for dairy management. In 1910, 8 institutions for the blind ■■■ 326 inmates; ■■■ for ■■■ deaf and dumb had 786; 25 ■■■ feeble-minded had 1,391. In ■■■ reformatories of Switzerland in 1910, there ■■■ 1,527 children under instruction. The expenditure ■■■ instruction in 1911 was: by ■■■ State, 41,800,000 francs; by the communes, 44,600,000 francs; total, 86,400,000 francs.

■■■■ universities in Switzerland. These universities ■■■ organised on the model of those of Germany, governed by a rector and a senate, ■■■ divided into four 'faculties' of theology, jurisprudence, philo-

sophy, and medicine. There is a Polytechnic School, maintained by the Federal Government, at Zurich, with a teaching staff of 185 and 1,336 matriculated students, in 1909. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the universities in the winter of 1912-13:—

	Theology	Law	Medicine	Philosophy	Total	Teaching
Basle (1460)	51	74	230	114	569	1.0
Zurich (1833)	36	343	451	610	1,380	176
Bern (1834)	36	472	379	600	1,487	146
Geneva (1559) & (1732)	30	280	624	560	1,501	156
Lausanne (1597) & (1860)	10	253	297	400	1,056	—
Fribourg (1859)	244	11	—	244	608	92
Neuchâtel (1806) & (1909) ²	10	67	—	170	250	7

¹ As an Academy.

² As a University.

These numbers are exclusive of 'hearers,' but inclusive of over 1,100 women students.

Justice and Crime.

The 'Bundes-Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 19 members, with 9 supplementary judges, appointed by the Federal Assembly for six years, the President and Vice-President, as such, for two years. The President has a salary of 13,000 francs a year, and the other members 12,000 francs. The Tribunal has two sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs; between parties who refer their suits to it, the value in dispute being at least 3,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1910, the prison population (condemned) of Switzerland consisted of 4,210, of whom 511 were foreigners.

Capital punishment exists in Appenzell-A.Rh., Obwalden, Uri, Schwyz, Glarus, Lucerne, Valais, Schaffhausen, and Freiburg.

Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), passed by both Chambers on June 18, 1911, accepted by the electors of the Republic with a small majority. Total votes 528,781, of which 236,037 were 238,684 against the

citizens entitled to against illness, and foreigners may the benefits of the law. Compulsory against illness does not yet, but cantons communities are entitled under the act declare obligatory insurance for certain or, in general, to establish public benefit (sick fund) associations, make employers responsible for the payment the premiums of their employees

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, which are under the Federal liability law. Every person above the of 14 can insure voluntarily at the Federal insurance administration (or at corporation).

Finance.

The entire net proceeds of the Federal alcohol monopoly (259,600l. in 1913) are divided among the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1907	5,836,570	5,572,400	1910	6,674,609	6,458,221
1908	5,805,640	6,095,170	1911	3,931,704	4,031,842
1909	6,227,140	7,558,710	1912	3,710,400	3,866,300

The following table gives the budget estimates for 1913 :—

Source of Revenue	FRANCS	Branch of Expenditure	FRANCS
Property	1,906,714	Debt, Total Charge	8,076,000
Capital invested	4,659,972	General administration	1,608,400
General administration	120,800	Departments —	
Departments —		Political	1,162,307
Police	23,000	Interior	17,113,547
Interior	119,300	Justice and Police	2,944,500
Justice and Police	1,003,000	Military	44,296,227
Military	3,740,100	Finance Customs	9,618,320
Finance and Customs	68,754,000	Commerce, Industry, and	
Commerce, Industry, and		Agriculture	16,804,430
Agriculture	1,083,000	Posts and Railway	579,980
Railway	4,210,050	Miscellaneous	2,056,209
Miscellaneous			
Total	98,725,000 (8,949,000f.)	Total	108,155,000 (4,126,200l.)

The public debt of the Confederation amounted, January 1, 1910, to 4,977,200l., mostly at 3½ per cent. The debt charge for 1910 amounted

DEFENCE

to 251,885/ (of which 138,000/ was for redemption of debt) At the date the 'Federal Fortune,' or ~~Swiss~~ property, real property, 2,695,295/ , stock, 1,309,460/ , works producing interest, 1,868,990/ , stores not producing interest, 938,580/ , debts, 73,670/ , inventory, 2,145,740/ , Swiss National Bank 425,740/ , cash, 15,820/ , total, 9,463,310/ , the net Fortune being thus 4,977,190/

Defence.

There are fortifications on the south frontier for the defence of the St Gothard pass, others have been constructed at St Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes. Inability extends from the 17th to the end of the 48th year, actual service commencing at the age of 20. The first 12 years are spent in the first line, called the *Answug*, the next 6 in the *Landwehr*, and the remaining 6 in the *Landsturm*. For cavalry, however, service is 11 years in the *Answug*, and 12 in the *Landwehr*. The *Landsturm* only includes men who have undergone some training. The unarmed *Landsturm* comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days annually but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The *Landwehr* men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. The field army, formed of the *Elite*, is to consist of 6 divisions, 3 cavalry brigades, and 3 mountain brigades. A division consists of 3 brigades each of 2 regiments consisting of 2 or 3 battalions, 1 cyclist company, 1 battalion of field artillery, 1 howitzer batteries, 2 squadrons of guides, and 1 battalion of sappers. A cavalry brigade consists of 2 regiments. A mountain brigade consists of 2 or 3 battalions, 1 mountain batteries, and 1 company of sappers. Altogether there are 106 battalions, 11 field batteries, 12 howitzer batteries, 11 mountain batteries, and 11 cavalry regiments (each of 3 squadrons), besides 12 squadrons of guides. There is a staff organisation on paper for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, &c.

The total number of combatants in the field army may be taken as 140,000. There are also separate forces, mostly *Landwehr*, for manning the fortifications which close the St Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000. The *Landwehr* is organised in 60 battalions and 24 squadrons. Altogether Switzerland has nearly 200,000 (combatants), respectively the organised *Landsturm*, who may be called up to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The following table shows the strength of the Swiss troops (Auszug and Landwehr) in 1912

Troops		Auszug of 1812	Landwehr	
Staff				1,383
Infantry	Auszug, 106 battalions	85,181		147,100
	Landwehr, 11 battalions		50,974	
Cavalry	Auszug 35 squadrons and 4 mountain detachments	6,900		9,121
	Landwehr 11 squadrons		4,377	
Artillery	Auszug, 11 and mountain batteries			1,800
	16 position companies (partly Landwehr)			
	Landwehr 15 position companies			
	Paras and ammunition columns		1,101	
Engineers	Auszug altogether 28 companies	8		1,407
	Landwehr altogether 14 companies		1,401	
Medical	other subsidiary services	1,100	3,301	
Total		143,290	61,660	214,922

The Swiss infantry is armed with the Swiss repeating rifle. The field artillery has now been completely rearmed with a Q F shielded gun, 7.5 cm calibre. The position artillery has batteries of 8.4 and 10.5 cm guns.

The total expenditure on the army now amounts to not less than 100 million francs (1,720,000) yearly, a relatively large, being nearly one third of the total Federal budget. A sum of 220,000 was granted in 1910 for the fortifications of the St Gothard Pass and St Maurice.

Production and Industry.

The soil of the country is very equally divided among the population, it being estimated that there are nearly 300,000 peasant proprietors, representing a population of about 2,000,000.

Of the total 100 per cent 4 per cent is unproductive, of the productive 96 per cent is under grass and meadows, 10 per cent under forest, 18.7 per cent under fruit, 16.4 per cent under crops and gardens. Rye, oats, and potatoes are the chief crops, but the bulk of food crops consumed in the country is imported. The area and yield of the principal crops for 3 years are as follows:—

	Area			Yield		
	1909	1910	1911	1909	1910	1911
	Acres	Acres	Acres	Cwt	Cwt	Cwt
Wheat	105,983	104,728	104,641	1,910,769	1,475,000	1,887,608
Barley	12,844	12,844	12,800	201,889	189,288	189,288
Oats	80,769	80,522	80,522	1,678,231	1,389,750	1,384,871
Rye	60,268	60,021	59,907	987,708	808,521	918,717
Maize	8,211	8,211	8,285	62,971	47,229	60,810
Vines	88,412	88,870	88,870	8,989,908	8,858,515	18,804,910

1 Gallons of wine

The chief agricultural industries are the manufacture of cheese and condensed milk. Wine is produced in five of the cantons, tobacco in three. In 1911 (last census) there were in Switzerland, 143,728 horses, 1,448,371 cattle, 159,727 sheep, 569,253 pigs, 339,997 goats, beehives, 223,933.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland is 3,290 square miles, or 2,105,214 acres in extent (comprising 91,597 acres of cantonal forest, 1,403,772 acres belonging to municipalities and other corporations, and 609,855 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,119,270 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1876 it was enacted that this forest area should never be reduced, servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up, public forests should be surveyed, and new wood planted where required, subventions for the purpose being provided. In the year 1912, 20,958,196 trees (chiefly coniferous) were planted, while timber amounting to 2,061,644 cubic metres was cut. The free forest districts comprise 1,477 square miles.

There were, in 1912, 192 establishments for pisciculture, which produced fry of various species to the number of 42,104,650.

Switzerland though in the main an agricultural country, has a strong tendency to manufacturing industry. There are 5 salt mining districts, that of Boz (Vaud) belongs to the Canton, but is worked by a private company, that at Schweizerhalle (Basel) is worked by the Glöck family, those at Rheinfelden, Ryburg, and Kaiseraugst (Aargau) are worked by a joint stock company, in virtue of a concession from the Canton. The output of salt of all kinds in 1910 reached 621,491 quintals. From the various cement works the output in 1910 amounted to 757,503 metric tons. In 1912 there were 8,093 factories in Switzerland (7,907 in 1911). The number of persons employed (1911) was 328,841 (211,077 males and 117,764 females), the motive machinery had 515,859 horse power. In 1910, 146 breweries produced 2,507,222 hectolitres of beer.

Commerce.

The special commerce, including precious metals, is as follows in five years—

	1907	1910	1911	1912
Imports	£ 61,870,064	£ 11,017,381	£ 61,401,000	£ 78,549,415
Exports	£ 42,812,115	£ 4,504,805	£ 47,845,000	£ 44,408,860

The following table shows the value of special commerce in 1911 and 1912.—

Merchandise	Imports (1912)	Exports (1912)	Imports (1911)	Exports (1911)
	France	France	France	France
Cereals	231,052,996	6,366,541	219,706,716	6,186,482
Fruits ■■ vegetables	41,766,358	6,442,126	41,606,430	2,451,498
Colonial produce	107,625,794	55,667,233	86,859,153	47,046,021
Animal ■■ substances	110,385,922	118,717,470	106,729,461	108,184,400
Tobacco	16,471,642	4,207,156	14,867,046	4,102,618
Beverages	57,733,948	2,918,528	55,517,089	3,017,687
Animals, living	72,663,774	15,366,901	73,401,552	12,574,784
Hides ■■ skins	54,712,555	39,945,447	48,624,919	34,119,610
Timber	50,077,092	7,467,514	49,847,604	7,561,144
Cotton goods	134,105,931	370,400,149	121,955,776	206,087,276

Clocks	2,312,430	160,663,965	1,461,895	163,242,261
Chemicals	4,611,277	19,174,121	42,073,889	16,579,656
Grease, oils, &c.	29,194,702	2,427,671	26,892,389	1,649,794
Total incl. other merchandise	1,963,724,114	1,357,596,670	1,902,354,946	1,267,800,464

In Switzerland, for the majority of imports, the values are fixed by a system of Exports nominated by the Customs department. Up to 1901 a single value was fixed for each class of goods, but the Commission now takes into account the difference of prices in different countries of origin. For values of exports declarations are, in general, considered sufficient. Returns show the net weight, though the gross weight also is declared. It is sought to record as the country of origin the country of production, and as the country of destination where the goods are to be consumed. When exact information is not available the most distant known points of transit are recorded. In accordance with this system, Swiss returns show, as far as can be ascertained, the trade between Switzerland and Great Britain, though, since direct commercial intercourse is impossible, the name of Switzerland does not appear in the trade returns of the United Kingdom. The treaty of Commerce provides for the most favoured nation treatment in respect of commerce, residence and other matters affecting Swiss and British interests.

The customs duties amounted in 1909, to 392,011 francs; in 1910 to 40,060,250 francs; in 1911, 80,939,346 francs; in 1912, to 86,175,262 francs.

The following table, in thousands of francs, shows the distribution of the special trade with Switzerland (including bullion but not coin). Much of the trade with the frontier countries is really of the nature of transit trade:—

	Imports from (1910)	Imports from (1911)	Exports to (1910)	Exports to (1911)
	1,000	1,000	1,000	1,000
	France	France	France	France
Germany	565,720	591,395	270,163	274,479
France	846,591	339,633	130,045	132,637
Italy	208,068	180,629	85,593	83,284
Austria-Hungary	110,746	118,824	80,072	85,045
Great Britain	112,677	99,857	200,855	212,920
Belgium	36,261	88,926	22,911	25,227
Russia	85,618	89,660	41,812	41,812
Holland	18,724	28,083	9,577	9,871
United States	—	75,085	—	142,228

Total trade between Switzerland ■■■ the United Kingdom (in thousands of pounds) for five years —

—	1907	1908	1909	1910	1911
Imports from Switzerland into U. K.	8 401	7 914	8 501	9 811	10 085
Exports to Switzerland ■■■ U. K.	2,616	2 314	2 861	3 371	3 934

Internal Communications.

In 1912 the State railways of Switzerland had a length of 2,288 miles, ■■■ the privately owned railways 1,176. There ■■■ also ■■■ miles of foreign railways within the Confederation. The cost of construction of the railways up ■■■ the end of 1911 was 1,935,969,869 francs (77 438 794/7). There ■■■ carried (1912) 18,457,031 tons of goods and 105,575,536 passengers. The receipts from traffic of all the Swiss railways amounted to 214,319,718 francs (8,572,788/7). The working expenses amounted to 128,406,969 francs (5,136,278/7). Five of the principal Swiss railways have been acquired by the Confederation. The traffic on the Swiss waters ■■■ 1912 was carried on by 285 boats or barges belonging to 19 companies.

In 1912 there ■■■ in Switzerland 2,093 post offices and 1,926 letter boxes. By the internal ■■■ there ■■■ forwarded 175,485 129 letters, 87,100,792 post cards, 69,780,150 packets of printed matter, 1,206,206 samples, 200,682,738 newspapers, and 6,540,498 registered parcels, &c. In the international service there ■■■ forwarded 29,217,052 letters, 22,291,841 post cards, 16,558,195 packets of printed matter, 1,686,608 samples, 2,374,285 newspapers, and 2,312,458 registered parcels, &c. Internal post office orders were sent to the amount of 816,538,413 francs, and international sent and received to the amount of 167,153,241 francs. Receipts, 1912, 64,367,567 francs (2,574,702/7), expenditure, 61,853,678 francs (2,474,147/7).

Switzerland has a very complete system of telegraphs, consisting (1912) of 2,186 miles of line with 16,449 miles of ■■■. There were transmitted 1,706,607 inland telegrams, 3,155,773 international, and 1,438,809 in transit through Switzerland. Number of offices, 2,291. There ■■■ 442 telephone systems with 11,349 miles of line and 196,399 miles of wire, conversations, 55,474,572. The telegraph and telephone receipts ■■■ 1912 amounted ■■■ 18,541,804 francs (741,672/7), the expenditure to 17,582,229 francs (701,288/7).

Money ■■■ Credit.

In 1912 the ■■■ of ■■■ of ■■■ nominal value of 13,740,000 francs (gold, 11,000,000 francs, fractional silver, 2,000,000, nickel and bronze, 740,000).

There ■■■ in Switzerland in 1912, ■■■ banks with an aggregate paid capital of 244,760,000 francs. Note circulation amounted to 6,813,000 francs.

Banks of issue ■■■ subject ■■■ inspection. The ■■■ National Bank, with headquarters divided ■■■ Bern and Zurich, opened its doors ■■■ June 20, 1907. It will ultimately have the exclusive right to issue bank ■■■ in Switzerland, the existing banks being allowed ■■■ years to withdraw their note ■■■. On December 31, 1912, there ■■■ notes ■■■ the bank in circulation ■■■ the ■■■ of 371,813,000 francs.

Money, Weights, and Measures.

The *Franc* of *Batsen*, and *Rappen* = *Centimes*

Average rate of exchange, 25 22½ francs = £1 sterling.

The 20-franc piece is fine, the 5-franc silver piece fine, the silver franc, franc, and half-franc are 835 fine. Switzerland belongs to the Latin Monetary Union, but Italy is exonerated from taking back its exported fractional case of the dissolution of the Union, the importation into Switzerland of franc, franc, and franc pieces is prohibited by decree of February 21, 1899, on pain of confiscation. By a Convention of November 15, 1902, with the other States within the Union, Switzerland may coin, exceptionally, 12,000,000 francs fractional silver pieces, but the must be spread least years.

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs avoirdupois. The *Arpent* (Land) = 8.9ths of .

The *Pfund*, pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the of the old halves and quarters, named *Halbpfund*, and *Viertheilpfund*.

Diplomatic and Consular Representatives

1. OF SWITZERLAND IN GREAT BRITAIN.

Envoy and Minister — M. Gaston Chulin.

Secretary. — Ch. Paravicini,

Councillor of Legation — M. Theo Kattel.

2. OF GREAT BRITAIN IN SWITZERLAND

Envoy Extraordinary and Minister Plenipotentiary —

Secretary — Robert H. Chve

Military Attaché — Colonel Edward John Gienet, C.B.

Commercial Attaché. — Sir Austin Lee, K.C.M.G., C.B. (also at Paris)

Consul General Zurich — Sir Angus, K.C.M.G.

There are Consuls at Bern, Geneva, Lausanne, Lucerne, Davos, and St. Moritz. Vice Consuls at Zurich, Montreux, Bâle, St. Gall, Lugano, and Neuchâtel.

TURKEY AND DEPENDENT STATES.

(OTTOMAN EMPIRE.)

Reigning [redacted]

[redacted] V., born November 3, 1844 (21 Shavval 1260), [redacted] of Sultan Abdul Medjid; succeeded to the throne [redacted] the deposition of [redacted] elder brother, Sultan Abdul Hamid II., April 27, 1909.

Children of the Sultan.

I. *Zia-E-din* Effendi, born 1877. II. *Nedim-ed-Din* Effendi, born 1881. III. *Esmir-Hilmi* Effendi, born February 18, 1883. IV. *Refa* Sultana, born 1887.

Brothers and Sisters of the Sultan.

[redacted] and deposed Sultan, Abdul Hamid, there [redacted] two surviving brothers and [redacted] sisters of the reigning Sultan.

I. *Djémile* Sultana, born August 18, 1843; married, June 3, 1858, to Mahmoud-Djelal Eddin Pasha, [redacted] of Ahmet Veli Pasha; widow, 1892.

II. *Sevke* Sultana, born November 21, 1851; widow of the [redacted] Mahmut Pasha, son of Halil Pasha.

III. *Mediha* Sultana, born 1857; married (1) 1879, to Nedjib Pasha; widow, 1885; (2) April 30, 1890, to Ferid Pasha.

IV. *Sulrima* Effendi, born 1860.

V. *Id-E-din* Effendi, born January 12, 1861.

The present sovereign of Turkey is the thirty-fifth, in male descent, of the house of Othman, the founder of the Empire, and the twenty-ninth Sultan since the conquest of Constantinople. By the law of [redacted] succession obeyed in the reigning family, the crown is inherited according to seniority by the male descendants of Othman, sprung from the Imperial Harem. The Harem is considered a permanent State institution. All children born in the Harem, whether offspring of free women [redacted] of slaves, are legitimate and of equal lineage. The Sultan is succeeded by his eldest son, but only in [redacted] there [redacted] no uncles or cousins of greater age.

It has not been the custom of the Sultana of Turkey for [redacted] centuries to contract regular marriages. The inmates of the Harem come, by purchase [redacted] free will, mostly from districts beyond the limits of the empire, the majority from Circassia. From among these inmates the Sultan designates a certain number, generally seven, to be 'Kadein,' [redacted] Ladies of the Palace, the rest, called 'Odalik,' remaining under them as servants. The superintendent of the Harem, always [redacted] aged Lady of the Palace, and bearing the title of 'Hamadar-Kadin,' [redacted] to keep up intercourse with the outer world through the Guard of Eunuchs, whose chief, called 'Kizlar-Aghasi,' has the [redacted] rank as the Grand Vizier, but has the precedence if present [redacted] occasions.

The following is a list of the names, with date of accession, of the thirty-four sovereigns who have ruled Turkey since the foundation of the empire and of the reigning house:—

House of Othman.

Othman	[redacted]	Bajazet II.	1481
Orchan	[redacted]	Selim I.	[redacted]
Murad I.	[redacted]	Solyman I., 'The Magni-	
Bajazet I., 'The Thunder-		ficent'	[redacted]
bolt'	1389	[redacted] II.	[redacted]
Interregnum	1393	[redacted] III.	1574
Mohammed I.	[redacted]	Mohammed III.	[redacted]
Murad II.	[redacted]	Ahmet I.	1603
Mohammed II., Conqueror		Mustapha I.	1617
of Constantinople	[redacted]	Othman II.	[redacted]

Murad IV, 'The Intrepid'	1623	Abdul Hamid I	1773
Ibrahim	1611	Selim III	1789
Mohammed IV	1648	Mustapha IV	1807
Solyman II	1687	Mahmoud II	1808
Ahmet II	1691	Abdul Medjid	1839
Mustapha II	1695	Abdul Aziz	1861
Ahmet III	1703	Murad V (May 30)	1876
Mahmoud II	1730	Abdul Hamid II (Aug 31)	1876
Othman III	1754	Mohammed V (April 27)	1909
Mustapha III	1757		

The civil list of the Sultan is variously reported at from one to two millions sterling. To the Imperial family belong a great number of crown domains, the income from which contributes to the revenue. The amount charged to the Budget of 1911-12 is £T493,280.

Constitution and Government

The fundamental laws of the Empire are based on the precepts of the Koran. Next to the Koran, the laws of the 'Hadith,' a code formed of the supposed sayings and opinions of Mahomet and the sentences and decisions of his immediate successors are binding upon the Sovereign as well as his subjects. Another code of laws the 'Canon Nameh,' formed by Sultan Solyman the Magnificent from a collection of 'hatti sheriffs,' or decrees, issued by him and his predecessors, is held in general obedience, but merely is an emanation of human authority. After the promulgation of the Hatt-i Sherif of 1839, complete codes of law (Civil Criminal, and Commercial) were drawn up and form the laws in force being largely based on the Code Napoleon. These codes are administered by the 'Nizams' into Courts. The Civil Code is administered by the Sheriat courts dealing with questions of real property, and with all matters relating to the personal status of Moslems.

Forms of constitution after the model of the West European States were drawn up at various periods by successive Ottoman Governments: the first of them embodied in the 'Hatt-i Humayoun' of Sultan Abdul Medjid, proclaimed February 18, 1856, and the most recent is a decree of Sultan Abdul Hamid II of November 1876. The latter provided for the security of personal liberty and property, for the administration of justice by irremovable judges, the abolition of torture, the freedom of the Press, and the equality of all Ottoman subjects. Islam was declared to be the religion of the State, but freedom of worship was secured to all creeds, and all persons, irrespective of religion, were declared eligible for public office. Parliament should consist of two Houses, a Chamber of Deputies and a Senate. Senators should be at least 40 years of age and would be appointed by the Sultan from among those who have rendered distinguished service to the State. For the election of deputies one electoral delegate has to be chosen for every 50 electors, and these electoral delegates choose a deputy for every 8,000 electors. Electors must be Ottoman subjects of at least 25 years of age, without distinction of race or creed, while delegates must be at least 30 years of age. Civil or military officials may offer themselves for election, but must immediately resign their posts on being returned. In consequence of the prevailing discontent, especially in the army, caused by corruption and misgovernment an Imperial Decree was issued for the convocation of a Parliament, and constitutional government was restored July 24, 1908. Martial law was proclaimed at Constantinople in April, 1909, for a period of one year from that date, the proclamation was renewed in April, 1910, and again in

March, 1911, for — year. On January 15, 1912, the first Turkish Parliament was dissolved.

The Turkish Cabinet, which came to power — January 24, 1913, after a coup d'état, consists of the following members —

Grand Vizier and Minister of War — Marshal Mahmud Shevket Pasha

Minister of Justice — Ibrahim Pasha

President of the Council of State and Foreign Minister — Prince —

of Egypt

Minister of Marine — General Tschuruk Sula Mahmud

Minister of Public Instruction — Shukri Bey

Minister of the Interior — Halil Adil Bey

Minister of Finance — Rifaat Bey

Minister of Public Works and Commerce — Batzaria Effendi

Minister of Mines, Forests, and Agriculture — Djelal Bey

Minister of Posts and Telegraphs — Oskurn

Minister of Pious Foundations — Hani Bey

Shah ul Islam — Musa Kiarim Effendi

The whole of the empire is divided into Vilayets, or governments, these subdivided into Sanjaks, or — provinces, these into Kaza, — districts, with occasional subdivision into Nahies, or sub districts. At the bottom of the list is the "Karie" or village having at its head a "Mouktar." A Vali, or governor general, representing the Sultan, and assisted by a provincial council, is placed at the head of each Vilayet. The minor provinces, districts, &c., are subjected to inferior authorities (Mutesarrifs, Kaimakams, Mudirs and Mukters) under the superintendence of the Vali. The division of the country into Vilayets has been frequently modified of late for political reasons. For similar reasons six of the Sanjaks of the empire are governed by Mutesarrifs appointed directly by the Sultan, and — known — Mutesarrifats, reporting direct to the Ministry of the Interior. All subjects, however humble their origin, are eligible to, and may fill, the highest offices in the State.

Area and Population

The Ottoman Empire is made up of (1) Turkey in Europe¹ (the archipelago and the Balkan Peninsula), (2) Turkey in Asia (Anatolia, Arabia, Syria, Palestine, Mesopotamia, and Kurdistan), and (3) Provinces of the Isles of Crete, Samos, and Cyprus. The total area (including States — nally subject) may be estimated at 941,416 square miles, and — total population — about 39,600,000, viz. —

	Square miles	Population
Immediate possessions —		
Europe	104,000	9,000,000
Asia	1,000,000	21,000,000
	1,104,000	30,000,000
Crete	1,400	310,000
Cyprus	3,600	287,000
Samos—tributary principality	—	58,000
Egypt	—	20,000,000
	100	10,000,000
Total	941,416	39,600,000

¹ At the close of the war which commenced on September 30, 1912, the possessions in Europe will be considerably lessened. Thracian Thrace being in part divided among the Allied States (Bulgaria, Serbia, Montenegro, Greece), and in part into an independent state of Albania.

The **■** and population by Vilayets, according to an earlier estimate, **■** follows :—

Vilayets	Area Sq Miles	Population	Population per Sq Miles
Constantinople	1,505	1,203,000	790
Chatalja (Mutesarrifat)	733	60,000	82
Adrianople	14,822	1,029,300	69
Salonica	17,510	1,130,400	64
Monastir	11,000	844,900	77
Kosovo	12,700	1,039,100	82
Sentari (Albania)	4,170	294,100	70
Yanina	6,910	527,000	76
Total	67,330	6,139,200	91
Anatolia Minor —			
Ismid (Mutesarrifat)	3,130	222,700	71
Brussa	25,490	1,426,500	64
Bigha (Mutesarrifat)	2,500	129,000	51
Archipelago	2,400	422,000	121
Myrina on Aidin	2,500	2,500,000	64

Kerbela	65,000	Bitlis	40,000
Mosûl	70,000	Tchirzond	51,000
Micca	80,000	Diarbekr	38,000
Basra	55,000		

The Lebanon is governed by ■ Mutesarrif (Christian), and has ■ special government, the constitution of which was modified in December, 1912, with ■ view to making it more liberal than before

Religion ■■ Education.

Mahometans form the vast majority of the population in Asiatic Turkey, but only one-half of the population in European Turkey. Recognized by the Turkish Government are the adherents of nine non-Mahometan creeds—namely, 1 Latins, Franks, or Catholics, who ■ the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers ■ the Empire, and proselytes among Armenians, Bulgarians, and others, 2 Orthodox Greeks, 3 Bulgarians under their Exarch at Constantinople, 4 Armenians, under their Patriarch ■ Constantinople, but under the supreme spiritual control of ■ Catholicos at Echmiadzin, in the Russian Caucasus. In 1903, the old dignity of Catholicos of Sis, ■ (Sis), was restored and a new appointment made. There still remains ■ abeyance the seat of the Catholicos of Akhtomar (Van), an ancient dignity, 5 Syrians and United Chaldeans, under their Patriarch ■ Mossul, 6 Maronites, under their Patriarch ■ Kanoubin in Mount Lebanon, 7 Protestants, consisting of converts chiefly among the Armenians ■ Jews, ■ Nestorians, or Assyrian Christians, under the Patriarch Mar Shannan of Kerkhannes. These religious denominations ■ invested with the privilege of possessing their ■ ecclesiastical rule. The Patriarchs of the Greeks and Armenians, the Bulgarian Exarch, and the 'Chacham Baschi,' ■ high rabbi of the Jews, possess, in consequence of these functions, considerable power and influence, especially the Greek Patriarch.

In Constantinople about half ■ settled inhabitants ■ Mussulmans, the other ■■ being made up mostly of Orthodox Greeks, Armenians, ■■ Catholics, and ■■ Uniates, and Jews. There is, besides, a very large foreign population of various professions. In the Turkish ■■■■ of the Aegean ■ the population ■ mostly Christian, 296,800 Christians to 27,200 Mussulmans. In ■■■■ parts of Asiatic Turkey ■■■■ Asia Minor, Mussulmans, 7,179,900, Armenians, 576,200, other Christians, 972,300; Jews, &c., 184,600, Armenia, Mussulmans 1,795,800, Armenians, 480,700, other Christians, 165,200, Jews, &c.,

80,700; Aleppo, Mussulmans, 792,500; Armenians, 49,000; other Christians, 134,800; Jews, &c., 20,000; Beyrût, Mussulmans, 230,200; Armenians, 6,100; other Christians, 160,400; Jews, &c., 136,900; Lebanon, Mussulmans, 30,400; Christians, 319,300; Jews, &c., 49,800. The Mahometan clergy is subordinate to the Sheik-ul-Islam. Their offices are hereditary, and they can only be removed by Imperial iradé. A priesthood, however, in the strict sense of a separate class, to whom alone the right of officiating in religious services belongs, cannot be said to exist in Turkey.

The number of mosques in the Turkish Empire is 2,120, of which are Constantinople. The number of the clergy is 11,600. Connected with the mosques are 1,780 elementary schools, where education is supplied gratis. The private revenue of the Evkaf (Church), previous to the year of 1878, was 30,200,000 piastres (251,000*l.*) per annum, but they have now been reduced to 20,000,000 piastres (166,000*l.*). The expenses are reckoned at 15,000,000 piastres (125,000*l.*). The stipend of the Sheik-ul-Islam, 7,031,520 piastres (59,000*l.*), and those of the Naibs and Muftis, 7,876,646 piastres (66,000*l.*), are paid by the State. The principal revenues of the Evkaf are derived from the sale of landed property which has been bequeathed it, and which is known under the name of Vacuf. Three-fourths of the urban property of the Empire is supposed to belong to the Vacuf. Purchasers of property of this description pay a nominal annual rent to the Evkaf; but should they die without direct heirs the property reverts to the Church.

In Turkey, elementary education is nominally obligatory for boys from 6 to 11 years of age, and for girls from 6 to 10 years of age. Education is free; all schools are under Government control, but there is no interference with the religious education of the different communities. Elementary instruction includes the Turkish language, the Korân, arithmetic, history, geography, and hand work of various kinds, but secular as well as religious instruction is entrusted to the Mussulman clergy. It is of little value. There are middle-class schools for boys from 11 to 16 years of age, who, in addition to elementary subjects, learn French, geometry, and various branches of physical and natural science. In Aleppo there are 710 Moslem, 250 Christian, and 30 Jewish schools, with respectively, 19,000, 8,000, and 2,000 pupils. Besides the ordinary instruction (mostly religious), in a few schools French is taught and, in fewer, English. The schools of various descriptions within the empire number about 86,230, and contain about 1,331,200 pupils, one to twenty-four of population.

The university which was nominally founded at Constantinople in 1900, with 14 professors to teach theology (Mussulman), mathematics, philosophy, law, and medicine, has not yet (1907) got beyond the paper stage. The Imperial School of Medicine occupies an imposing site on the Scutari shore of the Bosphorus. There is an Imperial art school, a Great National School (Greek) of old foundation with 400 students, and a Greek theological academy with 100 students.

The revenue is derived from tithes, land and property taxes, Customs, monopolies, and other sources; the largest portions of the expenditure are for military purposes and for public charges.

The Estimates presented to the Chamber in November, 1911, show for the year 1928 (1912-1913), the revenue amounting to £T29,630,901, the expenditure amounting to £T33,246,941. Deficit, £T3,666,040.

The Ottoman Government, when it meets its liabilities, made an arrangement with its creditors, confirmed by the Iradé of December 8/20, 1911.

supplemented and modified by that of September 1, 1911. A Council of Administration at Constantinople was appointed, and to it was handed over for distribution among the bondholders the funds derived from the excise duties, from the Bulgarian, Eastern Rumanian, and Cyprus tribute, and from the tax on Persian tobacco. The net revenue in 1911-12 available for the service of the debt was £T4,126,598, compared with £T4,066,812 in 1910-11.

The condition of the Turkish debt was as follows on March 14, 1912 —

	£T
Secured by Egyptian tribute	17,842,990
Secured by administered revenues	85,174,981
Various loans	24,062,808
Total	126,580,729

The following loans have been authorised by the Government but had not been issued up to the end of 1912 — Four per cent loan of 1910 from German and Austrian banks (second portion, for £T3,960,000), Four per cent loan of 1911 from Banque Paribas for £T2,500,000, and Four per cent loan of 1912 from the Ottoman Bank, for £T10,000,320. Total, £T16,460,320.

Defence.

I. FORTIFICATIONS.

The principal fortress in European Turkey is the entrenched camp of Adrianople. Constantinople is defended by the lines of Chakmedje. The Bosphorus and Dardanelles are strongly fortified, although the guns are out of date. Salonika and Smyrna are defended by batteries. Erzerum, in Armenia, is an entrenched camp.

II. ARMY.

Until recently military service had been theoretically compulsory for all Moslems, but Christians had not been allowed to serve. As the Christians in European Turkey exceed in number the Moslems (by 3,500,000 to 2,500,000) and there are also nearly 3½ millions of Christians in Turkey in Asia, this religious distinction has cramped the Ottoman Empire in the development of its military strength. Further, compulsory service cannot be enforced in Arabia, while the Kurdish and Arab tribes in Asia Minor are exempt; so also is the district of Constantinople and that of Skodra (Skutari), in Albania. The burden of defence has therefore fallen on about 11 million Moslems out of a total population of about 20 millions of all creeds and races.

Under the present régime, the advisability of incorporating Christians in the army has been recognized, and in August, 1909, a decree was promulgated extending the obligation of military service to non Moslems; but the practical difficulty of fully reforming the recruiting law has been found very considerable.

Liability commences at the age of 20 and lasts for 20 years. Service in the first line, or active army, called the *Nizam*, is for 9 years, viz. — in the case of the infantry, 5 in the ranks and 4 in the reserve; for cavalry and artillery, 4 in the ranks and 5 in the reserve; but in practice the recruits are often kept for longer periods with their colours. The soldier next passes to the *Kedif*, or second line, and remains in it for another 11 years. Finally he completes his service with 20 years in the *Mustafa*. The reservists are

liable to be summoned annually for 6 weeks training, and the *Redif* for one month in alternate years, but the trainings are regularly carried out. The recruits of the annual contingent, surplus to the requirements of the first line, are passed into a separate reserve. They undergo from 12 to 18 months training in the first year of their service, and are afterwards supposed to receive an annual training of 30 days.

The *Redif* is in two classes, the first class representing men of the first five years of *Redif* service and the second class representing men of the remaining four years *Redif* service. The *Redif* infantry exists in time of peace in the form of small cadres, but the units can be and frequently are embodied. They are used, in common with the *Nizam* for the suppression of disturbances and are sometimes retained in service for considerable periods. There is no *Redif* cavalry except 12 small cadres, on which it is intended to build regiments in event of war. There are however, irregular cavalry in Asia Minor, raised from the Kurdish and Arab tribes and called the *Hamidiyah* cavalry. There is no *Redif* artillery or engineers. When *Redif* divisions are mobilized they are supplied with these arms from the *Nizam*.

The *Mustafas* has no organisation.

The Empire is divided into 6 *Nizam* and 1 *Redif* inspection areas of very unequal size and military importance. Of the *Nizam* Inspections the 1st covers Rumelia and Anatolia and produces 1 army corps, the 2nd covers Macedonia and Albania, Thracia and Syria and produces 1 army corps and 3 independent divisions, the 3rd covers Armenia and Kurdistan and produces 2 army corps and 2 independent divisions, the 4th covers Mesopotamia, Arabia, and Tripoli, and includes 2 army corps and 5 independent divisions. The 1st *Redif* Inspection coincides with the 1st *Nizam* Inspection, and produces 17 divisions, the 2nd also coincides with the 2nd *Nizam* Inspection and produces 22 divisions, the 3rd and 4th correspond to the *Nizam* areas, and produce 1 and 4 divisions respectively, the 5th comprises Syria and produces 7 divisions. Altogether there are on paper 43 *Nizam* divisions and 57 *Redif* divisions. The troops in Yemen and the Hedjaz (4th Inspection) are in force in occupation as well as those in Tripoli.

Nizam divisions normally have 3 line regiments, 1 rifle battalion, and 6 to 8 field batteries, each line regiment consisting of two battalions and 1 cadre in peace, and of 3 battalions in war, thus the division has 7 battalions in peace and 10 in war. The artillery is being reorganised in 12 gun batteries. An army corps consists of 1 or 3 divisions, 1 cavalry brigade, 3 howitzer batteries, 6 mountain batteries, an engineer battalion and telegraph company. There are 40 regiments of *Nizam* cavalry of 1 squadrons each, besides these, there are 10 regiments of irregular Kurdish (*Hamidiyah*) cavalry. *Redif* divisions have from 7 to 12 battalions, usually 9.

It is proposed to form 22 companies of frontier guards to relieve the numerous small detachments of regular troops scattered along the European frontier.

The approximate peace strength of the Turkish army (not the peace establishment) has been of late years, about 230,000 of all ranks. Of these about 20,000 are in Yemen, 10,000 in Hedjaz, and 10,000 in Tripoli.

The Gendarmerie—The extent of the Turkish Empire, its many subject races and turbulent elements, have necessitated the formation of large forces of Gendarmerie, amounting altogether to about 42,000 men, of whom 16,000 to 17,000 are mounted. Of these, 11,000, roughly speaking, are (or were) in European Turkey, 29,000 in Asia Minor, 1,500 in Arabia, and 1,000 in Tripoli. The Gendarmerie is recruited partly from the reserve of the *Nizam*, and partly by direct enlistment, it, however, is being amalgamated.

Tripoli Lebanon — Since there been in Tripoli a local militia force consisting on paper of battalions and cavalry regiments, in which compulsory, and it hoped that a complete Redif division might be organised eventually. There is also a Lebanon militia, consisting of 2 battalions and a squadron.

The War Minister is responsible for the administration and efficiency of the army. Under him there is Chief of the General the head of a General Staff Department of 8 sections. The Master General of the Ordnance, who is responsible for material, is also under the War Minister; formerly he was independent.

The Turkish budget for 1910-11 showed an expenditure of £6,971,012 the estimates of the Minister of War, and of £300,000 in those of the Grand Master of the Ordnance, total £7,291,012. The provision made for the Gendarmerie was £1,427,014.

The Turkish infantry in the first three 'Inspections' both Nizam and Redif, have the 7 mm Mauser magazine rifle, model 1898. Elsewhere they often have older weapons. The Turkish field artillery is now being rearmed with F Krupp guns of the latest patterns. All horse and batteries are to have the 7.5 cm. The mountain batteries have the light 7.5 cm Krupp, and howitzer batteries a 15 cm (6 inch) piece. Three batteries of 10.5 cm (4.2 inch) position guns have also been ordered.

III. NAVY.

For the navy of Turkey the are raised in the same manner as the land forces, partly by conscription, and partly by voluntary enlistment. The of in the navy is twelve years, five in active service, three in the reserve, and four in the Redif. The nominal strength of the navy is 1 vice-admirals, 11 rear-admirals, 208 captains, 289 commanders, 10 lieutenants, 187 ensigns, and 80,000 sailors, besides about 9,000.

The principal ships are as follows:

Launched	Name	Displacement	Armour		Armament	Torpedo Tubes	Horsepower	Maximum speed
			Belt	Gun

¹ Ex German battleships. ² Reported seized by Italy. ^(?) Reported —

The Ottoman Navy has been in the course of reorganization for the last two years under two British Admirals and a British [redacted] of navigating, torpedo and gunnery officers. When the [redacted] with Italy broke out (1911) there [redacted] 8 effective destroyers and 14 torpedo boats, all under ten years old.

There [redacted] also torpedo gunboats *Peik* = *Shevket* and *Berk* = *Savfet* (1906), of [redacted] knots, *Pelenkileria* (1890), of [redacted] knots, and a variety of small gunboats. Two scouts, nine [redacted] ton destroyers and [redacted] submarines, [redacted] older [redacted] projected.

Production and Industry.

Land in Turkey [redacted] held under four different forms of tenure—namely, 1st, as 'Miri, or Crown lands, 2nd as 'Yakuf,' [redacted] pious foundations, 3rd, 'Mulikaneh,' or Crown grants, and 4th, [redacted] 'Mulk, or freehold property. The first description, the 'miri,' [redacted] Crown lands, which form the largest portion of the territory of the Sultan, are held direct from the Crown. The Government grants the right to cultivate [redacted] unoccupied tract on the payment of certain fees, but continues to exercise the rights of seigniorry over the land in question [redacted] implied in the condition that if the [redacted] neglects to cultivate it for a period of three years it is forfeited to the Crown. The second form of tenure, the 'Yakuf,' was instituted originally to provide for the religion of the State and the education of the people, by the erection of mosques and schools, but this object has been set aside, or neglected for several generations, and the 'Yakuf' lands have mostly been seized by Government officials. The third class of landed property, the mulikaneh, was granted to the spahis, the old feudal troops, in recompense for the military service required of them, and is hereditary, and exempt from tithes. The fourth form of tenure, the 'mulk,' [redacted] freehold property, does not exist to a great extent. Some house property [redacted] the towns, and of the land in the neighbourhood of villages, [redacted] 'mulk,' which the peasants purchase from time to time from the Government.

The system of levying a tithe on all produce leaves no inducement to the farmer to grow more than [redacted] required for his own use, or in his immediate proximity. The agricultural development of the country [redacted] further crippled by custom dues for the exportation of produce from [redacted] province to another.

Agriculture [redacted] most primitive. The soil for the most part is very fertile, the principal products are tobacco, cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, all varieties of fruits. Coffee, madder, opium, gums, [redacted] largely exported. In 1911, the produce of wheat [redacted] 164,979,000 bushels, barley, 119,903,600 bushels, oats, 20,995,400 bushels, rye, 17,939,000 bushels, corn, 33,339,700 bushels. Of these amounts Turkey in Asia produced 145,519,000 bushels of wheat, 106,271,000 bushels of barley, 14,456,000 bushels of oats, 12,093,700 bushels of rye, and 18,856,200 bushels of [redacted]. Flour milling [redacted] Smyrna is being improved and extended. Coffee [redacted] grown in the Hodeida region, opium [redacted] an important crop [redacted] Konia. Tobacco is grown both in European and Asiatic Turkey, the 1911 crop having been the largest gathered since 1903. The abolition of the monopoly [redacted] 1914 will increase the production still more. In 1911, 54,468,084 pounds were exported. The forest laws of the empire [redacted] based [redacted] those of France, but restrictive regulations are not enforced, and the country [redacted] being rapidly deprived of [redacted] timber. About [redacted] million acres are under forest, of which 3½ million acres are [redacted] European Turkey [redacted] [redacted] of pine, fir, larch, oak, cedar and other timber [redacted]. Extensive mulberry plantations have been founded both in European and Asiatic Turkey, and about 250,000 plants are annually distributed to the

peasants [REDACTED] production of oil of roses is encouraged by the Government, who supply stocks of [REDACTED] plants to the peasantry. In cotton growing regions the Government distribute also cotton seed of good quality. The cotton crop of the Province of Adana amounted to 72,000 bales [REDACTED] 1910, of which about 6,000 bales consisted of long fibre (American) cotton and the balance of short fibre (native) cotton.

In Asiatic Turkey, 16,567,775 [REDACTED] are under cultivation [REDACTED] follows — 13,649,474 acres under cereals, fruit and vegetables, 473,085 [REDACTED] industrial products (cotton, flax, etc.), 779,982 acres, and vines, 1,213,630 [REDACTED].

In Palestine [REDACTED] interesting feature in agricultural development [REDACTED] the establishment of Jewish and German colonies, of the former [REDACTED] Jaffa there [REDACTED] 26 with [REDACTED] total population of about 7,88% cultivating [REDACTED] than [REDACTED] acres, the chief produce being cereals, cotton, and various fruits. These colonies [REDACTED] mainly of Russian Jews, some being maintained by private enterprise, others by the Chovav Zion Association, and others again (originally founded by Baron [REDACTED] de Rothschild) by the Jewish Colonization Association. The [REDACTED] German colonies in the Jaffa region [REDACTED] also mainly agricultural. A very comprehensive survey has been in the [REDACTED] of execution during the last two years in Mesopotamia with [REDACTED] view to the irrigation of huge tracts of land which have lain waste for centuries but which bear clear evidence of having been artificially irrigated in ancient times. The irrigation scheme [REDACTED] almost complete.

The Turkish provinces, especially those in Asia, [REDACTED] rich in minerals, which are little worked. In 1906 a new mining law came into force. Chrome [REDACTED] exported from Turkish ports mostly from Europe and Marmora. There [REDACTED] 3 chrome mines [REDACTED] Merzina worked by primitive methods, the Government silver mines at Bulgan Maden, Konia produce annually about 2,600 kilos of silver and 400 tons of silver lead, Zinc is found at [REDACTED] the Black Sea and in Aidin, manganese ore (3,000 tons) at Salonica, [REDACTED] Konia and Aidin, antimony ore, [REDACTED] tons, copper ore is found in the Armenian Taurus, at Tereboli, [REDACTED] Trabizond, at Afghana Maden near Diarbeki, said to be [REDACTED] of the largest and most productive [REDACTED] in the world and [REDACTED] the Xanthi district [REDACTED] the Dedeagatch Salonica rail way, borax from [REDACTED] to 8,000 tons exported annually from Marmora, meerschaut at Eskiwhichr, argentiferous pyrites, at Salonica, chrome [REDACTED] Merzina, emery at Smyrna, in Aidin, Konia, Adana, and the Archipelago, asphalt, at Vanina, [REDACTED] Myria, and on the Euphrates, coal and lignite (400,000 tons annually) [REDACTED] Heracles [REDACTED] the Black Sea, also in the Smyrna district, petroleum in the Middle Tigris valley and various isolated places in Asia Minor, also [REDACTED] the north coast of the Sea of Marmora. The salt mines [REDACTED] [REDACTED] Yenien yield a large output. In 1911 [REDACTED] the quantity sold amounted to 846,625 metric tons, of which 261,947 tons [REDACTED] sold in Turkey and the rest abroad. There [REDACTED] salt works also at Aleppo, Erzeroum, Samos, Crete, and other places. Both gold and silver [REDACTED] found in the Smyrna sanjak; gold and silver and argentiferous lead at Bulghai Maden (Konia), mercury [REDACTED] Smyrna and [REDACTED] [REDACTED] Konia, kaolin in the [REDACTED] Rhodes, [REDACTED] Aidin, iron in Aleppo and in Kossaro (not worked), [REDACTED] Adana (output 40,000 tons a year). Many of these minerals are scarcely worked. [REDACTED] Brusa quarries of lithographic stone [REDACTED] now extensively [REDACTED]. There is a good deal of brass-turning and beating of copper [REDACTED] utensils for household purposes.

[REDACTED] fisheries of Turkey are important; the fisheries of [REDACTED] Bosphorus alone represent a value of upwards [REDACTED] 250,000l, though the fishery methods

are antiquated. The coast of the Mediterranean produces excellent sponges, the mother-of-pearl, and Persian Gulf pearls.

Industries in Turkey are mostly quite primitive. There is a tendency to start factories on a small scale, but the supply of labour is likely to prove a difficulty. A glass factory on the Golden Horn, belonging to the Civil List Department, has been leased and is being worked under British management. It employs 250 hands, and turns out about 2,000 worth of glass bottles, etc., per month. There is another glass factory working in Constantinople at Pasha Bagtche, on the Bosphorus. It employs 350 hands, and produces about 3,000 worth of glass monthly. An Ottoman company has been formed, under British management, to manufacture soap. The works are on the Golden Horn, and produce about 50 tons of soap per month.

A brick and tile factory has started work at Pasha Bagtche, on the Bosphorus, on a small scale, and is to be considerably extended. A company has been formed for starting a floating dock at Steniz, on the Bosphorus. Two cement factories have been established with local capital at Guebeh, on the Gulf of Ismidt, and the cement is on the market at the price of 12 piastres per sack of 40 kilos.

The Turkish Government cloth mills at Kari Mursal and Ismidt have been equipped with new machinery, and manufacture the khaki woollen cloth required by the army. At Pauderma there is a woollen yarn spinning mill belonging to the Oriental Carpet Manufacturers' Company, which produces 2,750,000 lbs. annually, and employs 140 hands. At Smyrna a weaving mill has been opened, with a producing capacity of 500,000 metres (about 540,000 yards), which will be increased this year to 1,200,000 metres (about 1,312,000 yards). It will employ 400 hands.

Commerce.

In 1675 the commercial privileges granted under Capitulations to several foreign nations were extended to the English, and in 1809 these were confirmed by treaty. The 8 per cent *ad valorem* duty has been increased to 11 per cent. The total trade of Turkey in various years ending February 28 has been as follows (£T1 of 100 piastres = 18 shillings, £T10 = 91, 10/- = £T11) —

Years	Imports	Exports	Years	Imports	Exports
1900	23,959,120	12,982,900	1900	31,432,221	15,439,071
1901	22,046,560	16,082,200	1901	33,382,556	18,108,447
1902	24,673,619	19,218,031	1902	37,774,913	22,474,000

The chief imports and exports in 1910-11 are:—

	Imports	Exports		Imports	Exports
	£T	£T		£T	£T
Cattle	554,058	620,000	Wool	2,064,311	565,586
Other products	573,356	1,015,513	Timber	861,484	372,072
Cereals	4,810,388	1,991,682	Hides and skins	1,404,524	780,496
Fruit	312,488	4,540,361	Textiles	13,864,750	5,435,582
Wool, tea, etc.	1,115,824	238,658	Tobacco	—	2,705,874
Sugar	3,220,111	—	Machinery	854,494	8,871
Oil and tallow	1,589,937	930,000	Drugs	242,401	1,897,642
Chemicals	573,373	704,758	Jewellery	584,237	—,000

The trade of Turkey is largely with Great Britain, Austria, France, Germany, Italy and Russia. In 1910-11 it was distributed as follows :—

	Imports	Exports		Imports	Exports
	£T	£T		£T	£T
Great Britain	7,504,166	4,752,490	Italy	3,238,001	1,809,158
Austria-Hungary	6,772,497	1,941,487	Germany	2,475,922	800,677
France	3,477,704	3,896,841	All other couns	10,762,627	5,674,068
Germany	3,443,847	1,128,664	Total	37,000,160	19,580,564

Tobacco imported and exported is included in this table.

The value of commercial intercourse between the whole of the Turkish Empire, in Europe and Asia (including Crete), and Great Britain during the last five years, according to the Board of Trade Returns, is shown in the following table :—

	1908	1909	1911	1912
Imports into U. Kingdom	£ 5,158,149	£ 5,145,785	£ 4,808,076	£ 5,841,126
Exports of British produce to Turkey	7,010,164	7,611,084	6,636,666	5,100,000

The principal imports from Turkey into the United Kingdom and exports to Turkey from the United Kingdom (according to Board of Trade Returns, in two years were :—

Imports from Turkey	1910	1911	Exports to Turkey	1910	1911
Barley	491,401	1,847,448	Coal, coke	374,637	353,708
Wool	333,768	526,798	Cotton yarn	333,324	427,841
Angora Goats' hair	704,590	444,816	Ortens	5,280,893	5,792,596
Wool	267,006	327,876	Woolens	940,478	704,160
Woollen goods	270,648	266,611	Iron goods	201,008	274,147
Opium	291,702	374,140	Machinery	384,017	375,274

Shipping and Navigation.

The mercantile navy of the Turkish Empire in 1911 consisted of 66,878 tons, and sailing vessels of 205,641 tons. At Constantinople in 1911 there entered and cleared 21,338 vessels of an aggregate tonnage of 20,171,065 tons. This number comprised, in the foreign trade, 3,787 sailing vessels of, in the aggregate, 234,584 tons, 1,664 of 2,791,239 sailing regularly, and 10,681 of 16,701,877 sailing regularly; in the coasting trade, 2,960 sailing 62,244 tons, and 2,246 of 380,971 tons. The liners visit Constantinople (German, Russian, Austrian, Italian, Turkish, French, Egyptian, the last-named under British flag). Of the tonnage entered in 1911, 8,646,189 was Greek, 3,205,742 Greek, 2,194,545 Austro-Hungarian, 1,288,755 Russian, 678,208 French, 864,578 Turkish, and 770,568 German.

Internal Communications.

The length of railway line in European and Asiatic Turkey in 1912 ~~is~~ as follows :— Miles open

European—		open	
Salonica-Monastir ¹	■	Smyrna-Aidin	320
Constantinople-Salonica ¹	317	Konia-Eregli Persian Gulf ¹	125
Oriental Railways	■	Mersina Adana	■
		Beirut-Damascus	96
Total European	1,239	Rayak Aleppo ¹	■
		Damascus Medina	812
		Jaffa-Jerusalem	54
		Haifa Deira	105
Asiatic—		Total Asiatic	2,836
Haider Pasha Angora ¹	358		
Eshki Sheki Konia ¹	288	Total Ottoman Empire	4,075
Mudania Brussa	25		
Smyrna-Cassaba ¹	165		
Alashen Afion Karahissar	156		

¹ ~~These~~ railways have a kilometre guarantee. The guarantee paid by the debt council amounted to £15,891⁹ in 1911, £120,141 in 1911

The German concession of the Baghdad Railway is to extend the Anatolian line from Konia to Adana, Mosul, Baghdad, and Busra, with many branch lines and ■ extension to a port on the Persian Gulf. It has been constructed as far as Bulgurlu, about 15 miles beyond Eregli, and a company has been formed to carry it 840 km (520 miles) further. The Haifa railway has been extended to Deira, where it joins the Mecca Railway.

Schemica are under consideration for the construction of ■ miles of railway and 440 miles of junction lines ■ Europe, and 4,940 miles of railway in Asia, total, 6,008 miles in the Turkish Empire.

Electric tramways ■ working in Smyrna, Damascus, Beyrouth, and Salonica.

There are 929 Turkish post-offices in the Empire. In the year 1910-11 the inland service transmitted 30,731,000 letters and 1,709,000 post cards, and 15,376,000 samples and printed papers; the international service transmitted 14,069,000 letters and 3,052,000 post-cards, and 4,327,000 ■ and printed papers. A parcel post system has been introduced into Turkey, and works fairly well.

Foreign post-offices ■ maintained in most of the large coast towns by nations commercially interested.

The length of telegraph lines in Turkey is about 28,890 miles, and the length of ■ about 49,200 miles. There are 1,017 telegraph offices. Messages in the year 1910-11, 7,145,138.

Money, Weights, and ~~Weights~~ Turkey.

The Imperial Ottoman Bank, with ■ capital of £10,000,000, had, ■ Nov 30, 1910, a note circulation of £1941,250, and cash on hand amounting to £18,586,834.

The ■ value of ■ coinage (including recoinage) of Turkey ■ Gold, £142,128,321; silver, £110,521,665; copper (in 1906), £148,015. In 1907 silver pieces were coined to ■ nominal value ■ 30,110,000 piastres. ■ coins ■ 20 paras and 10 paras have been introduced into ■ coinage during 1911.

	£	s.	d.
The Turkish Lira, or gold Medjidi	0	18	0.064
Piastre, 100 to the Lira	0	0	2.16
■ £11 = £10 approximately.			

Large accounts are frequently, as in the budget estimates, given down in 'purses' of 500 Medjidie piastres, or 5 Turkish liras. The 'purses' are calculated as worth £ 10s. sterling. The gold *Zarz* weighs 1 gramme fine, and thus contains 6147 grammes of fine gold. The silver 20-piastre piece weighs 24.055 grammes .830 fine, and therefore contains 19.9 grammes of fine silver.

The <i>Oke</i> , of 1 dram.	2 lbs. avoirdupois.
" <i>Almed</i>	1 161 imperial gallon.
" <i>Kileh</i>	0 9120 imperial bushel.
44 <i>Okes</i> = 1 <i>Canlar</i> or <i>Kinial</i>	= 125 lbs. avoirdupois.
39 <i>Okes</i>	= 1 cwt
180 <i>Okes</i> = 1 <i>Cheke</i>	= 511 pounds.
1 <i>Kile</i> = 100 <i>Okes</i>	= 0 imperial quarter
816 <i>Kilehs</i>	= 100 imperial quarters.
The <i>Endast</i> (cloth measure)	= 27 inches.
" <i>Arshin</i> (land measure)	= 30 inches
" <i>Donum</i> (land measure)	= 40 square paces.

The *kile* is the chief measure for grain, the lower measures being definite weights rather than measures. 1000 *kiles* are equal to 12 126 British imperial quarters, or 266 hectolitres.

In 1889 the metric system of weights was made obligatory for cereals, metric weights were declared obligatory in January 1892, but the decree is not yet enforced.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN.

Ambassador.—Ahmed Riza Bey (1912)

Councillor of Embassy.—H. Djevad Bey.

First Secretary.—Réouf Ahmed Bey.

Second Secretary.—Beikis Bey

Third Secretary.—H. Chefik Bey.

Honorary Attaché.—L. Moisel Bey.

Naval Attaché.—Commander Hussein Bey.

Councillor.—Djevad Bey

Consul-General in London, Mundji Bey.

There are Consular representatives of Turkey at the following places—

Birmingham, Bradford, Cardiff, Dublin, Jersey, Liverpool (C. G.), Newcastle-on-Tyne, Glasgow, Hartlepool, Hull, Leith, Manchester, Southampton, Sunderland, Swansea, &c.

2. OF GREAT BRITAIN IN TURKEY.

Ambassador.—Rt. Hon. G. A. Lowther, G.C.M.G., C.B.

Councillor.—C. M. Marling, C.B., C.M.G.

Chief Dragoman.—G. H. Fitzmaurice, C.B., C.M.G.

Secretaries.—G. Kidston, E. Ovey, Hope-Vere, Lord G. Wellesley, H. Nicolson, E. A. Keeling (acting).

Attachés.—R. Smith-Barry and Hon. Richard Leigh.

Military Attaché.—Major G. Tyrrell, R.A.

Judge.—R. B. P. Cator.

Judge.—Peter Gain.

Commercial Attaché.—E. Wankley, C.M.G.

Consul-General.—H. C. A. Eyres.

There are British Consular Representatives at the following places —
Consuls-General — Baghdad, Beirut, Salonica, Smyrna
Consuls — *Vice-Consuls* — Aleppo, Benghazi, Adrianople, Bussora, Bitlis, Damascus, Jaffa, Jeddah, Jerusalem, Erzerum, Samos, Smyrna, Tiflitz, Brusa, Dardanelles, Gallipoli, Scutari, Adana, Antioch, Van, Rhodes, Scala Nuova, Kharput, Sivass, Diarbekr, Konia, Uskub, Monastir, Deira, Mosul, and Kaibala.

TERRITORIAL STATUS

CRETE.

Island of Crete was under Venetian rule from 1211 to 1669, when it fell beneath the Ottoman power. Thenceforth (with the exception of about 10 years, 1830-40, when it was ruled by the Viceroy of Egypt) it was governed as a Turkish vilayet. After more than 70 years of almost continuous insurrection, the Powers—Great Britain, Russia, France, and Italy—intervened, and in 1830 constituted the Island, with the adjacent islets, an autonomous territory under a High Commissioner of the Powers, subject to the suzerainty of the Porte, paying, however, no tribute. Since August 14, 1906, the right of the King of the Hellenes to propose the High Commissioner has been recognised by the protecting Powers, under whose sanction Greek officers have taken over the direction of the Gendarmerie and Militia.

The events of September and October, 1908, in the Balkans having fostered agitation in Crete for annexation to Greece, the Powers have declared that the administration of the island will be entrusted to the "constituted authorities" until the question can be settled with the consent of Turkey. In September, 1911, the signatory powers decided not to fill the post of High Commissioner, nor in any way to change the *status quo* of the island. This leaves the Government of the island in the hands of a Commission and an Assembly acting like all other authorities in the island, in the name of the King of the Hellenes.

In October, 1912, the Cretan deputies were admitted into the Greek Parliament at Athens, and the proclamation of the annexation (Oct., 1908) with the kingdom was sanctioned by the Greek Government. Stephen Dragoumis, a late premier of Greece, was appointed Governor of the Island.

At the present, however (March, 1913), the Greek annexation has not been recognised by the Powers, but in all probability the recognition will be forthcoming. The peace between Turkey and the Balkan allies is signed.

Area and Population.

The Island is about 160 miles in length and from 10 to 15 miles in breadth, the total area being 3,365 square miles. It is divided into 5 departments, 11 cantons, and 77 parishes. According to the results of the census of June 5, 1911, the inhabitants, at that date, numbered 342,151, of whom 307,812 were Christian, 27,852 Mussulman, and 487 Jewish, and 6,000 foreigners. Besides this there are 11,055 persons who were temporarily abroad during the last census, thus making the total population 358,206. Between 1900 and 1910 the total population had increased by 43,021; the Greek element had increased by 37,964; the Mussulman element had decreased by 5,644. All the inhabitants of the Island, even the Mussulmans, speak Greek. The chief towns are Canes, the Capital, with (1911) 24,899 inhabitants; Rethymo, 9,086; Candia, 25,185.

Religion and Education.

In the Island there are about 3,500 Greek churches and chapels and 10 Catholic churches, 10 mosques, and 30 Mohamedan mosques, then 15 Greek monasteries, and 10 nunneries. The Church of the Holy Trinity is directed by the Synod, consisting of the metropolitan and 10 bishops of the Island, sitting at Heraklion (Candia). Education is nominally compulsory from 6 to 12 years of age.

Christian primary schools, with 362 teachers and 38,642 pupils (27,878 boys and 10,764 girls), 19 Mohamadan primary schools, with 71 teachers and, 1,917 pupils (1,420 boys and 497 girls). The secondary schools (7 progymnasias, ■ high schools for girls, and 4 gymnasia), all Christian, numbered (1910) 15, with 45 teachers and 2,378 pupils (1,926 boys and 452 girls). The school enrolment averages about 1 pupil for 10 inhabitants. For Education Government grants (1910) about 1,056,066 drachmai annually. The judicial system, organised on ■ Greek pattern, comprises 2 courts of appeal, 5 courts of assize, 26 justice of peace courts. There ■ a police force of about 1,500 and 26 officers, and the militia 1,000 men, both commanded by 41 Greek officers.

Finance.

The revenue and expenditure for five years, ending August 31 (O S.), were in drachmai or francs as follows:—

	1907-08	1908-09	1909-10	1910-11
Revenue	8,411,411	8,990,193	9,990,113	10,411,257
Expenditure	4,371,174	5,907,940	6,119,190	6,671,261

Revenue is derived from customs receipts (averaging about 2,500,000 drachmai per annum) from excise, tobacco, and salt monopolies, stamps, court fees, fines, and from taxes on articles of consumption. The expenditure in 1910-11 comprised for public instruction 1,129,412 drachmai, for justice 798,660, for the home department 673,211, for finance 1,044,718, and for public security and public works 4,721,190.

The public debt in 1911 amounted to 5,317,226 francs, most of which was advanced by the four Powers at an annual interest and sinking fund (at 5 per cent) of 200,000 drachmai, the service of which has been postponed until 1911. The Government has been authorized to contract ■ loan of 9,300,000 drachmai, mostly for public works. In 1901, Turkey conceded to the island her rights in the salt monopoly for ■ sum of 1,500,000 drachmai, of which, in September 1905, the amount outstanding was 1,310,589 drachmai.

Agriculture and Commerce

Crete ■ mainly agricultural, and its chief product is olive oil, used partly in the manufacture of soap (annual produce about 3,155,000 kilos, worth about 17,600,000 drachmai), for which there ■ 18 factories. The annual yield of oil averages ■ about 33,000 tons, but good and bad years alternate. Other products are carob beans (1,560,000 dr), valoneas, dry and fresh fruits, ■ (1,110,000 dr exported to Malta), chestnuts, hides and leather (from 10 tanneries), cheese, ■. There are about 400,000 sheep and 120,000 goats, besides horses (10,000), asses (40,000), ■ (70,000), and pigs (20,000) ■ the islands.

The ■ of the island ■ mainly with Greece and Turkey. In the ■ 5 years, the value of the imports and exports ■ as follows, in

	1907	1908	1909	1910	1911
Imports	750,061	842,869	698,067	726,012	662,289
Exports	478,080	■	■	604,371	■

The chief exports in 1911 were olive oil, valued at 194,830*l*, carob beans, 72,451*l*, soap, 45,523*l*; raisins, 95,657*l*; wine, 58,807*l*, oranges, 13,544*l*, sheep and goat skins, 11,603*l*.

In 1911 there entered and cleared at the ports of the island 8,414 vessels of 1,811,500 tons. One-third the tonnage was Austro-Hungarian, and the remainder mostly Italian, Russian, and French.

Crete has entered the Postal Union. There are 28 Cretan post-offices, besides Austrian, French, and Italian offices on the island. In 1910-11, 1,881,210 inland and 292 international letters passed through the Cretan post offices. Receipts 281,055 dr, expenditure 221,797. There were (in 1909) 368 miles of telegraph line, and 15,646 inland telegrams and 45,148 foreign telegrams.

The Bank of Crete, founded in 1899, with a capital of 5,000,000 gold drachmas, has obtained for 30 years the exclusive right of issuing notes. The Cretan money is similar to that of Greece. There are silver coins of 5 and 2 drachmas, and of the drachma and $\frac{1}{2}$ drachma (50 lepta), and copper and nickel coins of 1, 2, 5, 10, 20 lepta. The drachma is equivalent to the franc, or 25.225 dr = £1. The old Turkish piastre, however, still lingers. The metric system of weights and measures is in general use, but the *oke* (2.8 lbs.), and the *pieque* ($\frac{1}{2}$ yard) are also in vogue. The circulation of foreign money is prohibited, except European gold coins.

There is an Agricultural Bank, founded in 1864. It has a capital of 9,960,941 drachmas, and makes small advances to farmers at 6 per cent interest.

British Consul General at Candia—A. C. Wratislaw, C.B., C.M.G.

There are vice consuls at Candia, Candia, and Rethyma.

SAMOS.

An island off the coast of Asia Minor, forming a principality under the sovereignty of Turkey, under the guarantee of France, Great Britain, and Russia, December 11, 1832.

Governor.—*Bagley Effendi* (appointed 1912).

Area 180 square miles; population (1902) 53,424. There are besides, 15,000 natives living on the coast of Asia Minor. There are 1,836 foreigners, of whom 1,221 are Greeks. In 1899 there were 824 marriages, 1,545 births, and 1,221 deaths. The religion is the Greek Orthodox.

The estimated revenue for 1910 was 3,716,968 piastres, and expenditure 3,627,496. Public debt, 2,570,500 piastres.

The most active industries are the manufacture of wine, oil, cigarettes, leather, and brandy. Tobacco, wine and olive oil are produced.

Samos is known to contain deposits of various minerals including antimony, silver-lead manganese, copper, zinc, and marble, but there is little oil no mining.

The imports for 1911 amounted to 19,741,212 piastres, and the exports to 37,036,252. The chief exports were wine, raisins, leather, oil, cigarettes, spirits, and carob beans.

In 1910, 1,338 vessels of 486,076 tons entered the ports of the island they were mostly Austrian, Turkish, French, and Greek.

In 1910, 146,840 letters passed through the Post Office. The number of telegraphic despatches was 11,962.

EGYPT.

(MISR.)

Reigning Khedive.

Abbas Hilmi, born July 14, 1874; son of Mohamed Tewfik; succeeded to the throne on the death of his father, January 8, 1892; married Princess Ikbal Hanem; offspring: Princess Emina Hanem, born February 12, 1895; Princess Atiatou Iah Hanem, born June 9, 1896; Princess Fathieh Hanem, born November 27, 1897; Prince Mohammed Abdul Mounem, heir-apparent, born February 20, 1899; Prince Loutfi Hanem, born September 1900; Prince Abdul Kader, born February 4, 1902. He has one brother, Mohamed Aly, born October 29, 1876, and two sisters, Khadijah Hanem, born May 2, 1879; married January 31, 1895, to Abbas Pasha Helim; Nimet Hanem, born November 6, 1891; married (1) January 8, 1896, to Djemil Tassun Pasha, divorced (2) 1904, to Hussein Kemal-ed-Din Pasha. The present sovereign of Egypt is the seventh ruler of the dynasty of Ali, appointed Governor of Egypt 1806, who made himself, in 1811, independent of the country by force of arms. The position of the Khedive's grandfather, I.—forced to abdicate, under pressure of the British and French Governments, 1879—was recognised by the Imperial

Shériff of February 13, 1841, issued under the guarantee of the five great European Powers, which established the hereditary succession to the throne of Egypt under the same rules and regulations as those to the throne of Turkey. The title given to Mehmet Ali and his immediate successors was the Turkish one of 'Vali,' or Viceroy; but this was changed by Imperial firman of May 21, 1848, into the Persian-Arabic 'Khidāwī-Mīr,' or, as more commonly called, Khedive. By the Imperial firman of May 27, 1868, obtained on the condition of the sovereign of Egypt raising his annual tribute to the Sultan's civil list from 376,000*l.* to 720,000*l.*, the succession to the throne of Egypt was made direct from father to son, instead of descending, after the Turkish law, to the eldest son. By a firman issued June 8, 1873, the Sultan granted Ismail I. the hitherto withheld rights of concluding commercial treaties with foreign Powers, and of maintaining armies.

The predecessors of the present ruler of Egypt were—

	Born	Died	Reigned
Mehemet Ali, founder of the dynasty	1769	1849	1811–48
Ibrahim, step son of Mehemet	1789	1848	June–Nov 1848
Abbas, grandson of Mehemet	1813	1854	1848–54
Said, son of Mehemet	1822	1863	1854–63
Ismail, son of Ibrahim	1830	1896	1863–79
Mohamed Tewfik, son of Ismail	1852	1892	1879–92

The present Khedive of Egypt has an annual allowance of £E100,000

Government and Constitution.

The administration of Egypt is carried on by native Ministers, subject to the ruling of the Khedive. From 1879 to 1883 two Controllers General, appointed by France and England, had considerable powers in the direction of the affairs of the country (Khedivial Decree, November 10, 1879). In the summer of 1882, in consequence of a military rebellion, England intervened, subdued the rising, and restored the authority of the Khedive. In this intervention England was not joined by France and as a result, on January 18, 1883, the Khedive signed a decree abolishing the joint control of England and France. In the place of the Control, the Khedive, on the recommendation of England, appointed an English financial adviser, without whose financial decision no financial decision was to be taken. The financial adviser has a right to a seat on the Council of Ministers, but he is not an executive officer. The Khedivial Decree appended to and approved by the Anglo-French Convention of April 4, 1904, has removed most of the restrictions which encumbered the management of Egyptian Finance. No modification may be introduced into the terms of the Convention without the assent of the signatory powers to the Convention of London of 1885.

The Egyptian Ministry is at present composed of six members, among whom the departmental work is distributed as follows—1 President—Interior; 2 Finance, 3 Foreign Affairs, 4 Justice, 5 Public Works, War and Marine, 6 Education.

On May 1, 1883, an organic law was promulgated by the Khedive creating a number of representative institutions, including a Legislative Council, a Chamber of Deputies, and Provincial Councils. The Legislative Council is a consultative body, consisting of 30 members, of whom 14 are nominated by the Government. The Council meets on Nov. 15 each year, and continues its session till the end of May, the following year. It might be summoned to hold extraordinary meetings by decree. Its session is closed until

■ informs the Government of its opinion on all questions submitted to it. It examines the budget and all proposed administrative laws, but it cannot initiate legislation and the Government ■ not obliged to act on ■ advice. Of its members, 12 residing in Cairo ■ an allowance of 100l ■ year for carriage expenses, and 17, having their residences in provincial towns, ■ allowances varying between 285l to 316l a year for residential expenses ■ Cairo. The General Assembly, which consists of the members of the Legislative Council with the addition of the ■ ministers and 46 members popularly elected, has ■ legislative functions, but no ■ direct personal or land tax ■ be imposed, and no public loan ■ be contracted, without its consent. It has to be summoned at least ■ every two years. The members, when convoked, ■ an allowance of 1l ■ day, with railway expenses. The Council of Ministers, with the Khedive, ■ the ultimate legislative authority. Since 1887 an Ottoman High Commissioner has resided in Cairo. The Provincial Councils have been reorganised, and ■ 1910 were endowed with the powers of applying bye laws, authorising public markets, fixing the number and pay of ghaffars (village watchmen), authorising the creation of esbeks (hamlets), and they ■ created local authorities in conjunction with elementary vernacular education and trade schools. They consist of two elected representatives from each Markaz. The Mudir is the ex officio President of the Council.

Egypt Proper is administratively divided into 5 governorships (mohalazas) of principal towns, and 14 mudiras ■ provinces, subdivided into districts or Markaz. In 1890 the Powers consented to a decree constituting ■ Municipality in Alexandria, with power to impose local taxes.¹

In thirteen towns (Mansouria, Medinet el Fayum, Tanta, Zagazig, Da-masuhou, Beni Suef, Mahala el Kubia, Minia, Mit Ghami, Zifta, Kati el Zayat, Hebouan, and Port Said) Mixed Commissions have been formed with power to impose taxes on residents who have given an express consent to be taxed for municipal purposes.

In 30 other towns a third class of town council (Local Commissions) exists, but there is no power to impose local taxes, the revenue being derived from grants from the central Government and receipts from water supply, slaughter houses, &c.

Liberal arts	121,782	4,346	126,128
Persons living solely on their incomes	97,813	13,800	111,613
Domestics	67,263	2,201,251	2,268,514
General designation without indication of a determinate occupation	69,544	3,781	73,325
Unproductive and unknown occupation	2,408,680	4,169,484	6,578,164
Fresh-water fish and game	37,491	—	37,491
Nomad population	2,434	4,947	7,381
Extraction of minerals	4,112	—	4,112
			11,387,859

Of the Egyptian population over 10 years of age, 62.65 per cent were employed in agriculture; of the foreign population, less than 1 per cent. Egyptian population, 16.27 per cent employed in various industries and trades; of the foreign population, 47.85 per cent. Of the total number employed in the liberal professions, 1 per cent. foreigners.

The principal towns, with their populations in 1907, are — Cairo, 654,476; Alexandria, 332,246; Tanta, 54,437; Port Said, 49,884; Mehalla el Kobra, 47,955; Mansura, 40,279; Assiut, 39,442; Damauhbour, 38,752; Fayum, 37,820; Zagazig, 34,999; Damietta, 29,354; Minia, 27,221; Sherbin, 25,473; Akhmim, 23,795; Beni-Suef, 23,357; Menut, 22,316; Shihin el Kom, 21,576; Mellawi, 20,249; Qena, 20,069.

Religion and Instruction.

In 1907 the population consisted of 10,366,826 Moslems; 706,322 Copts, 38,885 Jews, Christians 12,738 Protestants; 57,744 Roman Catholics; 76,953 Greek Orthodox; 27,937 Eastern Christians; 206 others. Thus Moslems formed 91.84 per cent of the population; Christians, 7.81 per cent, Jews, 0.34 per cent; others, 0.01 per cent. The highest religious and judicial authorities among the Moslems are the Sheikh-ul-Islam appointed by the Khedive and chosen from among the learned class of Ulema, and the Grand Cadi nominated by the Sultan, and chosen from amongst the learned Ulema of Stamboul. The principal seat of Koranic learning is the Mosque and University of Azhar at Cairo, founded year 361 of the Hegira, 972 of the Christian era. In 1908 it had 329 professors and 9,940 students of Islam and subjects connected therewith. The Mosque of El-Ahmadi at Tanta had 89 professors and 3,607 students.

There are in Egypt large numbers of native Christians connected with the various Oriental churches; of these, the largest and most influential are the Copts, the descendants of the ancient Egyptians; their creed is Orthodox (Jacobite), and was adopted in the first century of the Christian era. Its head is the Patriarch of Alexandria as the successor of St. Mark. There are three metropolitans and twelve bishops in Egypt, one metropolitan and two bishops in Abyssinia, one bishop for Khartum; there are also arch-priests, priests, deacons, and monks. Monks must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 132 years from the Gregorian calendar.

100 TURKEY AND SYRIA :—EGYPT

The following table shows the proportion of illiterates in the religious communities (1907 census) —

Religion	Population	Number illiterates per 1000		
		Males	Females	Total
Moderns	10,269,443	91.2	98.8	95.0
Copts	70,372	91.2	184	137.7
Jews	35,675	91.2	64.7	77.9
Others	175,776	281	523	402
Total	11,189,978	90.2	96.9	94.6

Subject to certain adjustments for purposes of comparison it appears that the proportion of the native Egyptian population able to read and write in 1907, as compared with the returns of the previous census in 1897 is as follows —

1907		1917	
Males	Females	Males	Females
85 per 1000	41 per 1000	90 per 1000	21 per 1000

Until 1897, Government initiative in the matter of education was limited to supplying a Europeanised course of education designed to fit Egyptians for various branches of the public service and for professional careers. This system of schools, which owes its origin to the Europeanising zeal of Mohammed Ali Pasha, the first viceroy, consists of Primary Schools, Secondary Schools, and Professional Colleges (Law, Medicine, Engineering, Veterinary, Military, Teaching), in addition to a number of special schools (Accountancy and Commerce, Agriculture, Technical, Police, and Housewifery).

Scattered throughout the country there have existed from time immemorial a number of indigenous schools called 'kuttabs'. In 1897, the Ministry of Education endeavoured to bring these independent 'kuttabs' voluntarily under Departmental supervision by means of a system of inspection and reward. Government aid was made dependent on daily instruction being given in the K's, apart from any religious teaching, and the school reaching a satisfactory level of efficiency. The extent to which the scheme has developed is shown in the following table —

Year	Number of private kuttabs under inspection	Number of pupils under inspection			Number of kuttabs awarded a grant in 1911	Amount of grant-in-aid awarded in £E
		Boys	Girls	Total		
1909-10	3,582	174,023	16,852	190,875	2,000	21,470
1910-11	3,644	174,023	17,000	191,023	3,150	21,580
1911-12	3,644	191,687	16,768	208,455	3,270	22,982

A staff of 11 Inspectors and 35 Sub-Inspectors is exclusively engaged under the Ministry of Education in the improvement and development of these kuttabs. To improve the teaching in the Ministry has instituted bi-weekly holiday classes for teachers at 35 centres, and has recently created 11 Normal Schools for teachers and one for teachers.

In close relationship with the kuttabs, Government has recently created trade schools in carpentry, metal work, etc., at Bulak and Assiut, and similar schools have been established through private enterprise in Cairo (4), Alexandria, Damietta, Tulk, Fayum, Suez, Abu Tig, Luxor, Suhag, and Hamadi, and other provincial centres.

The following table gives the number of kuttabs (corrected to December 31st, 1911,

RELIGION AND INSTRUCTION

107

concerning the schools under the immediate direction of the Egyptian Government in 1897 and 1911 respectively. The schools marked with an asterisk * are under Departments other than the Ministry of Education.

By the enactment extending the powers of Provincial Councils, which came into force on January 1, 1910, these bodies are empowered to levy temporary taxes for purposes of public utility, including education. Seventy per cent of the taxation devoted to education must be applied to the improvement of elementary and industrial (including agricultural) education. The remaining 30 per cent may be used for the development of Higher Primary and other schools of an advanced grade. All of the Councils have availed themselves of their powers under the Act.

The following Table, compiled from the Statistical Return for 1911 issued by the Statistical Department shows the total number of schools in Egypt, whether Government or private, exclusive of 'kuttabs'.

Nationality	Number of Schools	Number of Pupils		
		Males	Females	Total
Egyptian Institutions	557	82,654	12,692	95,346
English	99	1,519	1,034	2,553

and Spanish.

Justice.

The indigenous tribunals of the country are the *Mekkenmehs*, presided over by *Cadis*. At present time, they retain jurisdiction in matters of personal law (marriage, succession, guardianship, &c.) only, together with functions connected with the registration of land. In matters of personal law non-Mussulmans are, however, a general subject of the *Faiz* or other religious chiefs. In other matters, natives are subject to the so-called Native Tribunals established in 1884-89. There are now 47 Summary Tribunals, each presided over by a single judge (generally speaking) civil jurisdiction in matters up to 100 in value, criminal jurisdiction in offences punishable by imprisonment up to three years, that is, police offences and misdemeanours; seven Central Tribunals each of the Chambers of which consists of judges; and a Court of Appeal at Cairo, about half of the judges being European.

Under a law of 1904, there are also weekly sittings in every markaz and [redacted] for the disposal of petty offences, the judges having powers up to three months' imprisonment or fine of ££10, and the prosecution being conducted by the police. Some of these markaz tribunals (at present numbering 25) have a limited civil jurisdiction, without appeal, up to ££10 in matters of real property, and [redacted] in other matters. Civil [redacted] not within the competence of the markaz [redacted] Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to the Court of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905-6 serious crimes (and, under a law of 1910, all press offences) [redacted] tried at the Central Tribunals by the judges of the Court of Appeal sitting as an Assize Court, assizes being [redacted] monthly. There is [redacted] on points of law to five judges of the Court of Appeal sitting in Cairo [redacted] Court of Cassation. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Procureur Général*; the investigation of crime is ordinarily conducted by the *Parquet*, [redacted] by the police under the direction of the *Parquet*: [redacted] going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, &c., are tried by special administrative tribunals.

Owing to the Capitulations, which apply to Egypt [redacted] being part of the Ottoman Empire, foreigners [redacted] exempted from the jurisdiction of the local tribunals. Mixed tribunals were instituted in 1876, consisting partly of native and partly of foreign judges, with jurisdiction in civil matters between natives and foreigners and between foreigners of different nationalities, or even between foreigners of the same nationality if the dispute relates to landed property in Egypt. These tribunals have, also, a limited penal jurisdiction in [redacted] of police offences, and in 1900 penal jurisdiction was conferred upon them in connection with offences against the bankruptcy laws. There are three Mixed Tribunals of First Instance, with a Court of Appeal sitting at Alexandria. Civil cases between foreigners of the [redacted] nationality [redacted] tried by their own Consular Courts, which also try criminal cases not within the jurisdiction of the Mixed Tribunals, in which the accused [redacted] foreigners. By Decree of January 30, 1910, the Mixed Tribunals are continued for a term of five years. The Prisons Department in 1911 dealt with 81,410 persons, of whom 3,232 [redacted] females.

¹ Exclusive of the Domain Loan

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,800/ were issued for the purpose of extinguishing the floating debt. Other ■■■■ followed in rapid succession. The dual control by England and France began ■■■■ 1879. In January, 1880, the two Controllers-General reported that Egypt could not possibly meet her engagements ■■■■ full, and in July the Liquidation Law, in accordance with the recommendation of ■■■■ International Commission of the Great Powers, ■■■■ promulgated. By this law the United debt was reduced to ■ per cent interest; further ■■■■ were made, and the United debt thus increased to 60,958,240/; certain unconsolidated liabilities were added to the Preference debt, which thus ■■■■ to 22,743,800/; and the Daira Sanieh debt ■■■■ increased to 9,512,900/; the interest being reduced to ■ per cent. In 1885 and subsequent years further loans and ■■■■ entered into.

On October 15, 1905, the Daira Sanieh Loan ■■■■ paid ■■■■. The condition and the charge of the various debts in January, 1912, ■■■■ as follows:—

	Debt	Charge
■■■■ Loan, ■ per ■■■■	7,816,600	807,125
Privileged Debt, 4 1/2 per cent	31,127,740	1,082,225
■■■■ Debt, ■ per ■■■■	55,971,960	2,182,900
■■■■ Loan, 4 1/2 per cent	203,420	8,429
Total	94,621,660	3,660,695

On January 1, 1913, the debt stood ■ ££94,349,880

In 1911 the debt ■ reduced by £350,540

The charges ■ account of debts of ■ kinds (including tribute), ■ shown in the estimates for ■ to ££4,598,452

In 1888 and 1890, reserve funds ■ established, the balances of which, ■ virtue of the Anglo French Convention of April 4, 1904, ■ placed at the disposal of the Egyptian Government ■ 1905, less certain sums ■ in the hands of the Caisse de la Dette Publique for the service of the debt. The amount received by the Egyptian Government was carried to a General Reserve Fund

In the General Reserve Fund on January 1, 1911, there was a balance of ££5,749 119 and during the year 1911 there ■ paid in ££2, 103 645 total, ££8,052,764. From the Fund ■ 1911 payments were made amounting to ££2 205,152. The balance at the end of 1911 was ££5 847 612

Defence.

EGYPTIAN ARMY

On September 19, 1882, the existing Egyptian army ■ disbanded. The organisation of a new army was entrusted to a British general officer, who ■ given the title of Sirdar. Service is compulsory but owing to the small contingent required only a fraction of the men who are liable actually serve. Service is for three years. In the Sudanese battalions service ■ voluntary and extended. The army consists of 5 squadrons of cavalry, ■ camel corps, 6 batteries, 18 battalions of infantry (of which 6 are Sudanese and 1 ■ a special Equatorial battalion), a railway battalion, and various departments. Most of ■ higher posts are held by British officers. The strength of the army is about 17,000

ARMY OF OCCUPATION

The British garrison, ■ army of occupation consists of a cavalry regiment, ■ horse artillery battery, a mountain battery, a company of engineers, and 4 battalions (one company ■ Cyprus) stationed in the Nile Delta, and of a battalion of infantry and detachment of mountain artillery, stationed in the Anglo Egyptian Sudan. The establishment, including departmental services, is 6 067 of all ranks. The Egyptian Government contributes 150,000/ towards the cost of these troops.

Production and Industry

The cultivable ■ of Egypt proper was reckoned in 1911 12 at 7,683 933 faddans (1 faddan = 1 ■ acre), ■ of this 2,397,879 were uncultivated for want of reclamation. The readjustment of the land tax ■ now ■ plete, the old distinction between kharagi and Urhum tax has disappeared, and the taxes on land range from 2 piastres (1 piastre = 2½d) to 164 piastres per faddan according to the rental value. The corvée, or forced labour, ■ been abolished, ■ the inhabitants ■ still called out to guard or repair the Nile banks in flood time, and ■ also liable ■ any sudden emergency, in 1907, 16,898 ■ were called out. The agricultural population (Fellaheen) ■ about 61 per cent of the whole. A large proportion of ■ ■ land holders with under 50 faddans, while others, almost ■ altogether landless, ■ labourers, ■ relation between the employers and

the employed being mostly hereditary. The following table shows, for 1911, the number of landholders and the distribution of the land between foreigners and natives:—

Extent of holding in feddans	Foreigners		Natives		Total of area		Total of Landowners	
	Area in feddans	Number	Area in feddans	Land-owners	Area in feddans	Percentage	Land-owners	Percentage
Up to 1	1,151	1,996	380,812	839,098	381,463	—	641,612	59.40

Total	708,591	7,627	4,792,017	1,438,423	5,458,008	100.00	1,441,290	100.00

The Egyptian agricultural year includes three seasons or crops. The leading winter crops, wheat and barley, are sown in November and harvested in May and June, the principal summer crops, cotton, sugar, and rice, are sown in March and harvested in October and November, and the autumn crops, maize, millet, and vegetables generally, are sown in July and gathered in September and October. In Lower Egypt and Fayûm where perennial irrigation is effected by means of a network of canals tapping the Nile and traversing the Delta in every direction, the chief crops are cotton, rice, Indian corn, wheat, barley, clover, cucumber; in Upper Egypt, south of Deyrout, where the basin system of irrigation, i.e. submergence, is high Nile is generally adhered to, cereals and vegetables are produced; north of Deyrout the same conditions prevail as in Lower Egypt, except that rice is grown. Where there is perennial irrigation two or three crops are secured annually.

Extensive reservoir works, consisting of a dam at Aswan, a barrage and lock at Assiut, and a barrage at Zifta have been completed. The storage capacity of the reservoir is estimated at 1,065,000,000 cubic metres. It has been decided to raise the level of the Dam by 2 metres, and thus double its capacity. A barrage constructed at Enna affords adequate irrigation of a large tract of rasin land in a year of low Nile. North of Deyrout an area of approximately half a million acres has been converted from basin to perennial irrigation in the last ten years. The production of cotton in six years was—

Year	Cantars	Year	Cantars
1906-07	6,946,883	1908-10	6,900,772
1907-08	7,234,600	1910-11	7,078,587
1908-09	6,751,132	1911-12	7,424,208

In 1912 the area and yield of wheat were 1,447,837 acres and 4,204,819 tons; barley, 382,327 acres and 1,234,153 tons; maize and millet, 1,925,087 acres and 9,352,941 tons; and rice, 237,357 acres and 1,615,881 tons.

In 1912 the cotton exported amounted to 240,475 cantars, valued at £182,806, the wheat exported amounted to 6,688,210 cantars, valued at £22,988,211 (1 cantar = 99.05 lbs).

1 The cotton tissues imported amounted in 1912 to £E3,405,518; in 1911, to £E4,125,067, in 1910, to £E3,500,212. The quantity of raw cotton exported was, in 1910, 6,009,406 cantars, valued at £E24,241,712; in 1911, 6,698,210 cantars, valued at £E22,968,211; in 1912, 8,806,948 cantars, valued at £E37,629,277.

2 Cigarettes

the imports in 1911 the value of £E23,680,344, and of exports value of £E28,014,926 passed through the port of Alexandria, in 1912, of imports £E22,157,020, exports £E23,790,256

Goods imported Egypt examined by experts, who determine their value according to the market price in their original country, plus the of transport, freight, insurance. In order, however, to facilitate customs operations, the administration, in communication with merchants interested, establishes, on the basis above, periodical tariffs for articles of importation. In statistics of the Custom House, the values are estimated according to the estimated prices which served as basis for the payment of duty fixed at 8 per cent *ad valorem* (except coal, liquid fuel, charcoal, firewood, timber for building purposes petroleum, oxen, cows, sheep and goats whether alive or dead stored, the duty on which reduced to 4 per cent *ad valorem* from November 25, 1905) without taking into account amount of that duty. regards exports, there are tariffs for nearly all of them, estimated in the manner the tariffs of imports. The quantities recorded in statistics are declared by the merchants controlled by the Customs.

The origin of imports and destination of exports are declared by importers and exporters, and controlled, as much as possible, by the searchers and appraisers of the Custom House.

Principal imports into the United Kingdom from Egypt, and the principal exports from the United Kingdom to Egypt according to Board of Trade returns:—

Year	British Imports from Egypt				Exports of British Produce to Egypt

Russian	112	311,394			
Italian	67	801,573			
Norwegian	34	59,812	Total	4,909	18,624,794

The number and net tonnage of vessels that have passed through the Suez Canal, and the gross receipts of the company, have been as follows in eight years —

Year	No of Vessels	Net Tonnage	Receipts	Year	No of Vessels	Tonnage	Receipts
			£				£
1904	4,237	1,401,831	4,767,000	1908	1,795	13,632,293	4,454,000
1905	4,116	13,194,101	4,692,000		4,239	15,407,527	4,939,000
1906	3,975	15,445	4,479,000	1910	4,133	16,541,498	5,348,000
1907	4,267	13,728,634	4,964,000	1911	4,909	18,624,794	5,592,000

The number of passengers (civil and military) who went through the canal was, in 1906, 353,881; in 1907, 243,926; in 1908, 218,967; in 1909, 218,122; in 1910, 234,320; in 1911, 275,259.

The Suez Canal is 87 miles long, 66 actual canal and 21 miles lakes, connecting the Mediterranean with the Red Sea, opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968.

¹ Including British, German, and other steamers and warships.

Internal Communications

On January 1, 1911, there were (exclusive of sidings) 1,481 miles of rails (double and single) belonging to the State, and 111 miles of rails of agricultural light railways owned by private companies. 111 miles of State and 111 miles of companies' rails in the Delta, and 111 miles of State and 104 miles of light railways in Upper Egypt. This is exclusive of the Sudan military railway to Khartum, and of the Upper Egypt Auxiliary Railways and Wadi Oases Railway acquired by the State in July 1906 and June 1907 respectively. The length of the former is 111 miles and that of the latter 122 miles. Their gauges are 5 ft. 6 in. and 2 ft. 6 in. respectively. The railways have a gauge of 5 ft. 6 in. except the line from Luxor to Aswan, which is 2 ft. 6 in. gauge.

The following table shows for the last five years the length of line of the State Railways, the number of passengers and weight of goods carried, and the net receipts:—

Year	Line	Number of Passengers	Goods carried	Net receipts
	Miles		Tons	
1907	1,443	26,082,627	4,175,351	1,611,843
1908	1,449	26,851,661	4,227,644	1,653,390
1909	1,449	27,206,900	4,657,227	1,283,889
1910	1,455	28,737,000	4,556,493	1,429,537
1911	1,481	27,941,000	4,318,501	1,600,380

The working expenses, ££2,090,849 in 1911, represent an average of 55.02 per cent. of the gross receipts, which were ££3,691,179.

The telegraphs and telephones belonging to the Egyptian Government were, at the end of 1911, of a total length of 6,229 kilom., the length of the wire being 20,535 kilom. The Eastern Telegraph Company, by concessions, have telegraph lines across Egypt from Alexandria to Cairo, Suez, and from Port Said to Suez, connecting their cables to the British and India. Number of telegrams in 1911 was 2,756,195, as against 2,564,827 in 1910, not including service telegrams and those sent by the British Telegraph.

There were in 1911 1,701 post offices and stations. In the internal service (1911) there passed through the post-office 30,129,000 letters, post-cards, and 17,054,000 newspapers, &c., and samples; in the external service, 19,193,000 letters and post-cards, and 13,595,000 newspapers, &c., and samples. Receipts ££912,333; expenses ££279,998.

Money and Credit.

The National Bank has a capital of 3,000,000L. Its reserves amounting to 1,550,000L. The Agricultural Bank has a capital of 3,740,000L. The Government guarantees interest at 3 per cent., and it lends money to the Fellahs at 8 per cent. interest.

In 1901, a Post-Office Savings Bank was opened. On December 31, 1911, it had 6,740 depositors with balances amounting to ££47,492. On December 31, 1912, the depositors numbered 285,003, and their balances amounted to ££570,493. Of the depositors in 1911, 89,898 were natives, and 27,757 were Europeans.

Money, Weights, and Measures

MONEY.

By decree of November 14, 1885 (7 **1305**), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8.5 grammes 875 fine, and therefore contains 7.4375 grammes of fine gold. Its value in sterling = £1 0s 6½d.

The 10 piastre silver piece weighs 14 grammes fine, and therefore contains 11.67 grammes of fine silver. The piastre is worth 2.46d in English money. It is subdivided into tenths (ochrel guarche).

Coins in circulation are the Egyptian pound (100 piastres) in gold; 20, 10, 5, 2 and 1 piastre pieces in silver; 1, ½, ¼, ⅓ piastre pieces in nickel, and ⅓ and ⅔ piastre pieces in bronze. Silver coin is legal tender only up to £E2. For **years** gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively English sovereigns, which are legal tender at the rate of 97½ piastres.

Egyptian money is now minted at the Birmingham Mint. The nominal value of the coinage (including seignage) from 1887 to 1911 was —

Years	Gold	Silver	Nickel	Bronze	Total
	£	£S	£S	£S	£
1887-1900	2,024	537,907	412,446	16,124	4,018,521
1910	—	66,117	15,000	1,900	74,617
1911	—	329	20,054	1,900	859,062
1887-1911	52,024	5,927,033	449,014	19,224	4,447,300

By a decree of the Khedive, dated April 28 1891, the metrical system of weights and **measures** ordered to be employed in all public and administrative transactions from January 1, **1891**.

MEASURE OF CAPACITY.

The *Ardeb* is equal to 48.579 gallons, or 5.44789 bushels.

The approximate weight of the ardeb is as follows:—Wheat, 315 rotls; beans, **rotls**; barley, 260 rotls; maize, 315 rotls; cotton seed, 270 **rotls**.

WEIGHTS.

Okiah	—	1,3206 ounce
Botl	—	lb
Oke	—	2.7513 lbs.
Kantar { or 1 Rotl or }	—	99 lbs.
	36 lbs.	

LENGTH MEASURES.

	Inches
Darra town	— 22.8350
Darra Mumari for building, &c	— ft
yards = 88 yards	100 yards

MEASURES OF SURFACE.

Feddan, **measure** for land, = 7,468 **pies** = 1.03808 acres.
1 sq. pie = 6.05 sq. ft. = 562 sq. metre.

Diplomatic and Consular Representatives.

Cairo — *His Majesty's Agent and Consul-General in Egypt, Minister Plenipotentiary* — Field Marshal Viscount Kitchener, K. C. B., G. C. B., G. C. M. G., G. C. I. E.

Councillor — M. Cheetham, C. M. G.

Secretaries — Lord Colum Crichton Stuart, and Greg (Actg.), and W. F. Kattigan.

Consul at Cairo — A. D. Alban.

Consul General at Alexandria — D. A. Cameron, C. M. G.

There are also Consular representatives at Mansura, Tanta, Zagazig, Buket-es Sab, and Port Said.

ANGLO-EGYPTIAN SUDAN

Government.

The rule of Egypt in the Sudan, after having gradually extended during the course of many years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country for about sixteen years under a desolating tyranny. In 1898 the Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899, he was overtaken by the Egyptian forces near Gedid, where he was slain in battle, and his remaining followers taken prisoners.

A convention between the British and Egyptian Governments, signed at Cairo, January 19, 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. The British and Egyptian flags shall be used together, laws shall be made by proclamation, duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt, the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1864 respecting the import and export of ammunition, and spirits.

The Sudan has been divided into thirteen Provinces. The Governors of provinces are British Officers of the Egyptian Army employed under the Sudan Government or British civil officials of the Government. Administration is carried out through British Inspectors in charge of more districts into which the provinces are subdivided, these units being supervised by District officials who in most cases Egyptian officers lent from the Egyptian Army.

In 1910 a Governor-General's Council was created, the Governor-General in the discharge of his executive and legislative powers. All ordinances, laws and regulations are now made by the Governor General in Council.

Darfur, to the south of Kordofan, is within the limits of the Anglo-Egyptian Sudan and its tribute, its management of its internal affairs is left entirely to its hereditary Sultan.

The Province of Lado, which was contained in the occupation of H. M. King Leopold II, King of the Belgians, during his reign, by the Agreement signed at Brussels on May 12, 1906, reverted to the Anglo-Egyptian Sudan on his death, and has been included in the Mongalla province.

Area ■■■ Population.

Extending southwards from ■■■ frontier of Egypt to Uganda and the Belgian Congo (approximately N lat 5°), a distance of about 1,650 miles, and stretching from the Red Sea to ■■■ confines of Wadai ■■■ Central Africa, the subject territory has ■■■ of about 984,520 square miles. The population is ■■■ roughly computed ■■■ 1,000,000. ■■■ Masawa, which ■■■ formerly Egyptian, ■■■ belongs to the Italian Colony of Eritrea, Harar was, by agreement, made over to the local Emir and ■■■ belongs to Abyssinia, while Zeila and Berbera ■■■ belong to British Somaliland. The Eritrea-Sudan frontier has been completely delimited and demarcated, ■■■ also has the greater part of the frontier with Abyssinia (see under *Abyssinia*). The chief towns are Khartum, population (1909), 18,235, the capital, Omdurman (the old Dervish capital), population (1912) 48,000, Khartum North, population 35,285. Halfa, Merowe, El Damiel, Atbara, Port Sudan, Suakin, Kassala, El Duene, Korti, El Obeid, Nahud, Wad Midani, and Singa.

Instruction

The schools under the Central authority are classified as follows.—There are first the elementary vernacular schools, "Kuttibs" as they are called, 47 in number (June, 1912), situated ■■■ all parts of the country, and with a total number of about 3,226 pupils. In these schools instruction is given to boys from 7 to 10 years of age in reading, writing, arithmetic and religion. Next there are the primary schools, of which there are now six—at Khartum, Omdurman, Berbera, Wad Midani, Halfa, and Suakin. The subjects taught in schools of this class include English, Arabic, Mathematics, and in some cases land measuring, and the total number of boys in attendance is 810. After completing their primary course, boys can proceed ■■■ the secondary school at the Gordon College or they may be employed ■■■ clerks ■■■ translators in Government offices. The secondary school at Gordon College numbers 53 pupils, some of whom take a course in engineering and surveying while the rest are trained to be teachers ■■■ primary schools. There is also in the Gordon College buildings a training college attended by ■■■ students, who undergo a five years' course of training, after which they ■■■ drafted out ■■■ teachers in vernacular schools or as *kadis* ■■■ district courts. The industrial workshops of which there are at present three, at Khartum, Kassala and Omdurman, total ■■■ boy apprentices. At Khartum and Kassala, smith work, carpentry, fitting, &c., ■■■ taught, and at Omdurman stone cutting and brick work. A primary school has been constructed adjacent to the Gordon College, with a boarding house to accommodate 100 is shortly to be put ■■■ hand. A start has been made ■■■ the education of girls by the opening of ■■■ girls' school at Rufaa—which is at present attended by 60 students. Affiliated to the Gordon College ■■■ the Wellcome Tropical Research Laboratories, where investigations are carried ■■■ connection with diseases and with the economic products of the country.

Justice.

In Khartum and Port Sudan civil justice ■■■ administered (except ■■■ small cases) by civil judges who are English barristers, or Scottish advocates. Elsewhere civil ■■■ heard by Governors and Inspectors ■■■ provinces; ■■■ some provinces a special inspector, called a judicial inspector, ■■■ appointed for this work. Civil judges sometimes go ■■■ circuit.

Appeals are heard by the [] Judge, [] English barrister, usually sitting alone, but sometimes with two of the civil judges.

[] Mohammedan Law Courts administer the Moslem religious [] in [] between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, [] also Mohammedan charitable endowments.

Criminal justice is administered either by single magistrates, or courts of [] magistrates. Governors and inspectors of provinces and the district officials above mentioned [] the magistrates. With few exceptions, decisions of magistrates and courts require confirmation either by the Governor of the province [] by the Governor-General, both of whom have extensive powers of revision.

The [] penal code [] an adaptation of the Indian penal code.

Finance.

The general [] of the Sudan [] estimated in 1912 at ££1,375,600, and the ordinary expenditure at ££1,710,600. The deficit of ££335,000 is met by [] grant from Egypt. In this expenditure, however, is included the [] of ££172,000, which the Sudan Government pays Egypt for the upkeep of the Egyptian Army [] the Sudan, thereby reducing the actual contribution from Egypt to ££163,000.

This annual contribution paid by Egypt to balance the Budget has been reduced by ££90,000 in the last four years, and further large reductions [] contemplated in the near future. It is estimated that the [] received by Egypt for custom dues, railway transport, posts and telegraphs, etc., through the occupation of the Sudan practically amount to [] much as the contribution.

The actual figures for the last six years of revenue and ordinary expenditure, exclusive of the [] of ££172,000 paid for the Egyptian Army, are as follows (££1 = £1 0s. 6d.) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	££	££		££	££
1907.	975,973	1,012,367	1911	1,171,097	1,214,976
1908	979,443	1,168,657	1912 ¹	1,311,316	1,340,844
1909	1,042,699	1,168,519		1,375,600	

¹ Estimate.

The revenue [] chiefly derived from railway and [] receipts, custom dues, and [] levied [] land, animals, date trees, [] []

Production and Commerce.

The [] still [] from the effects of the Dervish oppression, during which it [] largely depopulated, wide tracts having [] of cultivation and trade having been abandoned. The northern provinces show the first signs of returning prosperity, but those of the south possess great natural []. Several concessions have been granted for [] development of land for agricultural purposes [] the northern provinces. [] completion of basin irrigation works in Dongola [] attracted thereto [] considerable population who are being instructed by agriculturists [] Egypt [] the [] efficient tillage of [] thus [] brought under cultivation. Egyptian cotton has been successfully established [] the Nile, as well as in the Tokar district [] [] Province, [] increasing quantities [] cotton, which compare favourably with corresponding [] grown in

Egypt, are being produced annually. Experimental cotton growing is also being conducted in the Gezira, the fertile tract of country between the Blue Nile and White Nile, where with a proper system of irrigation, it is believed, an extensive area may be put under cultivation.

The opening of Egypt as a market for the surplus cattle of the Sudan, which has been rendered possible by strict veterinary organisation, has resulted in the growth of a very considerable trade in slaughter cattle and sheep, which it is estimated is worth about 250,000/ during 1911. Increased railway and river transport facilities are widening the area of supply and already the nomad Arabs from Western Kordofan and from Kassala are recognising the profits to be gained by disposing of their stock.

Along the Blue Nile and its affluent, the Rahad and Dunder, the soil is rich, and a wide area which bears such crops as dura, millet, and pulse, might be converted into a cotton and wheat-producing region. The vast forests which line the river banks, rich in fibres and tanning material, extend to the frontiers of Abyssinia. On the White Nile the soil is less fertile, but the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, and the rubber creeper. The finest gum forests are in Kordofan, and the best rubber in the Bahr el Ghazal.

In July, 1905, a Proclamation was issued rendering illegal the sale of land by natives without the consent of the governor of the Province in which the land is. This measure is intended for the protection of the natives. A cadastral survey of cultivated lands, accompanied by the settlement and registration of titles to land, has been nearly completed in the northern provinces. An extension of the system southwards is under consideration.

Gold is the only mineral at present being successfully exploited in the Sudan and mines are being worked at Um Nabardi.

The imports include clothing, coal, machinery, and railway material; the exports, gum, ivory, ostrich feathers, cereals, cotton, dates, cattle, and sheep.

IMPORTS EXPORTS.

Year	Imports.	Exports.	Year.	Imports.	Exports.
	£E	£M		£E	£E
1908 . . .	1,952,979	787,820	1910 . . .	1,931,428	977,621
1909 . . .	1,820,115	765,485	1911 . . .	2,373,949	1,376,958

Trade by countries for two years :—

Country.	Imports.		Exports.	
	1910	1911	1910	1911
	£E	£E	£E	£E
Egypt	874,793	902,513	649,751	787,820

	1,931,428	2,373,949	977,621	1,376,958

The returns show increases in the imports of cotton fabrics (££580,697 in 1911 as compared with ££420,945 in 1910), metal and machinery, refined sugar, flour, and coal.

Exports of gum and cotton valued at ££435,622 and ££237,575 respectively, as compared with ££217,932 and ££224,768 in 1910.

Internal Communications.

The railway from Wadi Halfa to Khartum, which was constructed for military purposes during the re-conquest, was declared open for general traffic on December 12, 1899. A connection with the Red Sea at Port Sudan was opened in October, 1905, and an extension of the line to Sennar and El Obeid was opened for traffic in February, 1912. The total length of line is, approximately, 1,500 miles.

All navigable arms of the Nile and its tributaries between Assuan (Egypt) and Rajaf were served by a fleet of Government passenger and cargo steamers which maintain a regular scheduled service over more than 2,500 miles of water.

Through telegraphic communication exists with Cairo, Rajaf and Massawa (Eritrea) and at the end of 1911 there were 4,965 miles of internal telegraph lines open. There are 63 post and telegraph offices.

Governor-General.—Lieut-General Sir Reginald Wingate, G.C.V.O., K.C.B., K.C.M.G., D.S.O., R.A., Sirdar of the Egyptian Army.

Inspector-General.—Major-General Sir Rudolf Baron von Slatin, G.C.V.O., K.C.M.G., C.B.

Legal Secretary.—E. Bonham Carter, C.M.G.

Financial Secretary.—Col. E. E. Bernard, C.M.G.

Civil Secretary.—Lieut.-Col. P. R. Phipps.

Director of Intelligence and Sudan Agent at Cairo.—Major L. O. F. Staak.

(1875-76), Felkin (1872-80), Jephson (1887-88), Junker (1876-76), Grant (1864), Lejean (1860-61), Pothenick (1852), Marno (1873-75), Schweinfurth (1868-71), Speke (1863), Ruzsagor (1838).

(REPÚBLICA ORIENTAL DE URUGUAY)

Constitution and Government.

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was promulgated July 18, 1830. The legislative power is in a Parliament of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from February 15 to July 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House assume the legislative power, as well as the general control of the administration. The representatives are chosen for three years, in the proportion of 1 to every 3,000 inhabitants of male adults who can read and write. The senators are chosen by the Electoral Colleges, whose members are directly elected by the people; there is one senator for each department, chosen for six years, one third retiring every two years. There are 75 representatives and 19 senators.

The executive is given by the Constitution to the President of the Republic, elected for the term of four years.

President of the Republic—Señor José Batlle, elected March 1, 1911.

The President is assisted in his executive functions by a council of ministers divided into seven departments, namely, those of the Interior and Worship, Foreign Affairs, Finance, War and Marine, Justice and Public Instruction, Industry, Labour and Communications, and Public Works.

Area and Population.

The following table shows the area and the population of the departments according to the results of the census of December 31, 1911.—

Departments	Area, square miles	Population Dec. 1911	Pop. per square Dec. 1911
Artigas	4,992	31,000	7.1
Canelones	1,513	97,719	59.8
Cerro Largo	5,764	40,407	8.6
Colonia	2,192	137,712	24.0
Durazno	5,521	47,243	5.5
Florida	1,744	10,030	10.8
Florida	4,763	51,202	10.9
Maldonado	1,584	33,168	20.0
Minas	1,644	57,086	11.7
Montevideo	256	335,135	1,320.9
Paysandú	6,115	48,419	9.4
San José	2,269	37,622	8.4
Rivera	3,798	39,413	10.8
Rocha	4,280	39,048	9.1
Salto	4,868	54,150	11.1
San José	4,667	51,785	10.2
Soriano	2,560	44,720	12.5
Tacuarembó	3,074	51,586	9.8
Trenta y Tres	3,686	34,807	9.4
Total	72,310	1,377,566	

population, December 31, 1910, 1,112,000.

The results of the census of October, 1908, showed a population of 1,042,186 (530,008 males and 512,178 females). Of this total, 180,722 foreigners, 82,357 being Italian, 54,885 Spanish, 27,780 Brazilian, 18,600 Argentine, 8,341 French, 1,324 British, 1,406 Swiss, 1,112 German, and 4,531 of other nationalities.

The population of Montevideo City in November, 1912, was 352,487. Of the other cities, Paysandu had 20,953 inhabitants; Salto, 19,788; Mercedes, 15,667.

Births, deaths, and marriages for five years. The births and deaths include still births:—

Years	Living Births	Still-Births	Marriages	Deaths	Surplus of Births over Deaths
1907	88,057	1,163	6,444	15,561	18,096
1908	85,520	1,366	6,368	14,121	21,000
1909	85,068	1,387	6,541	13,249	20,414
1910	86,027	1,307	6,815	10,615	19,412
1911	87,530	1,367	6,967	10,512	20,978

Of the living births in 1911, 9,823, or 26.3 per cent., illegitimate.

For five years the arrivals and departures by sea at Montevideo were:—

	1907	1908	1909	1910	1911
Immigrants . . .	111,589	112,003	116,095	122,614	141,224
Emigrants . . .	86,067	96,875	102,367	106,769	123,034

Of the immigrants landing in Montevideo in 1911, 16,605 were Spanish; 15,819 Italian; 381 Brazilian; 1,619 French; 1,277 German; and 1,213 English.

Religion and Instruction.

The Roman Catholic is the State religion, but there is complete toleration. The Archbishop of Montevideo has 2 suffragan bishops. The 1908 census showed 480,095 Catholics, 12,283 Protestants, and 45,470 unspecified.

In 1908, the population six years of age numbered 1,042,668 (861,588 Uruguayans and 181,085 foreigners), and the illiterates six years of age numbered 350,547 (266,045 Uruguayans and 84,502 foreigners).

Primary education is obligatory. In 1911 there were 1,112 public schools with 82,441 enrolled pupils.

There is at Montevideo a university, with faculties of law, social sciences, medicine, mathematics, commerce, agriculture, and veterinary science. There are also a preparatory school and other establishments for secondary and higher education with 2,591 pupils. In 1910 the university had 112 professors, 1,112 regular students, and 661 pupils receiving secondary instruction. There are normal schools for males and for females. There is a school of arts and trades supported by the State where 1,112 pupils receive instruction gratuitously. At the military college, with 8 professors, there are 112 pupils. There are also many religious schools throughout the Republic with a considerable number of pupils.

For the relief of poverty there are a charity hospital, a hospital for the insane, an isolation hospital, an asylum for beggars, an orphan asylum, and 3 infant schools

Justice.

In 1907 the judicial system was reformed. A High Court of Justice was established consisting of 11 judges elected by the General Assembly of the Chambers, the President to be chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 11 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 1 for commercial cases, 1 for Government, 2 for criminal cases, 1 correctional court, and 2 for criminal investigation. Each departmental capital has a departmental court, and each of the 11 judicial sections into which the Republic is divided has a justice of peace court; further, each is divided into districts, in which deputy judges (alcaldes) try cases involving small amounts.

In September 1907 the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

Finance.

The receipts and expenditure for recent years are stated as follows (4 7 dollars = £1)

	Receipts	Expenditure		Receipts	Expenditure
	£	£		£	£
1907	4,834,140	4,075,340	1907 11 1	6,478,110	6,477,441
1908	5,052,908	4,494,860	1911 12 1	7,474,930	7,471,930
1909	5,418,045	5,228,34	1912 13 1	7,477,000	7,474,990

The estimates of revenue and expenditure for 1912-13 are:—

Revenue	Dollars	Expenditure	
Property tax	16,330,000	Legislation	
Trade licences	4,300,000	Presidency	86,107
Factory and tobacco taxes	1,690,000	Ministry Foreign Affairs	647,806
Stamped paper and stamps	1,757,000	Government	3,361,758
Barrel profits	1,075,000	Finance	2,167,781
Post and telegraph	1,465,700	Industries	1,487,768
Imports and exports	730,000	Public Works	
Receipts	1,000,000	War and Marine	4,710,491
	6,244,600	Public instruction	1,219,041
		Justice	
		National obligations	17,110,911
Total	35,162,300	Total	35,183,612

The amount of the public debt of Uruguay on January 1, 1912, is officially given as 181,857,541 pesos (28,054,796*l.*). The public debt in 1911 was 6,964,603 (1,638,781*l.*).

Defence.

The army of Uruguay consists of a small standing, or active, army, and the National Guard. Service in the active army is from 2 to 5 years, with engagement up to the age of 30. The recruitment of this army is, theoretically at least, on the voluntary principle, but in practice it appears to be compulsory, and to be carried on after the method of the press gang. It consists of 12 battalions of rifles, 9 cavalry regiments, 12 field batteries and some fortress artillery, with a peace strength of about 4,000.

The National Guard is a militia, service in which is compulsory. It is divided into three classes, or 'bans'. The first 'ban,' or 'mobile national guard' contains all the young men for military duty between the ages of 17 and 30, and forms a well-organised force of 15,000 to 20,000. It would take the field with the active army. The second ban, consisting of those between 31 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 45 and 60, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is nominally, about 100,000 men.

The total strength of the field army may amount to three divisions of about 12,000 men each. There is also a police force, with an establishment of 5,000.

The infantry of the active army is armed with the Mauser rifle, the 2 field batteries have the 7.5 cm Krupp. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The fleet consists of the cruiser *Montevideo*, 2,300 tons (formerly the Italian *Dogali*), armed with 6.6 inch guns, the yacht *18 de Julio*, and the 'scout destroyer' *Uruguay*, 1,400 tons speed 23 knots, launched at Kiel in 1910.

Production and Industry.

In Uruguay the agricultural industries are extending. The principal crops and their yield for two years were as follows:—

	Area		Yield	
	1911 1912	1910 1911	1911 1912	1911
	Acrea	Acrea	Cwts	Cwts
Wheat	556,110	644,021	4,766,460	8,250,876
Rye	181	145	1,102	430
Barley	6,307	2,307	8,576	10,716
Oats	40,640	20,307	29,872	171
Linseed	142,575	94,730	446,340	—

In 1900 the land devoted to pastoral purposes covered about 27,000,000 acres, while the cultivated area was about 1,383,800 acres. In 1908 there were within the Republic 8,192,602 head of cattle, 566,307 horses, 26,286,296 sheep, 60,000 mules, 40,000 goats, and 180,099 pigs. In 1907 breeding stock was introduced from Europe and Argentina to the extent of 540 cattle, 2,282 sheep, and 181 horses. The cattle industry is followed in all the departments, but most extensively in Salto, Paysandu, and Rio Negro. From Flay Bentos in 1911 there were shipped about 15,000 tons of animal products valued at \$26,399,678 dollars, about 112,500 head of cattle having been slaughtered in the year. The principal sheep-breeding departments are Durazno, with 2,796,168 sheep on runs covering 2,571,600 acres, and Soriano, with 1,692,736 sheep on 1,876,700 acres.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, and Colonia. In 1912 there were 2,246 properties (2,202 in 1911), of 15,113 acres (14,218 in 1911), with 23,700,000 vines (20,700,000 in 1911), producing 46,455,626 lbs of grapes (61,281,889 in 1911), and 2,786,999 gallons of wine (3,833,306 in 1911). Tobacco and olives are also cultivated. The production of rectified alcohol in Uruguay for the last 10 years is as follows (in gallons) — 1902, 631,404; 1903, 709,880; 1904, 505,469; 1905, 673,693; 1906, 633,369; 1907, 698,506; 1908, 638,450; 1909, 583,376; 1910, 568,538; 1911, 592,209. A Bill creating a State monopoly in the manufacture and rectification of alcohol is under discussion.

In the northern departments several gold mines are worked, and silver, copper, lead, magnesium, and lignite coal are found. The supply of electricity for light, power, and traction is a State monopoly (Bill passed October 20, 1912).

Commerce.

The special trade (merchandise only) is as follows (4 7 dollars 12) —

	1909	1910	1911	1912
Imports	7,913,703	5,174,401	6,114,511	9,711,000
Exports	7,933,021	7,410,414	7,471,000	10,947,872

In 1911 the customs receipts amounted to 3,411,508 in 1912 to 3,919,970. The principal imports for 1910, and principal exports for 1910 and 1911 were (in thousands of gold pesos) as follows —

Imports		Exports		1911
Cotton	4,913	Wool	1,036	14,481
Iron and Steel	2,476	Hides	11,147	9,976
Coal	2,201	Meat and Extracts	7,573	7,017
Wood	1,921	Live Stock	1,460	790
Woolens	1,883	Sand	1,157	1,312
Machinery	1,753	Cereals	167	473
Chemicals	1,701	Mineral Fat	1,636	1,119

The imports for 1910 and exports for 1910 and 1911 are distributed as follows (in thousands of gold pesos) —

Imported or to	Imports 1910	Exports 1910	Exports 1911	From or to	Imports 1910	Exports 1910	Exports 1911
Great Britain	11,862	3,420	3,000	Belgium	2,610	7,752	7,314
Argentina	2,772	5,567	4,500	United States	4,949	2,577	1,586
France	2,117	5,899	9,720	Brazil	1,304	6,101	8,287
Germany	6,641	1,026	6,553	Italy	2,943	1,560	1,324

Total trade between Uruguay and the U.K. (in thousands of pounds) for 5 years —

	1907	1908	1909	1910	1911
Imports from Uruguay into U.K.	1,007	1,086	1,298	1,748	1,425
Exports to Uruguay from U.K.	2,521	2,614	2,341	2,940	2,886

Shipping and Communications.

In 1911 Uruguay had ■ steamers of a total net tonnage of 23,960 tons, and 62 sailing vessels of a total net tonnage of 27,178 tons.

There entered at the port of Montevideo in 1911, 2,717 vessels of 8,028,786 tons, and cleared 2,699 of 7,946,929 tons. Of the shipping entered 1,272 of 3,790,458 tons ■ British vessels. The port of Montevideo is visited by the steamers of 20 different companies, of which 12 ■ British, 2 German, ■ French, 2 Italian, and 1 Spanish.

The National roads of Uruguay have a total length of 2,240 miles, and there are about 3,100 miles of departmental roads. The construction and improvement of roads and bridges continues. The hydrographic conditions of the country also supply convenient ■ of communication. The maritime and river coast from Chuy, the most easterly maritime point, to Santa Rosa, the most northerly point on the river frontier, extends to the length of 685 miles, while the many affluents of the Uruguay river (about 1,000 miles in total length) provide channels for inland navigation.

At the end of 1911 the railway system of Uruguay open for traffic had a length of 1,534 miles of standard gauge and 46 miles of ■ gauge, all in British hands, total, 1,570 miles. Important extensions ■ in progress especially towards the Brazilian boundary. There ■ 170 miles of tramway in operation. The tramway lines of Montevideo have been electrified.

The telegraph lines in operation have a total length of 4,850 miles, in 1911 318 offices through which 754 ■ telegrams passed. Two telephone companies have 16,518 miles of wire. A Government or municipal telephone scheme is under consideration.

In 1911 there ■ 1,018 post offices. The correspondence movement comprised 106,286,323 letters, packets, &c.

Money and Credit.

The Bank of the Republic has a nominal capital, raised ■ July, 1911, to 20,000,000 dollars. This bank has the exclusive right to issue notes. The president and directors are appointed by the Government. On Jan. 1, 1912, notes to the value of 25,638,911 dollars were in circulation.

The principal banks in Montevideo, in addition to the Bank of the Republic, are the four British banks, ■, the London and River Plate Bank, the London and Brazilian, the British Bank of South America, and the Anglo South American Bank, there ■ also the German Transatlantic Bank, the Spanish Bank, and the French and the Italian Banks. The Uruguayan Commercial and the Popular Banks enjoy excellent financial reputations, and there ■ also ■ land and mortgage banking institutions. In October, 1911, the Government proposed to create a National Insurance Bank with a monopoly of ■ business of all kinds. A Bill to this effect became law early in 1912. It declares a State monopoly of life, fire, labour, and accident risks, and creates a State Insurance Bank operating all descriptions of insurance. The declaration of the date when the ■ policy ■ to become effective is left to the discretion of the Government. In ■ meanwhile no ■ companies may be established. The Insurance ■ opened ■ doors ■ March 1, 1912.

Money, Weights, ■ ■ ■

There ■ no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso nacional*, weighing 1 ■ grammes, 917 fine. The ■ of June 23, 1862, authorised the coinage of

VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

Constitution and Government.

THE Republic of Venezuela was formed in [] by [] from the other members of the Republic of Colombia. The Constitution in force is that of August 5, 1909. Legislative authority is vested in a Congress of 2 chambers, the Senate and the Chamber of Deputies. The former consists of 40 members elected for [] years, [] for each State, Venezuelans by birth and [] 30 years of age. The latter is constituted as follows: Each [] chooses by direct election for [] years [] deputy, a Venezuelan by birth and [] 21 years of age, for every 35,000 inhabitants, and [] [] for [] [] of 15,000. A State with fewer than 35,000 of population will have [] deputy. The Federal District and the Territories which have, [] may reach, the population fixed by law will also elect deputies.

The executive power is exercised by the President of the Republic in [] junction with the Cabinet Ministers through whom he acts, and the Council of Government in certain [] determined by the Constitution. The President [] elected by Congress for 4 years, must be [] Venezuelan by birth and [] [] years of age; he may not be re-elected for the following presidential period. Failing the President, temporarily or absolutely, his place is supplied by the presiding member of the Council of Government. This Council consists of 10 members, 1 for each [] States, who are chosen by Congress for 4 years.

President of the Republic.—General J. V. Gomez, installed June, 1910.

The Cabinet consists of 7 Ministers: the Ministers of the Interior, of Foreign Affairs, of Finance and Public Credit, of War and Marine, of Fomento, of Public Works, and of Public Instruction. The seat of the General Powers of the Nation is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States [] autonomous and politically equal. Each has [] Legislative Assembly, whose members [] chosen in accordance with their respective Constitutions. Each State has a President, [] general Secretary, and [] Council of Government. The States are divided into districts [] municipalities. Each district has a municipal council, and each municipio a communal junta. The Territories [] administered by the President of the Republic through Governors, who in turn appoint secretaries.

Area and Population.

Venezuela has [] of about 393,976 square miles, with [] population officially estimated at 2,743,841 [] January 1, 1912. But the official figures have been very much questioned and it [] said that 1½ millions [] actuality. It is [] divided into [] Federal District, 20 States and 2 Territories, [] follows:—

States, []	States, []	States, []
Apure	Lara	Trujillo
Aragua	Monagas	Yaracuy
Anzoategui	[]	Zamora
Bolívar	Miranda	[]
Carabobo	Nueva Esparta	Ter. []
Cóchede	Portuguesa	" []
Falcón	Sucre	" []
Güirico	[]	

In 1911 the marriages within [] Republic, according [] the [] statistics, numbered 8,017; births, 83,758; deaths, 55,428; [] of passengers, 9,204; departures, 7,219.

[] 1910 in Caracas, the death rate was [] per 1,000, [] the birth rate 34·4.

Religion and Instruction.

The Roman Catholic is the religion, but there is toleration of all others. The Archbishop of Caracas is 5 suffragan bishops.

Instruction is given both in public and private schools, the former belonging to the Nation, the States, the Municipios, the latter to private persons. Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1911 the reorganisation of primary education was undertaken. The new system will be especially at the creation of large school buildings and schools in villages. The elementary schools numbered 1,367 with 43,579 pupils, secondary schools 102, 38 for boys, 38 for girls, and 1 mixed. In Caracas there is 1 normal school for females, and in Carabobo another for males. To each is annexed an elementary school with first and second grade pupils. There are 34 national colleges and 63 private colleges, 21 of which are subventioned. The former have each a 4 years' preparatory course and a 4 years' course in philosophy or for the bachelor's degree. In some of these communal instruction is also given. At Caracas is the central University, and in Merida is the University of Los Andes. In the former are faculties of Political, Medical, Mathematical, and Ecclesiastical Sciences, the chairs of the last named faculty being in the metropolitan seminary. The Los Andes University has faculties of Political and of Ecclesiastical Sciences. The University rectors and vice rectors must be Venezuelans by birth, and they and the professors must hold the degree of Doctor of a Venezuelan University. Through faculty councils university graduates have some influence on the organisation and improvement of scientific teaching. Special institutions are the National Academy of Fine Arts, National Library, College of Engineers, School of Arts and Trades, Military Academy, Nautical School, and a School of Engineering carried on at the Central University, and an agricultural and veterinary school at Maracay (1912).

Justice.

Federal judicial authority resides in the Court (which is also Court of Cassation) and in tribunals and courts established by special laws. The Federal Procurator General is appointed by Congress for 4 years.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The judicial officers hold their posts for 8 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipios.

Finance.

The revenues and expenditure for five years were (in bolivars and francs) —

	1906-09	1909	1911	1911-12	1912
		Bolivars	Bolivars	Bolivars	Bolivars
Revenue	410,132	552,857	934,074	51,181,250	52,500,000
Expenditure	47,668,806	54,337,175	61,640,000	1,182,250	52,500,000

The foreign debt of Venezuela began with its assumption of its share of the Colombian debt in 1834, amounting to 1,888,396*l*, and 906,430*l*, arrears of interest; total, 2,794,826*l*. An arrangement was made in 1854 when new consolidated bonds were issued for the amount of 2,750,000*l* for the conversion of the external debt. In August, 1904, the outstanding amount of the debt with arrears of interest, of the 4 per cent loan of 1854 with arrears of interest was 5,618,725*l*. In 1911 this debt was converted

into the 3 per cent. diplomatic loan of 5,229,700*l.*, of which £1,000,000 end of 1909 the outstanding amount was 4,611,500*l.*

On December 31, 1911, the debt of Venezuela (according to official statement) stood as follows:—

	Bolivars
External debt	130,711,587
Internal debt	82,867,001
Total	189,298,588 (7,496,972 <i>l.</i>)

Defence.

The active army consists of infantry, 20 battalions, each of 400 men; artillery, 7 batteries, each of 200 men. The naval force contains one battalion distributed among the vessels of the navy which consists of 3 gun-boats, 1 transport, a tug, a torpedo boat, and 1 coastguard vessel.

Production and Industry.

The surface of Venezuela is naturally divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first zone grown sugar-cane, coffee, cocoa, cereals, &c.; the second affords pasture for cattle; and in the third tropical products, such as caoutchouc, balata (a gum resembling rubber) tonga beans, copaiba, vanilla, growing wild, are worked by the inhabitants. The area under coffee is estimated at from 180,000 to 200,000 acres. The coffee plantations number about 33,000, and those of cocoa 5,000. There are about 11,000 sugar plantations, which flourished formerly, but have suffered from various causes, the latest blow having been the establishment of a Government monopoly in rum. The annual production of sugar is about 3,000 tons.

One-fifth of the population is engaged in agriculture. The live stock in Venezuela is estimated as follows:—2,004,257 oxen, 176,668 sheep, 1,667,272 goats, 191,079 horses, 89,186 mules, 312,810 asses, 1,618,214 pigs. A census of stock has been ordered. In the agricultural and cattle industries about 60,000 labourers are employed.

Venezuela is rich in metals and other minerals. Gold is found chiefly in the Yuruarí Territory. The quantity sent from that district in the 11 years 1884-99 was 1,394,480 ounces. In 1906 there were only 11 mining concessions worked. In the years ending June 30, 1906 and 1907, 564 kilos of gold valued at 60,746*l.*, and 817 kilos valued at 90,346*l.* respectively were exported. There are silver mines in the States of Bermudez, Lara, and Los Andes. Copper, silver, and iron are abundant, while sulphur, coal, asphalt, lead, kaolin, and tin are also found. The copper mines at Arca on the Bolívar railway have been re-opened (by the English Syndicate). Coal is worked at Coro in Falcon State and at Naricual. Iron mines at Imataca, on the Lower Orinoco, are being worked extensively since 1911. Mines in various States have been leased by the Government to a company for a yearly rent of 3,500,000 bolivars. Petroleum is found in many places and exclusive concessions have been given to the English Company in 1909 and to an American in 1911. Asphalt from Lake Bermudez is exported to the United States. Round the island of Margarita and neighbouring islets off the north coast of Venezuela pearl fishing is carried on.

Venezuela has few industries, the manufactured materials required being imported, even the sackings necessary for the export of Venezuelan produce. Tobacco and matches are Government monopolies; the latter are farmed by an English Company.

The value of the imports into Venezuela and exports from Venezuela in 1911 was:—

	1907	1908	1909	1910	1911
	£	£	£	£	£
Imports	2,154,330	2,022,995	2,004,089	2,567,868	3,774,665
Exports	3,251,310	3,028,650	3,289,166	3,719,911	4,654,996

The import duties in 1911 amounted to 21,751,301 bolivars (25 bolivars = 17.).

During the first six months of 1912, the imports amounted to 2,148,229/ and the exports to 2,840,427/.

Principal domestic exports in 1910 and 1911 were:—

	1910	1911		1910	
	Bolivars	Bolivars		Bolivars	
Cocoa	41,713,856	59,016,635	Hides	7,081,817	8,605,081
Cacao	17,521,937	16,569,956	Cattle	1,004,353	1,081,046
Balsa & rubber	15,781,568	15,357,991		1,664,552	3,837,680

Other exports were pearls, dividivi, asphalt, box-wood, and heron-feathers.

The distribution of the commerce in 1910 and 1911 was mainly as follows:—

	Imports	Exports	Imports	Exports
	Bolivars	Bolivars	Bolivars	Bolivars
United Kingdom and Colonies	19,284,711	10,979,049	27,886,018	10,714,081
United States	14,636,528	22,087,779	27,045,448	30,725,090
Germany	10,566,636	11,987,389	16,558,802	22,120,264
Holland and Colonies	4,739,407	3,420,168	6,987,091	5,510,857
Spain	2,785,633	3,743,614	2,452,555	3,778,985
France	6,175,588	29,149,456	9,624,065	21,928,851
Italy	1,723,867	149,385	3,094,071	738,868
Cuba	3,457	77,332	18,267	795,859

Total trade between Venezuela and the United Kingdom (in thousands of pounds) for 3 years:—

	1907	1908	1909		1911
	£	£	£	£	£
Imports from Venezuela to U. Kingdom	762	394	873	712	
Exports to Venezuela from U. Kingdom		709	494		1,096

Shipping and Commerce

The number of vessels which entered port of Venezuela in 1911 was 1,584 and the aggregate tonnage of 1,340,207 tons (British vessels, 111 of 242,325 tons). Of the total entered, 1,229 at La Guaira numbered 1,050,930 tons. The port of Maracaibo is visited regularly by the vessels of American, British, Dutch, French, German, Italian, and Spanish steamship companies. Foreign vessels are not permitted to engage in the

coasting trade, except by special concessions or by contract with the Government.

Venezuela in 1911, 8 steamers of 2,046 tons, and 15 sailing vessels of 2,432 tons.

The roads of the country are primitive and (away from the rivers and railways) traffic is carried by means of pack animals and small mule-carts.

In Venezuela there are 12 lines of railway (5 national and 7 foreign—the latter including 1 British and 1 German) with a total length of about 1,000 miles. In 1911 the railway receipts amounted to 10,780,199 bolívares (2,005,427 from passengers, and 8,784,772 from other traffic). In Caracas electric tramways are worked by an English Company.

There are about 11,160 miles of navigable water in Venezuela. The Orinoco Steamboat Company has a virtual monopoly of the navigation of the river and its tributaries.

The telegraph system has (1911) a network of 4,902 miles; 179 telegraph offices. An English company supplies telephonic communication in most parts of the settled country. Length of line (December, 1911) 10,687 miles. There are 282 post-offices (1911).

Money, Weights, and Measures

The Bank of Venezuela (capital 12,000,000 bolívares), had on December 31, 1911, a guarantee fund of 718,187 bolívares, and a reserve fund of 1,200,000 bolívares; its circulation amounted to 5,027,200 bolívares. The bank of Caracas has a capital of 6,000,000 bolívares, with a reserve and guarantee funds amounting (December 31, 1911), to 1,066,009 bolívares; note circulation, 2,077,600 bolívares; the bank of Maracaibo has a capital of 1,250,000 bolívares; note circulation, 1,764,250 bolívares; there are many small banking establishments.

The new Venezuelan banking law (1911) provides for a National Bank of Venezuela, which shall have power to emit notes to bearer convertible on presentation. This bank must possess a minimum capital of 30,000,000 bolívares gold, wholly subscribed and deposited in the treasury. In its current accounts with private individuals it may charge interest up to the rate of 8 per cent. per annum as a maximum, but in its credit operations with the Government the maximum rate of interest is to be 5 per cent. The emission of notes of this bank shall not be greater than the amount of the capital.

The law also provides for the establishment of a Bank of Territorial Credit that shall perform operations of loan at interest with security of mortgages on real property and industrial enterprises. Neither this nor the National Bank have yet been founded (March, 1913).

In July, 1896, it was enacted that the issue of paper money by the Government should cease, and that silver or nickel money should be coined without legislative enactment. The intention was to issue in future only gold coin and certificates representing gold on hand. The currency in 1904 was stated to consist of 12,000,000 bolívares in gold, and 8,000,000 bolívares in silver. In 1904, 100,000 20-bolivar gold pieces were coined in Venezuela. From 1905 to the value of 56,761,717 bolívares have been coined. In 1911 Congress sanctioned the coinage of 7 million bolívares of silver, and 8 million bolívares of gold.

The 20-bolivar coins are approximately equal to 100 francs. The 10-bolivar coins are about 50 francs, and the medio is about 2½ francs. The Venezuelan silver coin contains 1 bolivar, and at par is about equivalent to 10 pence; the Venezuelan 10-bolivar is in circulation, but is used in accounts as equal to 10 bolívares.

A decree of May 18, 1912, provides that the metric system of weights and measures shall be the metric system.

THE HAGUE TRIBUNAL.

OFFICIALLY

THE PERMANENT COURT OF ARBITRATION.

The Permanent Court of Arbitration was established under the Act of July 29, 1899, signed (and subsequently ratified) by the part of 24 Powers. Under Protocol of June 14, 1907, for the accession of non-signatory Powers, the number of Powers represented in the Court has been largely increased. The purpose is to facilitate arbitration for international disputes which it has been impossible to settle by diplomacy. The Court is competent for all arbitration cases unless the parties agree to constitute a special tribunal, and its jurisdiction may be extended to disputes to which one or both of the parties are non-signatory Powers, if the parties so agree. When the signatory Powers desire to have recourse to the Permanent Court for the settlement of a dispute, the arbitrators called upon to form the competent tribunal for the purpose must be chosen from the general list of members of the Court. If the parties disagree on the composition of this tribunal, its members must be appointed in accordance with the course prescribed by the Act.

The Court has an International Bureau under the direction and control of a Permanent Administrative Council composed of the diplomatic representatives of the Signatory Powers accredited to the Hague, and of the Netherlands Minister for Foreign Affairs, who acts as President.

The Permanent Court consists of persons of known competency in questions of international Law, of whom four at the most are selected by each of the Signatory Powers; each appointment is for six years and may be renewed. The list of members of the Court (revived up to February, 1913) is as follows. The date of each appointment is stated (within brackets) —

AMERICA, UNITED STATES : Hon John W. Gigg, ex-Attorney-General (27 Nov 1900); Hon. George Day, Judge of Circuit Court (27 Nov 1904); H. Oscar S. Straus, formerly Minister of Commerce and Labor, and late Ambassador at Constantinople, (9 Jan. 1908); Hon. Elihu Root, formerly Secretary of State (16 Dec. 1910)

ARGENTINE REPUBLIC : H. F. Estanislao S. Zeballos, Professor of Private International Law at the University of Buenos Ayres, formerly Minister of Foreign Affairs and Worship (6 July, 1907); Luis Maria Drago, Deputy (6 July, 1907); Carlos Rodriguez Larreta, Professor of Constitutional Law in the University of Buenos Ayres, Deputy (6 July, 1907); Joaquin V. Gonzalez, Doctor of Law, Senator, President of the University of La Plata, formerly Minister of the Interior and Foreign Affairs and Worship, of Justice and Instruction, formerly Deputy, &c. THE END

STANFORD'S LIBRARY MAPS OF THE CONTINENTS.

Uniform in Size and Price

Four Sheets, Coloured,  Mounted to fold  Morocco Case, 60s.
Mounted on Rollers & Varnished, 45s. Mounted on Spring Roller, 

Size of each Map, 58 inches by 65 inches

EUROPE. Stanford's Library Map of Europe, New and Revised Edition, showing the boundaries of the various states. Rail ways are distinctly delineated. principal roads and submarine telegraph lines are also given. This is the largest and most detailed map of Europe published. Scale — 50½ miles to an inch (1 : 320,000)

ASIA. Stanford's Library Map of Asia, New and Revised Edition. The physical features of the country are laid down from the latest surveys. Roads railways canals and routes mountain passes, and submarine cables are given. Scale — 110 miles to an inch (1 : 691,000)

AFRICA. Stanford's Library Map of Africa, New and Revised Edition, embodying the results of the most recent explorations and presenting on a large scale an accumulation of all the facts known with regard to this continent. The political boundaries have been carefully revised the agreements arrived at between the several European Powers and the territory under British influence being properly coloured. Roads railways and submarine cables are inserted and the hill features are delineated in a subdued tone so as to preserve the clearness of the map. Scale — 4½ miles to an inch (1 : 977,362)

NORTH AMERICA. Stanford's Library Map of North America, New and Revised Edition, forming a compendium of political boundaries and geographical facts connected with that division of the American continent. The boundaries of the various states are clearly marked railways canals and submarine telegraph cables are inserted, the leading physical features are given in such a way as not to interfere with the topography. Scale — 5½ miles to an inch (1 : 527,400)

SOUTH AMERICA. Stanford's Library Map of South America, New and Revised Edition, showing the most recent political boundaries of the various states and the general geography of the continent. Railways canals and submarine telegraph lines are clearly shown and the hill features shown in such a way as not to interfere with the topography of the map. Scale — 5½ miles to an inch (1 : 527,400)

AUSTRALASIA. Stanford's Library Map of Australasia, drawing by colour the various colonies Tasmania and New Zealand are shown in their relative positions. New Caledonia New Guinea and the adjacent parts of the South Archipelago are given, railways roads and submarine cables are shown. An inset chart of the world indicates the relative positions of Australia and the other British possessions. Scale — 6½ miles to an inch (1 : 409,083)

Cartographers to His Majesty the King

To face matter at end]

The Man of Affairs

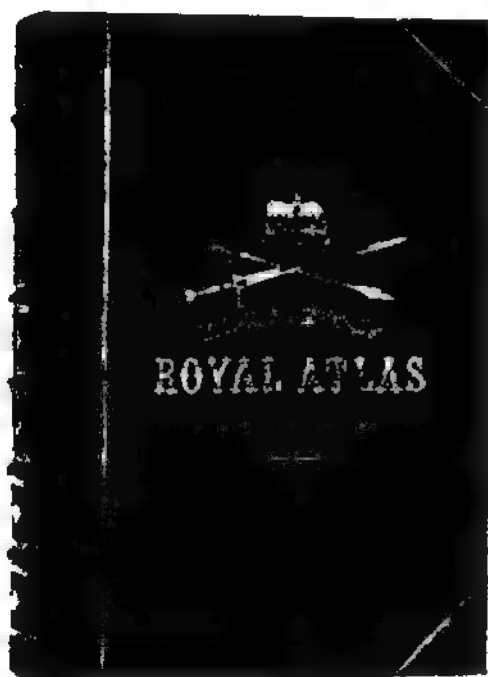

requires among his Reference Books a good, reliable Atlas one that may be depended on at every turn. Such an Atlas is the **ROYAL ATLAS**. The Geographical Information contained in the latest Edition is Accurate and Reliable, and of the very latest so that the

Man of Affairs may consult it with perfect confidence and rely upon it absolutely.

The Royal Atlas

contains many unique features that may be found in other atlases. Its full-page Maps are magnificently printed on thick plate paper in colours and in a special manner that increases the beauty and clearness of the maps. A special index is given to each map, which by its unique arrangement enhances its usefulness and makes the location of any place easy and rapid.

A general index of the principal places is also given at the end of the volume.

Superbly bound in **Full Morocco**

Price - - 24 4s. net.

Every Man of Affairs should have this Atlas at his elbow for everyday consultation

of ~~the~~ Council of ~~the~~ British Medical Association. ~~With~~ ~~a~~
Preface by the ~~Hon.~~ Hon. D. LLOYD GEORGE, M.P.

Third Edition, revised ~~and~~ enlarged, containing the
Model Rules, Regulations and Forms.

8vo. 7s. 6d. net.

DAILY CHRONICLE. "May certainly be regarded as the
standard work on the new Act. Written with insight, knowledge,
and a rare lucidity, it is beyond question the most exhaustive
exposition of the measure published."

DAILY TELEGRAPH. "An elaborate treatise upon the Act, as
well as an elaborately annotated edition of the Act itself . . .
A book into which the three authors have put an immense amount
of conscientious and laborious work."

LONDON: MACMILLAN AND CO., LTD.

The Spectator

A WEEKLY JOURNAL

POLITICS, LITERATURE, THEOLOGY, AND ART.
(LIBERAL-UNIONIST)

Established 1828.

EVERY SATURDAY, Price 6d, by Post, 6½d

THE *Spectator*, which circulates throughout the educated classes in the United Kingdom, Empire, and America, has the following among other features —

■ of the week is compressed into an animated narrative ■ thus readers of the paper are insured against missing the true bearing and the essential details of events

The leading articles deal in an independent and unconventional spirit with the chief matters of political, economic, and general interest

Other articles treat of literary, theological, social, and artistic questions, discuss interesting and curious aspects of natural history and country life

Books of special interest and importance are dealt with in the long reviews, while the shorter notices give in a compact form the judgment of equally competent critics on contemporary literature

In the weekly review of novels, readers of fiction may find a useful guide for making out their lists for the circulating libraries

The *Spectator* contains a list of all published during the week (not under a shilling in price) with the names of the publishers and the prices attached — a feature which will greatly increase its value to booksellers, librarians, literary institutions and private persons

An Important Recent Work.

**NARRATIVE OF THE VISIT TO INDIA
OF THEIR MAJESTIES KING GEORGE V.
AND QUEEN MARY AND OF THE
CORONATION DURBAR.**

By the Hon. John Fortescue. Illustrated.
8vo. 10s. 6d. net.

"THE TIMES" SAYS:

"Mr. Fortescue is always interesting, and that capacity of his has happily survived this far from easy task. As every one will remember, he was chosen ■■■ member of their Majesties' suite during the historic visit to India last winter in order that he should write the official chronicle of the tour, and here in a volume of moderate size is the result of his labours. Official chronicles ■■■ liable to suffer from two grievous faults. They are usually too meticulous and too impersonal, with the inevitable result that they are dull. Neither fault can be urged against Mr. Fortescue's work. It has taken, in the first place, a thoroughly appropriate form, for it is not too ponderous to deter the general reader ■■■ too sumptuous to strain the average purse. . . . Mr. Fortescue has not been afraid of expressing his ■■■ views, and the result is ■ narrative with *verve* and point—a narrative, in fact, with all the qualities of Mr. Fortescue's own mind. He will pause at any moment to throw you in a scrap of regimental history, which you swallow with delight. He will tell you, without shame, that he found his tent uncomfortable and other arrangements bad. He will keep the great Durbar itself waiting in order to ■■■ at the colour of Indian official baize. His criticisms ■■■ numerous and sweeping, and in points of detail they ■■■ often sound. But, whether sound ■■■ not, they ■■■ Mr. Fortescue's, and they give the book ■ character quite unlike the usual impartiality and ■■■ of ■■■ official chronicle." ■

“‘THE NATION’ is pre-eminently a progressive weekly; there is nothing of the stodgy in its pages.”

The Newspaper Owner, March 2, 1912.

THE NATION

keeps its readers in touch with new or interesting movements in Politics and Social Affairs, furnishing them at the same time with serious, independent, and authoritative criticism in its articles on Religion, Art, the Drama, Finance and Literature. Bright in style, varied in subject, it commands a brilliant staff of writers. A special feature is made of domestic and external politics of Foreign Nations; while its Reviews, contributed by writers of unequalled authority in their special subjects, are always fresh and up-to-date.

Every Saturday, SIXPENCE.

At all Bookstalls and Newsagents, or direct from the Office, 10, Adelphi Terrace, W.C.

An Important Recent Book

SOUTH AMERICA :

Observations and Impressions

By the Rt. Hon. JAMES BRYCE, O.M.

With Maps. 8vo. 8s. net.

Daily Mail.—"Mr. Bryce has written one of the most fascinating books of travel in our language, and he has at the same time contrived to give the world a valuable political study of the chief South American States."

Daily News.—"This book is a gift for which to thank the gods. . . . It is impossible to give more than a faint hint of all the wealth of reflection, observation, and learning in these chapters. The whole book is memorable, worthy of the topic and the man."

Daily Telegraph.—"Although the author refers to the contents of this book as 'observations and impressions' made and recorded during a four months' journey in South America, his work is, as may be readily imagined, far from being the superficial study which such a description might imply. . . . Accurate and essential information, cautious and well-considered speculation, judgment based not only on shrewd observation of the matter in hand, but on an easy familiarity with the comparisons afforded by the world at large and its history, these things go to the making of books which students prize. When they treat, as Mr. Bryce's book treats, of nations and civilisations imperfectly understood outside their own geographical borders, they may be said to possess an international value."

An Interesting Recent Book

A COLONY IN THE MAKING

Or SPORT AND PROFIT IN BRITISH EAST AFRICA.

By LORD CRANWORTH. With Map and Illustrations.
8vo. 12s. net.

Telegraph.—"It is a valuable and interesting work, at once descriptive and practical, that Lord Cranworth has written; valuable especially to those looking out for a field in which to utilise their energies and their capital, to those who would understand local conditions of different parts of the Empire, and to those who would have first-hand information about a famous big game country, and deeply interesting to all readers who can enjoy well-informed and well-presented accounts of life in distant places. Lady Cranworth contributes a chapter of helpful 'Hints for a Woman in British East Africa,' and the volume has many photographs which accentuate the strong appeal of the text."

Times.—"Lord Cranworth gives a most excellent account of the progress of the colony down to the end of 1911, and it is safe to say that when the history of the last decade in East Africa comes to be written this book is one upon which the historian will considerably depend."

Globe.—"The book is one which will attract considerable attention. If it will not supersede Sir Charles Elliott's classic work on East Africa, it is worthy at least a place beside it on the shelf of the colonist, sportsman, and colonial student, to all of whom different chapters will make an appeal."

Post.—"Singularly complete and well-informed account. . . . Lord Cranworth sees things in the proper perspective, though his detailed account of the opportunities for shooting and fishing, to say nothing of cricket and other artificial diversions, should satisfy the visiting sportsman, yet the chief value of his book consists in its wealth of accurate information regarding what are destined to be the staple industries of the country."

By Henry Mayers Hyndman

THE RECORD OF AN ADVENTUROUS LIFE.

With Portrait. 8vo. 15s. net.

Athenæum.—"Mr. Hyndman has written a book which is not only of great interest to the general reader who seeks amusement, but also of permanent value to the student of English political history. It is amongst other things a remarkably interesting retrospect of English society and politics during the last forty years, and its pungency and out-spokenness give it a most refreshing flavour."

Morning Post.—"The book is interesting and delightful in its story of the full life of a vivacious and generous soul."

FURTHER REMINISCENCES.

8vo. 15s. net.

Times.—"Whatever Mr. Hyndman writes is good reading; and this is even more the case with his *Further Reminiscences* than with his former autobiographical volume. The fact that the writer has lately celebrated his seventieth birthday seems only to make him livelier and younger than ever."

Athenæum.—"Mr. Hyndman's second volume of reminiscences is of little less interest to the general reader than its predecessor, and is likely to be of value to the student of politics. The attempt to get an account of any but the most prominent events of the 'seventies and 'eighties of last century is almost hopeless, and it is therefore specially useful to have a record of modern Socialists from one who has been connected with them from the first."

THE CLERGY LIST

For 1913

Thoroughly
Revised - -
Corrected to
the latest Date

Price
12s. 6d.

NOW READY

PRESS OPINIONS

THE TIMES (of March 12,
1912) says—

‘Returns those special features which give it a distinct place among directories concerned with the clergy of the Church of England. This handy book of nearly 2,000 pages contains much information not easily found elsewhere.’

THE SPECTATOR (of March 30,
1912) says—

‘This annual volume deserves for its completeness and the care with which it is kept to date, the highest praise. It tells us all that we can reasonably expect to know about the organisation of the Church (directors, arrangement of benefices, patronages, values, &c.), and the status of the clergy.’

THE WESTMINSTER

GAZETTE (of March 11, 1912)
says—

‘The work, which has now appeared annually for nearly seventy years has several special features. The work has been corrected as nearly up to date as possible, and remains one of the most useful, accurate, and handy books of reference on the subject with which it deals.’

THE CHURCH TIMES (of
March 15, 1912) says—

‘We have, from constant use, found this Directory practically without fault, which is high commendation considering the number of appointments contained in the book.’

Established nearly 70 Years

London: KELLY'S DIRECTORIES, Ltd.

182-184, HIGH HOLBORN

By **SIR CHARLES BRUCE, G.C.M.G.**

THE BROAD STONE OF EMPIRE.

Problems of Crown Colony Administration, with Records of Personal Experience With Maps and Portrait ■ Vols. 8vo 30s net.

TIMES — "Sir Charles Bruce is a veteran in the work of colonial government and administration. His long, varied, and distinguished career in the service of the Crown has entitled him to speak with high authority on all matters connected with the important and responsible business to which his life has been devoted. The student who reads Sir Charles Bruce's book with discrimination will derive much advantage and instruction from it. He has invested the Crown Colonies and Places of the Empire with a dignity, an importance, and an interest which are assuredly more than their due, but which have for various reasons been more or less obscured of late in the minds of many Imperial thinkers."

SIR EVERARD IM THURN in the *QUARTERLY REVIEW* — "Sir Charles deals in masterly fashion with the problems of education, in its widest sense, with the transportation of labour from places where it is not needed to places which can only be developed by such method, with mail services and other means of communication, with defence duly organized from the centre of the Empire, &c.; and he treats all these subjects from the position of one minutely considering the development of the Crown Colonies as a really important and integral part of the Empire. The questions raised or suggested by this valuable work are so many and various that a lengthy treatise might be devoted to their examination."

THE TRUE TEMPER OF EMPIRE WITH COROLLARY ESSAYS.

8vo 5s net

DAILY CHRONICLE — "Sir Charles Bruce's book will be of great interest and use to students of Imperial problems."

STANDARD OF EMPIRE — "Students of Imperial affairs will have a warm welcome for any new book bearing the name of the author of that admirable work, 'The Broad Stone of Empire.' Sir Charles Bruce's latest work, 'The True Temper of Empire,' is thoroughly and every way deserving of such a welcome, and should receive careful consideration from all thoughtful British readers. In the essays of which this volume is composed the author discusses with statesmanlike breadth of vision and real penetration the working of this temper in the maintenance of a united Empire, and in his concluding chapter, a united Kingdom. . . . The book is in every way worth reading." •

LONDON: MACMILLAN AND CO., LTD.

Foremost in the Ranks of the Evening Press.

The Westminster Gazette

is essentially the evening newspaper for the thinking reader.

Publishing only the news of events which actually happen, its columns form a trustworthy record of all movements in the world of Politics, Literature, the Dramat, Music, Finance, and Sport. Its City Intelligence is marked by fulness, enterprise, and accuracy. Its literary reviews have gained for it a reputation for clarity of judgment and its music and dramatic criticisms and news are regarded as standards of comparison.

In its opinions the WESTMINSTER GAZETTE is the organ of a sane and reasoned Liberalism, and its constant effort is to provide information on all questions of the day.

A much appreciated feature of the paper is the Cartoons of F.C.G., one of which appears in nearly every issue.

PRICE ONE PENNY

The Saturday Westminster

The SATURDAY WESTMINSTER has all the interest and charm of a magazine and the information of a review. It is a unique weekly paper for thinking men and women. The week's political and social events are dealt with in special articles and notes, while each number contains all F.C.G.'s cartoons of the week, including one specially drawn for the issue. The literature of the day is ably reviewed, while special and general articles, short stories and sketches from the pens of some of the best writers of the day form regular features.

The literary minded will find exercise and recreation in the page of literary problems, while an appeal is made to the photographer, the naturalist, the sportsman, and the lady reader in items and articles of personal interest.

A Working class view of Politics By **SIRPHEN RLYNOIDS** and **BOI and IOM WOOLLA** With Frontispiece Extra crown 8vo, 5s net

Times. "One dominant feature of the book is the impression of sincerity which it leaves, sincerity accompanied by its natural complement—a keen sense of humour. The strong common sense, the fearlessness, lucidity, and humour of this book will make many who disagree most strongly with its arguments recognise most clearly its usefulness in enabling them to look at the questions of the day from a [REDACTED] point of view

Daily Express.—"A book of the first sociological importance and of the most splendid human interest. It is no tract. It is far more fascinating than [REDACTED] hundred and ninety nine novels out of a thousand. It is the revelation of the mind of the people."

KING'S NEW PUBLICATIONS

IMPERIAL DEFENCE AND CLOSER UNION

By HOWARD DEGVILLI With a Preface by Col the Rt Hon J E B SEYMOUR, M.P. Secretary of State for War and an Introduction by Rear Admiral Sir CHARLES GUTHRIE, K.C. Demy 8vo Cloth 7s.6d. net (*Inland Postage 4d*)

This work is a record of the life work of the late Sir JOHN COLOMB and of the movement towards Imperial organisation. The Author deals with the constitutional aspects of Closer Union, which Sir John Colomb always believed to lie at the root of any satisfactory system of Imperial Defence.

NATIONAL LIFE AND NATIONAL TRAINING

By GENERAL SIR IAN HAMILTON G.C.B. D.S.O. Inspector-General of the Overseas Forces Crown 8vo, 6d. net (*Inland Postage 1d*)

TARIFFS AT WORK

An Outline of Practical Tariff Administration with special reference to the United States and Canada. By JOHN HEDLEY HIGGINSON B.Sc. (Econ.) Mitchell Student of the University of London Cloth 2s. net (*Inland Postage 4d*)

This treatise embodies some results of an inquiry undertaken by the Author as Mitchell Student of the University of London. A most interesting feature was the practical investigation of tariff administration in the United States and Canada which the Author was able to make on his visit to these countries in the spring of 1910.

LEASEHOLD ENFRANCHISEMENT

The Case for and against, and a Practical Scheme. Relief against Restrictive Covenants in Leases. Scheme for Continuity of Tenure. By F. A. COLLINS Crown 8vo Cloth, 2s. 6d. net (*Inland Postage 4d*)

CONTENTS: Introduction—Support of Compulsory Enfranchisement—The Case against Compulsory Enfranchisement—Proposed System—Relief against Onerous Covenants restricting Alterations and the User of Property—Continuity of Tenure—Conclusions—Index.

PEOPLE'S BANKS

A Record of Social and Economic Success. By H. W. WOLFF Demy 8vo Cloth, 6s. net (*Inland Postage, 5d*)

Standard—"By far the most complete account of the subject in the English language."

Daily Chronicle—"We recommend Mr Wolff's book to the close attention of all students of social and industrial reforms."

WAR AND THE PRIVATE CITIZEN

Studies in International Law. By A. PEARCE HIGGINS, M.A., LL.D., Lecturer at the Royal Naval War College. With an Introductory Note by the Rt Hon ARTHUR COHEN, K.C. Demy 8vo. Cloth, 5s. net (*Inland Postage, 4d*)

Scotsman—"Full of interest for readers anxious as to the application of received principles of international law to the newer actualities of these days."

P. S. KING & SON, Orchard House, Westminster.
